PART I

A. GENERAL INFORMATION

ITEM I. DATE, TIME AND PLACE OF MEETING OF SECURITY HOLDERS

The 2022 Annual Meeting of Stockholders of BASIC ENERGY CORPORATION (the Corporation) will be held on Wednesday, August 31, 2022 at 3:00 P.M. at the principal office of the Company, via remote communication, the link to which, to enable stockholders to register, participate and vote in the meeting, shall be provided by the Company, through the published notices of the meeting to stockholders or at the Company's website.

The complete mailing address of the principal office of the Corporation is:

UB 111 Paseo de Roxas Bldg.,
Paseo de Roxas Bldg. St., Legaspi Village
Makati City, 1229

RECORD DATE

The record date for the purpose of determining stockholders entitled to notice of, and to vote at, the Annual Stockholders Meeting is August 10, 2022.

APPROXIMATE DATE OF RELEASE OF INFORMATION STATEMENT AND PROXY FORM

Date: August 10, 2022

ITEM II – DISSENTERS' RIGHT OF APPRAISAL

The appraisal right of dissenting stockholders is governed by Sec. 80-85 of the Revised Corporation Code, which provide as follows:

The appraisal right may be exercised by any stockholder who shall have voted against (1) an amendment to the Articles of Incorporation that changes or restricts the rights of any stockholder or class of shares, or authorizes preferences in any respect superior to the outstanding shares of any class, or extends or shortens the corporate existence; (2) a sale, lease, exchange, transfer, mortgage, pledge or other disposition of all or substantially all of the corporate property and assets; (3) a merger and consolidation; and (4) investment of corporate funds for any purpose other than the primary purpose of the corporation. The dissenting stockholder who votes against any of the aforementioned proposed corporate action shall make a written demand on the corporation for payment of the fair value of his share(s), within thirty (30) calendar days from the date on which the vote was taken. Failure to make the written demand within such period shall be deemed a waiver of the appraisal right.

If the proposed corporate action is implemented, the corporation shall pay the stockholder, upon surrender of the certificate/s of stock representing the stockholder's shares, the fair value thereof as of the day before the vote was taken, excluding any appreciation or depreciation in anticipation of such corporate action.

If within sixty (60) days from the approval of the corporate action by the stockholders, the withdrawing stockholder and the corporation cannot agree on the fair value of the shares, it shall be determined and appraised by three (3) disinterested persons, one of whom shall be named by the stockholder, another by the corporation, and the third by the two thus chosen. The findings of the majority of the appraisers shall be final, and their award shall be paid by the corporation within thirty

(30) days after such award is made. No payment shall be made to any withdrawing stockholder unless the corporation has unrestricted retained earnings in its books to cover such payment. Upon payment by the corporation of the agreed or awarded price, the stockholder shall forthwith transfer his shares to the corporation.

From the time of the demand by the dissenting stockholder until either the abandonment of the corporate action involved or the purchase of the shares by the corporation, all rights accruing to such shares, including voting and dividend rights shall be suspended. However, if the dissenting stockholder is not paid the value of his shares within the said 30 days after the award, his voting and dividend rights shall immediately be restored.

The right of the dissenting stockholder to be paid the fair value of his shares shall cease (i) if the demand for payment is withdrawn with the consent of the corporation, if the corporate action involved is abandoned or rescinded by the corporation or is disapproved by the Securities and Exchange Commission (SEC), if its approval is required, or if the SEC determines that the stockholder is not entitled to appraisal rights. In such cases, the status as stockholder shall be restored and all dividend distributions which would have been accrued on the shares shall be paid to the stockholder.

ITEM III - INTEREST OF CERTAIN PERSONS IN MATTERS TO BE ACTED UPON

No director or officer of the Corporation or nominee for election as director, or officer of the Corporation, or past director or officer of the Corporation at anytime since the beginning of the last fiscal year, and to the best knowledge of the Corporation, no associate of a director or officer or nominee for election as director or officer of the Corporation has any substantial interest, direct or indirect, by security holdings or otherwise, in any matter to be acted upon at the Annual Meeting of Stockholders, other than the election as directors of the incumbent directors.

The Corporation has not received any information from a director or nominee-director of the Corporation, either verbally or in writing of his/her intention to oppose any action to be taken by the Corporation at the annual stockholders meeting.

B. CONTROL AND COMPENSATION INFORMATION

ITEM IV - VOTING SECURITIES AND PRINCIPAL HOLDERS THEREOF

- a) **Number of common shares** – 14,668,643,064 shares as of June 30, 2022. The Corporation has only one class of shares, which are common shares. Of these outstanding shares, 340,665,053 shares are held by foreigners. Each share is entitled to one vote, subject to cumulative voting, as explained below. There are no restrictions that limit the payment of dividends on common shares.
- b) **Record Date** – August 10, 2022
- c) **Voting Rights** - At the annual meeting of stockholders, every stockholder entitled to vote shall have the right to vote the number of shares of stocks standing in his own name in the stock books of the corporation at the time of the meeting. In the election of directors, a stockholder may: (a) vote such number of shares for as many persons as there are directors to be elected; (b) cumulate said shares and give one (1) candidate as many votes as the number of directors to be elected multiplied by the number of the shares owned; or (c) distribute them on the same principle among as many candidates as may be seen fit, provided that the total number of votes cast shall not exceed the number of shares owned by the stockholder as shown in the books of the corporation multiplied by the whole number of directors to be elected. No delinquent stock shall be voted.

d) **Security Ownership of Certain Record and Beneficial Owners and Management**

(1) **Security Ownership of Certain Record and Beneficial Owners**

The entities known to the Registrant to be directly or indirectly the record or beneficial owner of more than 5% of the Corporation's outstanding common shares as of June 30, 2022 are:

(1) Title of Class	(2) Name & Address of Record Owner & Relationship with Issuer	(3) Name of Beneficial Ownership and Relationship with Record Owner	(4) Citizen-ship of Record Owner	(5) No. of Shares Held & Nature of Ownership (Record/ Beneficial)	(6) Percentage
Common Shares	Philippine Depository and Trust Corporation* 37/F Tower I, Enterprise Center, Ayala Avenue, Makati City (No relationship with the Corporation)	Various Participants of PCD	Filipino	2,855,426,036 (Record)	19.46%
			Foreign	48,986,615 (Record)	0.33%
Common Shares	Map 2000 Development Corporation (M2DC)** Bldg. F, Phoenix Sun Business Park, E. Rodriguez Jr. Avenue, Brgy. Bagumbayan, Quezon City	Beneficial Owner: Rafaelito N. Villavicencio. He is the Chairman of M2DC.	Filipino	9,827,990,853 (Record)	67.00%

*Philippine Depository and Trust Corporation (PDTC) is a wholly-owned subsidiary of the Philippine Central Depository, Inc. ("PCD"), which acts as trustee-nominee for all shares lodged in the PCD system. It was formerly known as the PCD Nominee Corporation. The beneficial owner of such shares are the PCD's participants who hold the shares on their behalf or on behalf of their clients. Under a master Proxy Form to be executed by PDTC, the PCD participants are named as sub-proxies, who in turn shall submit their respective Proxy Forms before the deadline for proxies as required in the notice of the annual stockholders meeting, indicating their duly designated representatives who shall vote for the shares held by their respective clients, when so authorized by them.

PCD is a private corporation organized to implement an automated book entry system of handling securities transactions in the Philippines. Under the PCD procedures, when an issuer of a PCD-eligible issue will hold a stockholders' meeting, the PCD shall execute a pro-forma proxy in favor of its participants for the total number of shares in their respective principal security account as well as for the total number of shares in their client securities account. For the shares held in the principal securities account, the participant concerned is appointed as proxy with full voting rights and powers as registered owner of such shares. For the shares held in the client securities account, the participant concerned is appointed as proxy, with the obligation to constitute a sub-proxy in favor of its clients with full voting and other rights for the number of shares beneficially owned by such clients.

**MAP 2000 Development Corporation (M2DC) (formerly Map 2000 Energy, Inc.), is a domestic corporation duly registered under the laws of the Republic of the Philippines and is authorized to engage in (a) real estate acquisition, real estate development, rentals, property management

and related services, and (2) acquiring shares of stocks of viable corporations to actively exercise the rights of a shareholder. It owns a few real properties being leased out as fuel station lots, office establishment, production plant or commercial lands.

The current Board of Directors and Officers of M2DC are the following:

Rafaelito N. Villavicencio – Chairman
 Luisito V. Poblete – Director/ President
 Ana Lisa D. Villavicencio – Director/ Treasurer
 Manuel Z. Gonzalez – Director
 Donna SL. Sansano – Director/ Corporate Secretary

The shares held by M2DC shall be voted by its duly designated proxy in the Proxy Form to be executed by the company and submitted prior to the deadline for proxy submission as indicated in the notice of the annual stockholders' meeting.

None of the PDTC participants hold more than five percent (5%) of the Corporation's total outstanding and issued common shares of stock, as of June 30, 2022.

As of June 30, 2022, out of the 14,668,643,064 issued and outstanding shares of the Corporation, 3,638,343,157 shares are held by the public, equivalent to a public float of 24.80%, while as of June 30, 2022, 14,327,978,011 shares equivalent to 97.68% are held by Filipino citizens and 340,665,053 shares equivalent to 2.32% are held by foreigners.

(2) Security Ownership of Directors and Key Officers

The following are the number of common shares known to the Corporation to be owned beneficially and/or of record by the directors/nominees and key officers of the Corporation, and the percentage of shareholdings of each, as of June 30, 2022:

Voting Trust Holders of 5% or more

None of the directors and officers owns 5% or more of the outstanding capital stock of the Corporation. The Corporation is not also aware of any person holding 5% or more of the Corporation's outstanding shares under a voting trust agreement or similar agreement.

Changes in Control

Last December 18, 2020, the Corporation and Map 2000 Development Corporation (M2DC) executed a Memorandum of Agreement covering the subscription by M2DC to Nine Billion Eight Hundred Twenty Seven Million Nine Hundred Ninety Thousand Eight Hundred Fifty Three (9,827,990,853) primary shares of stock of BEC to be issued out of the increase in the authorized capital stock (ACS) of the Corporation from Php2.5 Billion to Php5.0 Billion, representing 67% of the issued and outstanding capital stock of the BEC post-increase. The subscription was subject to the fulfillment of certain conditions, including the approval by the Securities and Exchange Commission (SEC) of the application for said increase in ACS.

On September 10, 2021, the SEC approved the increase in the authorized capital stock of the Corporation to Php 5 Billion and the subscription of M2DC to 9,827,990,853 shares was recorded in the books of the Corporation. As of said date, the said subscribed shares of M2DC represent 67% of the total outstanding capital stock of the Corporation, more than majority control of the Corporation.

ITEM V - DIRECTORS AND EXECUTIVE OFFICERS

The following are the directors of the Corporation as of June 30, 2022:

<u>Name</u>	<u>Length/Period of Service</u>
Ramon F. Villavicencio	December 15, 2021 up to the present
Manuel Z. Gonzalez	May 12, 2021 up to the present
Oscar L. de Venecia, Jr.	1999-2006; March 30, 2007 up to the present
Beatrice Jane L. Ang	October 23, 2020 to the present
Reynaldo D. Gamboa	May 12, 2021 up to the present
Kim S. Jacinto-Henares	May 12, 2021 up to the present

Ramon L. Mapa	1976 up to the present
Jaime J. Martinez	October 10, 2007 up to the present
Maria Rosette Geraldine L. Oquias	May 12, 2021 up to the present
Supasit Pokinjaruras	June 28, 2017 to May 6, 2019; October 23, 2020 up to the present
Andres B. Reyes, Jr.	November 26, 2020 up to the present

Each director of the Corporation holds office for a one (1) year term beginning on the date of his election and expiring at the annual meeting of stockholders next after his election and until his successor shall have been elected and qualified.

NOMINATION OF DIRECTORS AND INDEPENDENT DIRECTORS

The Board of Directors of the Corporation, upon endorsement of the Nominating Committee composed of Mr. Ramon F. Villavicencio, as Chairman, with Mr. Oscar L. De Venecia, Jr., Atty. Manuel Z. Gonzalez, Mr. Jaime J. Martinez and Ms. Kim S. Jacinto-Henares (independent director) as members, has approved, in its meeting held on April 28, 2022, the nomination of the following as directors for election at the annual meeting of stockholders:

Ramon F. Villavicencio (incumbent director)
 Manuel Z. Gonzalez (incumbent director)
 Oscar L. de Venecia, Jr. (incumbent director)
 Beatrice Jane L. Ang (incumbent director)
 Reynaldo D. Gamboa (incumbent director)
 Kim S. Jacinto-Henares (incumbent director)
 Ramon L. Mapa (incumbent director)
 Jaime J. Martinez (incumbent director)
 Maria Rosette Geraldine L. Oquias (incumbent director)
 Supasit Pokinjaruras (incumbent director)
 Andres B. Reyes, Jr. (incumbent director)

From the above nominees, the following were nominated as Independent Directors:

Reynaldo D. Gamboa (incumbent director)
 Kim S. Jacinto-Henares (incumbent director)
 Andres B. Reyes, Jr. (incumbent director)

The Nominating Committee has determined that all the nominees possess all the qualifications and have none of the disqualifications for directorship as prescribed in the Corporation's By-Laws and Manual of Corporate Governance. None of the directors and officers of the Corporation are connected with any government instrumentality, agency or office.

For the purpose of electing the independent directors, the Nominating Committee adopted the independence criteria set out in the Corporation's Manual of Corporate Governance, Section 38 of the Securities Regulation Code and the Code of Corporate Governance for Publicly Listed Companies. The independent directors-nominees, namely: Reynaldo D. Gamboa, Kim S. Jacinto-Henares, and Andres B. Reyes, Jr., are likewise Independent Directors of the subsidiaries of the Corporation and are not officers or employees of the Corporation nor any of its subsidiaries, and are free from any business or other relationship with the Corporation which could or could reasonably be perceived to materially interfere with the exercise of their independent judgments in carrying out their responsibilities as independent directors.

The nominees for election as independent directors of the Board of Directors were nominated, as follows:

<u>Nominee</u>	<u>Nominating Party</u>	<u>Relationship</u>
Kim S. Jacinto-Henares	Oscar L. de Venecia, Jr.	none
Reynaldo D. Gamboa	Oscar L. de Venecia, Jr.	none
Andres B. Reyes, Jr.	Oscar L. de Venecia, Jr.	none

None of the above directors declined to stand for election to the Board of Directors because of any disagreement with the Corporation or any matter relating to the Corporation's operations, policies or practices.

Alain S. Pangan	Vice President for Finance
Alberto P. Morillo	Vice President for Operations
Angel P. Gahol	Corporate Secretary
Dominique P. Pascua	Compliance Officer

BACKGROUND INFORMATION

The following are the names, ages, positions and length of service in the Corporation of the nominees for election as directors for the term 2022-2023, and present key officers of the Corporation, trainings and seminars and continuing education, and their business representations and experiences for the last five (5) years.

DIRECTORS

Ramon F. Villavicencio, 80 years old, Filipino, is the Chairman of the Board of Basic Energy Corporation since December 15, 2021. He has more than 50 years' experience in the petroleum industry and is currently a Director of San Miguel Corporation. He was Chairman of Insular Oil Corporation, the Independent Philippine Petroleum Companies Association, and was President of the Philippine-Venezuelan Economic Council from 2011-2012. Among his milestones, he pioneered in oil recycling, hydro fuel technology, blended biodiesel availability for Flying V stations and the utilization of double hull/double bottom tankers way before the government's mandate for the usage of these type of tankers in 2010.

He has attended various trainings and seminars on Corporate Governance during the past five (5) years, the latest of which is the seminar conducted by the Center for Global Best Practices on October 29, 2021. He obtained his Bachelor of Commerce degree in 1962 and his Master's degree in Business Administration in 1964, both from De La Salle University.

Manuel Z. Gonzalez, 56 years old, Filipino, is the Vice Chairman of the Board of Basic Energy Corporation. He was elected as director of the Corporation on May 12, 2021 and holds that position up to the present. He is a Senior Partner in the Martinez Vergara Gonzalez & Serrano Law Office since 2006 up to the present. Prior to co-founding MVGS Law, Atty. Gonzalez was a partner with the Picazo Buyco Tan Fider & Santos Law Office until 2006. Atty. Gonzalez has been involved in corporate practice for over 20 years and has extensive experience and has been recognized by “The Legal 500” for his practice in the areas of capital markets, energy, mergers & acquisitions and banking and finance. Atty. Gonzalez currently serves as Director and Corporate Secretary to many corporations including to companies in the Century Pacific Group since 1995, Nomura Holdings Philippines since 2006 and ADP (Philippines), Inc. since 2010.

He has attended continuing legal education programs required for the practice of law and a seminar on corporate governance in 2021. Atty. Gonzalez graduated cum laude with a Bachelor of Arts degree in Political Science and Economics from New York University and received a Bachelor of Laws from the University of the Philippines, College of Law.

Oscar L. De Venecia Jr., 54 years old, Filipino, is a director and the President and CEO of the Corporation. He was the Executive Vice President & COO of the Corporation since April 04, 2007 and was appointed as President & CEO of the Corporation in August, 2011. He has served the Corporation for twenty-two (22) years, holding various executive positions, namely, as SVP and COO from June, 1997 up to June, 2001 and was the President and CEO from December, 2002 up to November, 2005. (b) Changes in and disagreements with accountants on accounting and financial disclosures

There are no disagreements with the Corporation's external auditors on any accounting principles or practices, and financial statement disclosures or auditing scope or procedure in the 2021 audited financial statements of the Corporation.

The accounting policies adopted are consistent with those of the previous financial reporting year, except that the Corporation has adopted the following amended Philippine Financial Reporting Standards (PFRS):

- Amendment to PFRS 16, Leases - COVID-19-Related Rent Concessions beyond June 30, 2021 – In 2020, PFRS 16 was amended to provide practical expedient to lessees from applying the requirements on lease modifications for eligible rent concessions that is a direct consequence of COVID-19 pandemic. A lessee may elect not to assess whether eligible rent concessions from a lessor is a lease modification. A lessee that makes this election account for any change in lease payments resulting from the COVID-19 related rent concession the same way it would account for a change that is not a lease modification, e.g., as a variable lease payment. This amendment is effective for annual reporting periods beginning on or after June 1, 2020, with earlier application permitted, and covers eligible rent concessions until June 30, 2021. The Group applied the practical

expedient in its financial statements for the year ended December 31, 2020. Due to continuing impact of the pandemic, another amendment to PFRS 16 was issued in 2021, which allows lessees to extend the application of the practical expedient regarding COVID-19-related rent concessions to reduction in lease payments that are due on or before June 30, 2022. The amendment is effective for annual reporting periods beginning on or after April 1, 2021 but earlier application is permitted. The 2021 amendment is mandatory for entities that elected to apply the previous amendment. Accordingly, the Corporation and its subsidiaries have applied the amendment in the current year financial statements.

Under prevailing circumstances, the adoption of the foregoing amendments to PFRS did not have any material effect on the consolidated financial statements of the Corporation and its subsidiaries.

The above changes are disclosed in the Consolidated Audited Financial Statements of the Corporation as of December 31, 2021.

(c) Participation of Representatives of External Auditors

Representatives of Reyes Tacandong & Co., which audited the aforementioned financial statements of the Corporation, (i) are expected to be present at the annual meeting of stockholders (ii) will have the opportunity to make a statement if they desire to do so; and (iii) are expected to be available to respond to appropriate questions from stockholders during said meeting.

(d) Incorporation by Reference

The following documents are incorporated herein by reference and are attachments to this Information Statement:

- (1) Notice of Annual Stockholders Meeting and Proxy Form;
- (2) 2021 Management Report;
- (3) Statement of Management's Responsibility for the 2021 Consolidated Audited Financial Statements of the Corporation;

- (5) SEC Form 17-A 2021 Annual Report
- (6) SEC Form 17-Q -covering the Interim Unaudited Financial Statements for the 1st Quarter of 2022; and
- (7) SEC Form 17-Q -covering the Interim Unaudited Financial Statements for the 2nd Quarter of 2022.

ITEM XII - MERGER, CONSOLIDATION, ACQUISITION & SIMILAR MATTERS

There are no actions to be taken up at the annual meeting of stockholders which will involve the merger or consolidation of the Corporation with another entity or acquisition by the Corporation of any other going business or the assets thereof.

ITEM XIII – ACQUISITION/DISPOSITION OF PROPERTY

There are no actions to be taken up at the annual meeting of stockholders which will involve the acquisition or disposition of property, whether real or personal, of the Corporation.

ITEM XIV - RESTATEMENT OF ACCOUNTS

There are no actions to be taken up at the annual meeting of stockholders which will involve the restatement of any asset, capital or surplus account of the Corporation.

D. OTHER MATTERS

ITEM XV – ACTION WITH RESPECT TO REPORTS

The following actions on reports of the Corporation shall be submitted at the annual meeting of stockholders:

- (a) Approval of the Minutes of the 2021 Annual Stockholders' Meeting held on November 24, 2021, which contain the following:
 - Approval of the Agenda for the 2021 Annual Stockholders' Meeting.
 - Approval of the Minutes of the 2020 Annual Stockholders' Meeting.
 - Approval of the 2020 Annual Report and notation of the 2020 Audited Consolidated Financial Statements.
 - Ratification of all acts done by the Board of Directors and Management for the term 2020-2021.
 - Election of the Directors of the Corporation for the term 2021-2022; and
 - Appointment of Reyes Tacandong & Co. as the external auditor for the fiscal year 2021.
- (b) Approval of the 2021 Annual Report which shall be preceded by the material information on the current top twenty (20) stockholders of the Corporation and the voting rights of stockholders, and shall consist of a detailed description and assessment of the performance of the Corporation in 2021 and the plan for operations for 2022-2023;
- (c) Notation of the Consolidated Audited Financial Statements (CAFS) for the year ending December 31, 2021, which shall include the financial highlights and details of the said CAFS, a statement of the adequacy of internal controls and risk management systems, statement of external audit and non-audit fees, if any; the dividend policy and in case of non-payment of dividends, the reasons therefor;
- (d) Ratification of all acts of the Board of Directors and Management for the period covering the term 2021-2022, a list of which will be attached in the agenda for the annual stockholders meeting and shall be presented to the stockholders of the Corporation at the annual meeting of stockholders;
- (e) Election of the Members of the Board of Directors including Independent Directors for the ensuing year, which shall be preceded by a presentation of the material information on the nominees, their profiles including length of service with the Corporation, trainings or seminars attended and their board representation in other companies, the Board attendance report in Board and Committee meetings and annual stockholders meeting, criteria for appraisal and the performance report, Board compensation report for 2021-2022, and disclosures on self-dealings and related party transactions, if any;
- (f) Approval of the amendment to Article Third of the Amended Articles of Incorporation on the change of the principal office address of the Corporation to Mandaluyong City, amendments to Sections 3,5 and 6 of Article I of the Amended By-laws on the participation, voting and attendance for quorum purposes of stockholders at the annual stockholder meetings via remote communication, and to Article VIII of Amended By-laws so as update the principal office address in the corporate seal of the Corporation;
- (g) Confirmation/ratification of the issuance of 990,000,000 Private Placement shares issued in 2007 and the 9,827,990,853 shares issued to Map 2000 Development Corporation on September 10, 2021; and
- (h) Appointment of External Auditors for the 2022 financial statements.

Summary of the Minutes of the Annual Stockholders Meeting held on November 24, 2021

1. Call to Order, Proof of the Required Notice of Meeting and Determination of Existence of Quorum

The Corporate Secretary advised the body that the following members of the Board of Directors and the Advisory Board and key officers of the Corporation, guests and stockholders are present at the meeting:

Board of Directors

Manuel Z. Gonzalez	Oscar L. de Venecia, Jr.
Beatrice Jane L. Ang	Ramon L. Mapa
Jaime J. Martinez	Ma. Rosette Geraldine L. Oquias
Supasit Pokijaruras	Reynaldo D. Gamboa
Kim S. Jacinto-Henares	Andres B. Reyes, Jr.

Advisory Board:

Jose C. de Venecia, Jr.	Reynaldo T. Casas
Francis C. Chua	Oscar S. Reyes
Gabriel R. Singson, Jr.	Jose P. de Venecia III

Officers:

Oscar L. de Venecia, Jr.	-President & CEO
Luisito V. Poblete	-Chief Operating Officer
Alain S. Pangan	-VP-Finance/Treasurer
Alberto P. Morillo	-VP-Operations
Angel P. Gahol	-Corporate Secretary
Dominique P. Pascua	-Compliance Officer
Darius A. Marasigan	-Business and Risk Development Officer

Stockholders:

Rafael N. Villavicencio	Dennis D. Decena
Emelinda I. Dizon	Donna S. Sansano
Corazon M. Bejasa	Myrna Felinda Angeles
Hernan Segovia	Anthony Gilbert Lastico Antiquera
Jayvee De Juan Menil	Jason Guerrero Ducanes
Henry Albert Fadullon	Mary Jean S. Patubo of Phoenix Petroleum Phils, Inc.

Vice Chairman Manuel Z. Gonzalez, started with the acknowledgement of the contributions of the late Chairman Oscar C. de Venecia, after which, he advised the body that he will be presiding the meeting as Acting Chairman and called the 2021 Annual Stockholder's Meeting of Basic Energy Corporation to order.

Thereafter, the Corporate Secretary certified that pursuant to the SEC Notice dated March 16, 2021, notices for the 2021 Annual Stockholders' Meeting of the Corporation were published in two newspapers of general circulation namely, Manila Bulletin and Philippine Star for two consecutive days on November 2, 2021 and November 3, 2021, and was posted in the company website. The Corporate Secretary further certified that based on the Certification issued by its Stock Transfer Agent, Philippine Stock Transfer Inc., out of the outstanding subscribed and issued shares of stock of the Corporation entitled to attend and vote at the meeting and the number of shares of the stockholders present, a total of 10,897,960,703 shares are represented in the meeting, either in

person or by proxy, and these shares account for 77.63% of the total outstanding subscribed and issued shares of the Corporation. He then certified that there is a quorum for the transaction of business in the Annual Stockholders' Meeting.

2. Approval of the Agenda for the Stockholders Meeting

Before proceeding to the agenda items, upon request of the Chairman, the Corporate Secretary reminded the body of the voting and tabulation procedures to be followed in the approval of the matters in the agenda. The Corporate Secretary further advised that any stockholder present or represented in the meeting shall have the opportunity to ask questions after the presentation of each matter in the agenda, by typing his questions at the Q & A Box. The Chairman added that before declaring any matter as approved, the Chairman shall ask the body if there are any objections to or questions on the matter involved, and only after hearing no objection shall the matter be considered or declared approved by the stockholders. He instructed the Corporate Secretary to record all questions or objections raised and the answers given to address such questions or objections.

The Corporate Secretary presented the agenda for the Annual Stockholders' Meeting and after the presentation, upon motion, which was duly seconded, and there being no objections to said motion, the Agenda for the 2021 Annual Stockholders Meeting was approved by the affirmative vote of all the stockholders represented or present in the meeting owning a total of 10,899,217,103 shares, representing 77.63% of the total issued and outstanding capital stock of the Company.

3. Approval of the Minutes of the Previous Meeting

The Chairman proceeded with the approval of the Minutes of the 2020 Annual Stockholders' Meeting held last October 23, 2020. Since the draft of the minutes of the said meeting had been posted in the website of the Company prior to the scheduled annual stockholders meeting, a motion was submitted for the approval of the said minutes.

Upon motion, which was duly seconded, and there being no objections to said motion, the Minutes of the 2020 Annual Stockholders' Meeting, were deemed approved by the affirmative vote of all the stockholders represented or present in the meeting owning a total of 10,899,217,103 shares, representing 77.63% of the total issued and outstanding capital stock of the Company.

4. Approval of the 2020 Annual Report and Notation of the 2020 Audited Financial Statements

Before the presentation of the 2020 Annual Report and the 2020 Audited Financial Statements, the Corporate Secretary presented the list of the major stockholders and key officers thereof, the nature of their businesses, including those in the top 20 stockholders of the Corporation and the top five (5) PDTC participants holding 5% or more of the outstanding capital stock of the Corporation, for the account of their respective clients. Thereafter, he discussed the voting rights of stockholders as provided under the Revised Corporation Code and the By-laws of the Company.

The President & CEO presented the Financial Report and the Operations Report for 2020. He first discussed the key financial performance indicators of the Company, which continued to remain positive, among others: the Company is extremely liquid, with a current ratio of 6.75:1, it is in a zero-debt position, and it maintains sound solvency ratios, with a debt-to-equity ratio of 5.52% and an asset-to-equity ratio of 105.52%.

On the 2020 Audited Consolidated Financial Statements, he reported that as of end-2020, total assets stood at Php 482.86 million, Php 117.72 million lower than the Php 600.58 million balance at the close of 2019. This was primarily due to the decreases in the value of investment in

associates amounting to Php 75.14 million, financial assets amounting to Php 18.55 million and cash equivalents of Php 33 million. The aforementioned decreases were partially offset by the increase in value of investment properties of Php 11.52 million.

Total liabilities stood at Php 25.24 million as of end-2020, a decrease of Php 17.61 million from the balance of Php 42.85 million at the close of 2019, due to the decreases in accrued retirement benefits of Php 8.58 million and deferred income tax liabilities of Php 8.17 million. Total equity settled at Php 457.62 million in 2020, down by Php 100.11 million from the Php 557.73 million balance at end-2019.

Total revenues for the year 2020 amounted to Php 13.92 million, which were derived from the fair value adjustments on investment properties, realized foreign exchange gain, management fees, and interest income. The variance of Php 9.5 million for the 2020 revenue from the 2019 revenue is due to the decreases in the fair value of adjustment on investment properties of Php 2.31 million, management fees of Php 6.42 million and interest income of Php 0.9 million. Total expenses amounted to Php 80.29 million, a decrease of Php 143.03 million from the year-ago balance of Php 223.31 million. For the year ended 2020, the Company recorded a net operating loss of Php 63.35 million, a variance of Php 134.46 million from the Php 197.81 million net operating loss recorded in 2019.

For the year 2020, no dividends were declared because the Company continued to report net operating losses and thus, no income was recognized which would enable your Company to declare dividends for shareholders. The Company is looking at certain equity investments that will provide the needed revenues to beef up the retained earnings of the Company.

At the end of 2020, the company's stock, with a par value of Php 0.25, carried a book value of Php 0.16 per share. With the stock market's ups and down in 2020, which was affected by the COVID-19 pandemic, the highest trading price for the Company's shares for 2020 was reported at Php 0.56 per share.

As to the adequacy of internal control systems, the Company has adequate internal control procedures in place that ensure compliance with policies and procedures, facilitate effective and efficient operations, ensure the quality of financial and reporting, and ensure compliance with applicable laws and regulations. The Company has set up a risk management system that sufficiently addresses risk evaluation and assessment, and monitoring and reporting of the risks attendant to the ongoing projects and investments of the Company.

He added that the external audit fees for the year 2020 amounted to Php 630,000.00 and fees for other professional services amounted to around Php 3.0 million.

Proceeding with the Operations Report, in 2020, the Company continued its venture for sound investments into the renewable energy sector and undertook measures to minimize its expenditures on its various geothermal, hydroelectric and natural gas service contracts.

The Company through its subsidiary Mabini Energy Corporation , was awarded by the Department of Energy last March 17, 2021, a service contract for its planned 50 megawatts wind project in Mabini, Batangas. The wind energy service contract provides a non-extensible 5-year pre-development stage and a 25 year development stage counted from signing. Currently, the

company is in the process of procuring services to conduct a Wind Resource Assessment (WRA) to determine the annual energy production that will dictate the total MV capacity of the wind power plant and location of the wind turbines.

The President proceeded to discuss the geothermal business of the Company. He mentioned that the Company has a retaining 20% participating interest in Iriga Geothermal Project located in Iriga, Camarines Sur, with DESCO as the partner/operator. It is expected to drill the first exploratory well by 2022, after the local and national permitting works have been completed, to assess the geothermal reserve of the project.

The President discussed that with the entry of MAP 2000 Development Corporation (M2DC) into the Company as its new major shareholder, the Company has come full circle in its business and bright future lies ahead as what the late Chairman, Oscar C. de Venecia has envisioned. He further said that with M2DC at the helm, the Company will continue to look for viable projects aimed at providing revenue streams in short, medium and long terms.

The President further mentioned that the Company has agreed to invest in Filoil Energy Company, Incorporated ("FECl") for a 60% ownership interest. FECl is the joint venture partner of Total Marketing Services ("TMS"), the Philippine subsidiary of Total France. With the entry of the Company into FECl, FECl will work towards bringing renewable energy systems into the operations of FECl and beyond with the aim to create a new and improved business model with the use of renewable energy at the forefront.

The actions taken by the Company, particularly with the measures taken to minimize the exposures in its geothermal service contracts and natural gas service contract, and the investment in the midstream and downstream oil and gas sector is in line with the strategies identified to bring the Company to profitability in the foreseeable future.

The President's report ended with optimism that Company will strive to remain sound even as it aggressively pursues further development of its projects.

The President & CEO reminded the body that a copy of the 2020 audited consolidated financial statements of the Company and its subsidiaries was attached to the 2021 SEC Form IS 20-Definitive Information Statement, which was posted in the Corporation's website and which was also furnished to the Philippine Stock Exchange, and a copy can also requested from the Corporate Secretary, without any extra charge.

After the presentation of the aforementioned reports, the table was opened for questions and clarifications from the stockholders. There were four (4) questions asked by stockholders on the reports presented, which are: when is the payment of M2DC expected considering that SEC approval of the increase in capital stock has been approved; on the FECl investment, when is the full investment expected and what are the synergies expected from the said investment, if there is any business activity which was ignored by the Company, and lastly, what benefit does the investment of M2DC benefit the minority stockholders. The President & CEO responded that the full payment of M2DC's shares is still dependent on the compliance of the conditions precedent and subsequent, under the covering Subscription Agreement and on the last two questions, the President & CEO responded that the Company will disclose at the opportune time as at the present, the intended investment with FECl is still in the discussion and negotiation stage. On the last question, the President & CEO advised that all business opportunities were looked into and none was ignored, and the minority shareholders will eventually benefit from the revenues that will be derived from the investments and projects of the Company.

There being no other questions raised, the appropriate motion was made, recognized and was duly seconded, and there being no objection thereto, the 2021 Annual Report to Stockholders, which was considered also as the report of the Board of Directors and Management, and the highlights of the 2020 Audited Financial Statements, were considered approved by the affirmative vote of all the stockholders represented or present in the meeting owning a total of 10,899,217,103 shares, representing 77.63% of the total issued and outstanding capital stock of the Company.

5. Ratification of all Acts of the Board and Management for the term 2019-2020

The Corporate Secretary advised the body that the list of resolutions and actions approved and adopted by the Board of Directors from the last stockholders meeting held in October 23, 2020 to October 15, 2021 were published in two newspapers of general circulation namely Manila Bulletin and Philippine Star for two consecutive days on November 2, 2021 and November 3 2021. In addition, the following are the actions taken by the Board of Directors in its Board meeting last November 4, 2021: a) Approval and adoption of the Resolution of Recognition for the late Chairman Oscar C. de Venecia and vesting on him the title of Chairman Emeritus of the Company; b) Issuance of the stock certificate for the 9,827,990,853 subscribed shares of M2DC and the submission of the listing application for said shares, upon full payment of the said shares.

A motion was submitted that with the approval of the 2021 Annual Report on the operations of the Corporation for the term 2020-2021, all acts done by the Board of Directors and Management from October 23, 2020 to November 4, 2021 be confirmed and ratified.

Upon said motion, which was duly seconded and there being no objection thereto, all acts done by the Board of Directors and Management during the said period were considered confirmed and ratified by the affirmative vote of all the stockholders represented or present in the meeting owning a total of 10,899,217,103 shares, representing 77.64% of the total issued and outstanding capital stock of the Company.

6. Election of Ten (10) Directors

The Corporate Secretary reminded the body that the individual profiles of the nominees including the length of service in the Company, the training and seminars and continuing education programs attended and their Board representations in other companies can also be found in the 2021 SEC Form IS 20- Definitive Information Statement which was posted in the Company's website. He presented the 2021 Attendance Report of the current members of the Board of Directors covering attendance in Board and Committee meetings and the annual stockholders meeting during said periods, the performance of the Board and the Board Committees and the performance of the duties and responsibilities of the individual directors, reporting that the performance evaluation for 2020-2021 was conducted last November 18, 2021, with an over-all rating of "Mostly Satisfactory/Exceeds Standards".

On the directors' compensation report for 2021, the Corporate Secretary reported that directors do not receive compensation from the Company and that the directors receive per diems for attendance at Board meetings and Board Committee meetings. The compensation report was presented in the format prescribed by SEC, and since directors do not receive compensation, only the compensation of officers were presented. The proposed related party transaction with Filoil Energy Corporation was presented. It was also reported that there were no self-dealing transactions reported for 2019- 2020 and up to the present.

After the above presentations of the Corporate Secretary, he reported that only ten (10) directors will be elected in view of the untimely demise of the late Chairman, Mr. Oscar C. de Venecia, The Chairman proceeded with the election of the ten (10) Directors for the ensuing year, 2021-2022. He reported to the body that in compliance with the Corporation's Manual on Corporate Governance, the Nominating Committee endorsed to the Board the nomination of the following nominees as members of the Board of Directors of the Corporation for the term 2021-2022, and the Board of Directors approved the nominations, as follows:

1. Manuel Z. Gonzalez.
2. Oscar L. de Venecia, Jr.
3. Beatrice Jane L. Ang
4. Ramon L. Mapa
5. Jaime J. Martinez
6. Maria Rosette Geraldine L. Oquias
7. Supasit Pokinjaruras
8. Reynaldo D. Gamboa as Independent Director
9. Kim S. Jacinto-Henares as Independent Director, and
10. Andres B. Reyes, Jr as Independent Director.

Upon motion, which was duly seconded, and there being no objection thereto, the Chairman dispensed with the balloting of votes for the election of the Directors of the Corporation considering that there were only 10 nominees for the 10 seats in the Board.

As directed by the Chairman, the Corporate Secretary cast all the votes of the stockholders present or represented in this meeting owning a total of 10,899,217,103 shares, representing 77.64% of the total issued and outstanding capital stock of the Company, in favor of the election of the aforementioned 10 nominees as directors of the Corporation for the term 2021-2022. Thereafter, the Chairman declared all the aforementioned 10 nominees as elected Directors of the Corporation for the term 2021-2022.

7. Appointment of External Auditors

The Vice President for Finance, Mr. Alain S. Pangan, presented a brief background and the credentials of Reyes Tacandong & Co., its management and the auditors who will be designated as the engagement partners for the Company. He also reported on the audit fees paid to Reyes Tacandong & Co. for the external audit of the financial statements of the Corporation for the year ended 2020. He also reported that no non-audit work was requested from Reyes Tacandong & Co. for 2020, hence, no fees for non-audit work was paid to Reyes Tacandong & Co.

The Chairman mentioned that the Board of Directors of the Corporation, upon recommendation of the Audit Committee, nominated Reyes Tacandong & Co. with Mr. Joseph C. Bilangbilin and Mr. Manuel P. Buensuceso as the engagement partners, as External Auditors for the 2021 financial statements of the Company.

Upon motion for the said nomination of Reyes Tacandong & Co., which was duly seconded, and there being no objection thereto, the appointment of Reyes Tacandong & Co. as the External Auditors of the Company for the financial statements for the fiscal year ending December 31, 2022, as recommended by the Audit Committee and the Board of Directors, as approved by the affirmative vote of the stockholders present or represented in this meeting owning a total of 10,899,217,103 shares, which represent 77.64% of the total issued and outstanding capital stock of the Company.

8. Adjournment

There being no other matters in the agenda, upon motion to adjourn, which was duly seconded, the Chairman adjourned the Corporation's 2020 Annual Stockholders' Meeting.

Summary of Voting Results:

Agenda Items	Votes in Favor	Votes Not in Favor	Abstentions
1. Approval of the Agenda for 2021 Annual Stockholders Meeting	10,897,960,703 shares equivalent to an affirmative vote of 77.63%	None	None
2. Approval of the Minutes of the last stockholders meeting held on October 23, 2020	10,897,960,703 shares equivalent to an affirmative vote of 77.63%	None	None
3. Approval of the 2020 Annual Report and the 2020 Consolidated Audited Financial Statements	10,897,960,703 shares equivalent to an affirmative vote of 77.63%	None	None
4. Ratification of Acts of Management and the Board for the term 2020-2021	10,897,960,703 shares equivalent to an affirmative vote of 77.63%	None	None
5. Election of 10 Directors for the term 2021-2022	10,897,960,703 shares equivalent to an affirmative vote of 77.63%	None	None
6. Appointment of Reyes Tacandong & Co. as the external auditor for the financial statements for the fiscal year 2021	10,897,960,703 shares equivalent to an affirmative vote of 77.63%	None	None

ITEM XVI - MATTERS NOT REQUIRED TO BE SUBMITTED

There are no matters to be taken up at the annual meeting of stockholders which are not required to be submitted for stockholders' vote or approval.

ITEM XVII – AMENDMENTS TO THE ARTICLES OF INCORPORATION AND BY-LAWS

The following amendments to the Amended Articles of Incorporation and Amended By-Laws of the Corporation shall be taken up at the annual meeting of stockholders:

- a. Amendment to Article Third of the Amended Articles of Incorporation on the change of the principal office address of the Corporation from Makati City to Mandaluyong City,
- b. Amendments to Sections 3,5 and 6 of Article I of the Amended By-laws on the participation, voting and attendance for quorum purposes of stockholders at the annual stockholder meetings via remote communication, and
- c. Amendment to Article VIII of Amended By-laws so as update the principal office address in the corporate seal of the Corporation.

ITEM XVIII - OTHER PROPOSED ACTIONS

The confirmation/ratification by stockholders of the issuance of 990,000,000 Private Placement shares issued in 2007 and the 9,827,990,853 shares issued to Map 2000 Development Corporation on September 10, 2021 shall be submitted at the annual meeting of stockholders.

ITEM XIX - VOTING PROCEDURES

(a) VOTE REQUIRED

Motions in general require the affirmative vote of a majority of the shares of the Corporation's common stock present and/or represented and entitled to vote in the annual meeting of stockholders. The proposed amendments to the Amended Articles and Amended By-laws of the Corporation to be taken up in the annual meeting of stockholders will require the affirmative vote of at least two thirds ($\frac{2}{3}$) of the outstanding and issued capital stock of the Corporation.

(b) ELECTION OF DIRECTORS

In the election of directors, every stockholder entitled to vote shall be allowed to accumulate his vote in accordance with the provisions of law. For this year's election, the top eleven (11) nominees with the most number of votes will be declared as the elected directors. If the number of the nominees does not exceed the number of directors to be elected, all the shares present or represented at the meeting will be cast in favor of the nominees. If the number of nominees exceeds the number of directors to be elected, voting will be done by ballot.

(c) METHOD OF COUNTING VOTES

Counting of votes will be done by the Corporate Secretary (or his authorized representatives) with the assistance of the representatives of the independent auditors and stock transfer agent of the Corporation. All votes attaching to the shares of common stock owned by stockholders whose proxies were received by the Corporation will be cast in accordance with the instructions given or authority granted under the proxies.

ATTACHMENTS

The attachments to this Information Statement consist of the Notice of Stockholders' Meeting and Proxy Form, the Corporation's 2021 Management Report, the 2021 Consolidated Audited Financial Statements of the Corporation, Statement of Management's Responsibility for the 2021 Consolidated Audited Financial Statements, SEC Form 17-Q covering the Interim Unaudited Financial Statements for the 1st Quarter of 2022 and SEC Form 17-Q covering the Interim Unaudited Financial Statements for the 2nd Quarter of 2022.

The Corporation will provide without charge each person solicited, on the written request of any such person, a copy of the Corporation's Annual Report for 2021 (SEC Form 17-A). Such written request should be directed to the:

**Corporate Secretary
Basic Energy Corporation
UB 111 Paseo de Roxas Bldg.
111 Paseo de Roxas Ave., Legaspi Village
Makati City, 1229**

At the discretion of Management, a charge may be made for exhibits, provided the charge is limited to reasonable expenses incurred by the Corporation in furnishing the exhibits.

Copies of resolutions of the Board of Directors, since the 2021 Annual Stockholders' Meeting, are available for examination during office hours at the office of the Corporate Secretary.

ANGEL P. CAHOL
Corporate Secretary

NOTICE OF ANNUAL STOCKHOLDERS MEETING

Notice is hereby given that the regular Annual Meeting of Stockholders of **BASIC ENERGY CORPORATION** will be held **on Wednesday, August 31, 2022 at 3:00 p.m.**, via remote communication, with the following agenda:

A G E N D A

1. Call to Order
2. Certification of Due Notice of Meeting and Existence of Quorum
3. Approval of Minutes of the Annual Stockholders' Meeting held on November 24, 2021
4. Presentation of the 2021 Annual Report
5. Presentation of the 2021 Audited Consolidated Financial Statements
6. Ratification of All Acts of the Board and Management for 2021-2022
7. Election of Directors for the term 2022-2023
8. Appointment of External Auditors for the 2022 Financial Statements
9. Proposed amendment to Article Third of the Amended Articles of Incorporation on the change of the principal office address of the Corporation from Makati City to Mandaluyong City, and proposed amendments to Sections 3, 5 and 6 of Article I of the Amended By-laws on the participation, voting and attendance for quorum purposes of stockholders at the annual stockholder meetings via remote communication, and proposed amendment to Article VIII of Amended By-laws so as update the principal office address in the corporate seal of the Corporation.
10. Confirmation/ratification of the issuance of the 990,000,000 private placement shares issued in 2007 and the 9,827,990,853 shares to Map 2000 Development Corporation issued on September 10, 2021; and
11. Appointment of External Auditors for the 2022 financial statements.
12. Other Matters
13. Adjournment

Given the continuing threat of the COVID-19 community transmission, the annual stockholders meeting shall be held via remote communication, where stockholders may participate and vote in absentia, using the link that will be posted at the Corporation's website: www.basicenergy.ph. Stockholders who wish to participate in the meeting via remote communication may contact the undersigned at apgahol@basicenergy.ph. As required under SEC regulations, there will be audio and visual recordings of the meeting for future reference. The processes for the registration, participation and voting by stockholders are attached as Annex A hereof.

Only stockholders of record at the close of business on **August 10, 2022** are entitled to notice of, and to vote at this meeting. For this purpose, the Stock and Transfer Books of the Corporation shall be closed from August 10 to 31, 2022.

Should you wish to authorize a representative to attend the meeting in your behalf, please accomplish the attached Proxy Form (Annex B) and (a) mail or deliver the same at the principal office of the Corporation at the UB 111 Paseo de Roxas Building, Paseo de Roxas, Legaspi Village, Makati City, or (b) email a copy to the undersigned at apgahol@basicenergy.ph, on or before **August 19**,

2022. Validation of proxies will be on August 25, 2022 at 3:00 p.m. at the principal office of the Corporation.

Please find attached the processes for the nomination and election of directors and the list of actions taken by the Board of Directors and Management for the term 2021-2022, as Annex C and Annex D hereof, respectively. You may access the 2022 Definitive Information Statement, the 2021 Management Report, SEC Form 17-A for 2021 and other pertinent or related documents from the Corporation's website at www.basicenergy.ph or at the PSE Edge, or you may request copies thereof from the undersigned during business hours at the principal office of the Corporation.

A copy of the Minutes of the 2021 Annual Stockholders Meeting are available for your perusal at the principal office of the Corporation during business hours and at the Corporation's website at www.basicenergy.ph.

We look forward to your attendance at the Annual Stockholders' Meeting.

Makati City, July 20, 2022.

ANGEL P. GAHOL
Corporate Secretary

ANNEX A
Notice of Annual Stockholders Meeting

**REQUIREMENTS AND PROCEDURES FOR VOTING IN ABSENTIA
AND PARTICIPATION VIA REMOTE COMMUNICATION AT THE ANNUAL STOCKHOLDERS MEETING
OF BASIC ENERGY CORPORATION**

I. PARTICIPATION AND VOTING IN ABSENTIA OF STOCKHOLDERS

Stockholders of Basic Energy Corporation (“the Company”) as of August 10, 2022 (“Stockholders”) may participate and exercise their right to vote on the agenda items in the 2022 Annual Stockholders Meeting (ASM) of the Company, to be held on August 31, 2022 at 3:00 pm by remote communication and voting in absentia. Voting in absentia means that stockholders shall have the opportunity to vote during the ASM without being physically present during the meeting.

II. REGISTRATION OF STOCKHOLDERS AND PROXY HOLDERS

a. The right to participate and to vote are subject to the successful registration of the Stockholders with the Company’s Stockholders Registration platform posted at the Company’s website www.basicenergy.ph. The registration will run from August 10, 2022, up to the close of business hours on August 29, 2022. After this latter date, stockholders will no longer be allowed participate by remote communication nor vote in absentia at the ASM.

b. To register, the Stockholder and Proxy Holders shall be requested to create a Log In Account and provide the items enumerated below to prove his/her identity and his/her right to participate and vote in the ASM:

- 1) Stockholder Name (First Name, Middle Name and Last Name);
- 2) Complete address;
- 3) E-mail address;
- 4) Contact number;
- 5) Digital copy of the front and back portions of the Stockholder’s two (2) valid government-issued IDs (in JPG format) (which shall be attached to the registration form);
- 6) If the Stockholder has issued a Proxy in favor of another person, the proxy holder shall likewise input under his name items 1) to 5) above; and
- 7) If the Stockholder who has issued a Proxy is a corporate entity, the digital copy of the Stockholder’s Secretary’s Certificate and Proxy shall be attached to the registration form.

c. The Company reserves its right to require additional personal data or documents to ensure the identity and validate the right of the Stockholder or his/her Proxy to participate and vote in the ASM. At all times, the right of the Stockholder to the privacy of his/her personal data as provided in the Data Privacy Act shall be ensured.

d. The Stockholder and his/her proxy shall be advised by email acknowledging his/her registration, or should there be additional requirements needed by the Company.

e. The registration data and other requirements shall be validated by the Company upon submission of the complete registration requirements and not later than three (3) business days prior to the ASM.

f. Upon successful registration, the Stockholder, or his/her proxy, will be given access to the ASM live stream and will be required to log-in to his/her Account and his/her successful log-in shall be considered as attendance in the ASM and shall be considered in the determination of quorum in the ASM.

III. PARTICIPATION VIA REMOTE COMMUNICATION

a. Only the stockholders, or their proxies, who have successfully registered with, and have logged in at the Company's website may be given access to the ASM livestream video service that will allow Stockholders or their proxies to participate in the ASM.

b. The Company will provide mechanisms to ensure that stockholders or their proxies shall have the opportunity to participate in the ASM, including the ability to read the presentations and hear substantially the discussions during the ASM.

c. Stockholders or their proxies may raise questions and clarifications on the agenda items.

d. Proceedings of the meeting shall be recorded. Stockholders may request for access to the recorded webcast of the ASM by sending an email to the Corporate Secretary at apgahol@basicenergy.ph.

IV. VOTING PROCEDURES

a. All agenda items indicated in the Notice of the Meeting will be set out in the digital absentee ballot and the registered Stockholder, or his/her proxy, may vote as follows:

1) For items other than the election of Directors, the registered Stockholder, or his/her proxy, will have the options to vote "Approve," "Disapprove," or "Abstain" or "Vote Withheld". The vote is considered cast for all the registered stockholder's shares.

2) For the election of Directors, the registered stockholder, or his/her proxy, may vote for all nominees or cumulate his vote for one or some of the nominees provided that the total number of allowable votes will not exceed the number of shares multiplied by the number of Board seats (Number of Shares x 11 Directors= Number of Voting Shares).

b. Once the registered Stockholder, or his/her proxy, has finished voting on the Agenda items, he/she can proceed to submit his/her electronic ballot by clicking the 'Submit' button. After the electronic ballot has been submitted, the registered Stockholder or his/her proxy may no longer change his/her vote.

c. The integrity and secrecy of votes shall be protected. As such, all votes received will be tabulated and validated by the Office of the Corporate Secretary. The external auditors will also be present to validate the results.

d. The Corporate Secretary shall report the results of voting during the meeting.

Note: For corporate stockholders, please attach a notarized copy of the Corporate Secretary's Certificate authorizing the issuance of the proxy form and designating the authorized representative of the corporation who will sign the proxy form, together with a copy of a valid ID of the designated authorized representative. For individual stockholders, please attach a copy of a valid ID of the designated authorized representative/proxy.

Annex C
Notice of Annual Stockholders Meeting

Basic Energy Corporation

Processes for Nomination of Directors For Election

(i) The Board of Directors sets the date, time and venue for the year's annual stockholders meeting in its regular meeting at the latest approximately three (3) months before the annual stockholders meeting. The Compliance Officer discloses to the Securities and Exchange Commission (SEC) and the Philippine Stock Exchange (PSE) the setting of the annual stockholders' meeting immediately after the Board meeting.

(ii) Any stockholder may submit nominations for election as members of the Board after the disclosures to the SEC and the PSE. Nominations shall be signed by the nominating stockholder and accepted and signed by the would-be nominee and submitted to the Nominating Committee at any time before the Committee submits the Final List of Nominees to the Board.

(iii) The Nominating Committee pre-screens the would-be nominees, ensuring that they possess all the qualifications and that they do not possess any of the disqualifications for directors as prescribed in the Manual on Corporate Governance, the Company's By-Laws and other applicable laws and regulations.

(iv) The Nominating Committee shall have the right to require the nominating stockholder to submit a resume of the would-be nominee and such other documents as may be necessary for the Nomination Committee to undertake its pre-screening functions.

(v) After the pre-screening process, the Nominating Committee prepares a Final List of all nominees and submits the list to the Board of Directors for approval, complete with the information required by the Securities Regulation Code.

(vi) The Final List of Nominees as approved by the Board shall be immediately disclosed to the SEC and the PSE. The Final List of Nominees is reported in the definitive Information Statement furnished to all stockholders prior to the stockholders' meeting. In case a nominee is not included in the Final List, the Corporate Secretary shall accordingly advise, in writing, the nominating stockholder and his/her nominee.

(vii) Only nominees whose names appear on the Final List of Nominees shall be eligible for election as directors. No other nomination shall be entertained after the Final List of Nominees shall have been disclosed and submitted to the SEC and the PSE. No further nominations shall be entertained or allowed on the floor during the actual stockholders' meeting.

Annex C
Notice of Annual Stockholders Meeting

Processes for Election of Directors

(i) The election of directors shall be part of the regular agenda for the annual stockholders meeting.

The election of directors shall be preceded by a presentation of the material information on the nominees, their profiles, attendance report, appraisal and performance report, compensation report and disclosures on self-dealings and related party transactions, if any;

(ii) At the annual meeting of stockholders, every stockholder entitled to vote shall have the right to vote the number of shares of stocks standing in his own name in the stock books of the corporation at the time of the meeting. In the election of directors, a stockholder may: (a) vote such number of shares for as many persons as there are directors to be elected; (b) cumulate said shares and give one (1) candidate as many votes as the number of directors to be elected multiplied by the number of the shares owned; or (c) distribute them on the same principle among as many candidates as may be seen fit, provided that the total number of votes cast shall not exceed the number of shares owned by the stockholder as shown in the books of the corporation multiplied by the whole number of directors to be elected.

(iii) No delinquent stock shall be voted.

(iv) If the number of the nominees does not exceed the number of directors to be elected, all the shares present or represented at the meeting will be cast by the Corporate Secretary in favor of the selected nominees. If the number of nominees exceeds the number of directors to be elected, voting will be done by ballot.

(v) The top eleven (11) nominees with the most number of votes will be declared as the elected directors.

(vi) Counting of votes in the ballots will be done by the Corporate Secretary (or his authorized representatives) with the assistance of the representatives of the external auditors and/or the stock transfer agent of the Company.

(vii) All votes attaching to the shares of stock owned by stockholders whose proxies were received by the Corporate Secretary will be cast in accordance with the instructions given or authority granted under the proxies.

5. I am not related to any director, officer or substantial shareholder of Basic Energy Corporation, or to any of its related companies, except as stated in Item 2 hereof, or to the substantial shareholders of its related companies, and I am not connected

with any government office or agency or any government owned or controlled corporation;

6. To the best of my knowledge, I am not the subject of any pending criminal or administrative investigation or proceeding;
7. I shall faithfully and diligently comply with my duties and responsibilities as Independent Director under the Securities Regulation Code and its Implementing Rules and Regulations and other SEC issuances; and
8. I shall inform the Corporate Secretary of Basic Energy Corporation of any changes in the above-mentioned information within five (5) days from its occurrence.

Executed this 1st day of June, 2022, at Makati City.

2021 MANAGEMENT REPORT

PART I. BUSINESS AND GENERAL INFORMATION

(A) Description of Business

(1) Business Development

The Company was organized initially as Basic Enterprises, Inc., a stock corporation, on September 19, 1968 and became an oil and gas exploration and development company on April 26, 1971. A year after, it assumed a new name, Basic Petroleum and Minerals, Inc. Over the years, the Company evolved from an operating company into a holding company under the corporate name, Basic Consolidated, Inc. As a holding company, it held equity investments in the following wholly owned subsidiaries: Basic Diversified Industrial Holdings, Inc., an investment holding company, iBasic, Inc., an information technology management company and service integrator, Basic Biofuels Corporation, which is into the development of biofuels, Basic Renewables, Inc., which is into development of renewable energy, Mabini Energy Corporation (formerly Basic Geothermal Energy Corporation), which holds the Wind Energy Service Contract for the development of a Wind Energy Project in Mabini, Batangas, Grandway Group Limited, a Hong Kong registered company which is into investments in equities abroad and in Southwest Resources, Inc., an oil exploration company, which is owned 72.58% by the Company.

Oil and Gas Business

The Company was a party, together with other oil exploration companies, in the exploration, development and production of natural gas under Service Contract 53, in onshore Mindoro. This service contract was awarded by the Department of Energy (DOE) on July 8, 2005 for a ten-year exploration period, pursuant to Presidential Decree No. 87, which prescribes the periods and programs for exploration, development, and commercial production. In June 2008, Pitkin Petroleum Ltd. (Pitkin) farmed-in into the project and in July, 2011, Resource Management Associates Pty Limited of Australia acquired 35% of Pitkin's 70% participating interest. In 2016, the DOE approved the agreement between Pitkin Petroleum and Mindoro Palawan Oil and Gas, Inc. (MPOGI) for the transfer of Pitkin Petroleum's participating interest and operatorship to MPOGI.

This service contract was, however, terminated by the DOE in June, 2019 due to non-submission by the operator of the reportorial requirements prescribed by DOE under the service contract. The remaining members of the consortium, with Philodrill Corporation as the lead, requested the DOE to reconsider the termination of this service contract. In March, 2020, the Company withdrew its participation in the consortium's request for reconsideration

of the termination of this service contract, and relinquished its remaining interest in favor of the remaining consortium members, which were subsequently approved by the DOE.
Geothermal Energy Projects

The Company was likewise involved in the exploration, development, and production of geothermal energy. It has been awarded service contracts for various areas by the Department of Energy (DOE), which prescribes the periods and programs for these service contracts pursuant to Presidential Decree No. 1442, for the Mabini Geothermal Service Contract and pursuant to R.A. 9513 (Renewable Energy Act of 2008) for the other geothermal service contracts.

A total of five (5) service contracts for the exploration and development of geothermal energy was awarded to the Company, namely: GSC No. 8 at Mabini, Batangas, which was awarded in 2007, and GSC No. 2013-02-042 at Mariveles, Bataan, GSC No. 2013-02-041 at East Mankayan, Benguet, Mountain Province and Ifugao, GSC No. 2013-02-043 at Iriga, Camarines Sur and Albay and GSC No. 2013 -11-048 at West Bulusan, Sorsogon, which were awarded in 2013.

The Mabini, Batangas Geothermal Service Contract covered a contract area of approximately 32.5 square kilometers and covered the Calumpan Peninsula. The contract period for exploration is 5 years and was extended up to 2019.

In 2015, Trans-Asia Oil and Energy Development Corporation (now Phinma Energy Corporation) agreed to a 25% participating interest in this project, which was confirmed upon completion of the gravity survey which it conducted in 2014. The DOE approved the farm-in agreement of the Company with Phinma Energy on September 15, 2015.

The work program committed to the DOE involved the drilling of one (1) exploratory well by July 2017. The drilling of the well was undertaken by Diamond Drilling Corporation of the Philippines and on February 6, 2017, target depth was reached at 1,679 meters. After various tests were conducted to determine the geothermal resource in the area, the consortium decided to drill a follow-up well in Barangay Solo, within the service contract area as part of its Contract Year 10 work program. Phinma Energy, however, withdrew from the consortium in July, 2018. On May 6, 2020, the Company withdrew from this service contract as it was unable to establish a viable geothermal resource.

The service contracts for the East Mankayan, Mariveles and West Bulusan projects were terminated by DOE effective April 15, 2019, December 28, 2019, and January 24, 2019, respectively. What remained is the Iriga Geothermal Power Project, of which the Company has a 20% participating interest.

Indonesia Oil Project

In 2013, the Company entered into a joint venture arrangement with Petrosolve Sdn Bhd, a company registered in Malaysia, which is into the business of developing oil fields and holds a technology for enhanced chemical oil recovery. The joint venture established Grandway Group Limited (Grandway), a joint venture company in Hong Kong, as the corporate vehicle of the joint venture in entering into business relationships in connection with the

management and operation of oil wells. Grandway was initially 70% owned by the Company and 30% owned by Petrosolve Sdn Bhd until 2017, when the latter transferred its shares to the Company, such that Grandway is now owned 100% by the Company. The joint venture then established PT Basic Energi Solusi (PT BES), as its operating arm in Indonesia for the management and operation of oil wells located in the Dadangilo and Wonocolo areas. In 2015, after having drilled five (5) wells, PT BES placed the project on hold until the organizational structure of local cooperatives and/or local miners which will handle the management and operation of oil wells in said areas and with whom PT BES shall enter into new cooperation agreements, have been established. In view thereof, the deferred exploration costs pertaining to this project amounting to Php147.93 million as of December 31, 2016, was fully provided an allowance for impairment.

Equity Investments in the EPC Contractors of the Myanmar Solar Power Project

In 2017, the Company decided to invest in Vintage EPC Co. Ltd. (VEPC) and Vintage International Construction Co. Ltd. (VINTER), which are limited companies registered in Thailand. VEPC and VINTER are the first counterparties of GEP (Myanmar) Co. Limited, the owner-developer of the 220 MW solar power plant located in the Minbu District, Magway region, Myanmar, for the supply and construction service requirements of the project. After the required due diligence work on said companies and its contracts, in 2018, the Company acquired 15% of the equities of the said companies.

Wind Energy Project

In March 2021, Mabini Energy Corporation (“MEC”), a wholly owned subsidiary of the Company, was awarded by the DOE, a Wind Energy Service Contract (“WESC”) with the contract area located in the municipality of Mabini, Batangas, giving MEC the exclusive rights to explore, develop and operate a Wind Energy Project in the aforementioned contract area. It is expected that a favorable pre-development stage of the project would lead to the construction and operation of the said power plant.

Equity Investment in Filoil Energy Company

In December 2021, the Company invested in Filoil Energy Company, Inc. (FEC) for a sixty percent (60%) equity interest in order for the Company to indirectly participate in FEC’s downstream oil activities through its existing joint venture with the Total -France group.

Green Energy E-Transport Project

Conceptualized early this year, the Green Energy E-Transport Project is in line and is underpinned by the government’s direction enshrined in R.A. 9513 (Renewable Energy law) and R.A. 11697 (Electric Vehicle Development Law). This project involves partnerships between the Company’s designated subsidiary, the transport operator, and the station dealers forming the ecosystem. The rooftop solar systems coupled with electric vehicles for public utility are envisioned to contribute to the reduction of carbon emission to address global warming.

The Company continues to look for business opportunities for the development of renewable energy resources such as but not limited to wind and solar power.

(2) Business of the Company and its Subsidiaries

Iriga Geothermal Power Project

The Iriga Geothermal Power Project in Camarines Sur was awarded by the DOE to the Company in 2013, covering a contract area that is bounded to the north by Isarog geothermal block of PNOC-RC and to the east by the highly productive Tiwi geothermal service contract area of formerly Chevron, now AP Renewables Inc. The aerial landscape is dominated by Iriga or Asog Volcano, a stratovolcano immediately southwest of Lake Buhi in southern Luzon.

In 2016, Desco Inc. entered into a Farm-in Agreement with the Company acquiring an eighty percent (80%) participating interest in and the operatorship of this project. The farm-in agreement and transfer of operatorship on the project to Desco Inc. was approved by the DOE on November 8, 2016, with the Company retaining a twenty percent (20%) participating interest in the project. In 2019, Desco Inc. received DOE's approval for the extension of its work program up to 2022, which involved securing the permitting requirements for the project, NCIP certification and well site preparations for the drilling of two (2) exploratory wells. After having identified the drill site for an exploratory well, Desco, Inc. is currently preparing for the drilling of an exploratory well within the year. The Company is carried free in the preparatory development works leading to and up to the drilling of the first exploratory well of this project.

Equity Investments in VEPC and VINTER

The Company invested in Vintage EPC Company Limited - Thailand ("VEPC") and VTE International Construction Company Limited - Thailand ("VINTER") for a fifteen (15%) percent equity interest of said companies in 2018. VEPC and VINTER are the EPC Contractors for the 220MW Solar Power Project located in Minbu District, Magway Region, Myanmar, who were engaged by Green Earth Power (Myanmar) as the owner-developer of the project and the holder of the Power Purchase Agreement with the Myanmar Government's energy and power ministry. The design and construction of the project commenced in 2016 and was planned to be developed in four (4) phases of 50 MW for Phases 1, 2 and 3 and 70 MW for Phase 4. Phase 1 has been on commercial operations since September 2019. Currently, site preparation and pre-engineering and civil works are on-going for Phases 2 and 3 of the project.

Wind Energy Project, Mabini, Batangas

The Company, through its wholly owned subsidiary, Mabini Energy Corporation ("MEC"), has been awarded a Wind Energy Service Contract by the DOE on March 17, 2021 to explore, develop, and operate a wind energy power plant for a period of twenty-five (25) years, extensible for another twenty-five (25) years. The project shall be implemented under R.A.

9513 (Renewable Energy Act of 2008). The exploration area to be covered is 4,860 hectares situated in Mabini, Batangas.

Currently, the company is conducting a Wind Resource Assessment (“WRA”) campaign and is expected to be completed in one (1) year. Related permitting and licensing works are also on-going that are necessary for the installation of meteorological mast and wind measuring equipment that will be used in the WRA campaign.

Upon favorable result of the WRA campaign, a full feasibility study, preliminary engineering and design, and financial closure will be done in order to secure the declaration of commerciality of the plant from the DOE. Such approval by the DOE will lead to the construction, testing and commissioning of the plant. Commercial operation of the said plant is expected to be by year 2027.

Green Energy E-Transport Program

The Green Energy E-transport Program was designed to address the government’s thrust of promoting renewable energy and the modernization of public-utility vehicles, using electric buses powered by solar systems with power storage and E-charging facilities installed at retail gas stations. The solar energy generated by the solar systems will be stored in power wall batteries to be utilized by the retail stations to complement the electricity supply drawn from the grid. Apart from the solar systems, electric charging stations will be installed in the service stations to power the batteries of the modern electric buses that will replace the old jeepneys. This is designed to jumpstart the availability of e-charging networks for e-buses and other electric vehicles in the near future.

Presently, the Company is pursuing the installation of rooftop solar systems on selected retail gas stations in partnership with various oil companies.

Equity Investment in Filoil Energy Company

Filoil Energy Company, Inc. (FEC) is a Filipino-owned company incorporated on January 8, 2002 and is registered to engage in petroleum trading whether wholesale or retail through Filoil gasoline stations. The first Filoil station opened in Dasmarinas, Cavite in 2002 and the retail outlets grew in number with over 200 stations until mid-2016. FEC also managed and operated depot terminals strategically located nationwide, that supported and assured the supply of petroleum to Filoil stations as well as its other oil company clients.

FEC is the joint venture (JV) partner of Total Marketing Services, the Philippine subsidiary of Total France, resulting in the formation of three (3) operating joint venture companies, namely; (i) Filoil Logistics Company; (ii) Total Philippines, and (iii) La Defense Filipinas Holdings Incorporated, engaged in downstream petroleum activities and oil and gas business, including retail and marketing, supply, depot management and logistics and property holding. Under this JV, the downstream oil industry portfolio of FEC had grown even further with this business synergy, serving the JV’s own retail stations, its dealers and all other oil companies nationwide.

With the investment in FEC, the Company will come full circle from its involvement in the downstream oil and gas sector during the 1980's and will now again be involved in the downstream as well as in the midstream oil and gas sectors. With the entry of the Company, opportunities are open for FEC in bringing renewable energy systems into its operations with the aim of creating a new and improved business model with the use of renewable energy at the forefront.

Risk Management

In the Geothermal, Solar and Wind Energy business and the various investments of the Company, the Company is faced with the following risks, in order of importance:

- (a) Probability of Exploration and Development Success. Geothermal, Solar and Wind projects are inherently high-risk undertakings. There can be no assurance that the Company's activities will be successful in discovering commercially viable geothermal, solar or wind resources. Even if an apparently feasible resource is determined, there is no guarantee that it can be economically exploited. Despite the Company's reliance on advanced technology such as 3-D seismic data to improve the probability of success of discovery, geothermal, solar and wind energy operations are speculative businesses. Advanced technology, even with the correct interpretation, only assists in identifying the resource structures and does not ensure the certainty of the presence of commercially viable resources. Moreover, in geothermal operations, 3-D seismic data and other advanced technology require higher investments that may result in higher losses, should the drilling prove unsuccessful.

Risk of heavy financial losses if prospects would prove unsuccessful could be mitigated through:

Farming-Out of Interest: A Farm-Out Agreement is a contract whereby a third party agrees to acquire from a licensee an interest in a production license and the corresponding operating agreement for a consideration normally consisting of an undertaking to perform a specified work obligation in the drilling of one or more wells. Farming out is usually undertaken by the seller of interest as a source for funding or as part of the rationalization of a licensee's interests. The seller may want to dispose of areas or interests which are peripheral to its main operations or in which it has small equity holdings but would take up as much management time as a larger holding.

Spreading Exploration Risks through Joint Ventures in Several Exploration Blocks: Forming alliances and jointly bidding for the development of a range of opportunities in geothermal, solar and wind projects, mitigates exploration and development risks of a corporation as there is risk-sharing - the cost and responsibilities of drilling, development or production are spread over a number of entities. Joint ventures also enable companies to free up funds otherwise tied up in a single project and enable these companies to build a portfolio of prospects.

Exploring in Geological Proven Areas: The Company has been making investments and will continue to invest in geologically proven provinces only.

- (b) Operating Hazards of Exploratory Drilling Activities and Environmental Risks (for geothermal projects). Drilling operations may be delayed, curtailed, or subjected to operating and technical difficulties. Unexpected drilling conditions, adverse weather conditions, unanticipated pressure or formations, equipment breakdowns, industrial and environmental accidents and other such events may occur which may have adverse effects on the Company's operations and correspondingly on its financial performance and condition. Geothermal exploration, development and drilling activities will be subject to Philippine environmental laws and regulations. Normal exploration and drilling operations involve certain operating hazards such as explosions, cratering, well blowouts, uncontrollable flows of steam, natural gas or well fluids, releases of toxic gas, accidental leakages, formations with abnormal pressures, fires, pollution and other environmental perils and risks, any of which may subject the Company to extensive liability or loss of assets.

Operating risks in the exploration and development drilling and production phases are generally directly driven by standards in design, procurement and installation, operating procedures, and contingency planning. The Company, in its investment evaluation process, considers the presence and implementation of the following measures and strategies to mitigate risk exposures: (i) hiring of technically competent staff that are adept in utilizing state-of-the-art technology and could conduct effective evaluation work; and (ii) ensuring adherence to the various environmental laws and regulations, taking into account not only local but international expectations as well.

- (c) Volatility in Power Prices and Exchange Rate Risks. Revenues derived from successful operation of the projects and investments in energy related ventures will be affected by changes in power prices or charges. Power prices and investments are sensitive to changes in the global supply and demand conditions, forward selling activities, domestic and foreign government regulations, environmental trends, overall global economic conditions, and other macroeconomic and political factors that are beyond the Company's control. Furthermore, if revenues or investments are pegged to the US dollar, the Company is exposed to exchange rate risks given the volatility of the rate of exchange between the US dollar and Philippine peso.
- (d) Government Regulations and Approvals. Government action such as changes in regulations may affect the Company's business and eventual operating and financial performance. Government may limit access to prospective development areas, implement stricter environmental laws to protect human health and the environment, impose higher taxes and royalties, all of which may adversely affect the Company's financial performance.

For the risks mentioned in items (c) and (d) above, these risks could be mitigated through early identification systems of risk exposures to external threats such as changes in government regulations and changes in the geo-political environment of operating locations. The Company will continue to negotiate power price agreements with inputs from experts. The Company adheres to its policy of involving competent technical professionals in the preparation and negotiations of power price agreements. The Company will also continue to involve competent technical professionals in the preparation and negotiations of power purchase agreements for its projects.

Employees

The Company has fifteen (15) officers and employees, of which six (6) are executive officers, seven (7) are assigned as technical, project, accounting, administrative, IT and operations support staff and two (2) are assigned for utility and service staff. In the next twelve (12) months, the Company is expected to hire additional personnel or engage the services of consultants as may be needed and as the Company pursues further development of its existing projects. As the Company pursues additional renewable energy projects, project managers, and engineering, technical and other support personnel may be required for these projects.

(B) Properties

The Company and its subsidiary, Basic Diversified Industrial Holdings Inc., own several parcels of land located in Bolinao, Pangasinan, containing an aggregate gross area of about 426,361 square meters. The property is located approximately 4.3 kilometers southwest from the Bolinao-Bani Provincial Road and is best suited for agro-industrial land development.

The Company also owns parcels of land located at Tanay, Rizal with a total area of 35,000 square meters, near the town proper with good roads and is suitable for residential housing development or for an agricultural farm project.

The Company also owns a parcel of land located at Gutalac, Zamboanga del Norte with an area of approximately 22 hectares, suitable for agricultural farm development.

The Company used to own its office units at the 7th Floor of the Basic Petroleum Building located at Carlos Palanca St., Legaspi Village, Makati City. These office units have been sold as of the end of December 2019.

To date, the Company or its subsidiaries do not have any plan to own additional properties for its projects.

(C) Legal Proceedings

The Company or its subsidiaries and affiliates are not involved in any pending legal proceeding(s) relative to properties or property interests of the Company, in the last five (5) years.

PART II. SECURITIES OF THE COMPANY

(A) Market Price and Dividends Information

1) Market Information

The shares of stock of the Company are traded in the Philippine Stock Exchange. The Company's high and low closing prices for each quarter of years 2020 and 2021, and the first and second quarters of 2022, are as follows:

	High			Low		
	2022	2021	2020	2022	2021	2020
1 st Quarter	0.630	2.150	0.255	0.350	0.650	0.122
2 nd Quarter	0.470	1.090	0.189	0.350	0.720	0.140
3 rd Quarter		0.810	0.188		0.435	0.151
4 th Quarter		0.800	0.560		0.500	0.151

The last trading price of shares of the Company at close of trading as of June 30, 2022 was Php 0.37 per share, with a high of Php 0.38 per share and a low of Php 0.365 per share.

2) Holders

- a. The Company has only one (1) class of shares- common shares. The total number of holders of common shares of the Company is 6,535 holders, as of June 30, 2022.
- b. Top 20 Stockholders as of June 30, 2022:

<u>NAME</u>	<u>NUMBER OF SHARES HELD</u>	<u>PERCENTAGE</u> (To Total Outstanding Shares)
MAP 2000 Development Corporation	9,827,990,853	67.00%
PCD Nominee Corporation (Filipino)	2,855,426,036	19.46%
PCD Nominee Corporation (Foreign)	48,986,615	0.33 %
PCCI Securities Brokers, Inc.	450,000,000	3.06%
Unicapital, Inc.	450,000,000	3.06%
Meta Corporation Public Co. Ltd.	287,276,497	1.96%
BA Securities, Inc.	150,944,248	1.03%
SR Capital Holdings, Inc	150,000,000	1.02%
DSG Sons Group, Inc.	105,000,000	.71%
Samuel Uy	40,000,000	.27%
Engracio Ang, Jr.	24,000,000	.16%
Phases Realtors, Inc	20,266,002	.14%
Christodel Phils, Inc.	19,923,745	.13%
Jan Sharon Gaisano Tan	11,250,000	.07%
Oscar S. Reyes	7,510,000	.05%
Myrna Felinda B. Angeles	7,500,000	.05%
Vicky Chua	7,500,000	.05%
Marco Go	7,500,000	.05%
Jaime J. Martinez	7,500,000	.05%
Archivald Po	7,500,000	.05%
Heirs of Salvacion de Venecia	6,000,000	.04%

c. Public Float

The Company is in compliance with the minimum public ownership requirement prescribed under existing regulations of the Securities and Exchange Commission and the Philippine Stock Exchange. The Company's level of public float as of June 30, 2022 is 24.80% of its total issued and outstanding shares.

3) Dividends

- a. No cash/stock dividends have been declared in 2021 and 2020, as the Company continued to report losses for these years and no retained earnings were recorded from which dividends could be declared. The existing projects of the Company which have long gestation periods, are still in the pre-development stages, which prompted the Company to look for equity investments that can generate, in the short to medium terms, revenues that will beef up the retained earnings of the Company.
- b. There are no restrictions that limit the payment of dividends on common shares.

4) Recent Sales of Unregistered or Exempt Securities

a. Issuance of Shares to Subscribers of Delinquent Shares Auctioned on August 23, 2021

Of the 1,462,500,000 shares subscribed in 2007 to support the capital increase of the Company in 2007 from Php 500 Million to Php2.5 Billion, 990,000,000 shares have been paid. The remaining 472,500,000 shares were declared delinquent as of June 10, 2021 and were auctioned on August 23, 2021. Only 22,500,000 shares (the "auctioned shares") were sold to three (3) winning bidders at said auction sale. The total amount of the winning bids for the auctioned shares in the amount of Php6,122,736.16 were paid on August 23, 2021. The request for confirmation of exemption from registration of these 22,500,000 shares under Section 10.1 (c) of the Securities Regulation Code, as amended, has been submitted to SEC, and the application for listing of these shares has been submitted to PSE. Both request for confirmation of exemption from registration and application for listing are pending with the SEC and PSE.

b. Issuance of Shares to Meta Corporation Public Company Limited of Thailand

Meta Corporation Public Company Limited (formerly Vintage Engineering Public Company Limited), a publicly listed company registered in Thailand, and a stockholder of the Company, had earlier subscribed to 106,892,000 additional shares at the total subscription price of Php26,723,000.00, which were issued as of December 31, 2018. These shares were confirmed by the Securities and Exchange Commission as exempt transactions under said Section 10.1 (k) of the Securities Regulation Code, however, the application for listing of these shares is still pending with PSE.

On December 18, 2020, the Company subscribed to 180,384,497 shares at the total subscription price of Php45,096,124.25, which was paid on November 15, 2021. The

issuance of said shares is pending confirmation by the Securities and Exchange Commission (“SEC”) as an exempt transaction under Section 10.1 (k) of the Securities Regulation Code, and the application for listing of these shares has been submitted to and is likewise still pending with the PSE.

c. Issuance of Shares to Map 2000 Development Corporation

The Company and Map 2000 Development Corporation (M2DC) executed on December 18, 2020, a Memorandum of Agreement covering the subscription by M2DC to 9,827,990,853 primary shares of stock of the Company, to be issued out of the increase in the authorized capital stock of the Company from Php2.5 Billion to Php5 Billion, representing 67% of the issued and outstanding capital stock of the Company post-increase. The subscription was subject to the fulfillment of certain conditions, including the approval by the Securities and Exchange Commission (“SEC”) of the application for said increase in capital. On September 10, 2021, the SEC approved the capital increase of the Company to Php5 Billion. The total subscription price for the said shares of M2DC at par value per share of Php0.25 was fully paid in the amount of Php2,456,997,713.25 on December 10, 2021. These subscribed shares of M2DC represent 67% of the total outstanding capital stock of the Company, constituting more than majority control of the Company.

The Company has filed a request for confirmation by SEC of the exemption from registration of the subscribed shares of M2DC under Section 10.1 (i) of the Securities Regulation Code. Likewise, the Company has submitted its application for the listing of the said shares with the Philippine Stock Exchange. Both request and application are still pending with the SEC and PSE, respectively.

ANNEX 68-I Schedule
For the Abovementioned Shares
(For the Period ended June 30, 2022)

1. Gross and net proceeds as disclosed in the application for listing of the abovementioned shares with the Philippine Stock Exchange

Securities	Gross Proceeds	Net Proceeds*
1. Auctioned Shares of 22,500,000 shares	Php 6,122,736.16	Php5,489,206.96
2. Meta Corporation Tranche 3 shares of 180,384,497 shares	Php45,096,124.25	Php44,645,162.01
3. Map 2000 Development Corporation shares of 9,827,990,853 shares	Php2,800,977,393.11	Php2,773,606,437.59

*Expenses attributable to the issuance of the shares, such as DST, filing fees and legal fees are deducted from gross proceeds to arrive at the net proceeds.

2. Actual gross and net proceeds

Securities	Actual Gross Proceeds	Actual Net Proceeds
1.Auctioned Shares of 22,500,000 shares	Php6,122,736.16	Php5,489,206.96
2.Meta Corporation Tranche 3 shares of 180,384,497 shares	Php45,096,124.25	Php44,645,162.01
3.Map 2000 Development Corporation shares of 9,827,990,853 shares	Php2,800,977,393.11	Php2,773,606,437.59

3. Each expenditure item where the proceeds were used:

Securities	Expenditure Item	Amount
1.Auctioned Shares of 22,500,000 shares	General and administrative expenses	Php5,489,206.96
2.Meta Corporation Tranche 3 shares of 180,384,497 shares	Wind Power Project Expenses	-0-*
3.Map 2000 Development Corporation shares of 9,827,990,853 shares	Equity investment in Filoil Energy Corporation	Php2,773,606,437.59

* Proceeds of previous placements are still being applied to the wind power project, which is on-going Wind Resource Assessment.

(B) Description of Securities

The shares of the Company consist only one (1) class- common shares, which are voting shares, with a stated par value of Php0.25 per share. Each common share is equal in all respects to every other common share issued by the Company.

PART III. FINANCIAL INFORMATION

(A) Management’s Discussions and Analysis and Plan of Operation

(1) Plan of Operations for 2022

Wind Energy Operations

The wind energy project of the Company seizes the opportunities of the Department of Energy’s Philippine Energy Plan (PEP) 2017 –2040 and National Renewable Energy Plan (NREP) 2011-2030 target of a 2.1 GW additional capacity on wind development in Luzon by 2030. This project would institutionalize the Company’s first major renewable energy project on its own undertaking and further provides revenue-generating growth for the Company. The project has a potential capacity of 50 MW and will be expected to be commercialized by the 3rd quarter of the Year 2027. A set of an initial 10 wind power turbines is expected to be installed and operational based on the initial modeling done by a wind expert company on 22 July 2019. A set of Class 10 wind turbines manufactured by Siemens-Gamesa or Vestas wind turbines with heights of 120 meters can be used since the area has an average wind speed of 7.0 to 8.0 meters per second.

The identified wind energy project covers most of the Calumpan Peninsula, within the Municipality of Mabini, Batangas. The wind mast is to be situated on top of Mount Gulugod Baboy, at an elevation of 450m above sea level. The identified site has a good wind exposure from the prevailing southwest (SW) wind direction, and good access roads across and going to the project site. The potential grid interconnection point is within the 15 km distance.

Under the approved WESC, the Company is committed to undertaking a 5 Year Pre-Development Wind Work program shown below. After the Pre-Development Phase and after a viable wind resource is established, a Declaration of Commerciality would bring the contract into the Development Stage. The final cost of the project would be determined through a detailed engineering and development design to be undertaken by the Company.

For 2022, the Company will be focusing on the Wind Resource Assessment campaign of the project, as the result of this assessment would support and lend further credence to the viability of the project that would attract interested partners and investors.

Green Energy E-Transport Program

The program involves establishing partnerships between the Company or a designated subsidiary, the transport operator, and the station dealer forming the ecosystem. For 2022, to start the project, the Company will be focused on identifying its partners, executing the covering agreements and procurement of the solar and e-charging systems to be installed in the retail gas stations.

Geothermal Energy Operations

For 2022, the Company will continue to monitor developments in its remaining project, the Iriga Geothermal project, and the implementation of the work program as approved by the DOE, involving the drilling of at least two (2) exploratory wells, and as shall be undertaken by its operator, Desco Inc. The Company is carried free in the first exploratory well, thus all costs for the work program up to the drilling of the first well shall be borne by Desco, Inc.

Since the Company is carried free for one (1) exploratory well, the Company plans to retain its 20% participating interest in this project in the meantime, and will make the decision whether or not to pursue this project further after the drilling results of the first exploratory well is determined and verified. Should there be other parties interested in the project in the future, the Company may consider an opportunity to divest its participating interest in the project, on terms beneficial to the Company. The Company is also considering selling its stake in this project to enable the Company to focus on its other renewable and related energy opportunities.

Business Development

The Company continues to pursue business opportunities for the development of renewable energy resources whether in the Philippines or abroad. The Company plans to be a major renewable energy and power company and with this objective, the Company is tasked to develop a robust portfolio of renewable energy projects such as solar and wind energy projects, in the Philippines and abroad, that will provide the Company with a continuing stream of revenues in the short and mid-terms.

(1) Management's Discussion and Analysis of Financial Condition and Results of Operations for 2021 and the First and Second Quarters of 2022

A. Full fiscal years (Three years)

2021

For 2021, the Company's total assets stood at Php19.4 billion, an increase of Php18.9 billion from its previous year balance of Php482.9 million. Current assets with a 2021 balance of Php13.9 billion increased by Php13.8 billion from the balance of Php137.1 million in 2020. The increase in current assets is primarily attributable to the increases in cash and cash equivalents of Php1.7 billion, receivables of Php8.9 billion, and other assets of Php906.8 million as well as recognition in 2021 of inventories amounting to Php1.2 billion and non-current asset held-for-sale amounting to Php1.2 billion. Non-current assets increased by Php51 billion from Php345.7 million in 2020 to Php5.4 billion in 2021 primarily due to increases investments in associates and joint venture of Php131.8 million, investment properties of Php57.7 million, property and equipment of Php4.7 billion, and other non-current assets of Php212.6 million.

Total liabilities in 2021 closed at Php12.7 billion, an increase of Php122.6 billion from the balance of Php25.2 million in 2020. Current liabilities amounting to Php10.8 billion increased from the balance of Php19.6 million in 2020. Non-current liabilities amounting to Php1.8 billion increased from the balance of Php22.5 million in 2020. This was due to the increases in accounts payable and accrued expenses of 9.5 billion, income tax payable of Php5 million, lease liability of Php86.3 million, loans payable of Php2.2 billion, and net deferred tax liability of Php847 million.

Total equity recorded in 2021 was Php6.7 billion, an increase of Php6.2 billion from the balance of Php457.6 million in 2020. This was primarily due to the increases in capital stock of Php2.9 billion, additional paid-in capital of Php310.9 million, retained earnings of Php81.4 million, equity attributable to non-controlling interest of Php3 billion.

For 2021, revenue generated amounted to Php3.7 billion. Revenue for the year came from sales revenue of Php3.7 million and service revenue of Php25.2 million. Other income for the year 2021 amounted to Php276.6 million composed primarily of fair value adjustment on investment properties of Php24 million, interest income of Php7.1 million, foreign exchange gain of Php2.8 million, gain on bargain purchase of Php137.2 million, income from penalty on delayed payment of receivables of Php9.9 million, gain from insurance claim of Php1.9 million and unrealized gain from change in fair value of derivative asset and liability of Php2.5 million. Compared to 2020, revenue and other income in 2021 increased by Php3.9 million primarily because of the sales revenue and service revenues recognized during the year.

Cost and expenses for 2021 amounted to Php3.7 billion, Php3.6 billion of which is cost of sales and services, Php121.3 million is general and administrative expenses, Php11.7 million is share in net losses of associates, and Php25.9 million is interest expense. Compared to 2020, cost and expenses in 2021 increased by Php3.8 billion primarily because of the cost of sales and services recognized in 2021 of Php3.7 million.

For the year 2021, the Company recorded a consolidated net income of Php109.8 million, Php81.4 million of which is attributable to equity holders of the parent company and Php28.4 million to non-

controlling interest. Including net comprehensive loss of Php2 million, the total comprehensive income for the year amounted to Php107.8 million.

In 2021, despite the continued global economic situation due to the COVID-19 pandemic, the Company continued to explore opportunities for investments in various energy projects as well as explore possible partnership that could bring value to the company.

The Company was awarded the Wind Energy Service Contract (“WESC”) for the Mabini Wind Power Project located in Mabini, Batangas. The Mabini Wind Power Project is in the development stage and is currently conducting the Wind Resource Assessment (“WRA”) in the service area as well as other preliminary technical, commercial and permitting works necessary to bring the project to commercial operations.

In September, 2021, MAP 2000 Development Corporation (“M2DC”) acquired least 67% of the outstanding capital stock of the Company. M2DC’s acquisition of 67% interest in the Company opened various investment opportunities for the Company in the oil and gas sector and further opportunities in the renewable energy sector.

In December 2021, the Company acquired 60% ownership interest in Filoil Energy Company Incorporated (“FEC”). The acquisition of 60% interest in FEC provides indirect interest in the joint venture companies of FEC with Total Marketing Services, the Philippine subsidiary of Total France. The joint venture companies of FEC with TMS are Filoil Logistics Corporation, Total Philippines, and La Defense Filipinas Holdings Incorporated.

The Company is also involved in the Green Energy E-Transport Program (“GEEP”) which intends to revolutionize and modernize the existing Public Utility Transport through the use of environmentally friendly energy sources and vehicles. The Company’s role in GEEP is primarily to install solar energy producing facilities and charging stations for electric vehicles for public transport.

2020

For 2020, the Company’s total assets stood at Php482.9 million, a decrease of Php117.7 million from its previous year balance of Php600.6 million. Current assets with a 2020 balance of Php131.6 million decreased by Php35.7 million from the balance of Php167.3 million in 2019. The decrease in current assets is primarily attributable to the decrease in cash and cash equivalents of Php33 million which was used primarily for general and administrative expenses. Non-current assets decreased by Php82 million from Php433.2 million in 2019 to Php351.2 million in 2020 primarily due to the decreased in investment in associates of Php75.1 million and decreased in financial assets at FVOCI of Php18.6 million. The decreases in noncurrent assets was partially offset by the increase in value of investment properties by Php11.5 million.

Total liabilities in 2020 closed at Php25.2 million, a decrease of Php17.6 million from the balance of Php42.8 million in 2019. Current liabilities amounting to Php19.5 million decreased by Php0.9 million from the balance of Php20.3 million in 2018. Non-current liabilities amounting to Php5.8 million decreased by Php16.7 million from the balance of Php22.5 million in 2019. This was due the decrease in net deferred tax liabilities of Php8.2 million and decrease in net retirement benefit liability of Php8.6 million.

Total equity recorded in 2020 was Php457.6 million, a decrease of Php100.1 million from the balance of Php557.7 million in 2019. This was primarily due to the increase in deficit of Php63.2 million due to the losses incurred during the year and further decrease in other equity reserves of Php35.6 million.

For 2020, revenue generated amounted to Php13.9 million. Revenue for the year mostly came from the fair value adjustment on investment properties of Php11.5 million, interest income of Php2 million, and management fee of Php0.3 million. Compared to 2019, revenue in 2020 decreased by Php9.5 million mainly because of the decrease in fair value adjustment on investment properties of Php2.3 million, and decrease in interest income of Php0.9 million.

Cost and expenses for 2020 amounted to Php80.3 million, Php43.4 million of which is general and administrative expenses, Php34.9 million is share in net loss of associates, and Php1.9 million is foreign exchange losses. Compared to 2019, cost and expenses in 2020 decreased by Php143 million primarily because of the decrease in general and administrative expenses of Php24.9 million, recognition of impairments of deferred exploration costs of Php114.6 million in 2019, recognition of loss on sale of properties and equipment of Php9.9 million in 2019, decrease in losses on write-off of receivables of Php3.9 million, and recognition of impairment of other assets of Php3.3 million in 2019.

For the year 2020, the Company recorded a consolidated operating loss of Php63.3 million, Php63.2 million of which is attributable to equity holders of the parent company and Php0.1 million to non-controlling interest. Including net comprehensive loss of Php36.8 million, the total comprehensive loss for the year amounted to Php100.1 million.

The aforementioned losses in 2020 were attributable to the absence of a steady flow of revenues from projects and investments of the Company.

In 2020, despite the current global economic situation due to the COVID-19 pandemic, the Company continued to explore opportunities for investments in various energy projects which are shovel-ready or about to commence operations or otherwise have shorter gestation period as well as explore possible partnership that could bring value to the company.

The Company also signed a Memorandum of Agreement (“MOA”) with MAP 2000 Development Corporation (“M2DC”) in December 2020 for the acquisition of at least 67% of the outstanding capital stock of the Company. The investment of M2DC for at least 67% interest in the Company is subject to the compliance by the Company with the conditions precedent and other representations, warranties and undertakings of the Company as stipulated in the aforementioned MOA.

2019

For 2019, the Company’s total assets stood at Php600.6 million, a decrease of Php184.3 million from its previous year balance of Php784.9 million. Current assets with a 2019 balance of Php167.3 million decreased by Php22.8 million from the balance of Php190.1 million in 2018. The decrease in current assets is primarily attributable to the decrease in receivables of Php95 million which was offset by the increases in cash and cash equivalents of Php64.8 million, refundable deposits of Php6.3 million and other current assets of Php1.1 million. Noncurrent assets decreased by Php161.5 million from Php594.8 million in 2018 to Php433.2 million in 2019 primarily due to the impairment of deferred exploration cost of Php114.3 million, disposal of property and equipment costing Php 39.7 million, decreased in investment in associates of Php13.7 million and decreased in other noncurrent assets of Php10.6 million. The decreases in noncurrent assets was partially offset by the increase in value of investment properties by Php13.8 million and financial assets at FVOCI of Php2.9 million.

Total liabilities in 2019 closed at Php42.8 million, a decrease of Php40.8 million from the balance of Php83.7 million in 2018. Current liabilities amounting to Php20.3 million decreased by Php38.6 million from the balance of Php58.9 million in 2018. This was primarily due to the settlement of the Php50 million short-term loan which was partially offset by the increase in accrued expenses and other payables. Non-current liabilities amounting to Php22.5 million decreased by Php2.3 million

from the balance of Php24.8 million in 2018. This was due the decrease in deferred income tax liabilities of Php8.7 million which was partially offset by the increase in accrued retirement benefits payable of Php6.5 million.

Total equity recorded in 2019 was Php557.7 million, a decrease of Php143.5 million from the balance of Php701.2 million in 2018. This was primarily due to the decrease in other equity reserves of Php9 million and the decrease in retained earnings of Php134.8 million due to the losses incurred during the year.

For 2019, revenue generated amounted to Php23.4 million. Revenue for the year came from the fair value adjustment on investment properties of Php13.8 million, management fees of Php6.7 million, and interest income of Php2.9 million. Compared to 2018, revenue in 2019 decreased by Php 26.5 million mainly because of the share in net income of Php14.3 million recognized in 2018, decrease in fair value adjustment on investment properties of Php7.6 million and decrease in foreign exchange gains of Php9.1 million which were partially offset by the increases in interest income of Php1.2 million and management fee of Php3.8 million.

Cost and expenses for 2019 amounted to Php223.3 million, Php114.6 million of which is impairment on deferred exploration costs, Php9.9 million is loss on sale of property and equipment, Php3.9 million is loss on write-off of receivables, Php3.3 million is impairment on other assets, Php68.4 million is general and administrative expenses, Php22.1 million is share in net loss of associates, and Php 886 thousand is interest expense. Compared to 2018, cost and expenses in 2019 increased by Php146.5 million primarily because of the impairment of deferred exploration costs, loss on sale of property and equipment, write-off of receivables, impairment of other assets, share in net loss of associates and increase in general and administrative expenses of Php12.4 million.

For the year 2019, the Company recorded a consolidated operating loss of Php197.8 million, Php198.1 million of which is attributable to equity holders of the parent company and Php0.3 million to non-controlling interest. Deducting net comprehensive income of Php36.2 million, the total comprehensive loss for the year amounted to Php161.6 million.

The aforementioned losses in 2019 were attributable to the absence of a steady flow of revenues from projects and investments of the Company and the impairment of deferred exploration costs in relation to the withdrawal from or acceptance of termination of the Company's various energy service contracts.

In 2019, the Company continues to explore opportunities for investments in various energy projects which are shovel-ready or about to commence operations or otherwise have shorter gestation period, within the country and abroad.

B (1) Interim period – 1st Quarter of 2022 (Unaudited as of March 31, 2022)

For the quarter ending March 31, 2022, the Company recorded total revenue of Php18.1 billion and cost of sales and services of Php17.6 billion resulting to a gross profit of Php511.5 million. Other income and expense for the quarter ending March 31, 2022 were at Php315.5 million and provision for income tax of Php34.5 million was recognized resulting to a net income before tax of Php196.1 million and net income after tax of Php161.6 million.

Total revenue for the 1st quarter of 2022 of Php18.1 billion was from sale of goods and services for the quarter. Cost and expenses for the 1st quarter of 2022 of Php17.8 billion was primarily from cost of sales of goods and services amounting to Php17.6 million.

Total assets as of March 31, 2022 stood at Php32.1 billion an increase of Php12.8 billion from Php19.4 billion as of December 31, 2021. Current assets, composed mostly of cash and cash equivalents amounting to Php2.2 billion, receivables amounting to Php11.5 billion, inventories amounting to Php9.1 billion, noncurrent assets held for sale of Php1.7 billion and other current assets amounting to Php992.6 million, increased by Php11.5 billion, primarily due to increase in inventories of Php7.9 billion and receivables of 2.5 billion. Non-current assets increased by Php1.3 billion. The increase was primarily due to the increase in other noncurrent assets of Php1.2 billion.

Total liabilities increased by Php10.3 billion from Php12.7 billion as of December 31, 2021 to Php22.9 billion as of March 31, 2022 primarily due to increase in loans payable of around Php13.7 billion which was partially offset by decreases in trade and other payables and deferred tax liability.

Total equity attributable to equity holders of the parent company as of March 31, 2022 stood at Php6.11 billion an increase of Php2.4 billion from Php3.7 billion as of December 31, 2021. This was primarily due to the increase in other equity reserves of Php2.3 billion and decrease in deficit of Php92 million.

The interim financial report is in compliance with generally accepted accounting principles. The same accounting policies and methods of computation were followed in the interim financial statements, as compared with the most recent audited financial statements, which are as of December 31, 2021.

B (2) Interim period – 2nd Quarter of 2022 (Unaudited as of June 30, 2022)

For the period ending June 30, 2022, the Company recorded total revenue of Php36.7 billion and cost of sales of Php35.9 billion resulting to a gross profit of Php851.2 million. Other income and expense for the period ending June 30, 2022 were at Php455.7 million resulting in an income before income tax of Php395.5 million. Net income for the period ending June 30, 2022 amounted to Php305 million after provision for income tax of Php90.4 million.

Total revenue for the 2nd quarter of 2022 was Php18.7 billion and cost of sales was Php18.3 billion resulting in a gross profit for the quarter of Php339.7 million. Other income and expenses for the 2nd quarter of 2022 was Php140.3 million resulting in an income before income tax of Php199.4 million for the quarter. Net income for the 2nd quarter of 2022 was Php143.5 million after deducting provision for income tax of Php55.9 million.

Total assets as of June 30, 2022 stood at Php28.1 billion an increase of Php8.7 billion from Php19.4 billion as of December 31, 2021. Current assets, composed mostly of cash and cash equivalents amounting to Php2.3 billion, receivables amounting to Php11.2 billion, inventories amounting to Php7.4 billion, noncurrent assets held for sale of Php1.2 billion and other current assets amounting to Php981.8 million, increased by Php9 billion, primarily due to increases in inventories of Php6.2 billion, receivables of 2.3 billion and cash and cash equivalents of Php524.3 million. Non-current assets decreased by Php335.8 million primarily due to the decreases in property and equipment of Php259.1 million, financial assets at FVOCI of Php27 million and other non-current assets of Php54.4 million.

Total liabilities increased by Php8.5 billion from Php12.7 billion as of December 31, 2021 to Php22.1 billion as of June 30, 2022 primarily due to increase in trade and other payables of Php9.3 billion which was partially offset by the decreases in loans payable of Php740.2 million, net deferred tax liability of Php27.1 million, lease liability of Php59.9 million and income tax payable of Php5 million.

Total equity attributable to equity holders of the parent company as of March 31, 2022 stood at Php6.11 billion an increase of Php2.4 billion from Php3.7 billion as of December 31, 2021. This was primarily due to the increase in other equity reserves of Php2.3 billion and decrease in deficit of Php92 million.

The interim financial report is in compliance with generally accepted accounting principles. The same accounting policies and methods of computation were followed in the interim financial statements, as compared with the most recent audited financial statements, which are as of December 31, 2021.

C. Key Performance Indicators

The following table shows the top Key Performance Indicators for the past three (3) years and as of 1st Quarter and 2nd Quarter, 2022:

Key Performance Indicators					
	2022 Q2	2022 Q1	2021	2020	2019
Return on Investment	4.47%	3.29%	0.77%	-3.12%	-7.86%
Net Profit Margin	0.83%	0.89%	2.91%	-466.35%	-639.83%
Investment in Projects, Non-Petroleum	0.88%	8.00%	1.26%	38.57%	29.09%
Investment in Wells & Other Facilities	0.05%	0.02%	0.03%	1.25%	1.00%
Current Ratio	1.16:1	1.18:1	1.29:1	7.01:1	8.23:1
Asset Turnover	154.90%	56.25%	40.54%	2.63%	10.40%
Solvency Ratios					
Debt to Equity Ratio	303.96%	375.37%	189.11%	5.52%	7.68%
Asset to Equity Ratio	403.96%	525.52%	289.11%	105.52%	107.68%
Interest Coverage Ratio	513.40%	653.22%	552.57%	NA	NA

ROI (Net Income/Average Stockholders' Equity) measures the profitability of stockholders' investment. Profit Margin (Net Income/Net Revenue) measures the net income produced by each peso of revenue. Investment in Projects as a % of Total Assets, measures how much the Company invested in its committed work programs. Current Ratio (Current Assets/Current Liabilities) measures the short-term debt paying ability of the Company. Asset Turnover (Net Revenue/Average Total Assets) measures how efficiently assets are used to produce profit.

ROI was 4.47 in the 2nd quarter of 2022, 3.29 in the 1st quarter of 2022, 0.77% in 2021, -3.12% in 2020, and -7.86% in 2019. The reversal from negative rates in 2020 and 2019 to positive rates in the 1st quarter of 2022 and 2021 were due to the net income recognized in the 1st quarter of 2022 and 2021.

Profit Margin was 0.83% in the 2nd quarter of 2022, -0.89% in the 1st quarter of 2022, 2.91% as of 2021, -455.04% in 2020, and -844.43% in 2019. Like in the previous paragraph, the reversal from negative rates in 2020 and 2019 to positive rates in the 1st quarter of 2022 and 2021 were due to the net income recognized in the 1st quarter of 2022 and 2021.

Investment in Non-Petroleum Projects as a % of Total Assets decrease to 0.88% in the 2nd quarter of 2022 from 8.00% in the 1st quarter of 2022 and was at 1.26% in 2021, 38.57% in 2020 and 29.09% in 2019.

Investment in Wells and Other Facilities as a % of Total Assets was 0.05% in the 2nd quarter of 2022, 0.02% in the 1st quarter of 2022, 0.03% in 2021, 1.25% in 2020 and 1% in 2019.

Current ratio was 1.16:1 in the 2nd quarter of 2022, 1.18:1 in the 1st quarter in 2022, 1.29:1 in 2021, 7.01:1 in 2020 and 8.23:1 in 2019 . The decrease in ratio was primarily due to the higher increase in current liability compared to current assets.

Asset Turnover was 154.90% in the 2nd quarter of 2022, 56.25% in the 1st quarter of 2022, 40.54% in 2021, 2.63% in 2020 and 10.40% in 2019. The increases in ratio was primarily due to the increases in revenue in 2021 and 2022.

Debt to Equity Ratio was 303.96% in the 2nd quarter of 2022, 375.37% in the 1st quarter of 2022, 189.11% in 2021, 5.52% in 2020 and 7.68% in 2019. The increase in ratio was primarily due to the increase debt for 2021 and 2022.

Asset to Equity Ratio was 403.96% in the 2nd quarter of 2022, 525.52% in the 1st quarter of 2022, 289.11 in 2021, 105.52% in 2020 and 107.68% in 2019. The increases in ratio in 2022 and 2021 from 2020 and 2019 was due to the increases in asset relative to equity.

Interest Coverage Ratio was 513.40% in the 2nd quarter of 2022, 653.22% in the 1st quarter of 2022 and 552.57% in 2021.

Key Variable and Other Qualitative and Quantitative Factors (Last Three Fiscal Years and Interim Periods up to June 30, 2022)

There are no events subsequent to the end of the reporting period that have not been reflected in the financial statements for the period.

There are no changes in the composition of the company during the period, including business conditions, acquisition or disposal of subsidiaries and long-term investments, restructurings, and discontinuing operations.

There are no known trends, events or uncertainties that will have a material impact on the liquidity of the Company.

There are no events that will trigger direct or contingent financial obligations that are material to the Company, including any default or acceleration of an obligation.

There are no material off-balance sheet transactions, arrangements, obligations, (including contingent obligations), and other relationships of the Company with unconsolidated entities or other persons created during the reporting period.

There are no material commitments for capital expenditures.

There are no known significant elements of revenues/income or loss from continuing operations.

The causes for any material changes (5% of the relevant accounts or such lower amount, which the Company deems material on the basis of other factors) from period to period which include vertical and horizontal analysis of any material item, have been presented in this report.

There are no seasonal aspects that have a material effect on the financial conditions or results of operations of the Company.

D. Comparative Analysis

Second Quarter of 2022 (Interim Unaudited) vs Fiscal Year 2021 Results of Operations

For the period ended June 30, 2022, the Company recorded total revenue of Php36.7 billion, an increase of Php14.3 billion compared to the revenue recognized for the year ended December 31, 2021 of Php3.7 billion. Cost of sales of goods and services for the quarter ended March 31, 2022 was at Php17.6 billion and increase of Php13.9 billion from Php3.7 billion recognized at the year ended December 31, 2021. Gross profit increased to Php511.5 million in the 1st quarter of 2022 from Php90.7 million at the end of 2021.

Other income for the quarter ended March 31, 2022 was at Php3.6 million, a decrease of Php181.9 million from Php185.5 million at the end of 2021. The decrease is primarily attributable to the gain on bargain purchase of Php137.2 million, income from penalty on delayed payment of receivables of Php9.9 million, foreign exchange gains of Php2.8 million, gain from insurance claim of Php1.9 million, unrealized gain from change in fair value of derivative asset and liability of Php2.4 million, fair value adjustment of investment property of Php24 million.

Expenses for the 1st quarter of 2022 was at Php319 million compared to Php159.1 million at the end of 2021. The increase of Php159.9 million is primarily due to the increase in general and administrative expenses of Php150.3 million and increase in interest expense of Php9.6 million.

The Company recorded a consolidated net income of Php161.6 million for the quarter ended March 31, 2022, an increase of Php51.8 million compared to the consolidated net income recognized at year ended December 31, 2021 of Php109.8 million.

Second Quarter, 2022 (Interim Unaudited) vs. Second Quarter, 2021 Results of Operations

For the quarter ended June 30, 2022, the Company recorded total revenue of Php18.7 billion and cost of sales of goods and services of Php18.3 billion for a gross profit margin of Php339.7 million. There was no revenue and cost of sales recognized in the same quarter of the previous year 2021.

Other income and expenses for the quarter ended June 30, 2022 was at Php140.3 million compared to Php18.4 million in the 2nd quarter ended June 30, 2021. The increase of Php121.9 million is primarily due to the increases in general and administrative expenses of Php77.8 million and finance costs recognized in the 2nd quarter of 2022 of Php60.2 million. The increases was partially offset by the increase in share in net income of associates and joint venture of Php17.5 million.

The Company recorded a net income on a consolidated basis of Php143.5 million for the quarter ended June 30, 2022 as compared to a net operating loss of Php18.4 million for the quarter ended June 30, 2021.

First Quarter of 2022 (Interim Unaudited) vs Fiscal Year 2021 Results of Operations

For the quarter ended March 31, 2022, the Company recorded total revenue of Php18.1 billion, an increase of Php14.3 billion compared to the revenue recognized for the year ended December 31, 2021 of Php3.7 billion. Cost of sales of goods and services for the quarter ended March 31, 2022 was at Php17.6 billion and increase of Php13.9 billion from Php3.7 billion recognized at the year ended December 31, 2021. Gross profit increased to Php511.5 million in the 1st quarter of 2022 from Php90.7 million at the end of 2021.

Other income for the quarter ended March 31, 2022 was at Php3.6 million, a decrease of Php181.9 million from Php185.5 million at the end of 2021. The decrease is primarily attributable to the gain on bargain purchase of Php137.2 million, income from penalty on delayed payment of receivables of Php9.9 million, foreign exchange gains of Php2.8 million, gain from insurance claim of Php1.9 million, unrealized gain from change in fair value of derivative asset and liability of Php2.4 million, fair value adjustment of investment property of Php24 million.

Expenses for the 1st quarter of 2022 was at Php319 million compared to Php159.1 million at the end of 2021. The increase of Php159.9 million is primarily due to the increase in general and administrative expenses of Php150.3 million and increase in interest expense of Php9.6 million.

The Company recorded a consolidated net income of Php161.6 million for the quarter ended March 31, 2022, an increase of Php51.8 million compared to the consolidated net income recognized at year ended December 31, 2021 of Php109.8 million.

First Quarter, 2022 (Interim Unaudited) vs. First Quarter, 2021 Results of Operations

For the quarter ended March 31, 2022, the Company recorded total revenue of Php18.1 billion and cost of sales of goods and services of Php17.6 billion for a gross profit margin of Php511.5 million.

Other income and expenses for the quarter ended March 31, 2022 was at Php315.5 million compared to Php19.3 million in the first quarter ended March 31, 2021. The increase of Php296.1 million is primarily due to the increases in general and administrative expenses of Php259.7 million, share in net loss of associates and joint venture of Php9.1 million, and finance costs recognized in the 1st quarter of 2022 of Php35.4 million.

The Company recorded a net income on a consolidated basis of Php161.6 million for the quarter ended March 31, 2022 as compared to a net operating loss of Php17.9 million for the quarter ended March 31, 2021.

2021 vs. 2020 Results of Operations

For the year ended December 31, 2021, the Company recorded total revenue of Php3.75 billion, an increase of Php3.7 billion compared to the revenue booked as of the year ended December 31, 2020 of Php0.3 million. The increase was mainly due to sales of goods and services recognized for the year ended December 31, 2021 of Php3.75 billion. Cost of sales of goods and services for the year ended were around Php3.65 and gross profit of Php511.5 million was recognized for the year ended December 31, 2021 compared to Php0.3 million recognized in the previous year ended December 31, 2020.

Other income for the year 2021 amounted to Php185.5 million, an increase of Php171.9 million from other income recognized in 2020 of Php13.9 million. The increase is primarily attributable to gain on bargain purchase of Php137.2 million, income from penalty on delayed payment of receivables of Php9.9 million, foreign exchange gains of Php2.8 million, gain from insurance claim of Php1.9 million, unrealized gain from change in fair value of derivative asset and liability of Php2.4 million, increase in fair value adjustment of investment property of Php12.5 million, and increase in interest income of Php5.1 million.

Expenses for the year 2021 amounted to Php159.1 million, an increase of Php78.8 million from Php80.3 million in 2020. The increase is primarily due to the increase in general and administrative expenses of Php77.9 million and interest expense of Php25.9 million recognized in 2021. The increase was partially offset by the decrease in share in net losses of associates of Php23.2 million.

The Company recorded a net income on a consolidated basis of Php109.8 million and a total comprehensive income of Php107.8 million for the year ended 2021 as compared to a net operating loss of Php63.3 million and total comprehensive loss of Php100.1 million for the year ended 2020.

2020 vs. 2019 Results of Operations

For the year ended December 31, 2020, the Company recorded total revenue of Php13.92 million a decrease of Php9.5 million compared to the revenue booked as of the year ended December 31, 2019 of Php23.43 million. The decrease was mainly due to the decrease in fair value adjustment on investment properties of Php2.31 million, decrease in management service fees of Php6.42 million, and decrease in interest income of Php0.9 million.

Costs and expenses for the year ended December 31, 2020 amounted to Php80.29 million, a decrease of Php143.03 million from costs and expenses booked for the year ended December 31, 2019 of Php223.31 million. The decrease was mainly due to the decrease in impairment loss on deferred exploration costs of Php114.55 million, decrease in loss on sale of property and equipment of Php9.91 million, decreases in write-off of receivables of Php3.9 million, decrease in impairment of other assets of Php3.25 million, and decrease in G&A expenses of Php24.94 million. The decreases in cost and expenses was partially offset by the increase in share in net loss of associates of Php12.85 million.

The Company recorded a net operating loss on a consolidated basis of Php63.35 million and a total comprehensive loss of Php100.11 million for the year ended 2020 as compared to a net operating loss of Php197.81 million and total comprehensive loss of Php161.61 million for the year ended 2019.

E. Changes in and disagreements with accountants on accounting and financial disclosures

There are no disagreements with the Corporation's external auditors on any accounting principles or practices, and financial statement disclosures or auditing scope or procedure in the 2021 audited financial statements of the Corporation.

The accounting policies adopted are consistent with those of the previous financial reporting year, except that the Corporation has adopted the following amended Philippine Financial Reporting Standards (PFRS):

- Amendment to PFRS 16, Leases - COVID-19-Related Rent Concessions beyond June 30, 2021 –

In 2020, PFRS 16 was amended to provide practical expedient to lessees from applying the requirements on lease modifications for eligible rent concessions that is a direct consequence of COVID-19 pandemic. A lessee may elect not to assess whether eligible rent concessions from a lessor is a lease modification. A lessee that makes this election account for any change in lease payments resulting from the COVID-19 related rent concession the same way it would account for a change that is not a lease modification, e.g., as a variable lease payment. This amendment is effective for annual reporting periods beginning on or after June 1, 2020, with earlier application permitted, and covers eligible rent concessions until June 30, 2021. The Group applied the practical expedient in its financial statements for the year ended December 31, 2020. Due to continuing impact of the pandemic, another amendment to PFRS 16 was issued in 2021, which allows lessees to extend the application of the practical expedient regarding COVID-19-related rent concessions to reduction in lease payments that are due on or before June 30, 2022. The amendment is effective for annual reporting periods beginning on or after April 1, 2021 but earlier application is permitted. The 2021 amendment is mandatory for entities that elected to apply the previous amendment. Accordingly, the Corporation and its subsidiaries have applied the amendment in the current year financial statements.

Under prevailing circumstances, the adoption of the foregoing amendment to the PFRS did not have any material effect on the consolidated financial statements of the Corporation and its subsidiaries.

PART IV MANAGEMENT AND CERTAIN SECURITY HOLDERS

(A) Directors and Officers

(1) The following are the directors of the Corporation as of June 30, 2022:

<u>Name</u>	<u>Length/Period of Service</u>
Ramon F. Villavicencio	December 15, 2021 up to the present
Manuel Z. Gonzalez	May 12, 2021 up to the present
Oscar L. de Venecia, Jr.	1999-2006; March 30, 2007 up to the present
Beatrice Jane L. Ang	October 23, 2020 to the present
Reynaldo D. Gamboa	May 12, 2021 up to the present
Kim S. Jacinto-Henares	May 12, 2021 up to the present
Ramon L. Mapa	1976 up to the present
Jaime J. Martinez	October 10, 2007 up to the present

His earlier work included stints as Geologist in various exploration and mining companies including PNOC – Exploration Corporation, Semirara Coal Corporation and Jasra Kutei Basin Ltd. in Indonesia, among others. He is also concurrently a Director of First Exploration and Development Services, a technical consultancy firm.

He attended the seminars on corporate governance conducted by SGV & Co. from 2016-2019. He attended the corporate governance seminar conducted by the Institute of Corporate Directors for directors and officers of listed companies in December, 2021. He obtained his Bachelor of Science degree in Geology from the University of the Philippines in 1978, and has earned MBA units from the Ateneo de Manila University. He has taken the Management Development Program from the Asian Institute of Management in 1994, and an MS in Computer Science (pending thesis) from the AMA Computer College in 2001.

Alain S. Pangan, 43 years old, Filipino, a Certified Public Accountant, was engaged as Vice President for Finance of the Corporation, effective January 2018 and holds that position to the present. Prior to joining the Company, he was the Investment and Treasury Manager of Enfinity Asia Pacific Holdings Limited – Manila ROHQ and Enfinity Philippines Technology Services, Inc., a renewable energy company with international activities in solar and wind energy, for more than three (3) years. He has more than seven (7) years of audit, compliance and advisory work with reputable Philippine audit/advisory firms.

He attended the seminars on corporate governance conducted by SGV & Co. in 2018 and 2019. He attended the corporate governance seminar conducted by the Institute of Corporate Directors for new directors and officers of listed companies in December, 2021. He obtained his Bachelor of Science degree in Accountancy from the Far Eastern University.

Angel P. Gahol, 68 years old, Filipino, is the Assistant Vice President- Legal Department of the Corporation since August 15, 2006. He is the Assistant Corporate Secretary and Compliance Officer of the Corporation. He has been the Legal and Human Resources Manager of the PHINMA's industrial estate, Bacnotan Industrial Park Corporation and Bacnotan Steel Industries, Inc. from 1997 to 2002 and of the mini-steel mill plant project located in Calaca, Batangas as HRD Manager on a concurrent basis. He has been with Bacnotan Consolidated Industries, Inc. for eight years as Legal Assistant and with PHINMA's Legal Department for more than seven years as Assistant Legal Counsel.

He attended the seminars on corporate governance conducted by SGV & Co. from 2016-2019 and has attended continuing legal education programs for the practice of law. He attended the corporate governance seminar conducted by the Institute of Corporate Directors for new directors and officers of listed companies in December, 2021. He obtained his degree in Bachelor of Arts, major in Economics, from the University of Santo Tomas in 1973 and his degree in Bachelor of Laws from the same university in 1979.

Dominique P. Pascua, 36 years old, Filipino, is the Compliance Officer of the Corporation starting July 29, 2021. He is a Junior Partner at the Calleja Peralta Jimenez San Luis Uy & Ulibas Law Firm (Calleja Law Firm); prior to his appointment as the Company's Compliance Officer, he served as the Legal Manager for Filoil Logistics Corporation from 2016 to 2020. He has also been serving the Filoil group of companies for more than seven years as its Assistant Legal Counsel.

He has attended continuing legal education programs for the practice of law and he attended the corporate governance seminar conducted by the Institute of Corporate Directors for new directors and officers of listed companies in December, 2021. He also attended the certification course for Compliance Officers conducted by the Center for Global Best Practices from March to April, 2022. He obtained his degree in Bachelor of Arts, major in Consular and Diplomatic Affairs, from the De La Salle College of Saint Benilde in 2004 and his degree in Bachelor of Laws from Far Eastern University in 2010.

(2) SIGNIFICANT EMPLOYEES

The key officers of the Corporation who are expected to make a significant contribution to the business of the Corporation consist of the above-named directors holding executive positions and officers. To retain these key officers, the employee benefits of the Corporation as defined in its Personnel Manual, may be upgraded when warranted by an improved financial condition of the Corporation, to make these benefits competitive with the industry.

(3) FAMILY RELATIONSHIPS

The Chairman of the Board, Ramon F. Villavicencio, is the father of Rafaelito N. Villavicencio, the Chairman of Map 2000 Development Corporation, which owns 67% of the outstanding and issued shares of the Corporation as of June 30, 2022. Other than this family relationship, there are no family relationships within the fourth civil degree known to the Corporation among the directors, nominees and executive officers of the Corporation.

(4) INVOLVEMENT IN ANY LEGAL PROCEEDINGS

The Corporation is not aware of any bankruptcy proceedings filed against any of its directors or executive officers, nor of any criminal conviction or final judgment barring or limiting any business involvement or any order or judgment subjecting said directors or executive officers, or a violation of a securities or commodities law or regulation filed against any of its directors or executive officers, during the past five (5) years ending May 31, 2022

(B) Executive Compensation

Compensation of Directors and Executive Officers

1) Per Diems of Directors

The Directors of the Corporation do not receive compensation from the Corporation, except for per diems for attendance at Board and Committee Meetings fixed at Php 20,900.00 and Php 10,450.00 per attendance, respectively, for 2022, Php 20,000.00 and Php10,000.00, respectively, for 2021 and Php 17,325.00 and Php 8,663.00, respectively, for 2020.

The following table shows the amount of per diems received by directors for the first half of 2022, and for the full years of 2021 and 2020. In May, 2021, new directors were elected as members of the Board, namely: Directors Manuel Z. Gonzalez, Reynaldo D. Gamboa, Kim S. Jacinto-Henares and Ma. Rosette Geraldine L. Oquias, replacing the directors who have resigned. The table for 2020 per diems shows the per diems received by directors who were re-elected in 2021, excluding the late Chairman Oscar C. de Venecia, who passed away in 2021.

Except for the stock option plan discussed below and the existing retirement plan for officers and employees of the Corporation, there is no other existing compensatory plan or arrangement covering bonuses, profit-sharing, warrants, options and other rights for directors and officers of the Corporation, or which will arise from the resignation, retirement, expiration of term of employment, change in control or change in the officer's responsibilities.

A stock option plan was approved by the stockholders at the 2007 annual meeting of stockholders, whereby directors and members of the Advisory Board, officers and selected employees of the Corporation and its subsidiaries, and other persons as determined by the Board of Directors were granted the option to purchase shares of stock of the Corporation from its unissued capital stock at par value, and exercisable on the 3rd year from approval of the plan by the stockholders, subject to such allocation of shares as may be approved by the Board of Directors, not to exceed the total of 500,000,000 shares (SOP shares). On September 8, 2011, the SEC has issued its Certificate of Exemption of the SOP shares from registration requirements. The SOP shares were approved for listing by the Philippine Stock Exchange- 26,700,000 shares in December, 2012 and 473,300,000 shares in July, 2013. All the SOP shares have been paid and listed in the Philippine Stock Exchange, as of July 31, 2021.

As of June 30, 2022, the Company does not have plans to issue SOP shares for directors, officers or employees.

3) Security Ownership

(1) Security Ownership of Record and/or Beneficial Owners

The table below shows the persons or entities know to the Company to the record and/or beneficial owner of more than 5% of the outstanding and issued shares of the Company:

(3) Voting Trusts

None of the directors and officers owns 5% or more of the outstanding and issued shares of the Company. The Company is not aware of any person or entity holding 5% or more of the Company's outstanding and issued shares under a voting trust agreement or similar agreement.

No person or entity hold more than 5% of the shares of the Company under a voting trust or similar agreement.

(4) Change in Control

Last December 18, 2020, the Corporation and Map 2000 Development Corporation (M2DC) executed a Memorandum of Agreement covering the subscription by M2DC to Nine Billion Eight Hundred Twenty Seven Million Nine Hundred Ninety Thousand Eight Hundred Fifty Three (9,827,990,853) primary shares of stock of BEC to be issued out of the increase in the authorized capital stock (ACS) of the Corporation from Php2.5 Billion to Php5.0 Billion, representing 67% of the issued and outstanding capital stock of the BEC post-increase. The subscription was subject to the fulfillment of certain conditions, including the approval by the Securities and Exchange Commission (SEC) of the application for said increase in ACS.

On September 10, 2021, the SEC approved the increase in the authorized capital stock of the Corporation to Php 5 Billion and the subscription of M2DC to 9,827,990,853 shares was recorded in the books of the Corporation. As of said date, the said subscribed shares of M2DC represent 67% of the total outstanding capital stock of the Corporation, more than majority control of the Corporation.

4) Certain Relationships and Related Transactions

1) Meta Corporation Public Company Limited

The Company had transactions with Meta Corporation Public Company Limited (formerly Vintage Engineering Public Company Limited), a public company registered in Thailand, a stockholder of the Company, relating to the equity investments of the Company in Vintage EPC Company Limited and VTE International Construction Company Limited, both of which are limited companies registered in Thailand, up to fifteen per cent (15%) of the outstanding capital of said companies, which were implemented in 2018 after satisfactory due diligence on the said companies and its projects. Vintage EPC Company Limited and VTE International Construction Company Limited are the EPC contractors in the Myanmar 220 MW Solar Power Plant Project of GEP (Myanmar) Company Ltd.

2) Filoil Energy Company, Inc.

After considering the fair opinion and valuation report from a third-party evaluator and its compliance with the requirements of the Company's Material Related Party Transaction Policy, the Company invested in 2021 in 60% of the equity of Filoil Energy Company Inc.(FEC), an independent oil industry participant with existing joint venture with the Total group since mid-2016. The joint venture is known in the industry to be active in the downstream oil business of fuel retailing, importation, bulk supplies and depot operations and allied logistics services.

The Company executed the Subscription Agreement with FEC on December 7, 2021, wherein the Company agreed to subscribe to 5,812,277 shares of FEC at the subscription price of Php3,000,000,000.00. The shares subscribed by the Company are equivalent to 60% of the total outstanding and issued shares of FEC, which will enable the Company to indirectly participate in the downstream oil business of FEC. The Subscription Agreement provided for a Financial Closing not later than December 15, 2021 (or such date as may be mutually agreed to by the parties) at which closing, the Company shall remit to a designated bank account of FEC the subscription price, and thereafter commence negotiation for a shareholders agreement. After closing, FEC undertook: (1) to file the corresponding updates to its 2021 General Information Sheet (GIS) consisting of the new principal address, additional purpose and capital and equity structure, (2) to file the pertinent DST return and pay the DST due on the Company's subscribed shares and (3) to issue to the Company the stock certificate covering the Company's subscribed shares.

In this regard, the Financial Closing actually occurred on December 10, 2021, on which date the Company remitted to FEC's bank account the subscription price of Php3 Billion. FEC filed the required amended GIS, filed the DST returns and paid the DST due on the subscribed shares of the Company, and issued the covering stock certificates in the name of the Company on December 29, 2021.

M2DC is currently a majority corporate shareholder in the Company, having subscribed to 67% equity interest in the Company. The relationship of M2DC with FEC is via indirect affiliation, where M2DC is the majority corporate-shareholder in Filoil Gas and Energy Company (FGEC) at 55%, while was initially a majority corporate-shareholder in FEC at 99.74% prior to the Company's entry. After BSC's entry, FGEC is now a minority corporate-shareholder in FEC as its equity interest in FEC was reduced to 39.9%.

Other than the above transactions, there were no material transactions during the past two (2) years, nor was there any material transaction, contractual or other commitments, currently on-going or being proposed, to which the Company was or is to be a party with any stockholder, incumbent director and/or executive officer of the Company, owning ten percent (10%) or more of the outstanding and issued capital stock of the Company.

PART V CORPORATE GOVERNANCE

The Company aims to build a strong and dynamic sense of corporate governance among its directors and officers. where governance, disclosure and transparency and compliance are part of its priorities to ensure the continued sustainable growth of the Company. Towards this end, the Company has adopted its Corporate Governance Manual last May 31, 2017, guided by Memorandum Circular No. 19, series of 2016, issued by the Securities and Exchange Commission, embodying the Code of Corporate Governance for publicly listed companies.

The Company's Corporate Governance Manual (the Manual) has established an evaluation system to determine the level of compliance of the Board and Management with the Manual, which includes an annual Board Performance Assessment which is accomplished by the Board through self-assessment. Said assessment includes the performance of the Chairman, the individual directors and the Board Committees and is conducted and monitored by the Corporate Governance Committee. For the year 2021, the Board has conducted the performance assessment of the Board and its committees and the directors, with an over-all performance rating of "Mostly Satisfactory/Exceeds Standards".

To further advance good governance, with the aim of ensuring integrity, transparency and proper governance in the conduct of all its affairs, the Board has appointed a Compliance Officer in July, 2021. The Board has established adequate internal control and risk management systems, as are relevant and applicable to the size of the Company and its operations.

There has been no deviation from the Manual and full compliance thereto has been enforced since the adoption of the Manual. As of the end of 2021, all directors and key officers have complied with the annual continuing training program on corporate governance requirement, to ensure that all directors and officers are continuously informed of the developments in the business and regulatory environment relevant to the Company.

The Company has scheduled a management strategic session in the next few months that will include in the discussions the recommendations of the directors and officers on policies and practices that could be adopted to strengthen corporate governance within the Company. The Company continues to take steps in further enhancing its adherence to the Manual and to internationally and locally accepted leading principles of good corporate governance.

REQUEST FOR 2021 ANNUAL REPORT ON SEC FORM 17-A

The Corporation will provide without charge each person solicited, on the written request of any such person, a copy of the Corporation's Annual Report for 2021 (SEC Form 17-A). Such written request should be directed to the:

**Corporate Secretary

The Stockholders and the Board of Directors
Basic Energy Corporation and Subsidiaries
UB 111 Paseo de Roxas Building,
Paseo de Roxas, Legaspi Village
Makati City

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of Basic Energy Corporation and Subsidiaries (the Group), which comprise the consolidated statements of financial position as at December 31, 2021 and 2020, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years ended December 31, 2021 and 2020 in accordance with Philippine Financial Reporting Standards (PFRS).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Acquisition of Filoil Energy Company, Inc. (FECI)

On December 7, 2021, the Group acquired 60% ownership interest in FECI for a total consideration of ₱3,000.0 million. The accounting for this transaction is complex due to the significant judgments and estimates that are required to determine the values of the consideration transferred and the identification and measurement of the fair value of the assets acquired and liabilities assumed. Due to the size and complexity of the acquisition, we considered this to be a key audit matter.

We validated the consideration transferred for the acquisition against supporting documents. We reviewed the allocation of the purchase price of the acquisition to the fair value of the identifiable assets and liabilities of FECL. We also reviewed the valuations prepared by the Group and the methodology used to identify the assets acquired and liabilities assumed. We tested the reasonableness of assumptions used in valuing the property and equipment and investment properties by comparing them with market information and quoted prices for similar assets. Further, we evaluated the adequacy of the financial statement disclosures in Notes 3, 4, and 5 in the consolidated financial statements including key assumptions, judgment and estimates.

Planned disposal of Investment in an Associate

The Group has an investment in an associate classified as noncurrent asset held for sale amounting to ₱1,157.5 million that was acquired through a business combination in 2021. The Group determined that the criteria of PFRS 5, “*Noncurrent Assets Held for Sale and Discontinued Operations*” for the classification and measurement of the investment in an associate as noncurrent asset held for sale were met. We considered this as a key audit matter because of the size of the transaction and the appropriateness of the application of PFRS 5 as to whether the expectation of the sale of the asset will be realized within 12 months from the year it was classified as held for sale or if delay exists, exceptions on the standard are complied with, and as to whether the asset is measured at the lower of fair value less costs to sell or its carrying amount.

We read and reviewed the minutes of meeting of the Board of Directors of the acquired subsidiary and confirmed with the management of the Group the commitment and approval of the plan to sell its investment in an associate. We discussed with key management of the Group the status of its ongoing negotiation to complete the sale to validate that the Group remains committed to its plan to sell its investment in associate and to ascertain whether or not the investment in associate is measured at the lower of fair value less costs to sell or its carrying amount based on indicative pricing in the negotiation. We also reviewed the adequacy of related disclosures in Note 9 to the consolidated financial statements.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report including the sustainability report for the year ended December 31, 2021, but does not include the financial statements and our auditors’ report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report including the sustainability report are expected to be made available to us after the date of this auditors’ report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Other Matter

The financial statements of Basic Energy Corporation and Subsidiaries as at and for the year ended December 31, 2019 were audited by another auditor who expressed an unmodified opinion on those statements on June 24, 2020.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, these could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used, and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Joseph C. Bilangbilin.

BASIC ENERGY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
AS AT AND FOR THE YEARS ENDED DECEMBER 31, 2021 AND 2020
(With Comparative Figures for 2019)

1. General Information

Corporate Information

Basic Energy Corporation (the Parent Company or BEC) was incorporated under the laws of the Republic of the Philippines and registered in the Philippine Securities and Exchange Commission (SEC) on September 19, 1968. On April 10, 2018, the SEC approved the Parent Company's amendment of its articles of incorporation for the extension of its corporate life for another 50 years starting from September 19, 2018. However, as prescribed by the Revised Corporation Code of the Philippines, effective February 23, 2019, the Company shall have perpetual existence.

The Parent Company is a holding company with diversified business interests in various fields of renewable energy and alternative fuels, wholesale and distribution of petroleum products, and in oil and gas exploration and development.

On September 30, 2021, Map 2000 Development Corporation (M2DC or the Ultimate Parent Company) acquired 67% ownership of the Parent Company. M2DC is registered with the Philippine SEC and is engaged in the business of real estate acquisition, development, and management. Effectively, the Parent Company became a subsidiary of M2DC.

The Parent Company shares are listed in the Philippine Stock Exchange (PSE) under the trading symbol "BSC".

The registered business address of the Parent Company is UB 111 Paseo de Roxas Building, Paseo de Roxas, Legaspi Village, Makati City.

The Parent Company and its subsidiaries are collectively referred to herein as "the Group". The details of the subsidiaries are as follows:

	Nature of Business	Percentage of Ownership (%)			
		2021		2020	
		Direct	Indirect	Direct	Indirect
Basic Diversified Industrial Holdings, Inc. (BDIHI)	Holding Company	100.00	–	100.00	–

*Indirect ownership through GGL

**Indirect ownership through FECI

***Indirect ownership through LDFHC

Status of Operations

On December 18, 2020, the Parent Company entered into a Memorandum of Agreement (MOA) with MAP 2000 Development Corporation (M2DC) for its subscription to 67% capital stock of the Parent Company for ₱2.8 billion. The capital stock subscription was completed on September 30, 2021.

The Parent Company used the proceeds from the issuance of capital stock to partially fund its acquisition of 60% ownership in Filoil Energy Company, Inc. (FECI) for ₱3.0 billion pursuant to the Subscription Agreement between the Parent Company and Feci on December 7, 2021. Feci is engaged in downstream petroleum business through its joint venture arrangement with an international petroleum company. The business operations of Feci includes supply and logistics, marketing and retail, and management of fuel depots and terminals with allied logistical services for petroleum products.

The acquisition significantly improved the Group's consolidated financial position and results of operations. The new board of directors and management continuously streamline the business operations of the Group to improve its business activities and create efficiency in its operations. This includes plan to sell some of its stock investments to generate funds to finance future projects on alternative and renewable energy sources.

Approval of the Consolidated Financial Statements

The consolidated financial statements of the Group as at December 31, 2021 and 2020, and for the years ended December 31, 2021 and 2020 were approved and authorized for issuance by the Board of Directors (BOD) of the Parent Company on May 26, 2022.

2. Summary of Significant Accounting Policies

Basis of Preparation

The consolidated financial statements of the Group have been prepared in compliance with Philippine Financial Reporting Standards (PFRS) issued by the Philippine Financial Reporting Standards Council and adopted by the Securities and Exchange Commission (SEC). This financial reporting framework includes PFRS, Philippine Accounting Standards (PAS) and Philippine interpretations from International Financial Reporting Interpretations Committee (IFRIC).

Measurement Bases

The consolidated financial statements are presented in Philippine Peso, the Parent Company's functional currency. The Parent Company and its subsidiaries determine their own functional currencies, which best reflect the economic substance of the underlying transactions, events and conditions relevant to each Company. All values are stated in absolute amounts, unless otherwise indicated.

At each reporting date, the assets and liabilities of GGL and PT BES are translated from their functional currencies (US Dollar and Indonesian Rupiah, respectively) to the Parent Company's functional and presentation currency (Philippine Peso) using the closing rate at each reporting date, while its comprehensive income is translated using weighted average exchange rates during the year.

The exchange differences arising on translation of a foreign operation are recognized in other comprehensive income (OCI).

The financial statements of the Group have been prepared on the historical cost basis, except for the following:

	<u>Measurement Bases</u>
Financial assets at fair value through other comprehensive income (FVOCI)	Fair Value
Investment properties	Fair Value
Derivative financial instruments	Fair Value

Historical cost is generally based on the fair value of the consideration given in exchange for an asset and fair value of the consideration received in exchange for incurring a liability.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability; or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a nonfinancial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses market observable data to the extent possible when measuring the fair value of an asset or a liability. Fair values are categorized into different levels in a fair value hierarchy based on inputs used in the following valuation techniques:

- Level 1 – Quoted (unadjusted) market prices in active market for identical assets or liabilities;
- Level 2 – Valuation techniques for which the lowest level of input that is significant to the fair value measurement is directly or indirectly observable; or
- Level 3 – Valuation techniques for which the lowest level of input that is significant to the fair value measurement is unobservable.

If the inputs used to measure the fair value of an asset or a liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level of input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following notes to the consolidated financial statements:

- Note 11 – Financial Assets at FVOCI
- Note 13 – Investment Properties
- Note 30 – Fair Value Measurement

Adoption of Amended PFRS

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following amended PFRS:

- Amendment to PFRS 16, *Leases – COVID-19-Related Rent Concessions beyond June 30, 2021* – In 2020, PFRS 16 was amended to provide practical expedient to lessees from applying the requirements on lease modifications for eligible rent concessions that is a direct consequence of COVID-19 pandemic. A lessee may elect not to assess whether eligible rent concessions from a lessor is a lease modification. A lessee that makes this election account for any change in lease payments resulting from the COVID-19 related rent concession the same way it would account for a change that is not a lease modification, e.g., as a variable lease payment. This amendment is effective for annual reporting periods beginning on or after June 1, 2020, with earlier application permitted, and covers eligible rent concessions until June 30, 2021. The Group applied the practical expedient in its financial statements for the year ended December 31, 2020.

Due to continuing impact of the pandemic, another amendment to PFRS 16 was issued in 2021, which allows lessees to extend the application of the practical expedient regarding COVID-19-related rent concessions to reduction in lease payments that are due on or before June 30, 2022. The 2021 amendment is mandatory for entities that elected to apply the previous amendment. Accordingly, the Group has applied the amendment in the current year financial statements.

The adoption of the amended PFRS did not materially affect the consolidated financial statements of the Group.

Amended PFRS Issued But Not Yet Effective

Relevant amended PFRS, which are not yet effective as at December 31, 2021 and have not been applied in preparing the consolidated financial statements, are summarized below.

Effective January 1, 2022:

- Amendments to PFRS 3, *Reference to Conceptual Framework* – The amendments will replace the reference of PFRS 3 from the 1989 Framework to the current 2018 Conceptual Framework. The amendments include an exception that specifies that, for some types of liabilities and contingent liabilities, an entity applying PFRS 3 should refer to PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, or IFRIC 21, *Levies*, instead of the Conceptual Framework. The requirement will ensure that the liabilities recognized in a business combination will remain the same as those recognized applying the current requirements in PFRS 3. The amendments also clarified that an acquirer shall not recognize contingent assets 4cquire4 in a business combination. The amendments should be applied prospectively.

- Amendments to PAS 16, *Property, Plant and Equipment – Proceeds Before Intended Use* – The amendments prohibit deducting from the cost of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for its intended use. Instead, the proceeds and related costs from such items shall be recognized in profit or loss. The amendments must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when an entity first applied the amendments.
- Amendments to PAS 37, *Onerous Contracts – Cost of Fulfilling a Contract* – The amendments clarify that for the purpose of assessing whether a contract is onerous, the cost of fulfilling a contract comprises both the incremental costs of fulfilling that contract and an allocation of costs directly related to contract activities. The amendments apply to contracts existing at the date when the amendments are first applied. At the date of initial application, the cumulative effect of applying the amendments is recognized as an opening balance adjustment to retained earnings or other component of equity, as applicable. Accordingly, the comparatives are not restated. Earlier application is permitted.
- Annual Improvements to PFRS 2018 to 2020 Cycle:
 - Amendment to PFRS 9, *Financial Instruments – Fees in the ‘10 per cent’ Test for Derecognition of Financial Liabilities* – The amendment clarifies which fees an entity shall include when it applies the ‘10 per cent’ test in assessing whether to derecognize a financial liability (i.e. whether the terms of a new or modified financial liability is substantially different from the terms of the original financial liability). These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or the lender on the other’s behalf. The amendment applies to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applied the amendments. Earlier application is permitted.
 - Amendment to PFRS 16, *Leases – Lease Incentives* – The amendment removes from the Illustrative Example 13 the illustration of the reimbursement of leasehold improvements by the lessor. The objective of the amendment is to avoid any potential confusion regarding the treatment of lease incentives because of how the requirements for lease incentives are illustrated.

Effective January 1, 2023:

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current* – The amendments clarify the requirements for an entity to have the right to defer settlement of the liability for at least 12 months after the reporting period. The amendments also specify and clarify the following: (i) an entity’s right to defer settlement must exist at the end of the reporting period, (ii) the classification is unaffected by management’s intentions or expectations about whether the entity will exercise its right to defer settlement, (iii) how lending conditions affect classification, and (iv) requirements for classifying liabilities where an entity will or may settle by issuing its own equity instruments. The amendments must be applied retrospectively. Earlier application is permitted.

- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure Initiative – Accounting Policies* – The amendments require an entity to disclose its material accounting policies, instead of its significant accounting policies and provide guidance on how an entity applies the concept of materiality in making decisions about accounting policy disclosures. In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and its nature. The amendments clarify (1) that accounting policy information may be material because of its nature, even if the related amounts are immaterial, (2) that accounting policy information is material if users of an entity’s financial statements would need it to understand other material information in the financial statements, and (3) if an entity discloses immaterial accounting policy information, such information should not obscure material accounting policy information. In addition, PFRS Practice Statement 2, *Making Materiality Judgements*, is amended by adding guidance and examples to explain and demonstrate the application of the ‘four-step materiality process’ to accounting policy information. The amendments should be applied prospectively. Earlier application is permitted.
- Amendments to PAS 8, *Definition of Accounting Estimates* – The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies, and the correction of errors. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. An entity develops an accounting estimate if an accounting policy require an item in the financial statements to be measured in a way that involves measurement uncertainty. The amendments clarify that a change in accounting estimate that results from new information or new developments is not a correction of an error, and that the effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors. A change in an accounting estimate may affect only the profit or loss in the current period, or the profit or loss of both the current and future periods. Earlier application is permitted.
- Amendments to PAS 12, *Deferred Tax Related Assets and Liabilities from a Single Transaction* – The amendments require companies to recognize deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. Earlier application is permitted.

Deferred effectivity –

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28 – *Sale or Contribution of Assets Between an Investor and its Associate or Joint Venture* – The amendments address a conflicting provision under the two standards. It clarifies that a gain or loss shall be recognized fully when the transaction involves a business, and partially if it involves assets that do not constitute a business. The effective date of the amendments, initially set for annual periods beginning on or after January 1, 2016, was deferred indefinitely in December 2015 but earlier application is still permitted.

Under prevailing circumstances, the adoption of the foregoing amendments to PFRS is not expected to have any material effect on the financial statements of the Group. Additional disclosures will be included in the financial statements, as applicable.

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Parent Company and its subsidiaries.

Subsidiaries are entities controlled by the Parent Company. Control is achieved when the Parent Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Parent Company controls an investee if and only if the Parent Company has:

- power over investee;
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee affect its returns.

Subsidiaries are consolidated from the date of acquisition or incorporation, being the date on which the Parent Company obtains control, and continue to be consolidated until the date such control ceases.

The financial statements of the subsidiaries are prepared using the same reporting period of the Parent Company. Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. Intercompany balances and transactions, including intercompany profits and unrealized profits and losses, are eliminated in full.

A change in ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction. Upon the loss of control, the Group derecognizes the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising from the loss of control is recognized in profit or loss. If the Group retains interest in the previous subsidiary, then such interest is measured at fair value at the date control is lost. Subsequently, it is accounted for as an equity-accounted investee or as financial assets at fair value through other comprehensive income (FVOCI) depending on the level of influence retained.

Noncontrolling Interests

Non-controlling interests represent the portion of profit or loss and net assets not held by the Parent Company and are presented separately in the Group’s consolidated statements of comprehensive income and within equity in the Group’s consolidated statements of financial position, separate from equity attributable to equity holders of the Parent Company, respectively.

NCI represents the following as at December 31, 2021 and 2020:

	Type of Interest	% of Interest	
		2021	2020
FECI	Direct	40.00	–
SRI	Direct	27.42	27.42
PT BES	Indirect	5.00	5.00
LDFHC	Indirect	64.00	–
FTMRC	Indirect	64.00	–
M2TI	Indirect	64.00	–
PLBRC	Indirect	70.00	–
FLC	Indirect	69.40	–

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquire. For each business combination, the Group elects whether to measure the non-controlling interest in the acquire either at fair value or at the proportionate share of the fair value of the acquire's identifiable net assets. Transaction costs are expensed as incurred and included in general and administrative expenses.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organized workforce with the necessary skills, knowledge or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

When the Group acquires a business, it assesses the financial assets and financial liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquire, if any.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date at fair value and any resulting gain or loss is recognized in the consolidated statement of comprehensive income.

Any contingent consideration to be transferred by the Group will be recognized at fair value at the acquisition date. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PFRS 9, Financial Instruments, is measured at fair value with changes in fair value recognized in the consolidated statement of income in accordance with PFRS 9. Other contingent consideration that is not within the scope of PFRS 9 is measured at fair value at each financial reporting date with changes in fair value recognized in the consolidated statement of income.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred, the amount recognized for non-controlling interest and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts recognized at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in the consolidated statement of income.

If the initial measurement of the fair value of net identifiable assets acquired in a business combination is incomplete by the end of the reporting period in which the business combination occurs, the Group recognizes in its consolidated financial statements provisional amounts for the items for which the measurement is incomplete. During the measurement period, the Group retrospectively adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognized as of that date. During the measurement period, the Group recognizes additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date and, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends as soon as the Group receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable. However, the measurement period shall not exceed one year from the acquisition date.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating unit (CGU) or group of CGUs that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquire are assigned to those units.

Where goodwill has been allocated to a CGU and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the disposed operation and the portion of the CGU retained.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity or a financial liability or equity instrument of another entity.

Date of Recognition. The Group recognizes a financial asset or a financial liability in the consolidated statement of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

"Day 1" Difference. Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a "Day 1" difference) in profit or loss. In cases where there is no observable data at inception date, the Group deems the transaction price as the best estimate of fair value and recognizes "Day 1" difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the "Day 1" difference.

Financial Assets

Initial Recognition and Measurement. Financial assets, are recognized initially at fair value, which is the fair value of the consideration given. The initial measurement of financial assets, except for those designated at FVPL, includes transaction cost.

Classification. The Group classifies its financial assets at initial recognition under the following categories: (a) financial assets at amortized cost, (b) financial assets at FVOCI, and (c) financial assets at FVPL. The classification of a financial asset at initial recognition largely depends on the Group's business model for managing the asset and its contractual cash flow characteristics.

Financial Assets and Liabilities

Date of Recognition. The Group recognizes a financial asset or a financial liability in the statement of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using trade date accounting.

Initial Recognition and Measurement. Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments, except for those designated at fair value through profit or loss (FVPL), includes transaction cost.

"Day 1" Difference. Where the transaction in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a "Day 1" difference) in profit or loss.

In cases where there are no observable data on inception, the Company deems the transaction price as the best estimate of fair value and recognizes "Day 1" difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the "Day 1" difference.

Classification. The Company classifies its financial assets at initial recognition under the following categories: (a) financial assets at fair value through profit or loss, (b) financial assets at amortized cost and (c) financial assets at fair value through other comprehensive income (FVOCI). Financial liabilities, on the other hand, are classified as either financial liabilities at FVPL or financial liabilities at amortized cost. The classification of a financial instrument largely depends on the Company's business model and its contractual cash flow characteristics.

Financial Assets at FVPL. Financial assets at FVPL are either classified as held for trading or designated at FVPL. A financial instrument is classified as held for trading if it meets either of the following conditions:

- it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- on initial recognition, it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

This category includes equity instruments which the Group had not irrevocably elected to classify at FVOCI at initial recognition. This category includes debt instruments whose cash flows are not “solely for payment of principal and interest” assessed at initial recognition of the assets, or which are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell.

The Group may, at initial recognition, designate a financial asset meeting the criteria to be classified at amortized cost or at FVOCI, as a financial asset at FVPL, if doing so eliminates or significantly reduces accounting mismatch that would arise from measuring these assets.

After initial recognition, financial assets at FVPL are subsequently measured at fair value. Unrealized gains or losses arising from the fair valuation of financial assets at FVPL are recognized in profit or loss.

As at December 31, 2021, the Group classified its derivative financial instrument under this category (see Note 10).

Financial Assets at Amortized Cost. Financial assets shall be measured at amortized cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method, less allowance for impairment, if any. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the financial assets are derecognized and through amortization process. Financial assets at amortized cost are included under current assets if realizability or collectability is within 12 months after the reporting period. Otherwise, these are classified as noncurrent assets.

As at December 31, 2021 and 2020, the Group’s cash and cash equivalents, trade and other receivables, refundable deposits, and long-term placements are included in this category (see Notes 6, 7, 10, and 15).

Cash and cash equivalents include cash in banks and short-term placements. Short-term placements are highly liquid investments with original maturities of three (3) months or less that are readily convertible to known amounts of cash, which are subject to an insignificant risk of changes in value.

Financial Assets at FVOCI – Debt Instruments. For debt instruments that meet the contractual cash flow characteristic and are not designated at FVPL under the fair value option, the financial assets are measured at FVOCI if both of the following conditions are met:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, interest income (calculated using the effective interest rate method) and impairment gains or losses of debt instruments measured at FVOCI are recognized directly in profit or loss. When the financial asset is derecognized, the cumulative gains or losses previously recognized in OCI are reclassified from equity to profit or loss as a reclassification adjustment.

As at December 31, 2021 and 2020, the Group's investments in quoted debt securities are classified under this category (see Note 11).

Financial Assets at FVOCI – Equity Instruments. For equity instruments that are not held for trading, the Group may irrevocably designate, at initial recognition, a financial asset to be measured at FVOCI when it meets the definition of equity instrument under PAS 32, *Financial Instruments: Presentation*. This option is available and made on an instrument by instrument basis.

Dividends from equity instruments held at FVOCI are recognized in profit or loss when the right to receive payment is established, unless the dividend clearly represents a recovery of part of the cost of the investment.

All other gains or losses from equity instruments are recognized in OCI and are presented in the equity section of the consolidated statement of financial position and are not reclassified to profit or loss in subsequent periods, but instead, these are transferred directly to retained earnings.

As at December 31, 2021 and 2020, the Group has quoted investments in equity securities which were irrevocably designated as financial assets at FVOCI (see Note 11).

Derivative Financial Instruments

The Group uses derivative financial instruments such as foreign exchange forward contracts to manage its exposure to foreign currency risks. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gain or loss arising from changes in fair value of derivatives that do not qualify for hedge accounting is recognized in profit or loss.

Reclassification

The Group reclassifies its financial assets when, and only when, it changes its business model for managing those financial assets. The reclassification is applied prospectively from the first day of the first reporting period following the change in the business model (reclassification date).

For a financial asset reclassified out of the financial assets at FVPL category to financial assets at amortized cost, its fair value at the reclassification date becomes its new gross carrying amount.

For a financial asset reclassified out of the financial assets at FVPL category to financial assets at FVOCI, its fair value at the reclassification date becomes its new gross carrying amount. Meanwhile, for a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVPL, any gain or loss arising from the difference between the previous amortized cost of the financial asset and fair value is recognized in profit or loss.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVOCI, any gain or loss arising from a difference between the previous amortized cost of the financial asset and fair value is recognized in other comprehensive income.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at amortized cost, any gain or loss previously recognized in OCI, and any difference between the new amortized cost and maturity amount, are amortized to profit or loss over the remaining life of the investment using the effective interest method. If the financial asset is subsequently impaired, any gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

In the case of a financial asset that does not have a fixed maturity, the gain or loss shall be recognized in profit or loss when the financial asset is sold or disposed. If the financial asset is subsequently impaired, any previous gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

For equity instruments which were irrevocably designated at initial recognition as financial assets at FVOCI, no reclassification in another category is allowed.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

Impairment of Debt Instruments at FVOCI and Financial Assets at Amortized Cost. The Group recognizes an allowance for expected credit losses (ECL) for all debt instruments not held at FVPL. ECL is based on the difference between the cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation to the asset's original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For financial assets instruments measured at amortized cost and FVOCI, the ECL is based on the 12-month ECL, which pertains to the portion of lifetime ECL that result from default events on a financial instrument that are possible within 12 months after the reporting date. However, when there has been a significant increase in credit risk since initial recognition, the allowance will be based on the lifetime ECL. When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. The Group also considers reasonable and supportable information that is available without undue cost or effort and is indicative of significant increases in credit risk since initial recognition.

The Group considers a financial asset in default when contractual payments are 30 days past due unless it is demonstrated that the non-payment was an administrative oversight rather than resulting from financial difficulty of the counterparty. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows in its entirety or a portion thereof. This is generally the case when the Group determines that the borrower does not have assets or source of income that could generate sufficient cash flows to repay the amount of financial asset for write-off. This assessment is carried out at the individual financial asset level.

Derecognition. A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- The right to receive cash flows from the asset has expired;
- The Group retains the right to receive cash flows from the financial asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- The Group has transferred its right to receive cash flows from the financial asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from a financial asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Group’s continuing involvement in the financial asset. Continuing involvement that takes the form of a guarantee over the transferred financial asset is measured at the lower of the original carrying amount of the financial asset and the maximum amount of consideration that the Group could be required to repay.

Financial Liabilities

Initial Recognition and Measurement. Financial liabilities are recognized initially at fair value, which is the fair value of the consideration received. In case of financial liabilities at amortized cost, the initial measurement is net of any directly attributable transaction costs.

Classification. The Group classifies its financial liabilities at initial recognition as either financial liabilities at FVPL or financial liabilities at amortized cost.

As at December 31, 2021 and 2020, the Group does not have financial liabilities at FVPL.

Financial Liabilities at Amortized Cost. Financial liabilities are categorized as financial liabilities at amortized cost when the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue, and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the liabilities are derecognized or through the amortization process. Financial liabilities at amortized cost are included under current liabilities if payment is due within 12 months after the reporting period. Otherwise, these are classified as noncurrent liabilities.

As at December 31, 2021 and 2020, the Group’s trade and other payables (excluding statutory payables), loans payable and lease liabilities are classified under this category (see Notes 16, 17, and 25).

Derecognition. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of comprehensive income.

Offsetting of Financial Assets and Liabilities

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position only if there is a currently enforceable legal right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated statement of financial position.

Classification of Financial Instrument between Liability and Equity

A financial instrument is classified as a liability if it provides for a contractual obligation to:

- Deliver cash or another financial asset to another entity;
- Exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- Satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Classification of Assets and Liabilities between Current and Noncurrent

The Group presents current and noncurrent assets, and current and noncurrent liabilities, as separate classifications in the notes to consolidated financial statements.

Current Assets. The Group classifies an asset as current when:

- It expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- It holds the asset primarily for the purpose of trading;
- It expects to realize the asset within 12 months after the reporting period; or
- The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Otherwise, the Group will classify all other assets as noncurrent.

Current Liabilities. The Group classifies a liability as current when:

- It expects to settle the liability in its normal operating cycle;
- It holds the liability primarily for the purpose of trading;
- The liability is due to be settled within 12 months after the reporting period; or
- It does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Otherwise, the Group will classify all other liabilities as noncurrent.

Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost includes all costs of purchase and other costs incurred in bringing the inventories to their present location and condition, and it is calculated using the moving average method.

The NRV of inventories is the estimated selling price in the ordinary course of business, less the estimated cost necessary to make the sale. In determining the NRV, the Group considers any adjustment necessary for obsolescence.

When the NRV of the inventories is lower than their cost, the inventories are written-down to its NRV and the difference between the cost and NRV of the inventories is charged in profit or loss.

Noncurrent Asset Held for Sale

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Noncurrent assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable, and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale expected to be completed within one (1) year from the date of classification.

If the one-year period is not complied, the Group can still classify its noncurrent asset as held for sale when:

- There are non-buyer conditions which extend the period required to complete the sale and the conditions can only be complied after a firm purchase commitment is obtained. The firm purchase commitment should be highly probable within one year
- There are buyer or non-buyer conditions that will extend the period required to complete the sale after the Group obtains a firm purchase agreement, and the Group already responded to the conditions expecting favorable resolution.
- During the one-year period, the noncurrent asset held for sale was not sold due to the occurrence of unlikely circumstances and the Group responded to the change in circumstances within the same period. Also, the noncurrent asset should be actively marketed at a reasonable price given the change in circumstances.

The Group recognizes an impairment loss for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell, to the extent that it has not been recognized in the carrying amount of the noncurrent asset before initial classification as held for sale. The Group recognizes a gain for any subsequent increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been recognized.

Assets and liabilities classified as held for sale are presented separately as current items in the consolidated statements of financial position.

Investments in Associates and a Joint Venture

These consist of investments in a joint arrangement classified as a joint venture and associates that are accounted for at equity method.

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. The considerations made in determining joint control are similar to those necessary to determine control over subsidiaries.

The Group's Investments in Associates and a Joint Venture are accounted for under the equity method. The investments are initially recognized at cost and adjusted to recognize the Group's share in the changes in the net assets of the associates since the acquisition date. Goodwill relating to the joint venture or associate is included in the carrying amount of the investment and is not tested for impairment separately. Dividends received by the Group from the associates and joint venture will reduce the carrying amount of the investments when the right to receive the dividend is established. Dividends received from associates and joint venture whose carrying values have been reduced to zero are recognized as income in the consolidated statement of income. The Group recognizes its share in net income or loss of the associates in profit or loss. Any change in OCI of the associates is presented as part of the Group's OCI. In addition, where there has been a change recognized directly in equity of the associate, the Group recognizes its share in these changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the Joint Venture or associate are eliminated to the extent of the Group's interest in the joint venture or associate.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in the joint venture or associate. At each financial reporting date, the Group determines whether there is objective evidence that the investment in the joint venture or associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the joint venture or associate and its carrying value, then recognizes the loss within share in earnings from investments in associates and joint ventures in the consolidated statement of income.

Upon loss of significant influence over the associate, the Group measures and recognizes any retained investment at fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognized in profit or loss.

The financial statements of the associates are prepared in the same reporting period and using the uniform accounting policies used by the Group.

Investment Properties

Investment properties pertain to land, buildings and improvements, and depot tanks held either to earn rental income or for capital appreciation or both, but not for sale in the ordinary course of business or for administrative purposes.

Investment properties are initially measured at cost which pertains to the purchase price and any directly attributable costs related to the acquisition. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are recognized in profit or loss in the period in which they arise. Fair values are determined using market data approach by an accredited external independent real estate appraiser.

An investment property is derecognized either when the asset has been disposed of or when the investment property has been permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal. In determining the amount of consideration from the derecognition of investment property the Group considers the effects of variable consideration, existence of a significant financing component, non-cash consideration, and consideration payable to the buyer, if any.

Transfers are made to or from investment property only when there is a change in use, evidenced by the ending of owner-occupation, commencement of an operating lease to another party or ending of the construction or development. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Deferred Exploration and Evaluation Costs

Deferred exploration and evaluation costs arising from the Group's exploration and evaluation activities are carried at cost less any accumulated impairment losses, if any.

Exploration and evaluation activities involve the search for oil, gas or other natural resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource. These include the following:

- Acquisitions of rights to explore;
- Gathering exploration data through geophysical studies;
- Determining and examining the volume and grade of the resource;
- Surveying transportation and infrastructure requirements; and
- Evaluating the technical feasibility and commercial viability of extracting the resource.

Exploration and evaluation expenditures are recognized as assets when the future economic benefit is more likely than not to be realized. These costs include directly attributable employee remuneration, materials and fuels used, surveying costs, drilling costs and payments made to contractors. The Group capitalizes any further costs incurred for exploration and evaluation activities up to the point when a commercial reserve is established.

Deferred exploration and evaluation costs are assessed for impairment before these are reclassified to "Property and equipment" account in the consolidated statement of financial position when the technical feasibility and commercial viability of extracting the resources are demonstrable. Any impairment loss is recognized in profit or loss. If the exploration area is found to contain no commercial reserves, the deferred exploration and evaluation costs are charged to profit or loss.

Property and Equipment

The following property and equipment are stated at cost less accumulated depreciation, amortization and any accumulated impairment losses:

- Depot Tanks
- Building and improvements
- Furniture, fixtures, and office equipment
- Machinery and equipment
- Transportation equipment

The initial cost of property and equipment consists of its purchase price after deducting trade discounts and rebates, import duties, nonrefundable purchase taxes, and any other costs directly attributable in bringing the asset to its working condition and location for its intended use. The cost of self-constructed assets includes the cost of materials, direct labor, any other costs directly attributable in bringing the assets to the working condition for their intended use, and costs of dismantling and removing the items and restoring the site on which they are located.

Expenditures incurred after the property and equipment have been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized in profit or loss in the year the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment. The cost of replacing a component of an item of property and equipment is recognized if it is probable that the future economic benefits embodied within the component will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced component is derecognized.

When parts of an item of property and equipment have different useful lives, these are accounted for as separate items (major components) of property and equipment.

Depreciation and amortization of property and equipment begin when it is in the location and condition necessary for it to be capable of operating in the manner intended by the management. Depreciation and amortization are calculated on a straight-line basis over the following estimated useful lives of the property and equipment:

	<u>Number of Years</u>
Depot tanks	15
Building and building improvements	15
Machinery and equipment	10
Transportation equipment	5
Furniture, fixtures and office equipment	3

The estimated useful lives, depreciation and amortization method are reviewed at each reporting date to ensure that these are consistent with the expected pattern of economic benefits from items of property and equipment.

Fully depreciated assets are retained in the accounts until they are no longer in use.

When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation, amortization and any impairment in value are removed from the accounts. Any resulting gain or loss is recognized in profit or loss.

Construction in progress represents properties under construction and is stated at cost, including costs of construction and other direct costs. Construction in progress is not depreciated until such time that the relevant assets are completed and ready for operational use.

Other Nonfinancial Assets

Other nonfinancial assets pertain to excess tax credits, prepayments, input value-added tax (VAT), and deferred input VAT.

Excess Tax Credits. Excess tax credits pertain to the Group's excess income tax payments. These include taxes withheld and remitted to the Bureau of Internal Revenue (BIR) by customers which can be applied to the Group's income tax payable in the same year the related income was recognized. Excess tax credits are carried forward and can be utilized in succeeding years.

Prepayments. Prepayments are expenses paid in advance and recorded as assets before these are utilized. Prepayments are apportioned over the period covered by the payment and included in profit or loss when incurred. Prepayments that are expected to be utilized within 12 months after the reporting date are classified as current assets. Otherwise, these are classified as noncurrent assets.

VAT. VAT is a tax on consumption levied on the sale, barter, exchange, or lease of goods or properties and services, and on importation of goods in the Philippines. It is an indirect tax, which may be shifted or passed on to the buyer, transferee or lessee of goods, properties or services.

Revenue, expenses, and assets are recognized net of the amount of VAT, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- Receivables and payables that include the amount of VAT.

The net amount of VAT recoverable from the taxation authority is presented as "Input VAT" under "Other noncurrent assets" account in the consolidated statement of financial position.

Deferred Input VAT. In accordance with Revenue Regulations (RR) No. 16-2005, input VAT on purchases or imports of capital goods (depreciable assets for income tax purposes) with an aggregate acquisition cost (exclusive of VAT) in each of the calendar month exceeding ₱1.0 million is claimed as credit against output VAT over 60 months or the estimated useful lives of capital goods, whichever is shorter.

Deferred input VAT represents the unamortized amount of input VAT on capital goods and input VAT on the unpaid portion of availed services, including the use or lease of properties.

Where the aggregate acquisition cost (exclusive of VAT) of the existing or finished depreciable capital goods purchased or imported during any calendar month does not exceed ₱1.0 million, the total input VAT will be allowable as credit against output VAT in the month of acquisition.

Deferred input VAT that are expected to be claimed against output VAT within 12 months after the reporting date are classified as current assets. Otherwise, these are classified as noncurrent assets.

Impairment of Nonfinancial Assets

The carrying amounts of nonfinancial assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amounts may not be recoverable. If such indication exists and when the carrying amounts exceed the estimated recoverable amounts, the assets or cash-generating units (CGU) are written down to their recoverable amounts. The recoverable amount of the asset is the greater of the fair value less cost of disposal or value in use. The fair value less cost of disposal is the amount obtainable from the sale of an asset in an arm's-length transaction less cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessment of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the CGU to which the asset belongs. Impairment losses are recognized in profit or loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In such instance, the carrying amount of the asset is increased to its recoverable amount. However, that increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment loss had been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such reversal, the depreciation and amortization charges are adjusted prospectively to allocate the asset's revised carrying amount on a systematic basis over its remaining useful life.

Equity

Capital Stock. Common stock is measured at par value for all shares issued and subscribed. Unpaid subscriptions are recognized as reduction to subscribed capital stock.

Additional Paid-in Capital (APIC). APIC represents the proceeds and/or fair value of consideration received in excess of the par value of the shares issued. Incremental costs directly attributable to the issuance of new common stock are recognized as a deduction from APIC, net of any tax effects.

Deficit. Deficit represents the cumulative balance of the Group's profit or loss.

Other Equity Reserves. Other equity reserves consist of cumulative balances of items of income and expense that are not recognized in profit or loss in accordance with PFRS. Other equity reserves of the Group pertain to equity reserve on acquisition of NCI, cumulative gain (loss) on translation of Investments in Associates, cumulative unrealized gain changes in fair value of financial assets at FVOCI, cumulative translation loss on consolidation of a foreign operations, and cumulative remeasurement gain (loss) on net retirement benefit liability.

Treasury Stock. Treasury stock represents the Parent Company's shares held by its subsidiary, which are carried at cost and deducted from equity until the shares are cancelled or sold.

When the shares are subsequently sold, the difference between the cost and consideration received, net of any directly attributable transaction costs, is included in equity attributable to the equity holders of the Parent Company.

Revenue Recognition

Revenue from contract with customers is recognized when the performance obligation in the contract has been satisfied, either at a point in time or over time. Revenue is recognized over time if one of the following criteria is met: (a) the customer simultaneously receives and consumes the benefits as the Group performs its obligations; (b) the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date. Otherwise, revenue is recognized at a point in time.

The Group also assesses its revenue arrangements to determine if it is acting as a principal or as an agent. The Group has assessed that it acts as a principal in its revenue arrangements.

The following specific recognition criteria must also be met before revenue is recognized.

Sale of Fuel. Sales revenue is recognized at the point in time when control of the asset is transferred to the customer upon delivery. The normal credit term is 15 to 120 days.

Service Income. Service income including hauling fees and port service income is recognized over the period that the related service is provided.

Income from Penalty on Delayed Payment of Receivables. Income from penalty on delayed payment of receivables are recognized when payments are received from customers.

Other Income. Income from other sources is recognized as revenue when earned.

The following are the specific recognition criteria for other revenues outside the scope of PFRS 15:

Rental Income. Revenue on rental under non-cancellable and cancellable leases are recognized on a straight-line basis over the lease term.

Interest Income. Interest income is recognized as the interest accrues taking into account the effective yield on the asset, net of final tax.

Dividend Income. Dividend income is recognized when the Group's right to receive payment is established.

Expense Recognition

Expenses are recognized in profit or loss when a decrease in future economic benefit related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.

Cost of Sales. Cost of sales includes the purchase price of the products sold as well as costs that are directly attributable in bringing the inventory to its intended condition and location. Costs of sales is recognized when the related goods are delivered to the customers.

Cost of Services. Cost of services are recognized as expense when the related services are rendered.

General and Administrative Expenses. General and administrative expenses constitute costs of administering the business. These are expensed when incurred.

Interest Expense. Interest expense is recognized in profit or loss using the effective interest method.

Employee Benefits

Short-term Benefits. The Group recognizes short-term employee benefits based on contractual arrangements with employees. The unpaid portion of the short-term employee benefits is measured on an undiscounted basis and is included as part of “Trade and other payables” account in the consolidated statement of financial position.

Retirement Benefit. Retirement benefit costs are actuarially determined using the projected unit credit method. This method reflects services rendered by employees up to the date of valuation and incorporates assumptions concerning employees’ projected salaries. The calculation of net retirement benefits (costs) is performed annually by a qualified actuary. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in the future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

The net retirement benefit liability recognized by the Group is the aggregate of the present value of the defined benefit obligation reduced by the fair value of plan assets out of which the obligations are to be settled directly. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using risk-free interest rates of government bonds that have terms to maturity approximating the terms of the related net retirement benefit liability.

Plan assets are assets that are held in trust and managed by a trustee bank. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. The fair value of the plan assets is based on the market price information. When no market price is available, the fair value of plan assets is estimated by discounting the estimated future cash flows using discount rates that reflect both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the retirement benefit liability, the measurement of the resulting net retirement benefit is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group recognizes retirement benefit costs, comprising of current service cost and net interest income or expense in profit or loss. The Group determines the net interest cost by applying the discount rate to the defined benefit liability at the beginning of the reporting period, taking into account any changes in the defined benefit liability during the period as a result of benefit payments.

Remeasurements of the net retirement benefit liability, which consist of actuarial gains and losses and the return on plan assets (excluding interest), and the effect of asset ceiling (if any, excluding interest) are recognized immediately in OCI and are not reclassified to profit or loss in subsequent periods.

Foreign Currency-Denominated Transactions

Transactions denominated in foreign currencies are recorded using the exchange rate at the date of the transaction. Outstanding monetary assets and liabilities denominated in foreign currencies are translated using the closing exchange rate at the reporting date. Differences arising on settlement or translation of monetary assets and liabilities are recognized in profit or loss.

Translation of a Foreign Operation. A foreign operation is a subsidiary, associate, joint arrangement or branch whose activities are based or conducted in a country or currency other than those of the reporting entity.

At each reporting date, the assets and liabilities of the foreign operation are translated from its functional currency to the Parent Company's functional and presentation currency using the closing rate at each reporting date, while its comprehensive income is translated using weighted average exchange rates during the year.

The exchange differences arising on translation of a foreign operation are recognized in OCI. Upon disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to profit or loss.

Income Taxes

Current Tax. Current tax assets and liabilities are measured at the amounts expected to be recovered from or paid to the taxation authorities. The tax rate and tax laws used in the computation are those that have been enacted or substantively enacted at the reporting date.

Deferred Tax. Deferred tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from the excess of minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carryforward benefits of unused tax credits and unused tax losses can be utilized. Deferred tax, however, is not recognized when it arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognized in profit or loss except to the extent that it relates to a business combination, or items directly recognized to equity or in OCI.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to offset current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Related Party Transactions

Related party transactions are transfers of resources, services or obligations between the Group and its related parties.

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control. Related parties may be individual or corporate entities. Transactions between related parties are accounted for at arm's-length prices or on terms similar to those offered to nonrelated parties in an economically comparable market.

Segment Reporting

The Group reports separate information about its operating segment.

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same Group) and whose operating results are regularly reviewed to make decisions about resources to be allocated to the segment and assess its performance; and for which discrete information is available.

Provisions and Contingencies

Provisions. Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain.

The expense relating to any provision is presented in profit or loss net of any reimbursement. If the effect of the time value of money is material, the estimated cash flows are discounted using a current pre-tax rate that reflects the current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Contingencies. Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Basic and Diluted Income (Loss) per Share

Basic Income (Loss) per Share. Basic income (loss) per share is calculated by dividing the net income (loss) for the period attributable to equity holders of the Parent Company by the weighted average number of issued and outstanding shares and subscribed shares, with retroactive adjustment for any stock dividends, stock splits or reverse stock splits during the year.

Diluted Income (Loss) per Share. Diluted income (loss) per share is calculated in the same manner as basic income (loss) per share, adjusted for the effects of any potentially dilutive, convertible securities.

Events After the Reporting Date

Post year-end events that provide additional information about the Group's financial position at reporting date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

3. Significant Judgments, Accounting Estimates and Assumptions

The preparation of the consolidated financial statements requires management to exercise judgments and make accounting estimates and assumptions that affect the amounts reported in the consolidated financial statements and related notes. The judgments, accounting estimates and assumptions used in the consolidated financial statements are based upon management's evaluation of relevant facts and circumstances at the reporting date.

While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the estimated amounts. Actual results could differ from such estimates.

The accounting estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions in accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

The following are the significant judgments, accounting estimates and assumptions made by the Group:

Judgments

Determination of Functional and Presentation Currency. The Group's consolidated financial statements are presented in Philippine Peso, the Parent Company's functional currency, which mainly influences labor, material and other costs of providing goods or services. The Parent Company and its subsidiaries determine their own functional currencies, which best reflect the economic substance of the underlying transactions, events and conditions relevant to each entity.

Based on the economic substance of the underlying circumstances, the functional currency of the Group's subsidiaries, except GGL and PT BES, is the Philippine Peso. The functional currency and presentation currency of GGL and PT BES are US Dollar and Indonesian Rupiah, respectively.

Classification and Measurement of Financial Assets. Classification and measurement of financial assets depend on the results of the contractual cash flow and the business model tests. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment reflecting all relevant evidence including how the performance of the assets is evaluated, the risks that affect the performance of the assets, and how these risks are managed.

At initial recognition, the Group designated its investments in equity and debt securities as financial assets at FVOCI (see Note 11).

Cash and cash equivalents, trade and other receivables, refundable deposit and long-term placements (included under "Other noncurrent asset" account) were classified as financial assets at amortized cost since the Group's primary business model in relation to these assets is to hold the financial assets to collect contractual cash flows solely for principal and interest (see Notes 6, 7 and 10).

Fair Value Measurement of Financial Instruments. The fair values of securities that are actively traded in organized financial markets are determined by reference to unadjusted quoted market prices at the close of business on the reporting date.

The fair values of financial instruments that are not quoted in active markets are determined by using generally accepted valuation techniques, such as discounted cash flow models. The models are validated and periodically reviewed by qualified personnel independent of the area that created them and are approved by the BOD before these are used. The models are calibrated to ensure that outputs reflect actual data and comparative market prices. Further, inputs used in these models are from observable data and quoted market prices in respect of similar financial instruments. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility.

While significant components of fair value measurement were determined using verifiable objective evidence, such as foreign exchange rates, the amount of changes in fair value would differ if the Group utilized different valuation methodologies and assumptions. Any changes in fair value of these financial assets and liabilities would affect the financial statements.

In accordance with the amendments to PFRS 7, disclosures about the level in the fair value hierarchy are required in which the fair value measurements are categorized for assets and liabilities measured in the consolidated statements of financial position.

Assumptions and methods of determining the fair values of financial instruments are presented in Note 30 to the consolidated financial statements.

Classification of Investment in an Associate as Noncurrent Asset Held For Sale. The Group classifies a noncurrent asset as held for sale when its carrying amount will be recovered principally through a sale transaction rather than through continuing use. In making its judgment, the Group considers its management's commitment to sell the asset within one (1) year. When the one-year period is not met, the Group determines whether the delay of the sale is caused by events or circumstances beyond its control and there is sufficient evidence that the Group remains committed to its plan to sell the asset.

Based on the Group's management assessment, investment in an associate classified as noncurrent asset held for sale will continue to be classified as such because of continuous discussion with the prospective investor to complete the sale. As at December 31, 2021 and 2020, the carrying amount of noncurrent asset held for sale amounting to ₱1,157.5 million is lower than its fair value less cost to sell (see Note 9).

Existence of Significant Influence over Associates and Joint Venture. The Group assessed that it has significant influence in its associates despite having interest ownership of below the 20% threshold where significant influence is presumed under PAS 28, *Investments in Associates and a Joint Venture and Joint Ventures*. Significant influence has been established by the Group over the investees because of its participation in the decision making process of the investees' significant activities, through its representation in the investees' BOD.

The Group's Investments in Associates amounted to ₱207.5 million and ₱123.4 million as at December 31, 2021 and 2020, respectively (see Note 12).

Assessment of Control on PLBRC. An entity is considered as a subsidiary when it is controlled by the Group. Control is established when the Group is exposed or has rights to variable returns from its involvement with an entity, and has the ability to affect those returns through its power over the entity.

The Group considers PLBRC as a subsidiary even though it has less than 51% equity ownership because it can exercise control over the management and operations of PLBRC. Moreover, majority of PLBRC's assets are being utilized in the Group's operations. Accordingly, the consolidated financial statements of the Group include those of PLBRC.

Determination of Reportable Operating Segments. The Group has determined that it has reportable segments based on the following thresholds:

- Its reported revenue, including both sales to external customers and intersegment sales or transfers, is 10% or more of the combined revenue, internal and external, of all operating segments.
- The absolute amount of its reported profit or loss is 10% or more, in absolute amount, of (i) the combined reported profit of all operating segments that did not report a loss and (ii) the combined reported loss of all operating segments that reported a loss.
- Its assets are 10% or more of the combined assets of all operating segments.

Operating segments that do not meet any of the quantitative thresholds may be considered reportable, and separately disclosed, if management believes that information about the segment would be useful to users of the consolidated financial statements. The Group assessed that it has a single reportable operating segment which is the downstream oil operations particularly the sale of petroleum products based on the criteria above (see Note 32).

Determination of Interest in a Joint Arrangement. The Group has, after considering the structure and form of the arrangement, the terms agreed by the parties in the contractual arrangement and the Group's rights and obligations arising from the arrangement, classified its interest in joint arrangement with Mariveles Joint Venture Corporation (MJVC) under PFRS 11, *Joint Arrangements*, as a joint venture. Accordingly, the Group accounts for its equity interests in a joint venture using the equity method.

The carrying amount of investment in a joint venture amounted to ₱47.7 million as at December 31, 2021 (see Note 12).

Capitalization of Exploration and Evaluation Expenditures. The Group makes judgments in determining whether there are future economic benefits from either future exploration or sale of reserves to capitalize exploration and evaluation expenditures. The Group further applies estimates and assumptions about future events and circumstances to determine whether an economically viable extraction operation can be established.

Deferred exploration and evaluation costs presented in the consolidated statement of financial position, amounted to ₱6.0 million as at December 31, 2021 and 2020 (see Note 15).

Accounting Estimates and Assumptions

Assessment for ECL on Trade Receivables. The Group, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade receivables. The provision matrix specifies provision rates depending on the number of days that a trade receivable is past due. The Group also uses appropriate groupings if its historical credit loss experience shows significantly different loss patterns for different customer segments. The Group then adjusts the historical credit loss experience with forward-looking information on the basis of current observable data to reflect the effects of current and forecasted economic conditions.

The Group adjusts historical default rates to forward-looking default rates by determining the closely related economic factor affecting each customer segment. The Group regularly reviews the methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience.

The determination of the relationship between historical default rates and forecasted economic conditions is a significant accounting estimate. Accordingly, the provision for ECL on trade receivables is sensitive to changes in assumptions about forecasted economic conditions.

Allowance for impairment losses on trade receivables amounted to ₱2,101,066 and ₱1,991,419 in 2021 and 2020, respectively (see Note 7).

The carrying amount of trade receivables amounted to ₱7,454.9 million and ₱30.4 million as at December 31, 2021 and 2020, respectively (see Note 7).

Assessment for ECL on Other Financial Assets at Amortized Cost and Quoted Debt Instruments Classified as Financial Assets at FVOCI. The Group determines the allowance for ECL using the general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12 months unless there has been a significant increase in credit risk since initial recognition in which case ECL is provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the counterparty.

The Group also considers financial assets that are more than 30 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the counterparty.

For cash in banks and cash equivalents, refundable deposit and debt instruments classified as financial assets at FVOCI, the Group assessed that the ECL is not material because the transactions with respect to these financial assets were entered only with banks and counterparties with good credit standing and relatively low risk of default. Accordingly, no provision for ECL on these financial assets was recognized in 2021 and 2020.

The carrying amounts of financial assets at amortized cost and quoted debt instruments at FVOCI are as follows:

	Note	2021	2020
Financial assets at amortized cost:			
Cash and cash equivalents*	6	₱1,752,440,609	₱73,836,392
Trade and other receivables**	7	8,931,257,027	33,166,196
Noncurrent portion of notes receivables	15	58,699,355	–
Refundable deposits	10	51,607,329	21,368,350
Long-term placements	15	107,089,806	–
Financial assets at FVOCI -			
Quoted debt securities	11	22,290,148	22,669,473

*Excluding cash on hand amounting to ₱498,797 and ₱32,782 as at December 31, 2021 and 2020, respectively.

**Excluding nonfinancial assets amounting to ₱36,895 and ₱70,128 as at December 31, 2021 and 2020, respectively.

Valuation of Inventories at the Lower of Cost or NRV. The Group writes down the cost of inventories whenever NRV becomes lower than cost due to damage, physical deterioration, obsolescence, changes in price levels or other causes. The lower of cost or NRV is reviewed regularly to reflect the accurate valuation in the financial records. Inventory items identified to be obsolete and unusable are also written off and charged as expense for the period.

No provision for inventory obsolescence is recognized in the consolidated statements of comprehensive income in 2021. The carrying amount of inventories amounted to ₱1,170.4 million as at December 31, 2021 (see Note 8).

Allocation of the Purchase Price in a Business Combination. The Group accounts for its business combinations using the acquisition method which requires extensive use of accounting judgments and estimates to allocate the purchase price to the fair market values of the identifiable assets and liabilities assumed in a business combination at the acquisition date. Any difference in the purchase price and the fair values of the net assets acquired is recorded as either goodwill or gain on bargain purchase in profit or loss. The significant judgments and assumptions made in estimating the fair value to be assigned to the identifiable assets and liabilities assumed in a business combination can materially affect the consolidated financial statements.

The Group engaged an external qualified appraiser to measure the fair values of investment properties and property and equipment arising from the acquisition of FECl in 2021. However, the fair values of net assets acquired are based on provisional amounts while the Group sought an independent valuation of the investment in associates under FECl. As allowed under PFRS 3, *Business Combinations*, the Group has a one-year measurement period from the acquisition date within which to finalize the fair values of net assets acquired. Any changes in the provisional fair values of net assets acquired will affect the amount of gain on bargain purchase recognized in profit or loss.

The Group's acquisition of FECl has resulted in the provisional recognition of gain on bargain purchase amounting to ₱137.2 million in 2021 (see Note 4).

Estimation of the Useful Lives of Property and Equipment. The Group estimates the useful lives of property and equipment based on the period over which the assets are expected to be available for use. The estimates are based on a collective assessment of industry practice, internal technical evaluation and experience with similar assets. The estimated useful lives of property and equipment are reviewed at each reporting date and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

Future results of operations could be materially affected by changes in estimates brought about by changes in the factors mentioned above. The amount and timing of recording of depreciation expense for any period would be affected by changes in these factors and circumstances.

There were no changes in the estimated useful lives of property and equipment in 2021, 2020 and 2019.

The carrying amounts of property and equipment amounted to ₱3,269,239,854 and ₱1,046,996, in 2021 and 2020, respectively.

Determination of the Fair Value of Investment Properties. Investment properties are measured at fair values. The Group works closely with external qualified appraisers who performed the valuation using appropriate valuation techniques. The Group comparable market data adjusted as necessary to reflect the specific assets' size, location and other characteristics. The valuation techniques and inputs used in the fair value measurement of investment properties are disclosed in Note 13 to the consolidated financial statements.

Fair value changes on investment properties amounted to ₱24.0 million, ₱11.5 million and ₱13.8 million in 2021, 2020, and 2019, respectively. The Group's investment properties amounted to ₱243.9 million and ₱186.2 million as at December 31, 2021 and 2020, respectively (see Note 13).

Assessment of the Recoverability of Deferred Exploration and Evaluation Costs. Deferred exploration and evaluation costs are capitalized in the period incurred until it has been determined that a property has no sufficient economically recoverable reserves, in which case the costs are written off as impairment losses. The Group reviews the carrying amounts of its deferred exploration and evaluation costs whenever events or changes in circumstances indicate that their carrying amounts may exceed their estimated net recoverable amounts. An impairment loss is recognized when the carrying amount of those assets exceeds its recoverable amount.

No provision for impairment of exploration and evaluation assets was recognized in 2021 and 2020. The Group's deferred exploration and evaluation assets amounted to ₱6.0 million as at December 31, 2021 and 2020 (see Note 15).

Assessment for the Impairment of Nonfinancial Assets. The Group assesses impairment on nonfinancial assets whenever events or changes in circumstances indicate that the carrying amount of the assets or group of assets may not be recoverable. The relevant factors that the Group considers in deciding whether to perform an asset impairment review include, among others, the following:

- Significant underperformance of a business in relation to expectations;
- Significant negative industry or economic trends; and
- Significant changes or planned changes in the use of the assets.

Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized. Recoverable amounts are estimated for individual assets or, if it is not possible, for the CGU to which the asset belongs.

The recoverable amount of the asset is the greater of the fair value less cost of disposal or value in use. The fair value less cost of disposal is the amount obtainable from the sale of an asset in an arm's-length transaction, less the cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset.

No impairment loss on other nonfinancial assets was recognized in 2021 and 2020. The carrying amounts of nonfinancial assets are as follows:

	Note	2021	2020
Investments in associates and a joint venture	12	₱255,231,102	₱123,449,335
Property and equipment	14	4,660,651,908	1,046,996
Other current assets*	10	855,748,241	8,652,090
Other noncurrent assets**	15	53,179,018	6,365,792

*Excluding refundable deposits and derivative assets totalling ₱81.0 million in 2021 and refundable deposits of ₱21.4 million in 2020.

**Excluding long-term placements and noncurrent portion of notes receivables totalling ₱165.8 million

Determination of the Retirement Benefits. The determination of the net retirement benefit liability and expense is dependent on the assumptions used by the actuary in calculating such amounts. These assumptions are described in Note 24 to the consolidated financial statements and include discount rates and salary increase rates among others. Actual results that differ from the Group's assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded liability in such future periods. While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the net retirement benefit liability.

As of December 31, 2021, the Group has a net retirement asset from its subsidiary of ₱12.0 million and a net retirement benefit liability from the Parent Company of ₱12.6 million. As of December 31, 2020, the Group has net retirement liability for its Parent Company amounting to ₱5.7 million.

Estimation of the Incremental Borrowing Rate on Lease Liabilities. The Group uses its incremental borrowing rate to measure lease liabilities. The incremental borrowing rate is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the ROU asset in a similar economic environment. The Group estimates the incremental borrowing rate using available observable inputs (such as the prevailing Bloomberg Valuation Service interest rates) adjusted for entity-specific estimates, to reflect the terms and conditions of the lease.

The Group has applied incremental borrowing rate ranging from 3.95% to 7.05% for the computation of lease liabilities and ROU assets. Lease liabilities amounted to ₱104.8 million as at December 31, 2021. Total ROU assets recognized as property and equipment and investment property amounted to ₱104.8 million as at December 31, 2021 (see Note 25).

Estimation of Provisions. The Group is currently involved in certain claims and assessments. The Group determined the probable costs for these claims and assessments based upon an analysis of potential results. As allowed under the relevant accounting standard, Management opted not to further disclose details regarding the claims and assessments because it can prejudice seriously the outcomes.

Provisions amounted to ₱53.5 million and ₱73.5 million as at December 31, 2021 and 2020, respectively (see Note 29).

Recognition of Deferred Tax Assets. The Group reviews the carrying amount of deferred tax assets at each reporting date and reduces the balance to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax assets to be utilized.

The Group's deductible temporary differences, carryforward benefits of NOLCO, and excess of MCIT over RCIT, for which deferred tax assets have not been recognized, amounted to ₱492.9 million and ₱461.9 million as at December 31, 2021 and 2020, respectively. The management assessed that there may be no sufficient future taxable income against which benefits of the deferred tax assets can be utilized (see Note 27).

4. Acquisition of FECl

On December 7, 2021, the Group entered in a Subscription Agreement with FECl. Under the Agreement, the Group subscribed to 60% of the total issued and outstanding shares of FECl for ₱3,000.0 million. The subscription is in line with the Group's strategic move to improve its operations and to ensure sustainable supply and distribution of petroleum products. The fair values of the identified assets and liabilities of FECl at the date of acquisition and the purchase price were allocated as follows:

	<i>Amounts in Million</i>
Assets	
Cash and cash equivalents	₱1,564.8
Trade and other receivables	9,968.2
Inventories	1,170.4
Noncurrent asset held for sale	1,157.5
Other current assets	904.5
Property, plant and equipment	4,710.6
Investment properties	33.7
Investments in associates and a joint venture	150.3
Other noncurrent assets	141.1
	<u>19,801.1</u>
Liabilities	
Trade and other payables	11,639.7
Loans payable	2,727.9
Lease liabilities	115.2
Net deferred tax liabilities	89.6
	<u>14,572.4</u>
Total identifiable net assets acquired at fair value	5,228.7
Percentage share of net assets acquired	60%
Net identifiable assets acquired	3,137.2
Cash consideration	(3,000.0)
Gain on bargain purchase	<u>₱137.2</u>
Total consideration	₱3,000.0
Less cash and cash equivalents acquired	1,564.8
Acquisition of subsidiary, net of cash and cash equivalents acquired	<u>₱1,435.2</u>

The fair values of net identifiable assets acquired are based on a provisional assessment pending the completion of an independent valuation.

If new information obtained within one year of the date of acquisition about facts and circumstances that existed at the date of acquisition identified adjustments to the above amounts, or any additional provisions that existed at the date of acquisition, then the accounting for the acquisition will be reviewed.

The excess of the fair value of the net assets acquired over the consideration amounting to ₱137.2 million represents gain on bargain purchase arising from the acquisition of the business. Non-controlling interest is measured based on its proportionate share on the net assets of FECl at acquisition date.

The revenue and net income of FECl from December 7, 2021, (the date the Group obtained control) up to December 31, 2021, amounted to ₱3,745.1 million and ₱40.6 million, respectively, which were included in the Group's results of operations in 2021. Had the acquisition taken place at the beginning January 1, 2021, the Group's revenue and net income for the year ended December 31, 2021 would have been ₱44,940.9 million and ₱487.8 million, respectively.

The assets and liabilities of FECl as at December 31, 2021 were included in the Group's 2021 consolidated financial statements.

Measurement of Fair Values of Identifiable Assets Acquired

The valuation techniques used for measuring the fair value of material assets acquired were as follows:

Property, Plant and Equipment, and Investment Properties, except Land. The fair value was estimated using the Replacement Cost Approach. This approach considers the costs that would be required currently to replace or construct the same service capacity, employing the same design and similar building materials of an asset.

Land. The fair value was estimated using the Sales Comparison Approach. This approach compares sales of similar or substitute properties and related market data to establish an estimated fair value.

5. Material Noncontrolling Interest

The Group's non-controlling interests on net assets amounting to ₱2,995.5 million and non-controlling interest on net liability amounting to ₱9.2 million as at December 31, 2021 and 2020, respectively, pertain to non-controlling interests in FECl, SRI and PT BES. The Group considers FECl as a subsidiary having material non-controlling interest amounting to ₱3,005.2 million representing 40% ownership in FECl as at December 31, 2021. The net income allocated to non-controlling interest in FECl amounted to ₱28.6 million in 2021. The summarized financial information of FECl as at December 31, 2021 and for the period December 7, 2021 to December 31, 2021 are as follows (amounts in millions):

Current assets	₱13,753.5
Noncurrent assets	1,919.1
Current liabilities	10,812.0
Noncurrent liabilities	976.6
Net assets	₱3,884.0
Revenue	₱3,745.1
Expenses	3,705.5
Income before income tax	39.6
Other income - net	8.3
Provision for (benefit from) income tax	(7.2)
Net income	40.7
Other comprehensive income	2.1
Total comprehensive income	₱42.8
Cash flows from (used in):	
Operating activities	(₱91.8)
Financing activities	(31.4)
Net increase in cash and cash equivalents	(123.2)
Cash and cash equivalents at date of acquisition	1,688.0
Cash and cash equivalents at end of year	₱1,564.8

6. Cash and Cash Equivalents

This account consists of:

	2021	2020
Cash on hand	₱498,797	₱32,782
Cash in banks	1,004,231,952	9,555,483
Short-term placements	748,208,657	64,280,909
	₱1,752,939,406	₱73,869,174

Cash in banks earn interest at the prevailing bank deposit rates and are immediately available for use in the current operations.

Short-term placements are made for varying periods of up to three months depending on the immediate cash requirements of the Group and earn annual interest at rates ranging from 0.38% to 3% in 2021 and 2020.

The sources of the Group's interest income for the years ended December 31, 2021, 2020 and 2019 are as follows:

	Note	2021	2020	2019
Cash and cash equivalents		₱2,869,517	₱1,024,207	₱1,447,844
Notes receivables	7	3,489,018	–	–
Long-term placements	15	96,328	–	–
Financial assets at FVOCI	11	655,760	944,340	1,421,183
		₱7,110,623	₱1,968,547	₱2,869,027

7. Trade and Other Receivables

This account consists of:

	Note	2021	2020
Trade receivable from:			
Third parties		₱4,211,815,526	₱1,508,394
Related parties	23	3,245,207,361	30,890,924
Current portion of notes receivable		1,083,765,900	–
Advances to related parties	23	315,690,000	–
Interest receivable		11,465,049	170,117
Others		65,451,152	2,658,308
		8,933,394,988	35,227,743
Less allowance for impairment losses		2,101,066	1,991,419
		₱8,931,293,922	₱33,236,324

Trade Receivables

Trade receivables are noninterest-bearing and are generally on a 15 to 120 days credit term.

In 2021, the Group assigned with recourse to a local bank its trade receivables from a related party, amounting to ₱1,977,594,771 (see Note 16).

Notes Receivable

This account consists of notes receivables acquired through the acquisition of FECl in 2021 as follows:

	Note	
Notes receivable from:		
Related parties	23	₱951,514,750
Third parties		190,950,505
Total		1,142,465,255
Less noncurrent portion of notes receivable from third parties	15	58,699,355
Current portion of notes receivable		₱1,083,765,900

Notes receivable from related parties are unsecured, collectible on demand and bear an annual interest of 3%.

Notes receivable from third parties includes short term receivables amounting to ₱111,493,215 which bears an annual interest of 3% and is collectible on demand. This also includes an unsecured 5-year note receivable with an interest of 7% as follows:

Current	₱20,757,935
Noncurrent	58,699,355
	<u>₱79,457,290</u>

Interest income on notes receivable in 2021 (for a one-month period) amounted to ₱3,489,018 (see Note 6). Interest receivables in these notes receivable including uncollected interest from date of acquisition amounted to ₱11,291,660 as at December 31, 2021.

Advances to Related Parties

Advances to related parties amounting to ₱315.7 million as of December 31, 2021 were acquired through the acquisition of FECl in 2021. These advances are non- interest bearing and payable in demand (see Note 23).

Allowance for Impairment on Trade and other Receivables

The balances and movements in the allowance for impairment on trade and other receivables as at and for the years ended December 31, 2021 and 2020 are as follows:

	2021	2020
Balance at beginning of year	₱1,991,419	₱2,142,006
Impairment during the year	196,151	33,143
Acquisition of a subsidiary	(86,504)	–
Writeoff during the year	–	(183,730)
Balance at end of year	<u>₱2,101,066</u>	<u>₱1,991,419</u>

8. Inventories

This account consists of fuels inventory measured at cost amounting to ₱1,170,390,829 as at December 31, 2021. As at December 31, 2021, cost of these inventories are lower than the NRV.

The cost of inventories recognized in profit or loss amounted to ₱3,596.6 million (see Note 20).

9. Noncurrent Asset Held For Sale

The identifiable assets acquired by the Group in the acquisition of FECl in 2021 includes investment in the shares of stock of an associate amounting to ₱1,157.5 million classified as noncurrent assets held for sale. On February 13, 2019, the BOD of FECl approved the plan to sell its shares of stock of the associate. Due to the COVID-19 pandemic, the negotiations with prospective investors were delayed and were put on hold. The BOD and management of FECl, after acquisition of control of BEC, decided to continue the negotiation with the prospective investor. As of May 26, 2022, the BOD and management of FECl are in discussion with a prospective investor to finalize the arrangement for the sale of the investment. Based on the ongoing negotiation, the carrying amount of the investment is lower than the negotiated price of the transaction.

10. Other Current Assets

This account consists of:

	2021	2020
Excess tax credits	P691,513,146	P2,587,566
Prepayments for:		
Rent	106,137,683	-
Insurance	10,941,189	-
Taxes	6,737,561	-
Others	19,630,602	502,928
Refundable deposits	51,607,329	21,368,350
Derivative asset	29,396,159	-
Current portion of deferred input VAT	11,645,988	-
Others	9,182,072	5,561,596
	P936,791,729	P30,020,440

Refundable Deposits

This account consists of refundable deposits from:

	Note	2021	2020
Investment contract		P22,692,553	P21,368,350
Leases	25	28,914,776	-
		P51,607,329	P21,368,350

Refundable deposit from investment contract pertains to the amount paid by the Group as refundable deposit for an equity investment opportunity in a power generation company in Taiwan amounting to US\$444,960. In 2019, the Group decided not to pursue its investment after conducting its due diligence review.

Refundable deposit from investment contract amounted to P22,692,553 and P21,368,350 as at December 31, 2021 and 2020. As of May 26, 2022, the Group is in the process of pursuing collection of this deposit.

Derivative Asset

The Company entered into foreign exchange forward contracts with local banks for the purchase of foreign currencies on a spot or forward basis to finance the settlement of the Group's foreign-currency denominated fuel purchases. The terms of the forward contracts provide for the payment of a fixed peso amount in exchange for a fixed amount of foreign currency.

The unrealized gain from change in fair value of derivative asset amounted to P2.4 million as at December 31, 2021 (see Note 22).

Deferred Input VAT

Deferred input VAT pertains to services and capital goods. This is presented in the consolidated statements of financial position as at December 31, 2021 as follows:

	Note	
Current		₱11,645,988
Noncurrent	15	34,334,726
		₱45,980,714

11. Financial Assets at FVOCI

This account consists of the Group's investments in:

	2021	2020
Quoted debt securities	₱22,290,148	₱22,669,473
Quoted equity securities	6,933,131	5,978,977
	₱29,223,279	₱28,648,450

The movements in financial assets at FVOCI are as follows:

	2021	2020
Balance at beginning of year	₱28,648,450	₱47,203,112
Net unrealized gain (loss) during the year on:		
Equity securities	954,155	(1,144,060)
Debt securities	(379,326)	589,398
Redemption of bonds	–	(18,000,000)
Balance at end of year	₱29,223,279	₱28,648,450

The balances and movements in the balance of cumulative unrealized gains on financial assets at FVOCI are as follows:

	2021	2020	2019
Balance at beginning of year	₱3,495,312	₱4,049,974	₱1,183,379
Unrealized gains (losses) for the year	574,829	(554,662)	2,866,595
Balance at end of year	₱4,070,141	₱3,495,312	₱4,049,974

The Company's quoted debt securities bear annual interest rates ranging from 4.50% to 4.84% in 2021 and 2020. Interest income earned on these securities amounted to ₱0.7 million and ₱0.9 million in 2021 and 2020, respectively (see Note 6).

Dividend income earned from quoted shares of stock amounted to ₱1,540 and ₱1,440 in 2020 and 2019, respectively.

The Company's financial assets at FVOCI as at December 31, 2021 and 2020 are carried at fair values based on quoted market prices or bidding dealer price quotations from active markets at the reporting date. This fair valuation is classified under the Level 1 category (see Note 30).

12. Investments in Associates and a Joint Venture

The details of the investments in associates and a joint venture of the Parent Company are as follows:

	Place of Incorporation	Nature of Business	Percentage of Ownership	
			2021	2020
Associates:				
Vintage EPC Co. Ltd. (VEPC)	Thailand	Engineering, Procurement and Construction	15.00	15.00
VTE International Construction Co. Ltd. (VINTER)	Thailand	Engineering, Procurement and Construction	15.00	15.00
Amlan Negros Development Realty Corp. (ANDRC)	Philippines	Holding of real properties	14.40	–
Ecology Insurance Agency Corp. (EIAC)	Philippines	Agency and brokering services	14.25	–
Filoil Asia Pacific, Ltd. (FAP)	Singapore	Sale of petroleum products	12.00	–
Joint Venture -				
Mariveles Joint Venture Corporation (MJVC)	Philippines	Management services	18.00	–

The Group's investments in associates and a joint venture are measured using the equity method. The balances and movements in this account are as follows:

	2021	2020
Cost		
Balance at beginning of year	₱172,285,031	₱172,285,031
Additions arising from acquisition of a new subsidiary	150,342,415	–
Balance at end of year	322,627,446	172,285,031
Accumulated equity in net losses		
Balance at beginning of year	(42,763,516)	(7,823,939)
Share in net income (loss) for the year	(11,731,017)	(34,939,577)
Balance at end of year	(54,494,533)	(42,763,516)
Cumulative translation gain (loss)		
Balance at beginning of year	(6,072,180)	34,130,165
Translation losses during the year	(6,829,631)	(40,202,345)
Balance at end of year	(12,901,811)	(6,072,180)
	₱255,231,102	₱123,449,335

The carrying amounts of investments in associates and a joint venture are as follows:

	2021	2020
Associates:		
FAP	₱102,000,000	₱-
VEPC	67,095,038	₱84,972,982
VINTER	37,397,363	38,476,353
ANDRC	123,079	-
EIAC	882,646	-
Joint Venture -		
MJVC	47,732,976	-
	₱255,231,102	₱123,449,335

The balances and movements in the cumulative gain (loss) on translation of investments in associates and a joint venture, included under "Other equity reserves" account in the consolidated statement of financial position are as follows:

	2021		
	Cumulative Translation Loss	Deferred Tax Asset (Liability)	Net
Balances at beginning of year	(₱6,072,180)	₱-	(₱6,072,180)
Translation loss	(6,829,631)	-	(6,829,631)
Balances at end of year	(₱12,901,811)	₱-	(₱12,901,811)

	2020		
	Cumulative Translation Gain (Loss)	Deferred Tax Asset (Liability)	Net
Balances at beginning of year	₱34,130,165	(₱5,119,524)	₱29,010,641
Translation loss	(40,202,345)	5,119,524	(35,082,821)
Balances at end of year	(₱6,072,180)	₱-	(₱6,072,180)

	2019		
	Cumulative Translation Gain	Deferred Tax Liability	Net
Balances at beginning of year	₱27,544,449	(₱4,131,667)	₱23,412,782
Translation gain	6,585,716	(987,857)	5,597,859
Balances at end of year	₱34,130,165	(₱5,119,524)	₱29,010,641

The tables below show the summarized financial information of the associates and joint venture as at and for the years ended December 31, 2021 and 2020:

	2021			
	VEPC	VINTER	MJVC	OTHERS
Current assets	₱5,010,501,894	₱1,559,720,799	₱104,584,877	₱500,000
Noncurrent assets	41,541	–	28,826,828	75,555,074
Current liabilities	4,475,077,989	1,336,556,032	2,752,940	76,184,377
Equity	535,465,446	223,164,767	130,658,765	(345,023)

Equity	611,990,665	222,163,011
Revenue	90,500,239	24,507,957
Net income (loss)	(240,723,734)	7,793,223

13. Investment Properties

The balances and movements in this account are as follows:

	2021			
	Land	Building and Improvements	Construction in Progress	Total
Cost				
Balances at beginning of year	₱186,226,000	₱–	₱–	₱186,226,000
Acquisition of a subsidiary	29,000,000	1,659,703	3,077,688	33,737,391
Fair value changes	23,973,000	–	–	23,973,000
Balances at end of year	₱239,199,000	₱1,659,703	₱3,077,688	₱243,936,391

	2020
	Land
Balance at beginning of year	₱174,708,000
Fair value changes	11,518,000
Balance at end of year	₱186,226,000

The Group earned rental income amounting to ₱6,572,194 from its investment property in 2021 (see Note 25). The Group has no income from its investment properties in 2020.

Direct operating expenses arising from these investment properties amounted to ₱2,530,471, ₱113,631, and ₱109,329 in 2021, 2020, and 2019, respectively.

The fair values of land classified as investment properties were estimated by an independent appraiser using the market data approach which involves the comparison of the properties to those that are more or less located within the vicinity of the appraised properties and are subject of recent sales and offerings. Adjustments were made to arrive at the market value by considering the location, size, shape, utility, desirability and time element. The latest appraisal report was dated December 31, 2021.

The fair value of investment properties is categorized under Level 3 (significant unobservable inputs) (see Note 30).

The significant inputs to fair valuation are as follows:

- *Price per sqm* - estimated value prevailing in the real estate market depending on the location, area, shape and time element.
- *Value adjustments* - adjustments are made to bring the comparative values in approximation to the investment property taking into account the location, size, shape and road frontage, among others.

The range of inputs used in the fair valuation is as follows:

	2021	2020
Price per sqm	₱480 to ₱4,800	₱28 to ₱4,700
Value adjustments	-30% to +10%	-10% to +20%

Sensitivity Analysis. Generally, significant increases (decreases) in price per sqm and any value adjustments would result in a significantly higher (lower) fair value measurement.

14. Property and Equipment

The balances and movements in this account as at and for the years ended December 31, 2021 and 2020 are as follows:

	2021							
	Land	Depot Tanks	Building and Improvements	Furniture, Fixtures, and Office Equipment	Transportation Equipment	ROU Asset	Construction in Progress	Total

Carrying Amounts	₱644,713	₱402,283	₱1,046,996

In 2021, the Company sold its property and equipment with carrying amount of ₱22,701 for ₱182,271 resulting to a gain on sale amounting to ₱159,570 (see Note 22).

In 2019, the Company sold its office condominium unit to third parties with a carrying amount of ₱77,004,808 resulting to a loss on sale amounting to ₱9,913,857 (see Note 22). The office condominium was measured using revaluation model. Accordingly, revaluation increment amounting to ₱43,804,902 in 2019 was reversed as a result of the disposal.

Depreciation and amortization are distributed in the consolidated statements of comprehensive income as follows:

	Note	2021	2020	2019
Cost of goods sold	20	₱40,658,164	₱–	₱–
General and administrative expenses	21	10,562,310	707,459	4,788,352
		₱51,220,474	₱707,459	₱4,788,352

15. Other Noncurrent Assets

This account consists of:

	Note	2021	2020
Long-term placements		₱107,089,806	₱–
Noncurrent portion of notes receivable	7	58,699,355	–
Noncurrent portion of deferred input VAT	10	34,334,726	–
Net retirement asset	24	11,997,023	–
Deferred exploration costs (net of allowance for impairment amounting to ₱114.6 million in 2021 and 2020)		6,013,928	6,013,928
Others		833,341	351,864
		₱218,968,179	₱6,365,792

Long-term Placements

Long-term placements amounting to ₱107.1 million represent money market placements with a term of 5 years and earn interest at prevailing rates. Interest income on long-term placements in 2021 (for a one-month period) amounted to ₱96,328 (see Note 6).

Deferred Exploration Costs

As at December 31, 2021 and 2020, the Group's deferred exploration and evaluation costs amounting to ₱6.0 million pertains to its 20% participation in a geothermal power project in Iriga, Camarines Sur, Philippines. On February 26, 2013, the Department of Energy (DOE) awarded Geothermal Service Contract (GSC) No. 2013-02-043 to the Company. The GSC grants an exclusive right to explore, develop and utilize the geothermal resources in Iriga, Camarines Sur for five (5) years.

On January 22, 2016, the Parent Company assigned its 80% participation and its capacity as operator in the Iriga project to Desco, Inc. (Desco) through a Farm-in Agreement which was approved by the DOE on November 8, 2016.

16. Trade and Other Payables

This account consists of:

	Note	2021	2020
Trade payables to:			
Third parties		₱6,041,131,261	₱13,341,888
Related parties	23	75,187,979	–
Liabilities on receivable financing		1,977,594,771	–
Advances from related parties	23	448,705,618	–
Dividends payable		304,688,714	888,714
Statutory payables		263,510,276	771,829
Interest payable	23	200,228,120	–
Unearned revenue		65,603,411	–
Provision	29	53,451,301	–
Current portion of lease liabilities	25	18,516,177	–
Others		53,177,230	4,557,165
		₱9,501,794,858	₱19,559,596

Trade Payables

Trade payable to third parties pertains to local and imported fuel purchases that are noninterest-bearing and are generally on a 30 to 120 days' term.

Liabilities on Receivables Financing

On September 16, 2021, the Group (through its acquired subsidiary in 2021) was granted by a local bank a receivable financing line amounting to ₱2.0 billion. The terms of the facility agreement covers the assignment of receivables of TPC subject to 100% valuation. The availment of the facility is co-terminus with the maturity of the assigned invoice plus a grace period of up to two days. The maximum tenor of the facility drawdown is 120 days. Financing cost on the facility drawdown shall be based on prevailing market rate to be deducted upfront from the drawdown of the facility.

As of December 31, 2021, liabilities on receivable financing availed from this facility amounted to ₱1,977,594,771. Finance cost relating to liabilities on receivable financing included in the consolidated income statement starting from date of acquisition of the Group's subsidiary until December 31, 2021 amounted to ₱10,475,590 (see Note 16).

Dividends Payable

Dividends payable pertains to unpaid cash dividends to non-controlling interests declared by a subsidiary in 2021 prior to the acquisition of the Group amounting to ₱304.7 million.

Statutory Payables

Statutory payables pertain amounts payable to various government agencies. These are unsecured, and are normally settled within 30 days.

Accrued Expenses

Accrued expenses consist of accruals for utilities and outside services which are normally settled in the subsequent year.

Finance costs

This account consists of interest expense and bank charges arising from letters of credit with local banks. The details are as follows:

	Note	2021	2020	2019
Interest expense on:				
Loans payable	17	₱7,989,138	₱-	₱886,473
Lease liability	25	7,398,490	-	-
Fee for receivable financing		10,475,592	-	-
		₱25,863,220	₱-	₱886,473

17. Loans Payable

This account consists of the Group's borrowings with several local banks and a related party as a result of the acquisition of FECl. The loans payable bear annual interest rates ranging from 3.00% to 7.00% in 2021.

The current and noncurrent portions of the loans payable of the Group as at December 31, 2021 follow:

	Local Banks	Related Parties	Total
Current	₱1,325,942,632	₱-	₱1,325,942,632
Noncurrent	49,089,030	833,909,360	882,998,390
	₱1,375,031,662	₱833,909,360	₱2,208,941,022

Details of the loans payable as at December 31, 2021 are as follows:

Purpose	Terms and Conditions	Effective Interest Rate (p.a.)	Outstanding Balance
To finance working capital requirements	Payable in 17 days to 90 days 2021.	3.0% to 5.8% in 2021	₱846,890,000
To finance the acquisition of assets	Payable in 18 months and may be extended for another 18 months as may be agreed by the parties	91-day treasury bill plus a specified margin	833,909,360
To finance investments in other companies	Payable in one (1) year	4.92%	250,000,000
To finance working capital requirements	Payable in one (1) year	4.25%	221,052,632
To finance the acquisition of assets	Payable on a monthly basis starting from December 28, 2018 until November 28, 2028.	6% for the first 30 days, to be repriced every 30 to 180 days.	55,133,943
To finance the acquisition of transportation equipment	Payable in equal monthly installment for five years; secured by transportation equipment with carrying amount of ₱1.6 million	6%	1,955,087
			₱2,208,941,022

Standby Credit Facility Agreement with a Related Party

The Group has an existing Standby Credit Facility Agreement (SCFA) for a maximum amount of ₱1,045.0 million with its subsidiaries from a related party. As at December 31, 2021, the outstanding loans payable arising from the SCFA with a related party amounted to ₱833.9 million. These loans are unsecured, interest-bearing based on the 91-day treasury bill rate plus a specified margin, and shall be payable in 18 months and may be extended for another 18 months as may be agreed upon by the parties.

Short-term Credit Facilities with Local Banks

The Group has short-term credit facilities with local banks to finance its working capital requirements. As at December 31, 2021, the outstanding loans payable from short-term credit facilities with local banks aggregated ₱1,317.9 million. These loans are unsecured, bear annual interest rates ranging from 3.0% to 5.8% in 2021, and payable in 17 days to one year from drawdown date.

The schedule of maturities of the loans payable as at December 31, 2021 is as follows:

Year	Amount
2022	₱1,317,942,632
2023	835,864,447
2024 and onwards	55,133,943
	₱2,208,941,022

The Company is not covered by any restrictive loan covenant.

Reconciliation of Liabilities Arising from Financing Activities

The table below details the cash and noncash changes in the Company's liabilities arising from financing activities as at December 31, 2021 and 2020.

	Liabilities on Receivables Financing	Loans Payable	Lease Liabilities	Advances from Related Parties	Dividends Payable	Total
Balances at the beginning of year	₱-	₱-	₱-	₱-	₱-	₱-
Noncash changes:

Balance at end of year	450,000,000	112,500,000	1,844,875,000	461,218,750	1,844,875,000	461,218,750
Capital stock	14,218,643,064	₱3,554,660,766	2,815,392,714	₱703,848,178	2,815,392,714	₱703,848,178
Treasury stock	18,000,000	₱3,240,000	18,000,000	₱3,240,000	18,000,000	₱3,240,000

Increase in Authorized Capital Stock

On October 23, 2020, the Parent Company's BOD approved the increase in authorized capital stock from ₱2.5 billion divided into 10.0 billion shares with a par value of ₱0.25 per share, to ₱5.0 billion divided into 20.0 billion shares with the same par value. On September 10, 2021, the SEC approved the increase in the Parent Company's authorized capital stock.

Memorandum of Agreement with M2DC

On December 18, 2020, a MOA was executed between the Parent Company and M2DC for M2DC's subscription to 9.8 billion shares, representing 67% of the issued and outstanding capital stock of the Parent Company post-increase, for ₱0.285 per share. The shares were issued out of the Parent Company's increase in authorized capital stock.

The total consideration of ₱2.8 billion was paid in cash, 25% upon fulfillment of the conditions precedent, and the remainder was paid upon the SEC approval for the increase in authorized capital stock. As at September 30, 2021, the Parent Company has fulfilled the conditions precedent, and the investment of M2DC was completed.

Treasury Stock

This pertains to the Parent Company's 18.0 million shares held by its subsidiary, Mabini Energy Corporation amounting to ₱3,240,000.

19. Revenues

This account consists of:

	2021	2020	2019
Revenue within the scope of PFRS 15:			
Sale of fuel	₱3,720,458,742	₱-	₱-
Port service income	15,887,418	-	-
Hauling service	2,159,842	-	-

				₱20,615,910	₱24,609,860

Terms and Conditions of Transactions and Balances with Related Parties

Outstanding balances of notes receivables are unsecured, unimpaired, interest-bearing and to be settled in cash.

Trade payables and advances to related parties are unsecured, noninterest-bearing and are to be settled in cash within one (1) year.

Loans payable are generally unsecured, interest-bearing and are to be settled in cash.

All related party transactions are in compliance with the related party transactions policy of the Group including the required approval process. This includes review of the related party committee and approval of the BOD for transactions exceeding certain thresholds and approval criteria.

24. Retirement Benefits

The Group has a funded, noncontributory defined benefit retirement benefit plan (the Plan) covering all regular employees of the Parent Company and its operating subsidiary. The retirement benefits are based on a certain percentage of the final monthly basic salary for every year of credited service of the employees. The benefits to be received by the employees under the Group’s defined benefit retirement plan meet the minimum mandated benefit under Republic Act No. 7641, *The Retirement Pay Law*.

The defined benefit obligation under the defined benefit retirement plan is determined using the projected unit credit method. The benefits to be received by the employees meet the minimum mandated benefit under Republic Act No. 7641, *The Retirement Pay Law*. The latest actuarial valuation report of the Group was at and for the year ended December 31, 2021.

Net Retirement Liability of the Parent Company

Movements of net retirement benefit liability of the Parent Company recognized in the consolidated statements of financial position are as follows:

	2021	2020
Balance at beginning of year	P5,680,301	P14,256,449
Retirement expense	4,492,561	4,264,900
Contributions paid	–	(13,117,316)
Net remeasurement loss recognized in OCI	2,420,776	276,268
Balance at end of year	P12,593,638	P5,680,301

The funded status of the Parent Company’s net retirement liability is as follows:

	2021	2020
Present value of defined benefit obligation	P32,130,202	P38,808,203
Fair value of plan assets	(19,536,564)	(33,127,902)
Net retirement benefit liability	P12,593,638	P5,680,301

The balances and movements of the present value of defined benefit obligation are as follows:

	2021	2020
Balance at beginning of year	₱38,808,203	₱33,614,601
Current service cost	4,343,742	3,709,912
Interest expense	1,043,559	1,197,187
Benefits paid	(13,980,985)	(498,938)
Actuarial losses (gains) recognized in OCI:		
Experience adjustments	4,953,607	435,161
Change in financial assumptions	(3,037,924)	350,280
Balance at end of year	₱32,130,202	₱38,808,203

The balances and movements of the fair value of plan assets are as follows:

	2021	2020
Balance at beginning of year	₱33,127,902	₱19,358,152
Benefits paid	(13,980,985)	(498,938)
Interest income	894,740	642,199
Return on assets excluding interest income	(505,093)	509,173
Contributions paid	-	13,117,316
Balance at end of year	₱19,536,564	₱33,127,902

Net Retirement Asset of the Operating Subsidiary

Movements of net retirement asset of the operating subsidiary included under “Other noncurrent assets” account in the consolidated statements of financial position as at and for the year ended December 31, 2021 are as follows (see Note 15):

Balance at beginning of year	₱-
Acquisition of a subsidiary	11,340,777
Retirement expense	(1,766,457)
Net remeasurement gain recognized in OCI	2,422,703
Balance at end of year	₱11,997,023

The funded status of the operating subsidiary’s net retirement asset as at December 31, 2021 is as follows:

Present value of defined benefit obligation	₱70,537,162
Fair value of plan assets	(82,534,185)
Net retirement asset	₱11,997,023

The balances and movements of the present value of defined benefit obligation as at and for the year ended December 31, 2021 are as follows:

Balance at beginning of year	P-
Acquisition of a subsidiary	71,263,122
Current service cost	1,755,917
Interest expense	262,286
Actuarial gains recognized in OCI:	
Change in financial assumptions	(2,195,636)
Experience adjustments	(548,527)
Balance at end of year	P70,537,162

The balances and movements of the fair value of plan assets as at and for the year ended December 31, 2021 are as follows:

Balance at beginning of year	P-
Acquisition of a subsidiary	82,603,899
Interest income	251,746
Return on assets excluding interest income	(321,460)
Balance at end of year	P82,534,185

Retirement Expense

The components of the retirement expense included under “General and administrative expenses” account in the consolidated statements of comprehensive income (see Note 21) are as follows:

	2021	2020	2019
Current service cost	P6,099,659	P3,709,912	P3,678,301
Net interest expense	159,359	554,988	381,120
	P6,259,018	P4,264,900	P4,059,421

Cumulative Remeasurement Gains (Loss) on Retirement Benefit Liability

The balances and movements of the cumulative remeasurement gain or loss on net retirement benefit liability, included under “Other equity reserves” account in the consolidated statements of financial position, are as follows:

Attributable to Parent Company

	2021		
	Cumulative Remeasurement Loss	Deferred Tax Asset	Net
Balances at the beginning of year	(P175,735)	P-	(P175,735)
Remeasurement loss	(1,679,429)	(109,355)	(1,788,784)
Balances at the end of year	(P1,855,164)	(P109,355)	(P1,964,519)

2020			
	Cumulative Remeasurement Gain (Loss)	Deferred Tax Asset (Liability)	Net
Balances at the beginning of year	₱100,533	(₱30,160)	₱70,373
Remeasurement loss	(276,268)	30,160	(246,108)
Balances at the end of year	(₱175,735)	₱-	(₱175,735)

2019			
	Cumulative Remeasurement Gain	Deferred Tax Liability	Net
Balances at the beginning of year	₱2,502,834	(₱750,850)	₱1,751,984
Remeasurement loss	(2,402,301)	720,690	(1,681,611)
Balances at the end of year	₱100,533	(₱30,160)	₱70,373

Attributable to Non-Controlling Interests

2021			
	Cumulative Remeasurement Gain	Deferred Tax Liability	Net
Balances at the beginning of year	₱-	₱-	₱-
Remeasurement gain	1,681,356	(248,015)	1,433,341
Balances at the end of year	₱1,681,356	(₱248,015)	₱1,433,341

The major categories of plan assets as a percentage of the fair value of total plan assets are as follows:

	2021	2020
Investments in unit investment trust fund	35.92%	49.76%
Investments in government securities	53.70%	44.88%
Other securities and debt instruments	7.96%	3.77%
Others	2.42%	1.59%
	100.00%	100.00%

The principal assumptions used in determining the present value of the defined benefit obligation are as follows:

	2021	2020
Discount rate	5.03%	3.56%
Salary increase rate	5.00%	5.00%

Sensitivity analysis on the net retirement benefit liability as at December 31, 2021 and 2020 are as follows:

	Change in Assumption	Effect on Net Retirement Benefit Liability	
		2021	2020
Discount rate	+1.00%	(P7,766,341)	(P2,018,946)
	-1.00%	9,097,821	2,302,970
Salary increase rate	+1.00%	P9,145,920	P2,411,046
	-1.00%	(7,959,458)	(2,159,003)

The sensitivity analysis above have been determined based on a method that extrapolates the impact on net retirement benefit liability as a result of reasonable changes in key assumptions occurring at the reporting date.

As at December 31, 2021, the maturity analysis of the undiscounted net retirement benefit liability is as follows:

Within one (1) year	P13,625,130
More than one (1) year to five (5) years	88,930,390
More than five (5) years to 10 years	47,754,131
More than 10 years to 15 years	27,287,513
More than 15 years to 20 years	11,161,031
More than 20 years to 25 years	17,980,914
	P206,739,109

The average duration of the retirement benefit liability as at December 31, 2021 is approximately 10.25 years.

25. Leases

Group as a Lessee

The Group entered into various lease agreements for the lease of terminals and deposits, service vehicles and office spaces. The term of the leases ranges from one (1) year to five (5) years. In most cases, no escalation was incorporated in the terms the leases. Other leases has an annual 5% escalation rate.

ROU Assets

The movements in the ROU assets for the year ended December 31, 2021 are as follows:

Group-Occupied ROU Assets

The balance and movements in the Group-occupied ROU assets as at and for the year ended December 31, 2021 are as follows:

Cost	
Balance at beginning of year	P-
Acquisition of a subsidiary	425,971,059
Balance at end of year	425,971,059
Accumulated Amortization	
Balance at beginning of year	-
Acquisition of a subsidiary	304,363,858
Amortization	7,052,938
Balance at end of year	311,416,796
Carrying Amount	₱114,554,263

The Group-occupied ROU asset is classified as property and equipment in the statement of financial position (see Note 14).

Lease Liabilities

The balance and movements of lease liabilities as at for the year ended December 31, 2021 follows:

	Note	
Balance at beginning of year		P-
Acquisition of a subsidiary		115,163,398
Payments		(17,739,477)
Interest expense	16	7,398,490
Balance at end of year		₱104,822,411

The lease liabilities are presented in the statement of financial position as at December 31, 2021 as follows:

	Note	
Current	16	₱18,516,177
Noncurrent		86,306,234
		₱104,822,411

Future minimum lease payments (MLP) and maturity analysis of lease liabilities as at December 31, 2021 are as follows:

	Future MLP	Present Value
Current	₱20,255,561	₱18,516,177
Noncurrent	91,183,588	86,306,234
	₱111,439,149	₱104,822,411

Security Deposit

Security deposits to be refunded at the end of the lease term amounted to ₱28.9 million as at December 31, 2021 (see Note 10).

Short-term Lease

The Group has certain short-term and low value leases. The Group applies the recognition exemption for these leases. Rental expense is recognized in the 2021 and 2020 statement of comprehensive income as follows:

	Note	2021	2020
Cost of sales and services	20	₱1,055,580	₱-
General and administrative expenses	21	6,650,290	722,732
		₱7,705,870	₱722,732

The lease-related expenses recognized in the 2021 statement of comprehensive income are as follows:

Rent expense on short-term leases	₱47,308,454
Interest expense	7,398,490
Amortization of lease liabilities	7,242,345
	₱61,949,289

Group as Lessor

The Group entered into various operating lease agreements to lease out office spaces and Amlan facility to related parties and third parties.

Rental income recognized in the 2021 statement of comprehensive income amounted to ₱6.6 million (see Note 19).

Future minimum lease receivables under the non-cancellable operating leases are as follows:

Within one year	₱78,866,330
After one year but not more than five years	269,459,966
	₱348,326,296

26. Registration with the Board of Investments (BOI)

On January 3, 2017, the BOI approved the application of the FLC as a new industry participant with new investments for storage and bulk marketing of petroleum products, for the operation of its Amlan Import Terminal - 9 Storage Tanks with 60 Million Liters Capacity (the Project).

In the grant of incentives, the extent of the Project's Income tax holiday (ITH) entitlement shall be based on the Project's ability to contribution to the economy's development based on net value added, job generation and measured capacity. FLC should also endeavor to undertake meaningful and sustainable corporate social responsibility activities in the locality where the Project is implemented.

FLC's registration with the BOI entitles it to the following fiscal and nonfiscal incentives available to its registered project, among others:

- ITH for income directly attributable to the revenue generated from the registered project for five (5) years from January 2017 or actual start of commercial operations, whichever is earlier;
- Additional deduction from taxable income of 50% of the wages corresponding to the increment in number of direct labor for skilled and unskilled workers in the year of availment as against the previous year if the project meets the requirements as stated in the BOI certificate;
- Minimum duty of 3% and VAT on imported capital equipment. Importation of brand new capital equipment, machinery and accompanying spare parts, shall be entitled to this incentive subject to requirements stated in the BOI registration;
- Tax credit on domestic capital equipment shall be granted on locally fabricated capital equipment. This shall be equivalent to the difference between the tariff rate and 3% duty imposed on the imported counterpart;
- Importation of consigned equipment for a period of 5 years from date of registration, subject to posting of the appropriate bond, provided that such consigned equipment shall be for exclusive use of the registered project;
- Exemption from taxes and duties on imported spare parts for consigned equipment with bonded manufacturing warehouse upon compliance with requirements stated in the BOI registration;
- Exemption from real property tax on production equipment or machinery. Equipment or machineries shall refer to those reasonably needed in the operations of the registered enterprise and will be used exclusively in its registered activity;
- Exemption from contractor's tax; and
- Employment of foreign nationals which may be allowed in supervisory, technical or advisory positions for five years from the date of registration.

In 2021, FLC availed benefits from ITH amounting to ₱50.9 million.

On March 4, 2021, the BOI granted the deferment of the FLC's ITH availment for 2020 due to the adverse effect of COVID-19 pandemic, effectively extending the expiry to January 3, 2023. Accordingly, the FLC's income tax for the 2020 taxable year is computed based on 27.5% regular corporate income tax. No ITH incentive was availed in 2020.

27. Income Taxes

The components of income taxes as reported in the statement of comprehensive income are as follows:

	2021	2020	2019
Reported in Profit or Loss			
Current tax expense	₱6,354,516	₱8,674	₱186,069
Deferred tax benefit	900,118	(3,023,007)	(2,260,358)
	₱7,254,634	(₱3,014,333)	(₱2,074,289)
Reported in OCI			
Deferred tax expense (benefit) on:			
Gain (loss) on translation of Investments in Associates and a Joint Venture	(₱1,707,408)	(₱5,119,524)	₱987,857
Remeasurement losses on net retirement benefit asset	(357,370)	(30,160)	(720,690)
Revaluation increment in office condominium	-	-	12,622,809
	(₱2,064,778)	(₱5,149,684)	₱12,889,976

The component of the Group's net deferred tax liabilities as presented in the consolidated statements of financial position as at December 31, 2021 are as follows:

Deferred tax assets:	
Lease liabilities	₱18,403,694
Accrued expenses	13,049,403
Unrealized foreign exchange losses	6,688,450
Retirement benefit liability	3,486,477
Others	1,098,375
	42,726,399
Deferred tax liabilities:	
Fair value adjustment in property and equipment arising from business combination	863,060,098
ROU assets	22,103,703
Unrealized derivative gain	4,510,751
Debt issuance cost	72,028
	889,746,580
	₱847,020,181

As at December 31, 2021 and 2020, the Group has the following deductible temporary differences and carryforward benefits of NOLCO and excess of MCIT over RCIT for which no deferred tax assets was recognized:

	2021	2020
NOLCO	₱408,877,913	₱397,521,813
Accumulated equity in net losses of associates	54,890,819	42,763,516
Net retirement benefit liability	9,997,127	5,752,920
Unamortized past service cost	9,066,348	10,286,371
Allowance for ECL on trade receivables	2,101,066	1,991,419
Excess of MCIT over RCIT	1,462,974	1,670,101
Unrealized foreign exchange loss	6,491,831	1,864,902
	₱492,888,078	₱461,851,042

The management assessed that there may be no sufficient future taxable income against which benefits of the deductible temporary differences and carryforward benefits can be utilized.

Details of the Group's NOLCO as at December 31, 2021 are as follows:

Year Incurred	Amount	Applied	Expired	Balance	Year of Expiration
2021	₱48,003,326	₱-	₱-	₱48,003,326	2026
2020	39,073,349	-	-	39,073,349	2025
2019	321,801,238	-	-	321,801,238	2022
2018	36,647,226	-	36,647,226	-	2021
	₱445,525,139	₱-	₱36,647,226	₱408,877,913	

Under Revenue Regulations No. 25-2020, net operating loss incurred for the taxable years 2020 and 2021 will be carried over for the next five (5) consecutive taxable years immediately following the year such loss was incurred.

Details of the Group's excess of MCIT over RCIT as at December 31, 2021 are as follows:

Year Incurred	Amount	Applied	Expired	Balance	Year of Expiration
2021	₱9,781	₱-	₱-	₱9,781	2024
2020	8,674	-	-	8,674	2023
2019	1,444,519	-	-	1,444,519	2022
2018	216,908	-	216,908	-	2021
	₱1,679,882	₱-	₱216,908	₱1,462,974	

The reconciliation between the provision for income tax based on statutory income tax rate and effective income tax rate is as follows:

	2021	2020	2019
Income tax benefit at statutory tax rate	₱29,262,105	(₱19,909,124)	(₱59,966,393)
Increase (decrease) in income tax resulting from:			
Expired NOLCO	9,161,807	12,368,898	13,356,476
Change in unrecognized deferred tax assets	7,603,914	9,961,741	23,296,615
Nontaxable income	(2,083,552)	(3,455,862)	(4,149,132)
Difference in tax rates	(2,168)	3,023,007	2,588,530
Nondeductible expenses	1,313,429	1,075,340	4,281,006
Income subjected to final tax	(1,777,656)	(590,564)	(860,708)
Expired excess of MCIT over RCIT	216,908	11,800	7,424
Taxable other income	-	-	19,371,893
Others	(36,440,153)	(5,499,569)	-
Income tax benefit at effective tax rate	₱7,254,634	(₱3,014,333)	(₱2,074,289)

On March 26, 2021, RA No. 11534 or the Corporate Recovery and Tax Incentive for Enterprises (CREATE) Act was signed into law by the President of the Philippines. Under the CREATE Act, the Group's Regular Corporate Income Tax (RCIT) is subjected to 25% instead of 30% income tax rate. In addition, the minimum corporate income tax (MCIT) is subjected to 1% instead of 2% of gross income for a period of three (3) years. The changes in the income tax rates became effective beginning July 1, 2020.

For financial reporting, however, the Group did not apply the change in income tax rate. Accordingly, the income tax rates used in preparing the financial statements as at and for the year ended December 31, 2020 are still 30% and 2% for RCIT and MCIT, respectively. Hence, for tax purposes, the change in rates under the CREATE law is applied effective July 1, 2020. The effect of the change was recognized in 2021.

28. Earnings (Loss) per Share

The following reflects the loss and share data used in the basic and diluted loss per share computation:

	2021	2020	2019
Net income (loss) attributable to shareholders of the Parent Company	₱81,383,718	(₱63,201,772)	(₱198,093,808)
Divided by: Weighted average number of outstanding shares	14,200,643,064	2,797,392,714	2,797,392,714
Basic and diluted income (loss) per share	₱0.006	(₱0.023)	(₱0.071)

There have been no other transactions involving common shares or potential common shares between the end of financial reporting period and the date of issuance of these consolidated financial statements. There are no potential dilutive shares as of December 31, 2021 and 2020.

29. Provisions

In the normal course of business, the Company has possible obligations arising from contingencies as at December 31, 2021 and 2020. The details of the provisions are not disclosed as it may prejudice the outcome of these contingencies.

The movement of provisions for the years ended December 31, 2021 and 2020 follows:

	2021	2020
Balance at beginning of year	P73,467,674	P99,801,875
Reclassification to trade and other payables	(15,015,510)	-
Payments	(5,000,864)	(26,334,201)
Balance at end of year	P53,451,300	P73,467,674

In 2021, provision amounting to P15,015,510 was reclassified to trade and other payables account in the consolidated statements of financial position due to the final determination of the obligation for settlement of the Group. This is considered as a noncash information in the consolidated statements of cash flows.

30. Fair Value Measurement

The following tables present the carrying amounts and fair values of the Group's assets measured at fair value, and liability for which fair values are disclosed, and the corresponding fair value hierarchy:

		2021			
		Fair Value			
		Carrying Amount	Quoted Prices in Active Markets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	Note				
Assets Measured at Fair Value					
Financial assets at FVOCI:					
Quoted debt securities	11	P22,290,148	P22,290,148	P-	P-
Quoted equity securities		6,933,131	6,933,131	-	-
Investment properties	13	243,936,391	-	-	243,936,391
Derivative asset	10	29,396,159	-	-	29,396,159
		302,555,829	29,223,279	-	273,332,550
Liability for which Fair Value is Disclosed					
Loans payable	17	P2,208,941,022	P-	P2,183,389,085	P-

		2020			
		Fair Value			
		Carrying Amount	Quoted Prices in Active Markets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	Note				
Financial assets at FVOCI:					
Quoted debt securities	11	P22,669,474	P22,669,474	P-	P-
Quoted equity securities		5,978,976	5,978,976	-	-
Investment properties	13	186,226,000	-	-	186,226,000
		P214,874,450	P28,648,450	P-	P186,226,000

The Group used the following techniques to determine fair value measurements:

Financial Assets at FVOCI. The fair values of financial assets at FVOCI are based on quoted market prices or bidding dealer price quotations from active markets at the reporting date.

Investment Properties. The fair value of the investment property was determined based on latest appraisal report. The appraisal was carried out using the market data or direct sales comparison approach which uses significant unobservable inputs such as recent sale transactions or offerings of similar properties which have occurred and offered with close proximity to the subject property. The fair valuation is classified under Level 3 category.

Loans Payable. The fair values of loans payable were determined as the sum of all future cash flows discounted using the prevailing market rates of interest for instruments with similar maturities. The discount rates used ranging from 2.17% to 4.63% in 2021.

Derivative Asset. The fair value of foreign exchange forward contracts is calculated by reference to projected forward exchange rates for contracts with similar maturity profiles.

There were no transfers between Level 1, Level 2, and Level 3 fair value hierarchy measurements in 2021 and 2020.

The table below presents the Group's financial assets and liabilities whose carrying amounts approximate their fair values due to their short-term nature as at December 31, 2021 and 2020:

	2021	2020
Financial assets at amortized cost:		
Cash and cash equivalents*	₱1,752,440,609	₱73,836,392
Trade and other receivables**	7,847,491,127	33,166,196
Long-term placements***	107,089,806	-
Refundable deposit	51,607,329	21,368,350
	₱9,758,628,871	₱128,370,938
Financial liabilities at amortized cost:		
Trade and other payables****	₱9,100,713,693	₱18,787,767

*Excluding cash on hand amounting to ₱498,797 and ₱32,782 as at December 31, 2021 and 2020, respectively

**Excluding nonfinancial assets amounting to ₱1,083,802,795 and ₱70,128 as at December 31, 2021 and 2020, respectively.

***Included under "Other noncurrent assets" account

****Excluding nonfinancial liabilities amounting to ₱401,081,165 and ₱771,829 as at December 31, 2021 and 2020, respectively.

31. Financial Risk Management Objectives and Policies

The Group's financial instruments consist of cash and cash equivalents, trade and other receivables (excluding nonfinancial assets), refundable deposits, derivative asset, financial assets at FVOCI, long-term placements, notes receivable and trade and other payables (excluding nonfinancial liabilities). The main financial risks arising from the Group's use of financial instruments include credit risk, liquidity risk, and market risks. The BOD regularly reviews and approves the appropriate policies for managing these financial risks, as summarized below.

Credit Risk

The Group's exposure to credit risk arises from the failure of its counterparty in fulfilling its financial commitments to the Group under the prevailing contractual terms. Financial instruments that potentially subject the Group to credit risk consist primarily of financial assets at amortized cost and debt securities at FVOCI.

The carrying amounts of financial assets at amortized cost and financial assets at FVOCI represent the Group's maximum credit exposure.

Trade Receivables

Trade receivables arise mainly from transactions with customers. The Group limits its exposure to credit risk by transacting with pre-approved and credit-worthy customers that have undergone stringent financial credit, and legal evaluation process. In addition, trade receivable balances are strictly monitored on an ongoing basis to ensure timely collections. Generally, trade receivables are written off if determined to be uncollectible.

There are no guarantees against trade receivables but the management closely monitors the receivable balance on a monthly basis and is in regular contact with this customer to mitigate risk.

The Group uses a provision matrix to calculate ECL for trade receivables. The provision rates are based on days past due for groupings of various customer segments analyzed by customer type, credit terms, and number of days outstanding. The provision matrix is based on the Group's historical default rates, which are adjusted for forward-looking information if forecast of economic conditions (i.e., stock market index) are expected to improve over the next year which can lead to a decreased number of defaults in the stock trading industry. At each reporting date, the observed historical default rates are updated and changes in the forward-looking estimates are analyzed.

Allowance for impairment losses on trade receivables amounted to ₱2.1 million and ₱2.0 million as at December 31, 2021 and 2020, respectively (see Note 7).

Financial Assets at Amortized Cost

The Group limits its exposure to credit risk by depositing its cash and cash equivalents only with banks that have good credit standing and reputation in the local and international banking industry. In addition, the trade and other receivables and refundable deposit are transacted with counterparties with good credit standing and a relatively low risk of default.

It is the Group's policy to measure ECL on the above instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the counterparties.

The Group also considers financial assets that are more than 30 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent significant credit risk such as when non-payment arising from administrative oversight rather than resulting from financial difficulty of the counterparty.

Debt Securities at FVOCI

The Group is subject to credit risk on its quoted debt securities at FVOCI. The Group limits its exposure to credit risk by acquiring quoted debt securities from companies with good credit standing and a relatively low risk of default. The Group recognizes changes in the fair value of the debt securities, whether attributable to changes in market conditions or changes in credit risk, in other comprehensive income.

The table below shows the carrying amounts of financial assets at amortized cost classified under 12-month ECL and lifetime ECL as at December 31, 2021 and 2020:

	2021				
	Financial assets at amortized cost				
	12-month ECL	Lifetime ECL - Not Credit Impaired	Lifetime ECL - Credit Impaired	Financial Assets at FVOCI	Total
Cash and cash equivalents*	₱1,752,440,609	₱-	₱-	₱-	₱1,752,440,609
Trade and other receivables**	3,558,796,295	4,288,694,832	2,101,066	-	7,849,592,193
Debt securities at FVOCI	-	-	-	22,290,148	22,290,148

	₱116,562,222	₱11,808,716	₱1,991,419	₱22,669,474	₱153,031,831

*Excluding cash on hand amounting to ₱32,782 as at December 31, 2020

**Excluding nonfinancial assets amounting to ₱70,128 as at December 31, 2020.

Liquidity Risk

Liquidity risk arises from the possibility that the Group may encounter difficulties in raising adequate funds to meet its financial commitments at a reasonable cost. The Group's objectives in effectively managing its liquidity are: (a) to ensure that adequate funding is available at all times; (b) to meet the commitments as they arise without incurring unnecessary costs; and (c) to be able to access funding when needed at the least possible cost.

To manage this exposure and to ensure sufficient liquidity levels, the Group closely monitors its collections and expenditures by preparing cash position reports that present actual and projected cash flows for the subsequent month.

The table below summarizes the maturity profile of the Company's financial liabilities as at December 31, 2021 and 2020 based on contractual undiscounted payments.

	2021					Total
	On Demand	1 to 3 Months	3 to 12 Months	1 to 5 Years	More than 5 Years	
Trade and other payables*	₱399,923,884	₱2,335,753,127	₱6,365,036,682	₱-	₱-	₱9,100,713,693
Lease liabilities	-	5,063,890	15,191,671	91,183,588	-	111,439,149
Loans payable**	-	896,650,707	510,552,620	883,218,992	7,554,046	2,297,976,365
	₱399,923,884	₱3,237,467,724	₱6,890,780,973	₱974,402,580	₱7,554,046	₱11,510,129,207

*Excluding nonfinancial liabilities and current portion of lease liabilities amounting to ₱382,564,988 and ₱18,516,177 as at December 31, 2021, respectively.

**Including future interest payable

	2020					Total
	On Demand	1 to 3 Months	3 to 12 Months	1 to 5 Years	More than 5 Years	
Trade and other payables*	₱-	₱6,724,142	₱12,063,625	₱-	₱-	₱18,787,767

*Excluding nonfinancial liabilities amounting to ₱0.8 million as at December 31, 2020

**Including future interest payable

Market Risks

The Group is exposed to market risks, primarily those related to foreign currency risk, equity price risk and interest rate risk.

Foreign Currency Risk. Foreign currency risk arises on financial instruments that are denominated in a foreign currency other than the functional currency.

The Group's transactional currency exposures arise from its transactions denominated in United States Dollar (USD), Thailand Baht (THB) and Indonesian Rupiah (IDR). The Group periodically reviews the trend of the changes in foreign exchange rates to address its exposure to foreign currency risk. The Group's policy is to maintain foreign currency exposure within acceptable limits and within the existing regulatory guidelines.

The following table shows the Group's foreign currency-denominated monetary financial assets and liabilities, and their Philippine Peso equivalents:

	2021		2020	
	Original Currency	Philippine Peso	Original Currency	Philippine Peso
Denominated in US Dollars				
Financial assets at amortized cost:				
Cash and cash equivalents	\$1,338,584	₱68,266,428	\$506,277	₱24,312,962
Refundable deposit	444,960	22,692,553	444,960	21,368,350
	\$1,783,544	₱90,958,981	\$951,237	₱45,681,312
Financial liability at amortized cost -				
Trade payables	\$71,771,657	₱3,660,282,735	\$-	₱-
Denominated in Thailand Baht				
Trade receivable	THB6,476,322	₱9,844,009	THB6,085,234	₱9,691,952

	2021		2020	
	Original Currency	Philippine Peso	Original Currency	Philippine Peso
Denominated in Indonesian Rupiah				
Financial assets at amortized cost:				
Cash and cash equivalents	IDR37,076,990	₱129,947	IDR42,014,057	₱142,848
Trade receivable	126,571,277	443,602	125,998,277	428,394
	163,648,267	573,549	168,012,334	571,242
Financial liabilities at amortized cost -				
Trade and other payables*	50,363,634,663	176,512,548	49,255,773,279	167,469,631
	(IDR50,199,986,396)	(₱175,938,999)	(IDR49,087,760,945)	(₱166,898,389)

For purposes of translating the foreign-currency-denominated monetary assets and liabilities as of December 31, the exchange rates applied were as follows:

	2021	2020
US\$	₱51.00 to US\$1	₱48.02 to US\$1
THB	₱1.52 to THB1	₱1.68 to THB1
IDR	₱0.0035 to IDR1	₱0.0034 to IDR1

The following table demonstrates the sensitivity to a reasonably possible change in the foreign currency exchange rates, with all other variables held constant, of the Group's income before tax. There is no other impact on the Group's equity other than those already affecting profit or loss.

	US Dollar		Thailand Baht	
	Increase (Decrease) in Exchange Rates	Effect on Income Before Tax	Increase (Decrease) in Exchange Rates	Effect on Income Before Tax
2021	1.08	(₱75,587,162)	0.03	₱194,290
	(1.08)	75,587,162	(0.03)	(194,290)
2020	1.09	₱1,036,848	0.03	₱185,229
	(1.09)	(1,036,848)	(0.03)	(185,229)

The Group assessed that its income before tax is not significantly affected by the reasonably possible change in exchange rates between PHP and IDR in 2021 and 2020.

The Company enters into foreign exchange forward contracts to manage its foreign currency risk on its foreign currency-denominated trade payables, whereby the Group purchases certain amount of foreign currencies at a fixed forward rate. Derivative asset as at December 31, 2021 and unrealized gain on derivative asset in 2021 arising from outstanding foreign exchange forward contracts amounted to ₱29.4 million (see Note 10).

Equity Price Risk. Equity price risk is the risk that the Group will incur economic losses due to adverse changes in a particular stock or stock index. The Group's equity price risk arises from its financial assets at FVOCI.

The Group's policy is to maintain the risk to an acceptable level. Movement in share price is monitored regularly to determine the impact on its financial position.

The table below sets forth the impact of changes in PSE index (PSEi) in the Group's unrealized gain or loss on its financial assets at FVPL and financial assets at FVOCI in 2021 and 2020:

	2021		2020	
Changes in PSEi	18.63%	(18.63%)	33.21%	(33.21%)
Financial assets at FVOCI in				
Telecommunications	₱2,901	(₱2,901)	₱6,462	(₱6,462)
Banks	1,068	(1,068)	6,845	(6,845)
	₱3,969	(₱3,969)	₱13,307	(₱13,307)

Commodity Price Risk. Commodity price risk is the risk that future cash flows from a financial instrument will fluctuate because of changes in market prices of commodities. The Company's commodity price risk results primarily from movements of the commodity prices of fuel purchases and sales from the date of delivery until the date of agreed price setting with the suppliers and customers.

The Company's exposure to commodity price risk is minimal because the intervening period between the date of delivery and date of agreed price setting is short. Accordingly, derivative asset or liability on commodity price risk which is embedded in fuel purchases and sales contracts is minimal as at December 31, 2021 and 2020.

Interest Rate Risk. The Group's exposure to the risk for changes in market interest rates relates primarily to the Group's interest-bearing financial assets and liabilities.

As at December 31, 2021 and 2020, the Group's interest-bearing financial assets and liabilities consist primarily of notes receivable, long-term placements and loans payable with fixed interest rates. The Group's exposure to changes in the interest rates is insignificant.

Capital Management

The primary objective of the Group's capital management is to ensure that it maintains strong and healthy financial position to drive its expansion and growth in the future.

The Group considers its capital stock and additional paid-in capital aggregating to ₱3,554,660,766 and ₱352,939,718 as at December 31, 2021 and 2020, respectively, as its capital employed. The Group manages the capital structure and will make adjustments when there are changes in the economic conditions, business activities, expense programs and the risk characteristics of underlying assets. No changes were made in the objectives, policies or processes during the years ended December 31, 2021 and 2020.

The Group is not subject to externally-imposed capital requirements.

32. Segment Reporting

The Group is organized into one reportable segment which is the downstream oil operations particularly the sale of petroleum products. Accordingly, all significant operating decisions are based upon analysis of the Group as one segment. The financial information about the sole business segment is equivalent to the consolidated financial statements of the Group.

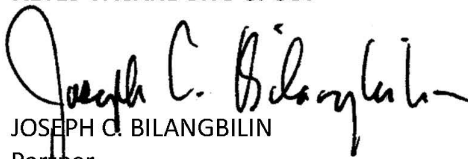

**REPORT OF INDEPENDENT AUDITORS
ON SUPPLEMENTARY SCHEDULES FOR FILING WITH THE
SECURITIES AND EXCHANGE COMMISSION**

The Stockholders and the Board of Directors
Basic Energy Corporation and Subsidiaries
UB 111 Paseo de Roxas Building,
Paseo de Roxas, Legaspi Village
Makati City

We have audited in accordance with the Philippine Standards on Auditing, the consolidated financial statements of Basic Energy Corporation and Subsidiaries (the Group) as at and for the year ended December 31, 2021 and have issued our report dated May 26, 2022. Our audit was made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The accompanying supplementary schedules are the responsibility of the Group's management. These supplementary schedules include the following:

- Financial Assets
- Amounts Receivable from Directors, Officers, Employees, Related Parties, and Principal Stockholders
- Amounts Receivable from Related Parties which are Eliminated during Consolidation of Financial Statements
- Long-term Debt
- Indebtedness to Related Parties
- Guarantees of Securities and Other Issuers
- Capital Stock
- Reconciliation of Retained Earnings Available for Dividend Declaration
- Map of the Conglomerate

The supplementary schedules are presented for purposes of complying with the Revised Securities Regulation Code Rule 68, and are not part of the basic consolidated financial statements. The supplementary schedules have been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, fairly state, in all material respects, the financial data required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.

**REPORT OF INDEPENDENT AUDITORS
ON COMPONENTS OF FINANCIAL SOUNDNESS INDICATORS**

The Stockholders and the Board of Directors
Basic Energy Corporation and Subsidiaries
UB 111 Paseo de Roxas Building
Paseo de Roxas, Legaspi Village
Makati City

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Basic Energy Corporation and Subsidiaries (the Group) as at December 31, 2021 and 2020 and for the years ended December 31, 2021, 2020 and 2019, and have issued our report thereon dated May 26, 2022. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole.

The supplementary schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Group's management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for purposes of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the basic consolidated financial statements prepared in accordance with PFRS. The components of the financial soundness indicators contained in the supplementary schedule have been subjected to the auditing procedures applied in the audit of the consolidated financial statements and in our opinion, are fairly stated in all material respects in relation to the consolidated financial statements taken as a whole.

**“STATEMENT OF MANAGEMENT RESPONSIBILITY
FOR CONSOLIDATED FINANCIAL STATEMENTS”**

The management of **Basic Energy Corporation and Subsidiaries** (the Group) is responsible for the preparation and fair presentation of the consolidated financial statements including the schedules attached therein, as at and for the years ended December 31, 2021 and 2020, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Group’s financial reporting process.

The Board of Directors reviews and approves the consolidated financial statements including schedules attached therein, and submits the same to the members.

Reyes Tacandong & Co., the independent auditor appointed by the Board of Directors, has audited the consolidated financial statements of the Group in accordance with Philippine Standards on Auditing, and in its report to the members, has expressed its opinion on the fairness of presentation upon completion of such audit.

PART I – BUSINESS AND GENERAL INFORMATION

Item 1. Business

(A) Description of Business

(1) Business Development

The Company was organized initially as Basic Enterprises, Inc., a stock corporation on September 19, 1968 and became an oil and gas exploration and development company on April 26, 1971. A year after, it assumed a new name, Basic Petroleum and Minerals, Inc. Over the years, the Company evolved from an operating company into a holding company under the corporate name, Basic Consolidated, Inc. As a holding company, it held equity investments in the following wholly owned subsidiaries: Basic Diversified Industrial Holdings, Inc., an investment holding company, iBasic, Inc., an information technology management company and service integrator, Basic Biofuels Corporation, which is into the development of biofuels, Basic Renewables, Inc., which is into development of renewable energy, Mabini Energy Corporation (formerly Basic Geothermal Energy Corporation), which holds the Wind Energy Service Contract for the development of a Wind Energy Project in Mabini, Batangas, Grandway Group Limited, a Hong Kong registered company which is into investments in equities abroad and in Southwest Resources, Inc., an oil exploration company, which is owned 72.58% by the Company.

On the Company's oil and gas business, the Company was a party, together with other oil exploration companies, in the exploration, development and production of natural gas under Service Contract 53, in onshore Mindoro. This service contract was, however, terminated by the Department of Energy ("DOE") in a letter dated June 14, 2019 due to non-submission by the operator of the reportorial requirements prescribed by DOE under the service contract. The remaining members of the consortium, with Philodrill Corporation as the lead, filed a request with the DOE to reconsider the termination, however, on March 10, 2020, the Company withdrew its participation in the request for reconsideration and relinquished its remaining shares to the remaining consortium members.

The Company has been awarded by the Department of Energy (DOE) a total of five (5) service contracts for the exploration and development of geothermal energy, namely: GSC No. 8 at Mabini, Batangas, which was awarded in 2007, GSC No. 2013-02-042 at Mariveles, Bataan, GSC No. 2013-02-041 at East Mankayan, Benguet, Mountain Province and Ifugao, GSC No. 2013-02-043 at Iriga, Camarines Sur and Albay and GSC No. 2013 -11-048 at West Bulusan, Sorsogon, which were awarded in 2013.

The Company surrendered to the DOE and withdrew from GSC No. 8 on May 06, 2020, while the service contracts for the East Mankayan, Mariveles and West Bulusan projects were terminated by DOE effective April 15, 2019, December 28, 2019, and January 24, 2019, respectively. In the Iriga project, where the Company has a twenty percent (20%) participating interest, Desco, Inc. is the operator, which is currently undertaking permitting and various works preparatory to the drilling of exploratory wells.

In 2013, the Company entered into a joint venture arrangement with Petrosolve Sdn Bhd, a company registered in Malaysia, which is into the business of developing oil fields and holds a technology for enhanced chemical oil recovery. The joint venture established Grandway Group Limited (Grandway), a joint venture company in Hong Kong, as the corporate vehicle of the joint venture in entering into business relationships in connection with the management and operation of oil wells. Grandway was initially 70% owned by the Company and 30% owned by Petrosolve Sdn Bhd until 2017, when the latter transferred its shares to the Company, such that Grandway is now owned 100% by the Company. The joint venture then established PT Basic Energi Solusi (PT BES), as its operating arm in Indonesia for the management and operation of oil wells located in the Dadangilo and Wonocolo areas. In 2015, after having drilled five (5) wells, PT BES placed the project on hold until the organizational structure of local cooperatives and/or local miners which will handle the management and operation of oil wells in said areas and with whom PT BES shall enter into new cooperation agreements, have been established.

In 2018, the Company decided to invest in Vintage EPC Co. Ltd. (VEPC) and Vintage International Construction Co. Ltd. (VINTER), which are limited companies registered in Thailand. VEPC and VINTER are the first counterparties of GEP (Myanmar) Co. Limited, the owner-developer of the 220 MW solar power plant located in the Minbu District, Magway region, Myanmar, for the supply and construction service requirements of the Engineering, Procurement and Construction (EPC) subcontractor engaged for the said project. After the required due diligence work on said companies and its contracts, in 2018, the Company acquired 15% of the equities of the said companies.

In March 2021, Mabini Energy Corporation (“MEC”), a wholly owned subsidiary of the Company, was awarded by the Department of Energy (“DOE”), a Wind Energy Service Contract (“WESC”) with the contract area located in the municipality of Mabini, Batangas, giving MEC the exclusive rights to explore, develop and operate a Wind Energy Project in the aforementioned contract area. It is expected that a favorable pre-development stage of the project would lead to the construction and operation of the said power plant

In December 2021, the Company invested in Filoil Energy Company Inc. (FEC) for an equity interest of up to 60% of the latter’s outstanding capital stock. The investment in FEC is in line with the strategic move of the Company to improve its operations. The investment in FEC gave the Company indirect participation in FEC’s downstream and midstream oil and gas activities through its existing joint venture with the Total group.

The Company continues to look for business opportunities for the development of other renewable energy resources such as but not limited to wind and solar power.

(2) Business of the Company and its Subsidiaries

Wind Energy Project, Mabini, Batangas

The Company, through its wholly owned subsidiary, Mabini Energy Corporation (“MEC”), has been awarded a Wind Energy Service Contract by the DOE on March 17, 2021 to explore, develop, and operate a wind energy power plant for a period of twenty-five (25) years, extensible for another twenty-five (25) years. The project shall be implemented under R.A. 9513 (Renewable Energy Act of 2008).

The exploration area to be covered is 4,860 hectares situated in Mabini, Batangas.

Currently, the Company is conducting a Wind Resource Assessment (“WRA”) campaign and is expected to be completed in one (1) year. Related permitting and licensing works are also on-going that are necessary for the installation of meteorological mast and wind measuring equipment that will be used in the WRA campaign.

Upon favorable result of the WRA campaign, a full feasibility study, preliminary engineering and design, and financial closure will be done in order to secure the declaration of commerciality of the plant from the DOE. Such approval by the DOE will lead to the construction, testing and commissioning of the plant. Commercial operation of the said plant is expected to be by year 2027.

Oil and Gas Operations

The Company was a party together with other oil exploration companies (the consortium), in Service Contract 53 for the exploration, development and exploitation of certain areas in onshore Mindoro. This service contract was awarded by the Department of Energy, which prescribes the periods and programs for exploration, development, and commercial production, pursuant to Presidential Decree No. 87.

Service Contract 53 (Onshore Mindoro)

SC 53 was awarded by the Department of Energy on July 8, 2005, for a ten-year exploration period. It covers 6,600 sq. km. of the onshore areas of Mindoro Island which is within the North Palawan Micro-Continental Block. Past exploration efforts in SC 53 included the drilling of 4 exploration wells, where three (3) of these wells encountered oil and gas but were considered non-commercial at the time of drilling.

The consortium entered into a Farm-In Agreement with Pitkin Petroleum Ltd. (Pitkin) which was approved by the Department of Energy on June 11, 2008. Under the Farm-In Agreement, Pitkin completed a magneto-telluric survey in onshore Mindoro and acquired in May 2010, over 200 kilometers of 2D seismic studies designed to delineate and assess the hydrocarbon potential of the Progreso-1X in San Jose, Mindoro Occidental and the Sablayan, Mindoro Occidental.

On July 11, 2011, Resource Management Associates Pty Limited of Australia signed a Farm-in Agreement with Pitkin Petroleum to acquire 35% from its 70% participating interest. On November 11, 2011, Pitkin Petroleum reported that Sub-Phase 1, which was to end March 6, 2012, was fulfilled with the completion of the 200 kilometers of seismic data. Sub-Phase 2 which carried a minimum work obligation of two (2) wells and a financial commitment of US\$2.0 million, have been extended up to the resolution of the complaint filed by Famatodi, Inc., an organization of indigenous peoples in Mindoro and the issuance of the Certificate of Precondition by the National Commission of Indigenous Peoples. The project was suspended in May 2012, pending resolution of the aforementioned case filed by Famatodi, Inc. and clearance by the NCIP.

In 2016, the DOE approved the agreement between Pitkin Petroleum and Mindoro Palawan Oil and Gas, Inc. (MPOGI) for the transfer of Pitkin Petroleum's participating interest and operatorship to MPOGI. In 2018, the Famatodi case was dismissed. In a letter of the DOE dated June 14, 2019 addressed to the consortium, the DOE terminated the service contract due to non-submission by the operator of the reportorial requirements prescribed by DOE under the service contract. A motion for reconsideration was submitted by the members of the consortium, except MPOGI. However, while this motion for reconsideration was pending resolution by the DOE, the Company, on February 20, 2020, advised the consortium of its withdrawal from this service contract, including its participation in the aforesaid motion for reconsideration filed by the consortium.

On March 1, 2020, the Department of Energy approved the company's withdrawal, and the relinquished its remaining shares to the remaining consortium members. The withdrawal of the Company from this service contract entailed the surrender to the remaining consortium members of the Company's 3% participating interest.

Geothermal Energy

The Company is likewise involved in the exploration, development, and production of geothermal energy. It has been awarded service contracts for various areas by the Department of Energy ("DOE"), which prescribes the periods and programs for these service contracts pursuant to Presidential Decree No. 1442, for the Mabini Geothermal Service Contract and pursuant to R.A. 9513 (Renewable Energy Act of 2008) for the subsequent geothermal service contracts.

Mabini, Batangas Geothermal Service Contract

The Mabini, Batangas Geothermal Service Contract was awarded to the Company on July 10, 2008. The contract area is approximately 32.5 square kilometers and covers the Calumpan Peninsula. The contract period for exploration is 5 years and was extended up to 2019.

The Company has secured the commitments of the local government units which indicated support to the project. The Certificate of Non-Coverage was issued by the Environmental Management Bureau on March 25, 2009 and the Certificate of Non-Overlap from the National Commission on Indigenous People was issued on April 15, 2009.

The Company completed on March 8, 2010, the due diligence studies and preliminary technical data collection, collation, and re-evaluation as part of its commitment in the work program committed with the DOE.

In 2015, Trans-Asia Oil and Energy Development Corporation (now Phinma Energy Corporation) agreed to a 25% participating interest in this project, which was confirmed upon completion of the gravity survey which it conducted in 2014. The DOE approved the farm-in agreement of the Company with Phinma Energy on September 15, 2015.

For this service contract, the work program committed to the DOE involved the drilling of one (1) exploratory well by July 2017. The drilling of the well was undertaken by Diamond Drilling Corporation of the Philippines and on February 6, 2017, target depth was reached at 1,679

meters. After various tests were conducted to determine the geothermal resource in the area, the consortium decided to drill a follow-up well in Barangay Solo, within the service contract area as part of its Contract Year 10 work program, with an estimated cost of Php50.710 million.

Phinma Energy withdrew from the consortium on July 3, 2018. On May 6, 2020, the Company withdrew from this service contract as it was unable to establish a viable geothermal resource.

Frontier Geothermal Service Contracts

The Company was also awarded the service contracts from the Department of Energy, covering four (4) geothermal projects, namely: Iriga Geothermal Power Project, Mariveles Geothermal Power Project, the East Mankayan Geothermal Power Project, and the West Bulusan Geothermal Power Project, all carrying a maximum exploration period of 5 years.

The East Mankayan Geothermal Power Project lies immediately east of the Cervantes, Ilocos Sur geothermal block of Pan Pacific Power Philippines Inc. and south of the Bontoc-Sadanga block which is operated by Magma Energy Resources. Immediately south is the Daklan block operated by Clean Rock Energy. The area actually covers the three provinces of Benguet, Mountain Province and Ifugao. The proposed area is surrounded by lots of known thermal manifestations, e.g., hot springs and thermally altered grounds.

The Mariveles Geothermal Power Project, in Bataan is situated along the West Luzon Volcanic Arc which starts from Mt. Pinatubo in the north and extends farther south across the Manila Bay towards Batangas and northeastern Mindoro.

In 2017, Desco Inc. entered into a Farm-in Agreement with the Company covering the acquisition of twenty-five (25%) percent participating interest in the Mariveles Geothermal Project.

The Company has requested the DOE for a suspension of obligations in the East Mankayan and Mariveles projects, due to difficulties encountered in securing the required LGU permit and other clearances. For the East Mankayan project, the DOE terminated the service contract effective April 15, 2019, which the Company has acceded to, while the DOE terminated the Mariveles project effective December 28, 2019.

The Iriga Geothermal Power Project in Camarines Sur is bounded to the north by Isarog geothermal block of PNOC-RC and to the east by the highly productive Tiwi geothermal service contract area of formerly Chevron, now AP Renewables Inc. The aerial landscape is dominated by Iriga or Asog Volcano, a stratovolcano immediately southwest of Lake Buhi in southern Luzon.

In 2016, Desco Inc. entered into a Farm-in Agreement with the Company acquiring eighty (80%) percent participating interest in and operatorship of the Iriga Geothermal Project. The farm-in agreement and transfer of operatorship on the project to Desco Inc. was approved by the DOE in a letter received by the Company on November 8, 2016. In 2019, Desco Inc. received DOE's approval for the extension of its work program, which involved securing the permitting requirements for the project, NCIP certification and well site preparations for the drilling of exploratory wells. The Company has a 20% interest in the project.

The West Bulusan Geothermal Power Project is situated in the municipalities of Juban, Magallanes, Irosin, Bulan, Matnog, Santa Magdalena, and Bulusan, in the province of Sorsogon. It is bounded on the northeast by the geothermal contract area of SKI Construction Group, Inc. and is in close vicinity to Mount Bulusan, an active volcano and a declared Natural Park by virtue of Proclamation No. 421 on 27 November 2000. The Department of Energy (DOE) estimates the project site to have a potential installed capacity of 50 MW. The area has previously been explored by the PNOC Energy Development Corporation (PNOC EDC) in the 1980's. Data gathered from this study is the take-off point for the feasibility study undertaken by the Company.

In 2016, the Company requested the DOE for a moratorium on the West Bulusan Geothermal Project, in view of the concerns raised by the indigenous people in the area and the local government units therein against the project, which prevented the Company from conducting the necessary permitting works. The DOE terminated this service contract effective October 19, 2018, to which the Company has submitted a request for reconsideration, which was subsequently denied. On January 24, 2019, the DOE finally terminated this service contract.

Green Energy E-Transport Program

The Green Energy E-transport Program was conceptualized to address the national thrust of promoting renewable energy and the modernization of public-utility vehicles. The program will pursue the installation of rooftop solar systems on retail stations in partnership with various oil companies. The solar energy generated by the solar system will be stored in powerwall batteries to be utilized by the retail station to complement the electricity supply drawn from the grid.

Apart from the solar system, electric charging stations will be installed in the service stations to power the batteries of the modern electric buses that will replace the old jeepneys. This is designed to jumpstart the availability of e-charging networks for e-buses and other electric vehicles in the near future. The entire program is in line and underpinned by the government's direction enshrined in R.A. 9513 (Renewable Energy law) and R.A. 11697 (Electric Vehicle Development Law). The rooftop solar systems coupled with electric vehicles for public utility will contribute to the reduction of carbon emission to address global warming.

Risk Management

In the Geothermal, Solar and Wind Energy business, the Company is faced with the following risks, in order of importance:

- (a) Probability of Exploration and Development Success. Geothermal, Solar and Wind projects are inherently high-risk undertakings. There can be no assurance that the Company's activities will be successful in discovering commercially viable geothermal, solar or wind resources. Even if an apparently feasible resource is determined, there is no guarantee that it can be economically exploited. Despite the Company's reliance on advanced technology such as 3-D seismic data to improve the probability of success of discovery, geothermal, solar and wind energy operations are speculative businesses. Advanced technology, even with the correct interpretation, only assists in identifying the resource structures and does not ensure the certainty of the presence of commercially viable resources. Moreover, in

geothermal operations, 3-D seismic data and other advanced technology require higher investments that may result in higher losses, should the drilling prove unsuccessful.

Risk of heavy financial losses if prospects would prove unsuccessful could be mitigated through:

Farming-Out of Interest: A Farm-Out Agreement is a contract whereby a third party agrees to acquire from a licensee an interest in a production license and the corresponding operating agreement for a consideration normally consisting of an undertaking to perform a specified work obligation in the drilling of one or more wells. Farming out is usually undertaken by the seller of interest as a source for funding or as part of the rationalization of a licensee's interests. The seller may want to dispose of areas or interests which are peripheral to its main operations or in which it has small equity holdings but would take up as much management time as a larger holding.

Spreading Exploration Risks through Joint Ventures in Several Exploration Blocks: Forming alliances and jointly bidding for the development of a range of opportunities in geothermal, solar and wind projects, mitigates exploration and development risks of a corporation as there is risk-sharing - the cost and responsibilities of drilling, development or production are spread over a number of entities. Joint ventures also enable companies to free up funds otherwise tied up in a single project and enable these companies to build a portfolio of prospects.

Exploring in Geological Proven Areas: The Company has been making investments and will continue to invest in geologically proven provinces only.

- (b) **Operating Hazards of Exploratory Drilling Activities and Environmental Risks** (for geothermal projects). Drilling operations may be delayed, curtailed, or subjected to operating and technical difficulties. Unexpected drilling conditions, adverse weather conditions, unanticipated pressure or formations, equipment breakdowns, industrial and environmental accidents and other such events may occur which may have adverse effects on the Company's operations and correspondingly on its financial performance and condition. Geothermal exploration, development and drilling activities will be subject to Philippine environmental laws and regulations. Normal exploration and drilling operations involve certain operating hazards such as explosions, cratering, well blowouts, uncontrollable flows of steam, natural gas or well fluids, releases of toxic gas, accidental leakages, formations with abnormal pressures, fires, pollution and other environmental perils and risks, any of which may subject the Company to extensive liability or loss of assets.

Operating risks in the exploration and development drilling and production phases are generally directly driven by standards in design, procurement and installation, operating procedures, and contingency planning. The Company, in its investment evaluation process, considers the presence and implementation of the following measures and strategies to mitigate risk exposures: (i) hiring of technically competent staff that are adept in utilizing state-of-the-art technology and could conduct effective evaluation work; and (ii) ensuring adherence to the various environmental laws and regulations, taking into account not only local but international expectations as well.

- (c) Volatility in Power Prices and Exchange Rate Risks. Revenues derived from successful operation of the projects will be affected by changes in power prices or charges. Power prices are sensitive to changes in the global supply and demand conditions, forward selling activities, domestic and foreign government regulations, environmental trends, overall global economic conditions, and other macroeconomic and political factors that are beyond the Company's control. Furthermore, if revenues are pegged to the US dollar, the Company is exposed to exchange rate risks given the volatility of the rate of exchange between the US dollar and Philippine peso.
- (d) Government Regulations and Approvals. Government action such as changes in regulations may affect the Company's business and eventual operating and financial performance. Government may limit access to prospective development areas, implement stricter environmental laws to protect human health and the environment, impose higher taxes and royalties, all of which may adversely affect the Company's financial performance.

For the risks mentioned in items (c) and (d) above, these risks could be mitigated through early identification systems of risk exposures to external threats such as changes in government regulations and changes in the geo-political environment of operating locations. The Company will continue to negotiate power price agreements with inputs from experts. The Company adheres to its policy of involving competent technical professionals in the preparation and negotiations of power price agreements. The Company will also continue to involve competent technical professionals in the preparation and negotiations of power purchase agreements for its projects.

(3) Employees

The Company has fifteen (15) officers and employees, of which six (6) are executive officers, seven (7) are assigned as technical, project, accounting, administrative, IT and operations support staff and two (2) are assigned for utility and service staff. The Company expects to hire additional personnel or engage the services of consultants as may be needed. When the Company will pursue additional renewable energy projects, project managers, and engineering, technical and other support personnel may be required for its projects.

Item 2. Properties

The Company and its subsidiary, Basic Diversified Industrial Holdings Inc., own several parcels of land located in Bolinao, Pangasinan, containing an aggregate gross area of about 426,361 square meters. The property is located approximately 4.3 kilometers southwest from the Bolinao-Bani Provincial Road and is best suited for agro-industrial land development.

The Company also owns parcels of land located at Tanay, Rizal with a total area of 35,000 square meters, near the town proper with good roads and is suitable for residential housing development or for an agricultural farm project.

The Company also owns a parcel of land located at Gutalac, Zamboanga del Norte with an area of approximately 22 hectares, suitable for agricultural farm development.

To date, the Company or its subsidiaries do not have any plan to own additional properties for its projects.

Item 3. Legal Proceedings

The Company or its subsidiaries and affiliates are not involved in any pending legal proceeding(s) relative to properties or property interests of the Company, in the last five (5) years.

Item 4. Submission of Matters to a Vote of Security Holders

The following matters were submitted for approval of the stockholders at the annual stockholders meeting held on November 24, 2021, and were approved as follows:

- a) Approval of the minutes of the annual stockholders meeting held on October 23, 2020, which contained, among others:
 - i) the election of the members of the Board of Directors including Independent Directors for 2021;
 - ii) approval of the increase in the Authorized Capital Stock of the Corporation from Php2.5 billion to Php5 Billion and the corresponding amendment of Article VII of the Amended Articles of Incorporation;
 - iii) approval of the amendments to the Amended By-laws of the Corporation, namely, creation of Section 10 of Article II for the creation of the position of Chairman Emeritus and Article VI on the deletion of the profit-sharing provisions of directors and officers of the Corporation; and
 - iv) appointment of Reyes Tacandong & Co. as External Auditors for the 2020 financial statements.
- b) Approval of the President's Report for 2020-2021 and the 2020 Audited Financial Statements of the Company;
- c) Ratification of all acts of Management and the Board during the period October 2020 to November 2021;
- d) Election of the following directors for the term 2021 to 2022:
 - Manuel Z. Gonzalez
 - Oscar L. de Venecia, Jr.
 - Beatrice Jane L. Ang
 - Ma. Rosette Geraldine L. Oquias
 - Ramon L. Mapa
 - Jaime J. Martinez
 - Supasit Pokinjaruras
 - Kim S. Jacinto-Henares - Independent Director
 - Reynaldo D. Gamboa - Independent Director
 - Andres B. Reyes, Jr. - Independent Director

Except for the late Chairman Oscar C. de Venecia, who passed away before the annual stockholders meeting, the nominees for the director positions are all incumbent directors and were re-elected as directors for the term 2021-2022; and

e) Appointment of Reyes Tacandong & Co. as External Auditors for the 2021 financial statements.

The above items were approved by the unanimous vote of all stockholders owning 10,899,217,103 shares, present and represented in the said annual stockholders meeting, constituting 77.64 % of the total outstanding shares of the Company as of record date of the said annual stockholders meeting.

The Company received duly signed proxies submitted to the Corporate Secretary for purposes of this annual stockholders meeting.

PART II – OPERATIONAL AND FINANCIAL INFORMATION

Item 5. Market for Issuers of Common Equity and Related Stockholders Matters

(1) Market Information

The shares of stock of the Company are traded in the Philippine Stock Exchange. The Company's high and low closing prices for each quarter of years 2021 and 2020:

	High		Low	
	2021	2020	2021	2020
1 st Quarter	Php2.150	Php0.255	Php0.650	Php0.122
2 nd Quarter	1.090	0.189	0.720	0.140
3 rd Quarter	0.810	0.188	0.435	0.151
4 th Quarter	0.800	0.560	0.500	0.151

Further, the last trading price for the shares of the Corporation, as of December 31, 2021, was at Php0.630 per share.

(2) Holders

Top 20 Stockholders as of December 31, 2021:

Name	Outstanding shares	Percentage
MAP 2000 Development Corporation	9,827,990,853	67.00%
PCD Nominee Corporation (Filipino)	2,892,312,935	19.72%
PCCI Securities Brokers Inc.	450,000,000	3.06%
Unicapital Inc.	450,000,000	3.06%
Meta Corporation Public Company Limited	287,276,497	1.95%
BA Securities Inc.	150,944,248	1.03%
SR Capital Holdings Inc.	150,000,000	1.02%
DSG Sons Group Inc.	105,000,000	0.71%
Samuel Uy	40,000,000	0.27%
Engracio Ang Jr.	24,000,000	0.16%
Phases Realtor Inc	20,266,002	0.14%
Christodel Philippines Inc.	19,923,745	0.13%
Jan Sharon Gaisano Tan	11,250,000	0.07%
Oscar S. Reyes	7,510,000	0.05%
Myrna Felinda B. Angeles	7,500,000	0.05%
Vicky Chua	7,500,000	0.05%
Marco Go	7,500,000	0.05%
Jaime J. Martirez	7,500,000	0.05%

Archivald Po	7,500,000	0.05%
JLV Holdings Inc.	7,200,000	0.04%

The Company is in compliance with the minimum public ownership requirement prescribed under existing regulations of the Securities and Exchange Commission and the Philippine Stock Exchange.

The Company's level of public float as of December 31, 2021 is 24.89% of total outstanding shares.

(3) Dividends

- (a) No cash/stock dividends have been declared in 2021 and 2020.
- (b) There are no restrictions that limit the payment of dividend on common shares.

(4) Recent Sale of Unregistered or Exempt Securities

a. Issuance of Shares Covering Private Placements Made in 2007

As a background, the Company increased its authorized capital stock from Php500 Million to Php2.5 billion in 2007 or an increase from 2 billion shares to 10 billion shares. The capital increase was approved by the Securities and Exchange Commission ("SEC") in November 2007. Out of the increase of 8 billion shares, 25% thereof or 2 billion shares were subscribed by way of private placements, of which 537.5 million shares have been paid and were eventually listed with the Philippine Stock Exchange ("PSE"). The balance of 1,462,500,000 shares were subscribed by eighteen (18) companies and individuals, as of December 2007, at Php0.25 per share, the payment of which was subject to call by the Board of Directors.

At the meeting of the Board of Directors on December 29, 2020, the Board of Directors authorized the call on these 1,462,500,000 shares, to be payable by April 8, 2021. This due date was extended up to June 10, 2021, at which time, only 990,000,000 shares subscribed by fourteen (14) companies and individuals, have been paid in the total amount of Php247,500,000.00, and the remaining 472,500,000 shares subscribed by four (4) subscribers, were declared delinquent as of June 10, 2021. The delinquent shares were confirmed by the Board of Directors on June 24, 2021. The request for confirmation of exemption from registration of these 990,000,000 shares under Section 10.1 (i) of the Securities Regulation Code, as amended, was approved by the SEC on February 22, 2022, while the application for listing of these shares is still pending with the PSE.

b. Issuance of Shares to Subscribers of Delinquent Shares Auctioned on August 23, 2021

Of the 1,462,500,000 shares subscribed in 2007 to support the capital increase of the Company in 2007 to Php2.5 billion, 990,000,000 shares have been paid and the application for listing of these shares are still pending with the PSE. The remaining 472,500,000 shares were declared delinquent as of June 10, 2021 and were auctioned on August 23, 2021. Only 22.5 million shares (the "auctioned shares") were sold to the winning bidders at said auction sale, as follows:

Myrna Felinda B. Angeles 7,500,000 shares

Jaime J. Martirez	7,500,000 shares
Oscar S. Reyes	7,500,000 shares

The total amount of the winning bids for the auctioned shares in the amount of Php6,122,736.16 were paid on August 23, 2021. The request for confirmation of exemption from registration of these 22,500,000 shares under Section 10.2 of the Securities Regulation Code, as amended, is yet to be submitted to SEC, upon advice by SEC of the documents required for this purpose, while the application for listing of these shares has been submitted to and is still pending with the PSE.

c. Issuance of Shares Under the Company’s Stock Option Plan

A stock option plan was approved by the stockholders at the 2007 annual meeting of stockholders, whereby directors and members of the Advisory Board, officers and selected employees of the Company and its subsidiaries, and other persons as determined by the Board of Directors, have been granted the option to purchase shares of stock of the Company from its unissued capital stock at par value, and exercisable on the 3rd year from approval of the plan by the stockholders, subject to such allocation of shares as may be approved by the Board of Directors, not to exceed the total of 500 million shares (SOP shares). On June 18, 2010, the stockholders approved the extension of the exercise period from July 12, 2010 to July 11, 2013. The details and mechanics of the plan have been approved by the Board of Directors on July 29, 2011. The SEC issued its Certificate of Exemption from Registration requirements on September 8, 2011.

The SOP shares subscribed by a total of seventeen (17) directors and officers of the Company were approved in principle for listing by the Philippine Stock Exchange, as follows: 26.7 million shares in December 2012 and 473.3 million shares in July 2013. All the SOP shares have been fully paid as of April 2021 and have been actually listed in the Philippine Stock Exchange as of July 31, 2021.

d. Issuance of Shares to Meta Corporation Public Company Limited of Thailand

Meta Corporation Public Company Limited (formerly Vintage Engineering Public Company Limited), a publicly listed company registered in Thailand, and a stockholder of the Company, subscribed to 106,892,000 additional shares at the total subscription price of Php26,723,000.00, which were issued as of December 31, 2018 and these shares were confirmed by the Securities and Exchange Commission as exempt transactions under said Section 10.1 (k) of the Securities Regulation Code, while the application for listing of these shares is still pending with PSE. Additionally, the Company subscribed to 180,384,497 shares at the total subscription price of Php45,096,124.25 on November 15, 2021. The issuance of said shares is pending confirmation by the Securities and Exchange Commission (“SEC”) as an exempt transaction under Section 10.1 (k) of the Securities Regulation Code, and the application for listing of these shares has been submitted to and is likewise still pending with the PSE.

e. Issuance of Shares to Map 2000 Development Corporation

The Company and Map 2000 Development Corporation (M2DC) executed on December 18, 2020, a Memorandum of Agreement covering the subscription by M2DC to 9,827,990,853

primary shares of stock of the Company, to be issued out of the increase in the authorized capital stock of the Company from Php2.5 billion to Php5 billion, representing 67% of the issued and outstanding capital stock of the Company post-increase. The subscription was subject to the fulfillment of certain conditions, including the approval by the Securities and Exchange Commission (“SEC”) of the application for said increase in capital. On September 10, 2021, the SEC approved the capital increase of the Company to Php5 Billion. The total subscription price for the said shares of M2DC at par value per share of Php0.25 was fully paid in the amount of Php2,456,997,713.25 on December 10, 2021. These subscribed shares of M2DC represent 67% of the total outstanding capital stock of the Company, constituting more than majority control of the Company.

The Company has yet to request for confirmation by SEC of the exemption from registration of the subscribed shares of M2DC under Section 10.1 (i) of the Securities Regulation Code. Likewise, the Company has yet to apply for backdoor listing of the said shares with the Philippine Stock Exchange.

Item 6. Management Discussion and Analysis or Plan of Operations

Plan of Operations 2022

Wind Energy Operations

For 2022, the Company would be focusing on the wind resource assessment campaign of the project, as the result of this assessment would support and lend further credence to the viability of the project that would attract interested partners and investors.

Green Energy E-Transport Program

For 2022, the Company will focus on implementing pilot project sites with the different oil companies. Procurement of vital components for the rooftop solar system, e-charging stations and electric buses is planned based on the agreed timetable with the project management team.

Geothermal Energy Operations

For 2022, the Company will continue to monitor developments in its remaining project, the Iriga Geothermal project, and the implementation of the work program as approved by the DOE and as undertaken by its operator, Desco Inc.

Business Development

The Company continues to pursue business opportunities for the development of renewable energy resources whether in the Philippines or abroad.

The Company invested in Vintage EPC Company Limited - Thailand (“VEPC”) and VTE International Construction Company Limited - Thailand (“VINTER”) for a fifteen (15%) percent equity interest of said companies in 2018.

VEPC and VINTER are the EPC Contractors for the 220MW Solar Power Project located in Minbu District, Magway Region, Myanmar, who were engaged by Green Earth Power (Myanmar) as the owner-developer of the project and the holder of the Power Purchase Agreement with the Myanmar Government’s energy and power ministry. The design and construction of the project commenced in 2016 and was planned to be completed in four (4) phases of 50 MW for Phases 1, 2 and 3 and 70 MW for Phase 4. Phase 1 is currently on commercial operations since September 2019. The subsequent phases shall be pursued after completion of the previous phases, to achieve full completion of the four (4) phases on or before 2022.

The Company invested in Filoil Energy Company Inc (“FEC”) for a 60% equity interest in the Company. The investment in FEC for a 60% equity interest is in with the strategic move of the Company to improve its operations and which provided the Company indirect ownership interest in the joint venture companies of Filoil with the Total Group.

The equity investment is part of the Company’s plans to be a major renewable energy and power company. With this objective, BEC was tasked to develop a robust portfolio of renewable energy projects such as solar, wind and biomass energy projects, in the Philippines and abroad, that will provide the Company with a continuing stream of revenues in the short and mid-terms.

Management’s Discussion and Analysis of Financial Condition and Results of Operations for 2021

Key Performance Indicators

The following table shows the top 5 Key Performance Indicators for the past two years:

Key Performance Indicators			
	2021	2020	2019
Return on Investment	0.77%	-3.12%	-7.86%
Net Profit Margin	2.91%	-466.35%	-639.83%
Investment in Projects, Non-Petroleum	1.26%	38.57%	29.09%
Investment in Wells & Other Facilities	0.03%	1.25%	1.00%
Current Ratio	1.29:1	7.01:1	8.23:1
Asset Turnover	40.54%	2.63%	10.40%
Solvency Ratios			
Debt to Equity Ratio	189.11%	5.52%	7.68%
Asset to Equity Ratio	289.11%	105.52%	107.68%

ROI (Net Income/Average Stockholders’ Equity) measures the profitability of stockholders’ investment. Profit Margin (Net Income/Net Revenue) measures the net income produced by each peso of revenue. Investment in Projects as a % of Total Assets, measures how much the Company invested in its committed work programs. Current Ratio (Current Assets/Current Liabilities) measures the short-term debt paying ability of the Company. Asset Turnover (Net Revenue/Average Total Assets) measures how efficiently assets are used to produce profit.

ROI was 0.77% in 2021, -3.12% in 2020, and -7.86% in 2019. The reversal from negative ROIs in 2019 and 2020 to 0.93% in 2021 was due to the net income recognized in 2021.

Profit Margin was 2.91% in 2021, -466.35% in 2020, and -639.83% in 2019. Like in the previous paragraph the reversal from negative margins in 2019 and 2020 was due to the net income recognized in 2021.

Investment in Non-Petroleum Projects as a % of Total Assets decreased to 1.26% in 2021 from 38.57% in 2020 which increased from 29.09% in 2019. The decrease in rate was primarily due to the increase in the total assets of Company.

Investment in Wells and Other Facilities as a % of Total Assets decrease to 0.03% in 2021 from 1.25% in 2020 which increased from 1.00% in 2019. The decrease in rate was primarily due to the increase in the total assets of the Company.

Current ratio decreased from 8.23:1 in 2019 to 7.01:1 in 2020 and further decrease to 1.29:1 in 2021. The decrease in ratio in 2020 was due to the decrease in current assets while the further decrease in 2021 was due to the higher increase in current liabilities compared to the increase in current assets.

Asset Turnover increase to 40.54% in 2021 from 2.63% in 2020 which decrease from 10.40% in 2019. The increase in ratio in 2021 was primarily due to increase in net revenue recognized in 2021 and the decrease in ratio in 2020 was due to the decreases in both revenue and total assets.

Debt to Equity Ratio increased to 189.11% in 2021 from 5.52% in 2020 which decreased from 7.68% in 2019. The increase in ratio was due to the bigger increase liabilities compared to the increase in equity.

Asset to Equity Ratio decreased from 107.68% in 2019 to 105.52% in 2020 and increased to 289.11% in 2021. The increase in ration in 2021 was due to the increases in both asset and equity and the decrease in 2020 was due to the decrease in both asset and equity.

2021

For 2021, the Company's total assets stood at Php19.4 billion, an increase of Php18.9 billion from its previous year balance of Php482.9 million. Current assets with a 2021 balance of Php13.9 billion increased by Php13.8 billion from the balance of Php137.1 million in 2020. The increase in current assets is primarily attributable to the increases in cash and cash equivalents of Php1.7 billion, receivables of Php8.9 billion, and other assets of Php906.8 million as well as recognition in 2021 of inventories amounting to Php1.2 billion and non-current asset held-for-sale amounting to Php1.2 billion. Non-current assets increased by Php51 billion from Php345.7 million in 2020 to Php5.4 billion in 2021 primarily due to increases investments in associates and joint venture of Php131.8 million, investment properties of Php57.7 million, property and equipment of Php4.7 billion, and other non-current assets of Php212.6 million.

Total liabilities in 2021 closed at Php12.7 billion, an increase of Php122.6 billion from the balance of Php25.2 million in 2020. Current liabilities amounting to Php10.8 billion increased from the balance of Php19.6 million in 2020. Non-current liabilities amounting to Php1.8 billion increased from the balance of Php22.5 million in 2020. This was due to the increases in accounts payable and accrued expenses of

9.5 billion, income tax payable of Php5 million, lease liability of Php86.3 million, loans payable of Php2.2 billion, and net deferred tax liability of Php847 million.

Total equity recorded in 2021 was Php6.7 billion, an increase of Php6.2 billion from the balance of Php457.6 million in 2020. This was primarily due to the increases in capital stock of Php2.9 billion, additional paid-in capital of Php310.9 million, retained earnings of Php81.4 million, equity attributable to non-controlling interest of Php3 billion.

For 2021, revenue generated amounted to Php3.7 billion. Revenue for the year came from sales revenue of Php3.7 million and service revenue of Php25.2 million. Other income for the year 2021 amounted to Php276.6 million composed primarily of fair value adjustment on investment properties of Php24 million, interest income of Php7.1 million, foreign exchange gain of Php2.8 million, gain on bargain purchase of Php137.2 million, income from penalty on delayed payment of receivables of Php9.9 million, gain from insurance claim of Php1.9 million and unrealized gain from change in fair value of derivative asset and liability of Php2.5 million. Compared to 2020, revenue and other income in 2021 increased by Php3.9 million primarily because of the sales revenue and service revenues recognized during the year.

Cost and expenses for 2021 amounted to Php3.7 billion, Php3.6 billion of which is cost of sales and services, Php121.3 million is general and administrative expenses, Php11.7 million is share in net losses of associates, and Php25.9 million is interest expense. Compared to 2020, cost and expenses in 2021 increased by Php3.8 billion primarily because of the cost of sales and services recognized in 2021 of Php3.7 million.

For the year 2021, the Company recorded a consolidated net income of Php109.8 million, Php81.4 million of which is attributable to equity holders of the parent company and Php28.4 million to non-controlling interest. Including net comprehensive loss of Php2 million, the total comprehensive income for the year amounted to Php107.8 million.

In 2021, despite the continued global economic situation due to the COVID-19 pandemic, the Company continued to explore opportunities for investments in various energy projects as well as explore possible partnership that could bring value to the company.

The Company was awarded the Wind Energy Service Contract (“WESC”) for the Mabini Wind Power Project located in Mabini, Batangas. The Mabini Wind Power Project is in the development stage and is currently conducting the Wind Resource Assessment (“WRA”) in the service area as well as other preliminary technical, commercial and permitting works necessary to bring the project to commercial operations.

In 2021, MAP 2000 Development Corporation (“M2DC”) acquired least 67% of the outstanding capital stock of the Company. M2DC’s acquisition of 67% interest in the Company opened various investment opportunities for the Company in the oil and gas sector and further opportunities in the renewable energy sector.

In December 2021, the Company acquired 60% ownership interest in Filoil Energy Company Incorporated (“FEC”). The acquisition of 60% interest in FEC provides indirect interest in the joint venture companies of FEC with Total Marketing Services, the Philippine subsidiary of Total France.

The joint venture companies of FEC with TMS are Filoil Logistics Corporation, Total Philippines, and La Defense Filipinas Holdings Incorporated.

The Company is also involved in the Green Energy E-Transport Program (“GEEP”) which intends to revolutionize and modernize the existing Public Utility Transport through the used of environmentally friendly energy sources and vehicles. The Company’s role in GEEP is primarily to install solar energy producing facilities and charging stations for electric vehicles for public transport.

2020

For 2020, the Company’s total assets stood at Php482.9 million, a decrease of Php117.7 million from its previous year balance of Php600.6 million. Current assets with a 2020 balance of Php137.1 million decreased by Php30.2 million from the balance of Php167.3 million in 2019. The decrease in current assets is primarily attributable to the decrease in cash and cash equivalents of Php33 million which was used primarily for general and administrative expenses. Non-current assets decreased by Php87.5 million from Php433.2 million in 2019 to Php345.7 million in 2020 primarily due to the decrease in investment in associates of Php75.1 million and decreased in financial assets at FVOCI of Php18.6 million. The decreases in noncurrent assets were partially offset by the increase in value of investment properties by Php11.5 million.

Total liabilities in 2020 closed at Php25.2 million, a decrease of Php17.6 million from the balance of Php42.8 million in 2019. Current liabilities amounting to Php19.5 million decreased by Php0.8 million from the balance of Php20.3 million in 2019. Non-current liabilities amounting to Php5.7 million decreased by Php16.8 million from the balance of Php22.5 million in 2019. This was due to the decrease in net deferred tax liabilities of Php8.2 million and decrease in net retirement benefit liability of Php8.6 million.

Total equity recorded in 2020 was Php457.6 million, a decrease of Php100.1 million from the balance of Php557.7 million in 2019. This was primarily due to the increase in deficit of Php63.2 million due to the losses incurred during the year and further decrease in other equity reserves of Php36.8 million.

For 2020, revenue generated amounted to Php13.9 million. Revenue for the year mostly came from the fair value adjustment on investment properties of Php11.5 million, interest income of Php2 million, and management fee of Php0.3 million. Compared to 2019, revenue in 2020 decreased by Php10.6 million mainly because of the decreases in fair value adjustment on investment properties of Php2.3 million, foreign exchange gains of Php1.1 million and decrease in interest income of Php6.4 million.

Cost and expenses for 2020 amounted to Php80.3 million, Php43.4 million of which is general and administrative expenses, Php34.9 million is share in net loss of associates, and Php1.9 million is foreign exchange losses. Compared to 2019, cost and expenses in 2020 decreased by Php143 million primarily because of the decrease in general and administrative expenses of Php24.9 million, recognition of impairments of deferred exploration costs of Php114.6 million in 2019, recognition of loss on sale of properties and equipment of Php9.9 million in 2019, decrease in losses on write-off of receivables of Php3.9 million, and recognition of impairment of other assets of Php3.3 million in 2019.

For the year 2020, the Company recorded a consolidated operating loss of Php63.3 million, Php63.2 million of which is attributable to equity holders of the parent company and Php0.1 million to non-

controlling interest. Including net comprehensive loss of Php36.8 million, the total comprehensive loss for the year amounted to Php100.1 million.

The aforementioned losses in 2020 were attributable to the absence of a steady flow of revenues from projects and investments of the Company.

In 2020, despite the current global economic situation due to the COVID-19 pandemic, the Company continued to explore opportunities for investments in various energy projects which are shovel-ready or about to commence operations or otherwise have shorter gestation period as well as explore possible partnership that could bring value to the company.

The Company also signed a Memorandum of Agreement (“MOA”) with MAP 2000 Development Corporation (“M2DC”) in December 2020 for the acquisition of at least 67% of the outstanding capital stock of the Company. The investment of M2DC for at least 67% interest in the Company is subject to the compliance by the Company with the condition precedent and other representations, warranties and undertakings of the Company as stipulated in the aforementioned MOA.

2019

For 2019, the Company’s total assets stood at Php600.6 million, a decrease of Php184.3 million from its previous year balance of Php784.9 million. Current assets with a 2019 balance of Php167.3 million decreased by Php22.8 million from the balance of Php190.1 million in 2018. The decrease in current assets is primarily attributable to the decrease in receivables of Php95 million which was offset by the increases in cash and cash equivalents of Php64.8 million, refundable deposits of Php6.3 million and other current assets of Php1.1 million. Non-current assets decreased by Php161.5 million from Php594.8 million in 2018 to Php433.2 million in 2019 primarily due to the impairment of deferred exploration cost of Php114.3 million, disposal of property and equipment costing Php39.7 million, decreased in investment in associates of Php13.7 million and decreased in other noncurrent assets of Php10.6 million. The decreases in noncurrent assets were partially offset by the increase in value of investment properties by Php13.8 million and financial assets at FVOCI of Php2.9 million.

Total liabilities in 2019 closed at Php42.8 million, a decrease of Php40.8 million from the balance of Php83.7 million in 2018. Current liabilities amounting to Php20.3 million decreased by Php38.6 million from the balance of Php58.9 million in 2018. This was primarily due to the settlement of the Php50 million short-term loan which was partially offset by the increase in accrued expenses and other payables. Non-current liabilities amounting to Php22.5 million decreased by Php2.3 million from the balance of Php24.8 million in 2018. This was due the decrease in deferred income tax liabilities of Php8.7 million which was partially offset by the increase in accrued retirement benefits payable of Php6.5 million.

Total equity recorded in 2019 was Php557.7 million, a decrease of Php143.5 million from the balance of Php701.2 million in 2018. This was primarily due to the decrease in other equity reserves of Php9 million and the decrease in retained earnings of Php134.8 million due to the losses incurred during the year.

For 2019, revenue generated amounted to Php23.4 million. Revenue for the year came from the fair value adjustment on investment properties of Php13.8 million, management fees of Php6.7 million, and interest income of Php2.9 million. Compared to 2018, revenue in 2019 decreased by Php26.5 million

mainly because of the share in net income of Php14.3 million recognized in 2018, decrease in fair value adjustment on investment properties of Php7.6 million and decrease in foreign exchange gains of Php9.1 million which were partially offset by the increases in interest income of Php1.2 million and management fee of Php3.8 million.

Cost and expenses for 2019 amounted to Php223.3 million, Php114.6 million of which is impairment on deferred exploration costs, Php9.9 million is loss on sale of property and equipment, Php3.9 million is loss on write-off of receivables, Php3.3 million is impairment on other assets, Php68.4 million is general and administrative expenses, Php22.1 million is share in net loss of associates, and Php886 thousand is interest expense. Compared to 2018, cost and expenses in 2019 increased by Php146.5 million primarily because of the impairment of deferred exploration costs, loss on sale of property and equipment, write-off of receivables, impairment of other assets, share in net loss of associates and increase in general and administrative expenses of Php12.4 million.

For the year 2019, the Company recorded a consolidated operating loss of Php197.8 million, Php198.1 million of which is attributable to equity holders of the parent company and Php0.3 million to non-controlling interest. Deducting net comprehensive income of Php36.2 million, the total comprehensive loss for the year amounted to Php161.6 million.

The aforementioned losses in 2019 were attributable to the absence of a steady flow of revenues from projects and investments of the Company and the impairment of deferred exploration costs in relation to the withdrawal from or acceptance of termination of the Company's various energy service contracts.

In 2019, the Company continues to explore opportunities for investments in various energy projects which are shovel-ready or about to commence operations or otherwise have shorter gestation period, within the country and abroad.

Item 7. Financial Statements

The Company's Consolidated Financial Statements and Schedules to Financial Statements are filed as part of this SEC Form 17-A.

Item 8. Changes and Disagreements with Accountants and Financial Closure

External Auditor

Upon the recommendation of the Audit Committee and the Board of Directors, the Company's external auditor, Reyes Tacandong & Co. ("RT&Co.") was appointed at the annual stockholders' meeting on November 24, 2021 as the Company's external auditor for the year 2021.

Audit services of RT&Co. for the fiscal year ended December 31, 2021 included the examination of books and consolidated financial statements of the Corporation and its subsidiaries, assistance in the preparation of the Corporation's final income tax returns and other services related to filing of reports made with the SEC and the BIR.

There was no event in the past three (3) years where RT&Co. had any disagreement with regard to any matter relating to accounting principles or practices, financial statement disclosures or auditing scope or procedures.

External Audit Fees

The Company paid the following fees to the external auditors for professional fees rendered in the last three (3) years:

Period Covered	Nature of Audit	Amount (in Php'000)
31 December 2021	Annual audit for regular reportorial requirement	675.0
31 December 2020	Annual audit for regular reportorial requirement	630.0
31 December 2019	Annual audit for regular reportorial requirement	672.5

RT&Co. has no shareholdings in the Company or any right, whether legally enforceable or not, to nominate persons or to subscribe for the securities in the Company, in accordance with the professional standards on independence set by the Board of Accountancy and approved by the Professional Regulation Commission.

The Audit Committee reviews the audit scope and coverage, strategy, and results for the approval of the Board. It ensures that audit services rendered shall not impair or derogate the independence of the external auditors or violate SEC regulations. Likewise, the Audit Committee evaluates and determines any non-audit work performed by external auditors, including the fees therefor, and ensures that such work will not conflict with the duties of the external auditors or threaten their independence.

Disagreements with External Auditors on Accounting and Financial Disclosure

There was no event in the past three (3) years where the External Auditors and the Company had any disagreement with regard to any matter relating to accounting principles or practices, financial statement disclosures or auditing scope or procedures.

There were no disagreements with the Company's external auditors on any accounting and financial disclosures in the 2021 Audited Financial Statements of the Company.

The accounting policies adopted are consistent with those of the previous financial reporting year, except that the Group has adopted the following amended PFRS:

- Amendment to PFRS 16, Leases - COVID-19-Related Rent Concessions beyond June 30, 2021 – In 2020, PFRS 16 was amended to provide practical expedient to lessees from applying the requirements on lease modifications for eligible rent concessions that is a direct consequence of COVID-19 pandemic. A lessee may elect not to assess whether eligible rent concessions from a lessor is a lease modification. A lessee that makes this election account for any change in lease payments resulting from the COVID-19 related rent concession the same way it would account for a change that is not a lease modification, e.g., as a variable lease payment. This amendment is effective for annual reporting periods beginning on or after June 1, 2020, with earlier application permitted, and covers eligible rent concessions until June 30, 2021. The Group applied the practical expedient in its financial statements for the year ended December 31, 2020.

Due to continuing impact of the pandemic, another amendment to PFRS 16 was issued in 2021, which allows lessees to extend the application of the practical expedient regarding COVID-19-

related rent concessions to reduction in lease payments that are due on or before June 30, 2022. The amendment is effective for annual reporting periods beginning on or after April 1, 2021 but earlier application is permitted. The 2021 amendment is mandatory for entities that elected to apply the previous amendment. Accordingly, the Group has applied the amendment in the current year financial statements.

Under prevailing circumstances, the adoption of the foregoing amendments to PFRS did not have any material effect on the consolidated financial statements of the Group.

PART III – CONTROL AND COMPENSATION INFORMATION

Item 9. Directors and Executive Officers of the Issuer

Board of Directors

The following are the members of the Board of Directors of the Company as of December 31, 2021:

Ramon F. Villavicencio	Chairman
Manuel Z. Gonzalez	Vice Chairman
Oscar L. de Venecia, Jr.	
Beatrice Jane L. Ang	
Ramon L. Mapa	
Jaime J. Martinez	
Ma. Rosette Geraldine L. Oquias	
Supasit Pokinjaruras	
Reynaldo D. Gamboa	Independent Director
Andres B. Reyes, Jr.	Independent Director
Kim S. Jacinto - Henares	Independent Director

Background Information

The following are the names, ages, positions, and period of service in the Company of the incumbent directors and key officers of the Company:

Directors

Ramon F. Villavicencio, 80 years old, Filipino, and is the Chairman of the Board of Basic Energy Corporation. He has more than 50 years' experience in the petroleum industry and is currently a Director of San Miguel Corporation. He was Chairman of Insular Oil Corporation, the Independent Philippine Petroleum Companies Association, and was President of the Philippine-Venezuelan Economic Council from 2011-2012. Among his milestones, he pioneered in oil recycling, hydro fuel technology, blended biodiesel availability for Flying V stations and the utilization of double hull/double bottom tankers way before the government's mandate for the usage of these type of tankers in 2010. He obtained his Bachelor of Commerce degree in 1962 and his Master's degree in Business Administration in 1964, both from De La Salle University.

Manuel Z. Gonzalez, 56 years old, Filipino, is the Vice Chairman of the Board of Basic Energy Corporation. He was elected as director of the Corporation on May 12, 2021 and holds that position up to the present. He is a Senior Partner in Martinez Vergara Gonzalez & Serrano Law Office since 2006 up to the present. Prior to co-founding MVGS Law, Atty. Gonzalez was a partner with the Picazo Buyco Tan Fider & Santos Law Office until 2006. Atty. Gonzalez has been involved in corporate practice for over 20 years and has extensive experience and has been recognized by "The Legal 500" for his practice in the areas of capital markets, energy, mergers & acquisitions and banking and finance. Atty. Gonzalez currently serves as Director and Corporate Secretary to many corporations including companies in the

Century Pacific Group since 1995, Nomura Holdings Philippines since 2006 and ADP (Philippines) Inc. since 2010. He has attended continuing legal education programs required for the practice of law and a seminar on corporate governance in 2021. Atty. Gonzalez graduated cum laude with a Bachelor of Arts degree in Political Science and Economics from New York University and received a Bachelor of Laws from the University of the Philippines, College of Law.

Oscar L. De Venecia Jr., 54 years old, Filipino, is a director and the President and CEO of the Corporation. He was the Executive Vice President & COO of the Corporation since April 04, 2007 and was appointed as President & CEO of the Corporation in August 2011. He has served the Corporation in various executive positions, namely, as SVP and COO from June, 1997 up to June 2001 and was the President and CEO from December 2002 up to November 2005. He is the President of Basic Geothermal Energy Corporation, Basic Renewables, Inc. and Basic Biofuels Corporation, and Basic Diversified Industrial Holdings, Inc., the Chairman and President of iBasic, Inc., director of Basic Consolidated International, Inc. and President of Southwest Resources, Inc.

He was the President of Forum Energy Philippines, Inc. from November 2005 to April 2007, Chairman and CEO of Blue Bamboo Solutions, Inc. from September 2002 to December 2005, a Consultant for Strategic Alliance Development Corporation from March 2002 and moved as Business Development Manager of Stradcom Corporation from May to November 2002. He was the President of the Rotary Club of Makati East for the Rotary Year 2010-2011 and is a member of the Management Association of the Philippines. He was appointed Honorary Vice Consul of the Consulate of Ukraine in the Philippines covering the Clark-Subic Economic Zone on February 18, 2011.

He obtained his degree in Bachelor of Arts in Economics from Fordham University, New York City, in 1996.

Beatrice Jane L. Ang, Filipino, 39 years old. Dr. Ang is presently a Director and Corporate Secretary of Quindecim Holdings, Inc., a venture providing for healthcare and related services, a position she held since 2017, and the Managing Director and Treasurer of BA Securities, Inc., from 2003 up to the present. She is also the Managing Director of CLMC Group of Companies, which is into manufacturing, import and export of telecommunication facilities, software development, information technology and real estate, among others, from 2003 up to the present. Her international diplomatic experience consists of her being presently the Honorary Consul Designate of the Honorary Consulate of Ukraine and the Special Assistant to the Consul of the Honorary Consulate of Tanzania. She was the Special Assistant to the Consul General of the Honorary Consulate of Peru from 2007 to 2010. Her socio-civic work experience includes being the Administrator of the Buddhist Tzu Chi Medical Foundation Philippines, Inc., since 2019 to the present and the Commissioner of the Tzu Chi Buddhist Compassion Relief Foundation from 1995 to the present. Item 12. Certain Relationships and Related Transactions

The Company has transactions with Meta Corporation Public Company Limited (formerly Vintage Engineering Public Company Limited), a public company registered in Thailand, a stockholder of the Company, relating to equity investments in Vintage EPC Company Limited (Thailand) and VTE International Construction Company Limited (Thailand) up to fifteen per cent (15%) of the outstanding capital of said companies, which were implemented after satisfactory due diligence on the said companies and its projects. Vintage EPC Company Limited and VTE International Construction Company Limited are the EPC contractors in the Myanmar 220 MW Solar Power Plant Project of GEP (Myanmar) Company Ltd.

Likewise, after considering the fair opinion and valuation report from a third-party evaluator and its compliance with the requirements of the Material Related Party Transaction Policy, in December 2021, the Company invested in 60% of the equity of Filoil Energy Company Inc., an independent oil industry participant with existing joint venture with the Total group since mid-2016. The joint venture is known in the industry to be active in the downstream oil business of fuel retailing, importation, bulk supplies and depot operations and allied logistics services.

Other than the above transactions, there were no material transactions during the past two years, nor was there any material transaction, contractual or other commitments, currently on-going or being proposed, to which the Company was or is to be a party with any stockholder, incumbent director and/or executive officer of the Company, disclosed or required to be disclosed in the financial statements of the Company pursuant to SFAS/IAS No. 24. In the normal course of business, the Company has transactions with its subsidiaries consisting of non-interest-bearing advances to finance the working capital requirements of these subsidiaries, and provides assistance to its subsidiaries in carrying out certain administrative functions in connection with its business operations

PART IV – CORPORATE GOVERNANCE

Item 13. Corporate Governance

The Company has an established evaluation system to determine the level of compliance of the Board and Management with its Manual on Corporate Governance, which consists of a feedback mechanism from the shareholders as well as an annual Board Performance Assessment which is accomplished by the Board through self-assessment and properly indicating the compliance rating. Said assessment includes the performance of the Chairman, the individual directors and the Committees and is conducted and monitored by the Corporate Governance Committee.

To further advance good governance, the Company – through its Board – has established its vision, objectives, policies and management of the Company based on an adequate internal control system and enterprise risk management network with the aim of ensuring integrity, transparency and proper governance in the conduct of all its affairs.

There have been no deviations from the Company's Manual on Corporate Governance and full compliance thereto has been made since the adoption of the Manual. All directors (both new and veteran) and key officers have complied with the annual continuing training program on corporate governance requirement under the Corporate Governance Code and the Company's own Manual on Corporate Governance to ensure that all directors are continuously informed of the developments in the business and regulatory environment relevant to the Company.

The Company continues to take steps in further enhancing its adherence to the practice and internationally and locally accepted leading principles of good corporate governance.

ATTACHMENT "A"

FINANCIAL INFORMATION For the period ended March 31, 2022

1. The following unaudited Financial Statements are contained in this report:

- 1.1 Statements of Income and Retained Earnings for the Period Ended March 31, 2022 and March 31, 2021;
- 1.2 Balance Sheets as of March 31, 2022 and December 31, 2021;
- 1.3 Statements of Cash Flows for the Period Ended March 31, 2022 and March 31, 2021;
- 1.4 Statements of Changes in Stockholders' Equity for the Period ended March 31, 2021 and March 31, 2020.

2. Discussion on Financial Condition for the Period December 31, 2020 and March 31, 2021.

A. Key Performance Indicators

Management considers the following as key performance indicators of the company: Return on Investment (ROI), Profit Margin, Performance of Committed Work Programs, Current Ratio and Asset Turnover.

The following table shows the Top 5 performance indicators for the past three interim periods:

KEY PERFORMANCE INDICATORS	1st Qtr 2022	1st Qtr 2021	1st Qtr 2020
Return on Investments (ROI) (Net Income / Ave. Stockholders' Equity)	3.29%	-2.89%	-6.45%
Profit Margin (Net Income / Net Revenue)	0.89%	-673.11%	-1641.49%
Investment in Projects (Non-Petroleum) as a % of Total Assets	8.00%	30.18%	30.53%
Investment in Wells & Other Facilities as a % of Total Assets	0.02%	0.97%	1.07%
Current Ratio (Current Asset / Current Liabilities)	1.18:1	13.1:1	8.41:1
Asset Turnover (Net revenue / Ave. Total Assets)	56.25%	0.42%	0.38%
Solvency Ratios			
Debt to Equity Ratio	375.37%	4.31%	5.33%
Asset to Equity Ratio	525.52%	102.72%	103.45%

ROI (Net Income / Average Stockholders' Equity) measures the profitability of stockholders' investment. Profit Margin (Net Income / Net Revenue) measures the net income produced by each peso of revenue. Investment in Projects as a % of Assets, measures how much the company invested in its committed work programs. Current Ratio (Current Assets / Current Liabilities) measures the short-term debt-paying ability of the company. Asset Turnover (Net Revenue / Average Total Assets) measures how efficiently assets are used to produce profit.

ROI was 3.29% for the 1st quarter of 2022, -2.89% for the 1st quarter of 2021, and -6.45% for the 1st quarter of 2020. The negative rates in 2020 and 2021 were due to the losses booked during those quarters and the positive rates for the 1st quarter of 2022 was due to the net income recognized for the period.

Profit Margin was 0.89% for the 1st quarter of 2022, -673.11% for the 1st quarter of 2021, and -1641.49%. The negative rates in 2019 and 2020 were due to the losses booked during those quarters and the positive rate for the 1st quarter of 2022 was due to the net income recognized during the period.

Investment in Projects (Non-Petroleum) as a % of Total Assets decreased to 8% in the 1st quarter of 2022 from 30.18% in the 1st quarter of 2021 and from 30.53% for the 1st quarter of 2020. The decrease was primarily due to the increase in total assets.

Investment in Wells & Other Facilities as a % of Total Assets further decreased from 0.97% in the first quarter of 2021 and 1.07% in the 1st quarter of 2020 to 0.02% in 2022. The decrease in rate from was due the increase in total assets.

Current Ratio was 1.18:1 for the 1st quarter of 2022, 13.1:1 for the 1st quarter of 2021, and 8.41:1 for the 1st quarter of 2020. The decrease in ratio for the 1st quarter of 202w was due to the increase in current liabilities compared to the increase in current assets.

Asset Turnover was 56.25% for the 1st quarter of 2022, 0.42% for the 1st quarter of 2021, and 0.38% for the 1st quarter of 2020. The increase in asset turnover from 2022 to 2021 was due to the increase in revenue due to sales of goods and services recognized for the period.

Debt to Equity Ratio was 375.37% for the 1st quarter of 2022, 4.31% for the 1st quarter of 2021, and 5.33% for the 1st quarter of 2020. The increased in the debt equity ratio from 2021 to 2022 and was due to the increase in total liabilities.

Asset to Equity Ratio was 525.52% for the 1st quarter of 2022, 102.72% for the 1st quarter of 2021, and 103.45% for the 1st quarter of 2020. The increase in ratio from 2021 to 2022 was due to the increase in assets.

B. Discussion and Analysis of Financial Condition as of March 31, 2021

For the quarter ending March 31, 2022, the company recorded total revenue of Php18 billion and cost of sales and services of Php17.6 billion resulting to a gross profit of Php511.5 million. For the quarter ending March 31, 2022, other income and expense were at Php315.5 million and provision for income tax of Php34.5 million were recognized resulting to a net income before tax of Php196.1 million and net income after tax of Php161.6 million.

Total revenue for the 1st quarter of 2022 of Php18.1 billion was from sale of goods and services for the quarter.

Cost and expenses for the 1st quarter of 2022 of Php17.8 billion was primarily from cost of sales of goods and services amounting to Php17.6 million.

Total Assets as of March 31, 2022 stood at Php32.1 billion an increase of Php12.8 billion from Php19.4 billion as of December 31, 2021. Current assets, composed mostly of cash and cash equivalents amounting to Php2.2 billion, receivables amounting to Php11.5 billion, inventories amounting to Php9.1 billion, noncurrent assets held for sale of Phhp1.7 billion and other current assets amounting to Php992.6 million, increased by Php11.5 billion, primarily due to increase in inventories of Php7.9 billion and receivables of 2.5 billion. Non-current assets increased by Php1.3 billion. The increase was primarily due to the increase in other noncurrent assets of Php1.2 billion.

Total Liabilities increased by Php10.3 billion from Php12.7 billion as of December 31, 2021 to Php22.9 billion as of March 31, 2022 primarily due to increase in loans payable of around Php13.7 billion which was partially offset by decreases in trade and other payables and deferred tax liability.

Total Stockholders' Equity as of March 31, 2022 stood at Php6.11 billion an increase of Php2.4 billion from Php3.7 billion as of December 31, 2021. This was primarily due to the increase in other equity reserves of Php2.3 billion and decrease in deficit of Php92 million.

The interim financial report is in compliance with generally accepted accounting principles. The same accounting policies and methods of computation were followed in the interim financial statements, as compared with the most recent audited financial statements, which are as of December 31, 2021.

The interim operations are not characterized by any seasonality or cyclicity. The nature and number of items affecting assets, liabilities, equity, net income and cash flows are explained in Attachment "A" on Financial Information for the period ending March 31, 2022.

There are no changes in estimates of amounts reported in prior interim periods of the current financial year or those reported in prior financial years.

There were no dividends paid (aggregate or per share) separately for ordinary shares and other shares.

Currently, the company has a single business and geographical segment and therefore, segment disclosures have not been included.

There are no material events subsequent to the end of the interim period that have not been reflected in the financial statements for the interim period.

There are no changes in the composition of the company during the interim period, including business conditions, acquisition or disposal of subsidiaries and long-term investments, restructurings, and discontinuing of operations.

Since December 31, 2021, there are no other changes in contingent liabilities or assets and no new material contingencies, events or transactions that have occurred during the current interim period.

There are no trends, demands, commitments, events or uncertainties, known to management that will have a material impact on the company's liquidity.

There are no material commitments for capital expenditures and no seasonal aspects that have a material effect on the financial conditions or results of operations.

There are no known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on net sales/revenues/income from continuing operations.

There are no events that will trigger direct or contingent financial obligations that are material to the company, including any default or acceleration of an obligation.

There are no material off-balance sheet transactions, arrangements, obligations, (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period.

The causes for any material changes (5% of the relevant accounts or such lower amount, which the

company deems material on the basis of other factors) from period to period which include vertical and horizontal analysis of any material item, have been presented in this report.

There were no sales of unregistered or exempt securities, nor were there any issuances of securities constituting an exempt transaction.

Finally, there are no other material information for disclosure during the current interim period, whether under this report or under SEC Form 17-C.

ADDITIONAL DISCLOSURES

Part I – Financial Information

Philippine Financial Reporting Standards. Notes to Interim Financial Statements: (SEC Memorandum Circular No. 6, Series of 2013)

Amended PFRS Issued But Not Yet Effective

Relevant amended PFRS, which are not yet effective as at December 31, 2021 and have not been applied in preparing the consolidated financial statements, are summarized below.

Effective January 1, 2022:

Amendments to PFRS 3, Reference to Conceptual Framework – The amendments will replace the reference of PFRS 3 from the 1989 Framework to the current 2018 Conceptual Framework. The amendments include an exception that specifies that, for some types of liabilities and contingent liabilities, an entity applying PFRS 3 should refer to PAS 37, Provisions, Contingent Liabilities and Contingent Assets, or IFRIC 21, Levies, instead of the Conceptual Framework. The requirement will ensure that the liabilities recognized in a business combination will remain the same as those recognized applying the current requirements in PFRS 3. The amendments also clarified that an acquirer shall not recognize contingent assets acquired in a business combination. The amendments should be applied prospectively.

Amendments to PAS 16, Property, Plant and Equipment - Proceeds Before Intended Use – The amendments prohibit deducting from the cost of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for its intended use. Instead, the proceeds and related costs from such items shall be recognized in profit or loss. The amendments must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when an entity first applied the amendments.

Amendments to PAS 37, Onerous Contracts - Cost of Fulfilling a Contract – The amendments clarify that for the purpose of assessing whether a contract is onerous, the cost of fulfilling a contract comprises both the incremental costs of fulfilling that contract and an allocation of costs directly related to contract activities. The amendments apply to contracts existing at the date when the amendments are first applied. At the date of initial application, the cumulative effect of applying the amendments is recognized as an opening balance adjustment to retained earnings or other component of equity, as applicable. Accordingly, the comparatives are not restated. Earlier application is permitted.

Annual Improvements to PFRS 2018 to 2020 Cycle:

Amendment to PFRS 9, Financial Instruments - Fees in the ‘10 per cent’ Test for Derecognition of Financial Liabilities – The amendment clarifies which fees an entity shall include when it applies the ‘10 per cent’ test in assessing whether to derecognize a financial liability (i.e. whether the terms of a new or modified financial liability is substantially different from the terms of the original financial liability). These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or the lender on the other’s behalf. The amendment applies to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applied the amendments. Earlier application is permitted.

Amendment to PFRS 16, Leases - Lease Incentives – The amendment removes from the Illustrative Example 13 the illustration of the reimbursement of leasehold improvements by the lessor. The objective of the amendment is to avoid any potential confusion regarding the treatment of lease incentives because of how the requirements for lease incentives are illustrated.

Effective January 1, 2023:

Amendments to PAS 1, Classification of Liabilities as Current or Non-current – The amendments clarify the requirements for an entity to have the right to defer settlement of the liability for at least 12 months after the reporting period. The amendments also specify and clarify the following: (i) an entity’s right to defer settlement must exist at the end of the reporting period, (ii) the classification is unaffected by management’s intentions or expectations about whether the entity will exercise its right to defer settlement, (iii) how lending conditions affect classification, and (iv) requirements for classifying liabilities where an entity will or may settle by issuing its own equity instruments. The amendments must be applied retrospectively. Earlier application is permitted.

Amendments to PAS 1 and PFRS Practice Statement 2, Disclosure Initiative – Accounting Policies – The amendments require an entity to disclose its material accounting policies, instead of its significant accounting policies and provide guidance on how an entity applies the concept of materiality in making decisions about accounting policy disclosures. In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and its nature. The amendments clarify (1) that accounting policy information may be material because of its nature, even if the related amounts are immaterial, (2) that accounting policy information is material if users of an entity’s financial statements would need it to understand other material information in the financial statements, and (3) if an entity discloses immaterial accounting policy information, such information should not obscure material accounting policy information. In addition, PFRS Practice Statement 2, Making Materiality Judgements, is amended by adding guidance and examples to explain and demonstrate the application of the ‘four-step materiality process’ to accounting policy information. The amendments should be applied prospectively. Earlier application is permitted.

Amendments to PAS 8, Definition of Accounting Estimates – The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies, and the correction of errors. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. An entity develops an accounting estimate if an accounting policy require an item in the financial statements to be measured in a way that involves measurement uncertainty. The amendments clarify that a change in accounting estimate that results from new information or new developments is not a correction of an error, and that the effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors. A change in an accounting estimate may affect only the profit or loss in the current period, or the profit or loss of both the current and future periods. Earlier application is permitted.

Amendments to PAS 12, Deferred Tax Related Assets and Liabilities from a Single Transaction – The amendments require companies to recognize deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. Earlier application is permitted.

Deferred effectivity -

Amendments to PFRS 10, Consolidated Financial Statements, and PAS 28 - Sale or Contribution of Assets Between an Investor and its Associate or Joint Venture – The amendments address a conflicting provision under the two standards. It clarifies that a gain or loss shall be recognized fully when the transaction involves a business, and partially if it involves assets that do not constitute a business. The effective date of the amendments, initially set for annual periods beginning on or after January 1, 2016, was deferred indefinitely in December 2015 but earlier application is still permitted.

Under prevailing circumstances, the adoption of the foregoing amendments to PFRS is not expected to have any material effect on the financial statements of the Group. Additional disclosures will be included in the financial statements, as applicable.

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Parent Company and its subsidiaries.

Subsidiaries are entities controlled by the Parent Company. Control is achieved when the Parent Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Parent Company controls an investee if and only if the Parent Company has:

- power over investee;
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee affect its returns.

Subsidiaries are consolidated from the date of acquisition or incorporation, being the date on which the Parent Company obtains control, and continue to be consolidated until the date such control ceases.

The financial statements of the subsidiaries are prepared using the same reporting period of the Parent Company. Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. Intercompany balances and transactions, including intercompany profits and unrealized profits and losses, are eliminated in full.

A change in ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction. Upon the loss of control, the Group derecognizes the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising from the loss of control is recognized in profit or loss. If the Group retains interest in the previous subsidiary, then such interest is measured at fair value at the date control is lost. Subsequently, it is accounted for as an equity-accounted investee or as financial assets at fair value through other comprehensive income (FVOCI) depending on the level of influence retained.

Noncontrolling Interest

Non-controlling interest represents the portion of profit or loss and net assets not held by the Parent Company and is presented separately in the Group's consolidated statements of comprehensive income and within equity in the Group's consolidated statements of financial position, separate from equity attributable to equity holders of the Parent Company, respectively.

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interest in the acquiree either at fair value or at the proportionate share of the fair value of the acquiree's identifiable net assets. Transaction costs are expensed as incurred and included in general and administrative expenses.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organized workforce with the necessary skills, knowledge or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

When the Group acquires a business, it assesses the financial assets and financial liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic

circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree, if any.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date at fair value and any resulting gain or loss is recognized in the consolidated statement of income.

Any contingent consideration to be transferred by the Group will be recognized at fair value at the acquisition date. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PFRS 9, Financial Instruments, is measured at fair value with changes in fair value recognized in the consolidated statement of income in accordance with PFRS 9. Other contingent consideration that is not within the scope of PFRS 9 is measured at fair value at each financial reporting date with changes in fair value recognized in the consolidated statement of income.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred, the amount recognized for non-controlling interest and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts recognized at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in the consolidated statement of income.

If the initial measurement of the fair value of net identifiable assets acquired in a business combination is incomplete by the end of the reporting period in which the business combination occurs, the Group recognizes in its consolidated financial statements provisional amounts for the items for which the measurement is incomplete. During the measurement period, the Group retrospectively adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognized as of that date. During the measurement period, the Group recognizes additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date and, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends as soon as the Group receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable. However, the measurement period shall not exceed one year from the acquisition date.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating unit (CGU) or group of CGUs that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a CGU and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the disposed operation and the portion of the CGU retained.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity or a financial liability or equity instrument of another entity.

Date of Recognition. The Group recognizes a financial asset or a financial liability in the consolidated statement of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

“Day 1” Difference. Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a “Day 1” difference) in profit or loss. In cases where there is no observable data at inception date, the Group deems the transaction price as the best estimate of fair value and recognizes “Day 1” difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the “Day 1” difference.

Financial Assets

Initial Recognition and Measurement. Financial assets, are recognized initially at fair value, which is the fair value of the consideration given. The initial measurement of financial assets, except for those designated at FVPL, includes transaction cost.

Classification. The Group classifies its financial assets at initial recognition under the following categories: (a) financial assets at amortized cost, (b) financial assets at FVOCI, and (c) financial assets at FVPL. The classification of a financial asset at initial recognition largely depends on the Group’s business model for managing the asset and its contractual cash flow characteristics.

Financial Assets and Liabilities

Date of Recognition. The Company recognizes a financial asset or a financial liability in the statement of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using trade date accounting.

Initial Recognition and Measurement. Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments, except for those designated at fair value through profit or loss (FVPL), includes transaction cost.

“Day 1” Difference. Where the transaction in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a “Day 1” difference) in profit or loss.

In cases where there are no observable data on inception, the Company deems the transaction price as the best estimate of fair value and recognizes “Day 1” difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the “Day 1” difference.

Classification. The Company classifies its financial assets at initial recognition under the following categories: (a) financial assets at fair value through profit or loss, (b) financial assets at amortized cost and (c) financial assets at fair value through other comprehensive income (FVOCI). Financial liabilities, on the other hand, are classified as either financial liabilities at FVPL or financial liabilities at amortized cost. The classification of a financial instrument largely depends on the Company’s business model and its contractual cash flow characteristics.

Financial Assets at FVPL. Financial assets at FVPL are either classified as held for trading or designated at FVPL. A financial instrument is classified as held for trading if it meets either of the following conditions:

it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term; on initial recognition, it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

This category includes equity instruments which the Company had not irrevocably elected to classify at FVOCI at initial recognition. This category includes debt instruments whose cash flows are not “solely for payment of principal and interest” assessed at initial recognition of the assets, or which are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell.

The Company may, at initial recognition, designate a financial asset meeting the criteria to be classified at amortized cost or at FVOCI, as a financial asset at FVPL, if doing so eliminates or significantly reduces accounting mismatch that would arise from measuring these assets.

After initial recognition, financial assets at FVPL are subsequently measured at fair value. Unrealized gains or losses arising from the fair valuation of financial assets at FVPL are recognized in profit or loss.

As at December 31, 2021 and 2020, the Company classified its derivative financial instrument under this category.

Financial Assets at Amortized Cost. Financial assets shall be measured at amortized cost if both of the following conditions are met: the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method, less allowance for impairment, if any. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the financial assets are derecognized and through amortization process. Financial assets at amortized cost are included under current assets if realizability or collectability is within 12 months after the reporting period. Otherwise, these are classified as noncurrent assets.

As at December 31, 2021 and 2020, the Company’s cash and cash equivalents, trade and other receivables, refundable deposits, and long-term placements are included in this category.

Financial Liabilities at Amortized Cost. Financial liabilities are categorized as financial liabilities at amortized cost when the substance of the contractual arrangement results in the Company having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

These financial liabilities are initially recognized at fair value less any directly attributable transaction costs. After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the liabilities are derecognized or through the amortization process.

As at December 31, 2021 and 2020, the Company's trade and other payables (excluding statutory payables and unearned revenue), loans payable, and lease liabilities are included in this category.

Derivative Financial Instruments

The Company uses derivative financial instruments such as foreign exchange forward contracts to manage its exposure to foreign currency risks. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gain or loss arising from changes in fair value of derivatives that do not qualify for hedge accounting is recognized in profit or loss.

Reclassification

The Company reclassifies its financial assets when, and only when, it changes its business model for managing those financial assets. The reclassification is applied prospectively from the first day of the first reporting period following the change in the business model (reclassification date).

UF or a financial asset reclassified out of the financial assets at FVPL category to financial assets at amortized cost, its fair value at the reclassification date becomes its new gross carrying amount.

For a financial asset reclassified out of the financial assets at FVPL category to financial assets at FVOCI, its fair value at the reclassification date becomes its new gross carrying amount. Meanwhile, for a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVPL, any gain or loss arising from the difference between the previous amortized cost of the financial asset and fair value is recognized in profit or loss.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVOCI, any gain or loss arising from a difference between the previous amortized cost of the financial asset and fair value is recognized in other comprehensive income.

Financial Assets at Amortized Cost. Financial assets are measured at amortized cost if both of the following conditions are met:

The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and

The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method, less any allowance for impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition, and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the financial assets are derecognized, impaired and through amortization process. Financial assets at amortized cost are included under current assets if realizability or collectability is within 12 months after the reporting date. Otherwise, these are classified as noncurrent assets.

As at December 31, 2021 and 2020, the Group's cash and cash equivalents, trade and other receivables, refundable deposits, and long-term placements are classified under this category (see Notes 4, 5 and 6). Cash and cash equivalents include cash in banks and short-term placements. Short-term placements are highly liquid investments with original maturities of three (3) months or less that are readily convertible

to known amounts of cash, which are subject to an insignificant risk of changes in value.

Financial Assets at FVOCI - Debt Instruments. For debt instruments that meet the contractual cash flow characteristic and are not designated at FVPL under the fair value option, the financial assets are measured at FVOCI if both of the following conditions are met:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, interest income (calculated using the effective interest rate method) and impairment gains or losses of debt instruments measured at FVOCI are recognized directly in profit or loss. When the financial asset is derecognized, the cumulative gains or losses previously recognized in OCI are reclassified from equity to profit or loss as a reclassification adjustment.

As at December 31, 2021 and 2020, the Group's investments in quoted debt securities are classified under this category (see Note 8).

Financial Assets at FVOCI - Equity Instruments. For equity instruments that are not held for trading, the Group may irrevocably designate, at initial recognition, a financial asset to be measured at FVOCI when it meets the definition of equity instrument under PAS 32, Financial Instruments: Presentation. This option is available and made on an instrument by instrument basis.

Dividends from equity instruments held at FVOCI are recognized in profit or loss when the right to receive payment is established, unless the dividend clearly represents a recovery of part of the cost of the investment.

All other gains or losses from equity instruments are recognized in OCI and are presented in the equity section of the consolidated statement of financial position and are not reclassified to profit or loss in subsequent periods, but instead, these are transferred directly to retained earnings.

As at December 31, 2021 and 2020, the Group has quoted investments in equity securities which were irrevocably designated as financial assets at FVOCI (see Note 8).

Reclassification. The Group reclassifies its financial assets only when it changes its business model for managing those financial assets. The reclassification is applied prospectively from the first day of the first reporting period following the change in the business model (reclassification date).

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVPL, any gain or loss arising from the difference between the previous amortized cost of the financial asset and fair value is recognized in profit or loss.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVOCI, any gain or loss arising from a difference between the previous amortized cost of the financial asset and fair value is recognized in OCI.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at amortized cost, any gain or loss previously recognized in OCI, and any difference between the new amortized cost and maturity amount, are amortized to profit or loss over the remaining life of the investment using the effective interest method. If the financial asset is subsequently impaired, any gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

In the case of a financial asset that does not have a fixed maturity, the gain or loss shall be recognized in profit or loss when the financial asset is sold or disposed. If the financial asset is subsequently impaired, any previous gain or loss that has been recognized in OCI is reclassified from equity to profit

or loss.

For equity instruments which were irrevocably designated at initial recognition as financial assets at FVOCI, no reclassification in another category is allowed.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

Impairment of Debt Instruments at FVOCI and Financial Assets at Amortized Cost. The Group recognizes an allowance for expected credit losses (ECL) for all debt instruments not held at FVPL.

ECL is based on the difference between the cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation to the asset's original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For financial assets instruments measured at amortized cost and FVOCI, the ECL is based on the 12-month ECL, which pertains to the portion of lifetime ECL that result from default events on a financial instrument that are possible within 12 months after the reporting date. However, when there has been a significant increase in credit risk since initial recognition, the allowance will be based on the lifetime ECL. When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. The Group also considers reasonable and supportable information that is available without undue cost or effort and is indicative of significant increases in credit risk since initial recognition.

The Group considers a financial asset in default when contractual payments are 30 days past due unless it is demonstrated that the non-payment was an administrative oversight rather than resulting from financial difficulty of the counterparty. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows in its entirety or a portion thereof. This is generally the case when the Group determines that the borrower does not have assets or source of income that could generate sufficient cash flows to repay the amount of financial asset for write-off. This assessment is carried out at the individual financial asset level.

Derecognition. A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- The right to receive cash flows from the asset has expired;
- The Group retains the right to receive cash flows from the financial asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- The Group has transferred its right to receive cash flows from the financial asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from a financial asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Group's continuing involvement in the financial asset. Continuing involvement that takes the form of a guarantee over the transferred financial asset is measured at the lower of the original carrying amount of the financial asset and the maximum amount

of consideration that the Group could be required to repay.

Financial Liabilities

Initial Recognition and Measurement. Financial liabilities are recognized initially at fair value, which is the fair value of the consideration received. In case of financial liabilities at amortized cost, the initial measurement is net of any directly attributable transaction costs.

Classification. The Group classifies its financial liabilities at initial recognition as either financial liabilities at FVPL or financial liabilities at amortized cost.

As at December 31, 2021 and 2020, the Group does not have financial liabilities at FVPL.

Financial Liabilities at Amortized Cost. Financial liabilities are categorized as financial liabilities at amortized cost when the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

After initial recognition, these financial liabilities are measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue, and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the liabilities are derecognized or through the amortization process.

As at December 31, 2021 and 2020, the Group's trade and other payables (excluding statutory payables), loans payable and lease liabilities are classified under this category.

Derecognition. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of comprehensive income.

Classification of Financial Instrument between Liability and Equity. A financial instrument is classified as a liability if it provides for a contractual obligation to:

- Deliver cash or another financial asset to another entity;
- Exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- Satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Offsetting of Financial Assets and Liabilities

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position only if there is a currently enforceable legal right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated statement of financial position.

Classification of Assets and Liabilities between Current and Noncurrent

The Group presents current and noncurrent assets, and current and noncurrent liabilities, as separate classifications in the notes to consolidated financial statements.

Current Assets. The Group classifies an asset as current when:

- It expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- It holds the asset primarily for the purpose of trading;
- It expects to realize the asset within 12 months after the reporting period; or
- The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Otherwise, the Group will classify all other assets as noncurrent.

Current Liabilities. The Group classifies a liability as current when:

- It expects to settle the liability in its normal operating cycle;
- It holds the liability primarily for the purpose of trading;
- The liability is due to be settled within 12 months after the reporting period; or
- It does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Otherwise, the Group will classify all other liabilities as noncurrent.

Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost includes all costs of purchase and other costs incurred in bringing the inventories to their present location and condition, and it is calculated using the moving average method.

The NRV of inventories is the estimated selling price in the ordinary course of business, less the estimated cost necessary to make the sale. In determining the NRV, the Company considers any adjustment necessary for obsolescence.

When the NRV of the inventories is lower than their cost, the inventories are written-down to its NRV and the difference between the cost and NRV of the inventories is charged in profit or loss.

Noncurrent Asset Held for Sale

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Noncurrent assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable, and the asset or disposal group is available for immediate sale in its present condition.

Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale expected to be completed within one (1) year from the date of classification.

If the one-year period is not complied, the Group can still classify its noncurrent asset as held for sale

when:

There are non-buyer conditions which extend the period required to complete the sale and the conditions can only be complied after a firm purchase commitment is obtained. The firm purchase commitment should be highly probable within one year

There are buyer or non-buyer conditions that will extend the period required to complete the sale after the Group obtains a firm purchase agreement, and the Group already responded to the conditions expecting favorable resolution.

During the one-year period, the noncurrent asset held for sale was not sold due to the occurrence of unlikely circumstances and the Group responded to the change in circumstances within the same period. Also, the noncurrent asset should be actively marketed at a reasonable price given the change in circumstances.

The Group recognizes an impairment loss for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell, to the extent that it has not been recognized in the carrying amount of the noncurrent asset before initial classification as held for sale. The Group recognizes a gain for any subsequent increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been recognized.

Assets and liabilities classified as held for sale are presented separately as current items in the consolidated statements of financial position.

Investments in Associates and a Joint Venture

These consist of investments in a joint arrangement classified as a joint venture and associates that are accounted for at equity method.

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. The considerations made in determining joint control are similar to those necessary to determine control over subsidiaries.

The Group's Investments in Associates and a Joint Venture are accounted for under the equity method. The investments are initially recognized at cost and adjusted to recognize the Group's share in the changes in the net assets of the associates since the acquisition date. Goodwill relating to the joint venture or associate is included in the carrying amount of the investment and is not tested for impairment separately. Dividends received by the Group from the associates and joint venture will reduce the carrying amount of the investments when the right to receive the dividend is established. Dividends received from associates and joint venture whose carrying values have been reduced to zero are recognized as income in the consolidated statement of income. The Group recognizes its share in net income or loss of the associates in profit or loss. Any change in OCI of the associates is presented as part of the Group's OCI. In addition, where there has been a change recognized directly in equity of the associate, the Group recognizes its share in these changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the Joint Venture or associate are eliminated to the extent of the Group's interest in the joint venture or associate.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in the joint venture or associate. At each financial reporting date, the

Group determines whether there is objective evidence that the investment in the joint venture or associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the joint venture or associate and its carrying value, then recognizes the loss within share in earnings from investments in associates and joint ventures in the consolidated statement of income.

Upon loss of significant influence over the associate, the Group measures and recognizes any retained investment at fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognized in profit or loss.

The financial statements of the associates are prepared in the same reporting period and using the uniform accounting policies used by the Group.

Investment Properties

Investment properties pertain to land, buildings and improvements, and depot tanks held either to earn rental income or for capital appreciation or both, but not for sale in the ordinary course of business or for administrative purposes.

Investment properties are initially measured at cost which pertains to the purchase price and any directly attributable costs related to the acquisition. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are recognized in profit or loss in the period in which they arise. Fair values are determined using market data approach by an accredited external independent real estate appraiser.

An investment property is derecognized either when the asset has been disposed of or when the investment property has been permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal. In determining the amount of consideration from the derecognition of investment property the Group considers the effects of variable consideration, existence of a significant financing component, non-cash consideration, and consideration payable to the buyer, if any.

Transfers are made to or from investment property only when there is a change in use, evidenced by the ending of owner-occupation, commencement of an operating lease to another party or ending of the construction or development. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Deferred Exploration and Evaluation Costs

Deferred exploration and evaluation costs arising from the Group's exploration and evaluation activities are carried at cost less any accumulated impairment losses, if any.

Exploration and evaluation activities involve the search for oil, gas or other natural resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource. These include the following:

- Acquisitions of rights to explore;
- Gathering exploration data through geophysical studies;
- Determining and examining the volume and grade of the resource;
- Surveying transportation and infrastructure requirements; and

- Evaluating the technical feasibility and commercial viability of extracting the resource.

Exploration and evaluation expenditures are recognized as assets when the future economic benefit is more likely than not to be realized. These costs include directly attributable employee remuneration, materials and fuels used, surveying costs, drilling costs and payments made to contractors. The Group capitalizes any further costs incurred for exploration and evaluation activities up to the point when a commercial reserve is established.

Deferred exploration and evaluation costs are assessed for impairment before these are reclassified to “Property and equipment” account in the consolidated statement of financial position when the technical feasibility and commercial viability of extracting the resources are demonstrable.

Any impairment loss is recognized in profit or loss. If the exploration area is found to contain no commercial reserves, the deferred exploration and evaluation costs are charged to profit or loss.

Property and Equipment

The following property and equipment are stated at cost less accumulated depreciation, amortization and any accumulated impairment losses:

- Depot Tanks
- Building and improvements
- Furniture, fixtures, and office equipment
- Machinery and equipment
- Transportation equipment

The initial cost of property and equipment consists of its purchase price after deducting trade discounts and rebates, import duties, nonrefundable purchase taxes, and any other costs directly attributable in bringing the asset to its working condition and location for its intended use.

The cost of self-constructed assets includes the cost of materials, direct labor, any other costs directly attributable in bringing the assets to the working condition for their intended use, and costs of dismantling and removing the items and restoring the site on which they are located.

Expenditures incurred after the property and equipment have been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized in profit or loss in the year the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment. The cost of replacing a component of an item of property and equipment is recognized if it is probable that the future economic benefits embodied within the component will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced component is derecognized.

When parts of an item of property and equipment have different useful lives, these are accounted for as separate items (major components) of property and equipment.

Depreciation and amortization of property and equipment begin when it is in the location and condition necessary for it to be capable of operating in the manner intended by the management. Depreciation and amortization are calculated on a straight-line basis over the following estimated useful lives of the property and equipment:

Number of Years	
Depot tanks	15
Building and building improvements	15
Machinery and equipment	10

Transportation equipment	5
Furniture, fixtures and office equipment	3

The estimated useful lives, depreciation and amortization method are reviewed at each reporting date to ensure that these are consistent with the expected pattern of economic benefits from items of property and equipment.

Fully depreciated assets are retained in the accounts until they are no longer in use.

When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation, amortization and any impairment in value are removed from the accounts. Any resulting gain or loss is recognized in profit or loss.

Construction in progress represents properties under construction and is stated at cost, including costs of construction and other direct costs. Construction in progress is not depreciated until such time that the relevant assets are completed and ready for operational use.

Other Nonfinancial Assets

Other nonfinancial assets pertain to excess tax credits, prepayments, input value-added tax (VAT), and long-term deposits.

Excess Tax Credits. Excess tax credits pertain to the Group's excess income tax payments.

These include taxes withheld and remitted to the Bureau of Internal Revenue (BIR) by customers which can be applied to the Group's income tax payable in the same year the related income was recognized. Excess tax credits are carried forward and can be utilized in succeeding years.

Prepayments. Prepayments are expenses paid in advance and recorded as assets before these are utilized. Prepayments are apportioned over the period covered by the payment and included in profit or loss when incurred. Prepayments that are expected to be utilized within 12 months after the reporting date are classified as current assets. Otherwise, these are classified as noncurrent assets.

VAT. VAT is a tax on consumption levied on the sale, barter, exchange, or lease of goods or properties and services, and on importation of goods in the Philippines. It is an indirect tax, which may be shifted or passed on to the buyer, transferee or lessee of goods, properties or services.

Revenue, expenses, and assets are recognized net of the amount of VAT, except:

When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and Receivables and payables that include the amount of VAT.

The net amount of VAT recoverable from the taxation authority is presented as "Input VAT" under "Other noncurrent assets" account in the consolidated statement of financial position.

Impairment of Nonfinancial Assets

The carrying amounts of nonfinancial assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amounts may not be recoverable. If such indication exists and when the carrying amounts exceed the estimated recoverable amounts, the assets or cash-generating units (CGU) are written down to their recoverable amounts. The recoverable amount of the asset is the greater of the fair value less cost of disposal or value in use. The fair value less cost of disposal is the amount obtainable from the sale of an asset in an arm's-length transaction less cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessment of the time value of money and the risks

specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the CGU to which the asset belongs. Impairment losses are recognized in profit or loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In such instance, the carrying amount of the asset is increased to its recoverable amount. However, that increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment loss had been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such reversal, the depreciation and amortization charges are adjusted prospectively to allocate the asset's revised carrying amount on a systematic basis over its remaining useful life.

Equity

Capital Stock. Common stock is measured at par value for all shares issued and subscribed. Unpaid subscriptions are recognized as reduction to subscribed capital stock.

Additional Paid-in Capital (APIC). APIC represents the proceeds and/or fair value of consideration received in excess of the par value of the shares issued. Incremental costs directly attributable to the issuance of new common stock are recognized as a deduction from APIC, net of any tax effects.

Deficit. Deficit represents the cumulative balance of the Group's profit or loss.

Other Equity Reserves. Other equity reserves consist of cumulative balances of items of income and expense that are not recognized in profit or loss in accordance with PFRS. Other equity reserves of the Group pertain to equity reserve on acquisition of NCI, cumulative gain (loss) on translation of Investments in Associates, cumulative unrealized gain changes in fair value of financial assets at FVOCI, cumulative translation loss on consolidation of a foreign operations, and cumulative remeasurement gain (loss) on net retirement benefit liability.

Treasury Stock. Treasury stock represents the Parent Company's shares held by its subsidiary, which are carried at cost and deducted from equity until the shares are cancelled or sold.

When the shares are subsequently sold, the difference between the cost and consideration received, net of any directly attributable transaction costs, is included in equity attributable to the equity holders of the Parent Company.

Revenue Recognition

Revenue from contract with customers is recognized when the performance obligation in the contract has been satisfied, either at a point in time or over time. Revenue is recognized over time if one of the following criteria is met: (a) the customer simultaneously receives and consumes the benefits as the Group performs its obligations; (b) the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date. Otherwise, revenue is recognized at a point in time.

The Group also assesses its revenue arrangements to determine if it is acting as a principal or as an agent. The Group has assessed that it acts as a principal in its revenue arrangements.

The following specific recognition criteria must also be met before revenue is recognized.

Sale of Fuel. Sales revenue is recognized at the point in time when control of the asset is transferred to the customer upon delivery. The normal credit term is 15 to 60 days.

Service Income. Service income including hauling fees and port service income is recognized over the period that the related service is provided.

Income from Penalty on Delayed Payment of Receivables. Income from penalty on delayed payment of receivables are recognized when payments are received from customers.

Other Income. Income from other sources is recognized as revenue when earned.

The following are the specific recognition criteria for other revenues outside the scope of PFRS 15:

Rental Income. Revenue on rental under non-cancellable and cancellable leases are recognized on a straight-line basis over the lease term.

Interest Income. Interest income is recognized as the interest accrues taking into account the effective yield on the asset, net of final tax.

Dividend Income. Dividend income is recognized when the Group's right to receive payment is established.

Expense Recognition

Expenses are recognized in profit or loss when a decrease in future economic benefit related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.

Cost of Sales. Cost of sales includes the purchase price of the products sold as well as costs that are directly attributable in bringing the inventory to its intended condition and location. Costs of sales is recognized when the related goods are delivered to the customers.

Cost of Services. Cost of services are recognized as expense when the related services are rendered.
General and Administrative Expenses. General and administrative expenses constitute costs of administering the business. These are expensed when incurred.

Interest Expense. Interest expense is recognized in profit or loss using the effective interest method.

Employee Benefits

Short-term Benefits. The Group recognizes short-term employee benefits based on contractual arrangements with employees. The unpaid portion of the short-term employee benefits is measured on an undiscounted basis and is included as part of "Trade and other payables" account in the consolidated statement of financial position.

Retirement Benefit. Retirement benefit costs are actuarially determined using the projected unit credit method. This method reflects services rendered by employees up to the date of valuation and incorporates assumptions concerning employees' projected salaries. The calculation of net retirement benefits (costs) is performed annually by a qualified actuary. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in the future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

The net retirement benefit liability recognized by the Group is the aggregate of the present value of the defined benefit obligation reduced by the fair value of plan assets out of which the obligations are to be settled directly. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using risk-free interest rates of government bonds that have terms to

maturity approximating the terms of the related net retirement benefit liability.

Plan assets are assets that are held in trust and managed by a trustee bank. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. The fair value of the plan assets is based on the market price information. When no market price is available, the fair value of plan assets is estimated by discounting the estimated future cash flows using discount rates that reflect both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the retirement benefit liability, the measurement of the resulting net retirement benefit is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group recognizes retirement benefit costs, comprising of current service cost and net interest income or expense in profit or loss. The Group determines the net interest cost by applying the discount rate to the defined benefit liability at the beginning of the reporting period, taking into account any changes in the defined benefit liability during the period as a result of benefit payments.

Remeasurements of the net retirement benefit liability, which consist of actuarial gains and losses and the return on plan assets (excluding interest), and the effect of asset ceiling (if any, excluding interest) are recognized immediately in OCI and are not reclassified to profit or loss in subsequent periods.

Foreign Currency-Denominated Transactions

Transactions denominated in foreign currencies are recorded using the exchange rate at the date of the transaction. Outstanding monetary assets and liabilities denominated in foreign currencies are translated using the closing exchange rate at the reporting date. Differences arising on settlement or translation of monetary assets and liabilities are recognized in profit or loss.

Translation of a Foreign Operation. A foreign operation is a subsidiary, associate, joint arrangement or branch whose activities are based or conducted in a country or currency other than those of the reporting entity.

At each reporting date, the assets and liabilities of the foreign operation are translated from its functional currency to the Parent Company's functional and presentation currency using the closing rate at each reporting date, while its comprehensive income is translated using weighted average exchange rates during the year.

The exchange differences arising on translation of a foreign operation are recognized in OCI. Upon disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to profit or loss.

Income Taxes

Current Tax. Current tax assets and liabilities are measured at the amounts expected to be recovered from or paid to the taxation authorities. The tax rate and tax laws used in the computation are those that have been enacted or substantively enacted at the reporting date.

Deferred Tax. Deferred tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from the excess of minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carryforward benefits of unused tax credits and unused tax losses can be utilized. Deferred tax, however, is not recognized when it arises

from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognized in profit or loss except to the extent that it relates to a business combination, or items directly recognized to equity or in OCI.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to offset current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Related Party Transactions

Related party transactions are transfers of resources, services or obligations between the Group and its related parties.

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions.

Parties are also considered to be related if they are subject to common control.

Related parties may be individual or corporate entities. Transactions between related parties are accounted for at arm's-length prices or on terms similar to those offered to nonrelated parties in an economically comparable market.

Provisions and Contingencies

Provisions. Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain.

The expense relating to any provision is presented in profit or loss net of any reimbursement.

If the effect of the time value of money is material, the estimated cash flows are discounted using a current pre-tax rate that reflects the current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Contingencies. Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Basic and Diluted Income (Loss) per Share

Basic Income (Loss) per Share. Basic income (loss) per share is calculated by dividing the net income (loss) for the period attributable to equity holders of the Parent Company by the weighted average number of issued and outstanding shares and subscribed shares, with retroactive adjustment for any stock dividends, stock splits or reverse stock splits during the year.

Diluted Income (Loss) per Share. Diluted income (loss) per share is calculated in the same manner as basic income (loss) per share, adjusted for the effects of any potentially dilutive, convertible securities.

Events After the Reporting Date

Post year-end events that provide additional information about the Group's financial position at reporting date (adjusting events) are reflected in the consolidated financial statements.

Post year-end events that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

Significant Judgments, Accounting Estimates and Assumptions

The preparation of the consolidated financial statements requires management to exercise judgments and make accounting estimates and assumptions that affect the amounts reported in the consolidated financial statements and related notes. The judgments, accounting estimates and assumptions used in the consolidated financial statements are based upon management's evaluation of relevant facts and circumstances at the reporting date.

While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the estimated amounts. Actual results could differ from such estimates.

The accounting estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions in accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

The following are the significant judgments, accounting estimates and assumptions made by the Group:
Judgments

Determination of Functional and Presentation Currency. The Group's consolidated financial statements are presented in Philippine Peso, the Parent Company's functional currency, which mainly influences labor, material and other costs of providing goods or services. The Parent Company and its subsidiaries determine their own functional currencies, which best reflect the economic substance of the underlying transactions, events and conditions relevant to each entity.

Based on the economic substance of the underlying circumstances, the functional currency of the Group's subsidiaries, except GGL and PT BES, is the Philippine Peso. The functional currency and presentation currency of GGL and PT BES are US Dollar and Indonesian Rupiah, respectively.

Classification and Measurement of Financial Assets. Classification and measurement of financial assets depend on the results of the contractual cash flow and the business model tests. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment reflecting all relevant evidence including how the performance of the assets is evaluated, the risks that affect the performance of the assets, and how these risks are managed.

At initial recognition, the Group designated its investments in equity and debt securities as financial assets at FVOCI.

Cash and cash equivalents, trade and other receivables, refundable deposit and long-term placements (included under “Other noncurrent asset” account) were classified as financial assets at amortized cost since the Group’s primary business model in relation to these assets is to hold the financial assets to collect contractual cash flows solely for principal and interest.

Fair Value Measurement of Financial Instruments. The fair values of securities that are actively traded in organized financial markets are determined by reference to unadjusted quoted market prices at the close of business on the reporting date.

The fair values of financial instruments that are not quoted in active markets are determined by using generally accepted valuation techniques, such as discounted cash flow models. The models are validated and periodically reviewed by qualified personnel independent of the area that created them and are approved by the BOD before these are used. The models are calibrated to ensure that outputs reflect actual data and comparative market prices. Further, inputs used in these models are from observable data and quoted market prices in respect of similar financial instruments. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility.

While significant components of fair value measurement were determined using verifiable objective evidence, such as foreign exchange rates, the amount of changes in fair value would differ if the Group utilized different valuation methodologies and assumptions. Any changes in fair value of these financial assets and liabilities would affect the financial statements.

In accordance with the amendments to PFRS 7, disclosures about the level in the fair value hierarchy are required in which the fair value measurements are categorized for assets and liabilities measured in the consolidated statements of financial position.

Assumptions and methods of determining the fair values of financial instruments are presented in Note 32 to the consolidated financial statements.

Classification of Investment in an Associate as Noncurrent Asset Held For Sale. The Group classifies a noncurrent asset as held for sale when its carrying amount will be recovered principally through a sale transaction rather than through continuing use. In making its judgment, the Group considers its management’s commitment to sell the asset within one (1) year. When the one-year period is not met, the Group determines whether the delay of the sale is caused by events or circumstances beyond its control and there is sufficient evidence that the Group remains committed to its plan to sell the asset.

Based on the Group’s management assessment, investment in an associate classified as noncurrent asset held for sale will continue to be classified as such because of continuous discussion with the prospective investor to complete the sale. As at December 31, 2021 and 2020, the carrying amount of noncurrent asset held for sale amounting to P=1,157.5 million is lower than its fair value less cost to sell.

Existence of Significant Influence over Associates and Joint Venture. The Group assessed that it has significant influence in its associates despite having interest ownership of below the 20% threshold where significant influence is presumed under PAS 28, Investments in Associates and a Joint Venture and Joint Ventures. Significant influence has been established by the Group over the investees because of its participation in the decision-making process of the investees’ significant activities, through its representation in the investees’ BOD.

The Group’s Investments in Associates amounted to P=207.5 million and P=123.4 million as at December 31, 2021 and 2020, respectively.

Assessment of Control on PLBRC. An entity is considered as a subsidiary when it is controlled by the Group. Control is established when the Group is exposed or has rights to variable returns from its involvement with an entity, and has the ability to affect those returns through its power over the entity.

The Group considers PLBRC as a subsidiary even though it has less than 51% equity ownership because it can exercise control over the management and operations of PLBRC. Moreover, majority of PLBRC's assets are being utilized in the Group's operations. Accordingly, the consolidated financial statements of the Group include those of PLBRC.

Determination of Reportable Operating Segments. The Group has determined that it has reportable segments based on the following thresholds:

Its reported revenue, including both sales to external customers and intersegment sales or transfers, is 10% or more of the combined revenue, internal and external, of all operating segments.

The absolute amount of its reported profit or loss is 10% or more, in absolute amount, of

- (i) the combined reported profit of all operating segments that did not report a loss and
- (ii) the combined reported loss of all operating segments that reported a loss.

Its assets are 10% or more of the combined assets of all operating segments.

Operating segments that do not meet any of the quantitative thresholds may be considered reportable, and separately disclosed, if management believes that information about the segment would be useful to users of the consolidated financial statements. The Group assessed that it has a single reportable operating segment which is the downstream oil operations particularly the sale of petroleum products based on the criteria above.

Determination of Interest in a Joint Arrangement. The Group has, after considering the structure and form of the arrangement, the terms agreed by the parties in the contractual arrangement and the Group's rights and obligations arising from the arrangement, classified its interest in joint arrangement with Mariveles Joint Venture Corporation (MJVC) under PFRS 11, Joint Arrangements, as a joint venture. Accordingly, the Group accounts for its equity interests in a joint venture using the equity method.

Capitalization of Exploration and Evaluation Expenditures. The Group makes judgments in determining whether there are future economic benefits from either future exploration or sale of reserves to capitalize exploration and evaluation expenditures. The Group further applies estimates and assumptions about future events and circumstances to determine whether an economically viable extraction operation can be established.

Deferred exploration and evaluation costs presented in the consolidated statement of financial position, amounted to P=6.0 million as at December 31, 2021 and 2020.

Accounting Estimates and Assumptions

Assessment for ECL on Trade Receivables. The Group, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade receivables. The provision matrix specifies provision rates depending on the number of days that a trade receivable is past due. The Group also uses appropriate groupings if its historical credit loss experience shows significantly different loss patterns for different customer segments. The Group then adjusts the historical credit loss experience with forward-looking information on the basis of current observable data to reflect the effects of current and forecasted economic conditions.

The Group adjusts historical default rates to forward-looking default rates by determining the closely related economic factor affecting each customer segment. The Group regularly reviews the

methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience.

The determination of the relationship between historical default rates and forecasted economic conditions is a significant accounting estimate. Accordingly, the provision for ECL on trade receivables is sensitive to changes in assumptions about forecasted economic conditions.

Assessment for ECL on Other Financial Assets at Amortized Cost and Quoted Debt Instruments Classified as Financial Assets at FVOCI. The Group determines the allowance for ECL using the general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12 months unless there has been a significant increase in credit risk since initial recognition in which case ECL is provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the counterparty.

The Group also considers financial assets that are more than 30 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the counterparty.

For cash in banks and cash equivalents, refundable deposit and debt instruments classified as financial assets at FVOCI, the Group assessed that the ECL is not material because the transactions with respect to these financial assets were entered only with banks and counterparties with good credit standing and relatively low risk of default. Accordingly, no provision for ECL on these financial assets was recognized in 2021 and 2020.

Valuation of Inventories at Lower of Cost or NRV. The Group writes down the cost of inventories whenever NRV becomes lower than cost due to damage, physical deterioration, obsolescence, changes in price levels or other causes. The lower of cost or NRV is reviewed regularly to reflect the accurate valuation in the financial records. Inventory items identified to be obsolete and unusable are also written off and charged as expense for the period.

No provision for inventory obsolescence is recognized in the consolidated statements of comprehensive income in 2021.

Allocation of Purchase Price in a Business Combination. The Group accounts for its business combinations using the acquisition method which requires extensive use of accounting judgments and estimates to allocate the purchase price to the fair market values of the identifiable assets and liabilities assumed in a business combination at the acquisition date. Any difference in the purchase price and the fair values of the net assets acquired is recorded as either goodwill or gain on bargain purchase in profit or loss. The significant judgments and assumptions made in estimating the fair value to be assigned to the identifiable assets and liabilities assumed in a business combination can materially affect the consolidated financial statements.

The Group engaged an external qualified appraiser to measure the fair values of investment properties and property and equipment arising from the acquisition of FECEI in 2021. However, the fair values of net assets acquired is based on provisional amounts while the Group sought an independent valuation of the investment in associates under FECEI. As allowed under PFRS 3, Business Combinations, the

Group has a one-year measurement period from the acquisition date within which to finalize the fair values of net assets acquired. Any changes in the provisional fair values of net assets acquired will affect the amount of gain on bargain purchase recognized in profit or loss.

The Group's acquisition of FECl has resulted in the provisional recognition of gain on bargain purchase in 2021.

Estimation of the Useful Lives of Property and Equipment. The Group estimates the useful lives of property and equipment based on the period over which the assets are expected to be available for use. The estimates are based on a collective assessment of industry practice, internal technical evaluation and experience with similar assets. The estimated useful lives of property and equipment are reviewed at each reporting date and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

Future results of operations could be materially affected by changes in estimates brought about by changes in the factors mentioned above. The amount and timing of recording of depreciation expense for any period would be affected by changes in these factors and circumstances.

There were no changes in the estimated useful lives of property and equipment in 2021, 2020 and 2019.

Determination of Fair Value of Investment Properties. Investment properties are measured at fair values. The Group works closely with external qualified appraisers who performed the valuation using appropriate valuation techniques. The Group comparable market data adjusted as necessary to reflect the specific assets' size, location and other characteristics. The valuation techniques and inputs used in the fair value measurement of investment properties are disclosed in Note 13 to the consolidated financial statements.

Assessment of the Recoverability of Deferred Exploration and Evaluation Costs. Deferred exploration and evaluation costs are capitalized in the period incurred until it has been determined that a property has no sufficient economically recoverable reserves, in which case the costs are written off as impairment losses. The Group reviews the carrying amounts of its deferred exploration and evaluation costs whenever events or changes in circumstances indicate that their carrying amounts may exceed their estimated net recoverable amounts. An impairment loss is recognized when the carrying amount of those assets exceeds its recoverable amount.

No provision for impairment of exploration and evaluation assets was recognized in 2021 and 2020.

Assessment for Impairment of Nonfinancial Assets. The Group assesses impairment on nonfinancial assets whenever events or changes in circumstances indicate that the carrying amount of the assets or group of assets may not be recoverable. The relevant factors that the Group considers in deciding whether to perform an asset impairment review include, among others, the following:

- Significant underperformance of a business in relation to expectations;
- Significant negative industry or economic trends; and
- Significant changes or planned changes in the use of the assets.

Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized. Recoverable amounts are estimated for individual assets or, if it is not possible, for the CGU to which the asset belongs.

The recoverable amount of the asset is the greater of the fair value less cost of disposal or value in use. The fair value less cost of disposal is the amount obtainable from the sale of an asset in an arm's-length transaction, less the cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset.

No impairment loss on other nonfinancial assets was recognized in 2021 and 2020.

Determination of Retirement Benefits. The determination of the net retirement benefit liability and expense is dependent on the assumptions used by the actuary in calculating such amounts.

These assumptions are described in Note 19 to the consolidated financial statements and include discount rates and salary increase rates among others. Actual results that differ from the Group's assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded liability in such future periods. While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the net retirement benefit liability.

Estimation of Incremental Borrowing Rate on Lease Liabilities. The Group uses its incremental borrowing rate to measure lease liabilities. The incremental borrowing rate is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the ROU asset in a similar economic environment. The Group estimates the incremental borrowing rate using available observable inputs (such as the prevailing Bloomberg Valuation Service interest rates) adjusted for entity-specific estimates, to reflect the terms and conditions of the lease.

The Group has applied incremental borrowing rate ranging from 3.95% to 7.05% for the computation of lease liabilities and ROU assets.

Estimation of Provisions. The Group is currently involved in certain claims and assessments. The Group determined the probable costs for these claims and assessments based upon an analysis of potential results. Management opted not to further disclose details regarding the claims and assessments because it can prejudice seriously the outcomes.

Recognition of Deferred Tax Assets. The Group reviews the carrying amount of deferred tax assets at each reporting date and reduces the balance to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax assets to be utilized.

The Group's deductible temporary differences, carryforward benefits of NOLCO, and excess of MCIT over RCIT, for which deferred tax assets have not been recognized. The management assessed that there may be no sufficient future taxable income against which benefits of the deferred tax assets can be utilized.

Subject: Re: SEC !7-Q Quarterly Report as of June 30, 2022 Basic Energy Corporation

To: <apgahol@basicenergy.ph>

Your report/document has been SUCCESSFULLY ACCEPTED by ICTD. (Subject to Verification and Review of the Quality of the Attached Document) Official copy of the submitted document/report with Barcode Page (Confirmation Receipt) will be made available after 15 days from receipt through the SEC Express System at the SEC website at www.sec.gov.ph

**SECURITIES AND EXCHANGE COMMISSION
SEC FORM 17-Q**

**QUARTERLY REPORT PURSUANT TO SECTION 17 OF THE SECURITIES
REGULATION CODE AND SRC RULE 17(2)(b) THEREUNDER**

1. For the quarterly period ended: **30 June 2022**
2. Commission identification number: **36359**
3. BIR Tax Identification No.: **000-438-702-000**
4. Exact name of issuer as specified in its charter: **BASIC ENERGY CORPORATION**
5. Province, country or other jurisdiction of incorporation or organization: **Philippines**
6. Industry Classification Code: (SEC Use Only)
7. Address of issuer's principal office: **UB 111 Paseo de Roxas, Legazpi Village, Makati City**
Postal code: **1229**
8. Issuer's telephone number, including area code: **(632) 3224-4383**
9. Former name, former address and former fiscal year, if changed since last report: **N.A.**
10. Securities registered pursuant to Sections 8 and 12 of the Code, or Sections 4 and 8 of the RSA

Title of each Class	Number of shares of common stock outstanding and amount of debt outstanding
Common Shares	14,668,643,064
Listed with PSE	3,090,875,714

11. Are any or all of the securities listed on a Stock Exchange?

Yes No

If yes, state the name of such Stock Exchange and the classes of securities listed therein:

Philippine Stock Exchange ("PSE") Common Shares

12. Indicate by check mark whether the registrant:

(a) has filed all reports required to be filed by Section 17 of the Code and SRC Rule 17 thereunder or Section 11 of the RSA and RSA Rule 11(a)-1 thereunder, and Sections 26 and 141 of the Corporation Code of the Philippines, during the preceding 12 months (or for such shorter period the registrant was required to file such reports)

Yes No

(b) has been subject to such filing requirements for the past ninety (90) days.

Yes No

**APPLICABLE ONLY TO REGISTRANTS INVOLVED IN INSOLVENCY/SUSPENSION OF PAYMENTS
PROCEEDINGS DURING THE PRECEDING FIVE YEARS:**

13. Check whether the registrant has filed all documents and reports required to be filed by Section 17 of the Code subsequent to the distribution of securities under a plan confirmed by a court or the Commission.

Yes [] No [X] This item is not applicable to the Company.

ATTACHMENT "A"

FINANCIAL INFORMATION For the period ended June 30, 2022

1. The following Unaudited Financial Statements are contained in this report:

- 1.1 Unaudited Interim Consolidated Statement of Financial Position as at June 30, 2022 and Audited Consolidated Statement of Financial Position as at December 31, 2021
- 1.2 Unaudited Interim Consolidated Statements of Comprehensive Income for the Six Months Ended June 30, 2022 and 2021
- 1.3 Unaudited Interim Consolidated Statements of Changes in Equity for the Six Months Ended June 30, 2022 and 2021
- 1.4 Unaudited Interim Consolidated Statements of Cash Flows for the Six Months Ended June 30, 2022 and 2021
- 1.5 Notes to Unaudited Interim Consolidated Financial Statements

2. Management's Discussion and Analysis on Financial Condition and Results of Operations for the period ending December 31, 2021 and June 30, 2022

A. Key Performance Indicators

Management considers the following as key performance indicators of the company: Return on Investment (ROI), Profit Margin, Performance of Committed Work Programs, Current Ratio and Asset Turnover.

The following table shows the Top 5 performance indicators for the past three interim periods:

Key Performance Indicators	2 nd Quarter 2022	2 nd Quarter 2021	2 nd Quarter 2020
Return on Investments (ROI) (Net income / Ave. Stockholders' Equity)	4.47%	-3.47%	-3.95%
Profit Margin (Net income / Net Revenue)	0.83%	-3,658.59%	-809.59%
Investment in Projects as a % of Total Assets	0.88%	12.45%	30.49%
Investment in Wells and Other Facilities as a % of Total Assets	0.05%	0.40%	1.07%
Current Ratio (Current Assets / Current Liabilities)	1.16:1	67.08:1	7.75:1
Asset Turnover (Net Revenue / Ave. Total Assets)	154.90%	0.09%	0.47%
Solvency Ratios			
Debt to Equity Ratio	303.96%	1.62%	5.73%
Asset to Equity Ratio	403.96%	100.97%	104.03%
Interest Coverage Ratio	513.40%	NA	NA

ROI (Net Income / Average Stockholders' Equity) measures the profitability of stockholders' investment. Profit Margin (Net Income / Net Revenue) measures the net income produced by each peso of revenue. Investment in Projects as a % of Assets, measures how much the company invested in its committed work programs. Current Ratio (Current Assets / Current Liabilities) measures the

short-term debt-paying ability of the company. Asset Turnover (Net Revenue / Average Total Assets) measures how efficiently assets are used to produce profit.

ROI was 4.47% for the 2nd quarter of 2022, -3.47% for the 2nd quarter of 2021, and -7.27% for the 2nd quarter of 2020. The positive rate for 2022 was due to the revenue recognized during the period and the negative rates in 2020 and 2021 were due to the losses booked during those periods.

Profit Margin was 0.83% for the 2nd quarter of 2022, -3,638.59% for the 2nd quarter of 2021, and -809.59% for the 2nd quarter of 2020. The positive rate for 2022 was due to the revenue recognized during the period and the negative rates in 2019 and 2020 were due to the losses booked during those periods.

Investment in Projects as a % of Total Assets increased to 0.88% in the 2nd quarter of 2022 from 12.45% in the 2nd quarter of 2021 which decreased from 30.49% for the 2nd quarter of 2020. The increase in 2022 was due to the increase in total assets and the decrease in 2021 was primarily due to the increase in total assets.

Investment in Wells & Other Facilities as a % of Total Assets decreased from 1.07% in the 2nd quarter of 2020 to 0.40% in the 2nd quarter of 2021 and further decreased to 0.05% in the 2nd quarter of 2022. The decrease in 2021 and 2022 was due the increase in total assets during the year.

Current Ratio was 1.16:1 for the 2nd quarter of 2022, 67.08:1 for the 2nd quarter of 2021, and 7.75:1 for the 2nd quarter of 2020. The decrease in ratio in 2022 was due to the increase in current liabilities and the increase in ratio from 2020 to 2021 was due to the increase in current assets.

Asset Turnover was 154.90% for the 2nd quarter of 2022, 0.09% for the 2nd quarter of 2021, and 0.47% for the 2nd quarter of 2020. The increase in asset turnover in 2022 was due to the revenue recognized during the period and the decrease in asset turnover from 2020 to 2021 was due to the decrease in revenue and increase in average total assets.

Debt to Equity Ratio was 303.96% for the 2nd quarter of 2022, 1.62% for the 2nd quarter of 2021, and 5.73% for the 2nd quarter of 2020. The increase in debt equity ratio in 2022 was primarily due to the increase in liability and the decrease in the debt equity ratio from 2020 to 2021 was due to the decrease in total liabilities and increase in total equity.

Asset to Equity Ratio was 403.96% for the 2nd quarter of 2022, 100.97% for the 2nd quarter of 2021, and 104.03% for the 2nd quarter of 2020. The increase in ratio for 2022 was due to the increase in assets and the decrease in ratio from 2020 to 2021 was due the higher increase in equity against the increase in assets.

Interest Rate Coverage Ratio for the 2nd quarter of 2022 was at 513.40% and no interest were paid during the 2nd quarter of 2021 and 2020.

B. Discussion and Analysis of Financial Condition as of June 30, 2022

For the period ending June 30, 2022, the company recorded total revenue of Php36.7 billion and cost of sales of goods and services of Php35.9 billion resulting in a gross profit of Php851.2 million. Other operating income and expenses of Php455.7 million, consist of operating expenses of Php363.2 million, finance costs of Php95.7 million, share in net income of associates and joint venture of Php977,142, other charges of Php2.6 million and interest income of Php4.8 million, were recorded for the period ending June 30, 2022 resulting in consolidated income before tax of Php395.5 million. Consolidated net income after tax of Php305 million was recorded for the period ending June 30, 2022 after provision of income tax of Php90.4 million

Revenue for the 2nd quarter of 2022 of Php18.7 billion was primarily from sales of goods and services

for the quarter. Cost of sales of goods and services for the 2nd quarter of 2022 amounted to Php18.3 billion and gross profit for the 2nd quarter of 2022 amounted to Php339.7 million.

Other income and expense for the 2nd quarter of 2022 amounting to Php140.3 million consists primarily of operating expenses amounting to Php91.6 million, finance costs of Php60.2 million, share in net income from associates and joint venture of Php12 million, other charges of Php1.7 million and interest income of Php1.2 million. Income before income tax for the 2nd quarter of 2022 was at Php199.4 million and net income after provision for income tax of Php55.9 million was at Php143.5 million.

Total assets as of June 30, 2022 stood at around Php28.1 billion an increase of around Php8.7 billion from Php19.4 billion as of December 31, 2021. Current assets, composed mostly of cash and cash equivalents amounting to Php2.3 billion, receivables amounting to Php11.2 billion, inventories amounting to Php7.4 billion, non-current asset held for sale amounting to Php1.2 billion and other current assets Php981.8 million, increased by Php9 billion due to increases in cash and cash equivalents of Php524.3 million, receivables of Php2.3 billion, inventories of Php6.2 billion, and other current assets of Php45 million. Non-current assets with a December 31, 2022 balance of Php5.4 billion decreased by Php335.8 million to Php5.1 billion in June 30, 2022.

Total liabilities as of June 30, 2022 increased by Php8.5 billion from Php12.7 billion as of December 31, 2021 to Php21.1 billion as of June 30, 2022. Current liabilities, composed of trade and other payables amounting to Php18.8 billion and current portion of loans payable amounting to Php1.1 billion increased by Php9 billion primarily due to the increase in trade and other payables of Php9.3 billion which was partially offset by the decreases in the current portion of loans payable of Php243.3 million and income tax payable of Php5 million. Noncurrent liabilities amounting to Php1.3 billion decreased by Php551.8 million due to decreases in loans payable – net of current portion of Php497 million, lease liability – net of current portion of Php26.4 million, net retirement benefit liability of Php1.3 million and net deferred liability of Php27.1 million.

Total Stockholders' Equity as of June 30, 2022 stood at Php6.9 billion, with equity attributable to equity holders of the parent company at Php3.7 billion and equity attributable to non-controlling interest at Php3.2 billion, increased by around Php253.2 million from Php6.7 billion as of December 31, 2021.

The interim financial report is in compliance with generally accepted accounting principles. The same accounting policies and methods of computation were followed in the interim financial statements, as compared with the most recent audited financial statements, which are as of December 31, 2021.

The interim operations are not characterized by any seasonality or cyclicity. The nature and number of items affecting assets, liabilities, equity, net income and cash flows are explained in Attachment "A" on Financial Information for the period ending June 30, 2022.

There are no changes in estimates of amounts reported in prior interim periods of the current financial year or those reported in prior financial years.

There were no dividends paid (aggregate or per share) separately for ordinary shares and other shares.

Currently, the company has a single business and geographical segment and therefore, segment disclosures have not been included.

There are no material events subsequent to the end of the interim period that have not been reflected in the financial statements for the interim period.

There are no changes in the composition of the company during the interim period, including business

conditions, acquisition or disposal of subsidiaries and long-term investments, restructurings, and discontinuing of operations.

Since December 31, 2021, there are no other changes in contingent liabilities or assets and no new material contingencies, events or transactions that have occurred during the current interim period.

There are no trends, demands, commitments, events or uncertainties, known to management that will have a material impact on the company's liquidity.

There are no material commitments for capital expenditures and no seasonal aspects that have a material effect on the financial conditions or results of operations.

There are no known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on net sales/revenues/income from continuing operations.

There are no events that will trigger direct or contingent financial obligations that are material to the company, including any default or acceleration of an obligation.

There are no material off-balance sheet transactions, arrangements, obligations, (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period.

The causes for any material changes (5% of the relevant accounts or such lower amount, which the company deems material on the basis of other factors) from period to period which include vertical and horizontal analysis of any material item, have been presented in this report.

There were no sales of unregistered or exempt securities, nor were there any issuances of securities constituting an exempt transaction.

Finally, there are no other material information for disclosure during the current interim period, whether under this report or under SEC Form 17-C.

Item 1. Financial Statements

The audited consolidated statement of financial position as at December 31, 2021, and the unaudited interim consolidated financial statements as at June 30, 2022 and for the six months ended June 30, 2022 and 2021 and selected notes to the unaudited interim consolidated financial statements of Basic Energy Corporation (the Parent Company) and its subsidiaries (collectively referred to as the “Group”) are filed as part of this Form 17Q.

BASIC ENERGY CORPORATION AND SUBSIDIARIES
UNAUDITED INTERIM CONSOLIDATED STATEMENTS OF FINANCIAL POSITION

NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS AS AT AND FOR THE SIX MONTHS ENDED JUNE 30, 2022 (With Comparative Information for 2021)

1. General Information

Corporate Information

Basic Energy Corporation (the Parent Company or BEC) was incorporated under the laws of the Republic of the Philippines and registered in the Philippine Securities and Exchange Commission (SEC) on September 19, 1968. On April 10, 2018, the SEC approved the Parent Company's amendment of its articles of incorporation for the extension of its corporate life for another 50 years starting from September 19, 2018. However, as prescribed by the Revised Corporation Code of the Philippines, effective February 23, 2019, the Company shall have perpetual existence.

The Parent Company is a holding company with diversified business interests in various fields of renewable energy and alternative fuels, wholesale and distribution of petroleum products, and in oil and gas exploration and development.

On September 30, 2021, Map 2000 Development Corporation (M2DC or the Ultimate Parent Company) acquired 67% ownership of the Parent Company. M2DC is registered with the Philippine SEC and is engaged in the business of real estate acquisition, development, and management. Effectively, the Parent Company became a subsidiary of M2DC.

The Parent Company shares are listed in the Philippine Stock Exchange (PSE) under the trading symbol "BSC".

The registered business address of the Parent Company is UB 111 Paseo de Roxas Building, Paseo de Roxas, Legaspi Village, Makati City.

The Parent Company and its subsidiaries are collectively referred to herein as "the Group". The details of the subsidiaries are as follows:

	Nature of Business	Percentage of Ownership (%)			
		2022		2021	
		Direct	Indirect	Direct	Indirect
Basic Diversified Industrial Holdings, Inc. (BDIHI)	Holding Company	100.00	–	100.00	–

Peninsula Land Bay Realty Corp. (PLBRC)***	Management Services	–	18.00	–	–

*Indirect ownership through GGL

**Indirect ownership through FECI

***Indirect ownership through LDFHC

Status of Operations

On December 18, 2020, the Parent Company entered into a Memorandum of Agreement (MOA) with MAP 2000 Development Corporation (M2DC) for its subscription to 67% capital stock of the Parent Company for ₱2.8 billion. The capital stock subscription was completed on September 30, 2021.

The Parent Company used the proceeds from the issuance of capital stock to partially fund its acquisition of 60% ownership in Filoil Energy Company, Inc. (FECI) for ₱3.0 billion pursuant to the Subscription Agreement between the Parent Company and FECI on December 7, 2021. FECI is engaged in downstream petroleum business through its joint venture arrangement with an international petroleum company. The business operations of FECI includes supply and logistics, marketing and retail, and management of fuel depots and terminals with allied logistical services for petroleum products.

The acquisition significantly improved the Group's consolidated financial position and results of operations. The new board of directors and management continuously streamline the business operations of the Group to improve its business activities and create efficiency in its operations. This includes plan to sell some of its stock investments to generate funds to finance future projects on alternative and renewable energy sources.

2. Summary of Significant Accounting Policies

Basis of Preparation

The unaudited interim consolidated financial statements of the Group as at and for the six months ended June 30, 2022 have been prepared in accordance with the Philippine Accounting Standards (PAS) 34, *Interim Financial Reporting* and in compliance with Philippine Financial Reporting Standards (PFRS) issued by the Philippine Financial Reporting Standards Council and adopted by the SEC. This financial reporting framework includes PFRS, PAS and Philippine interpretations from International Financial Reporting Interpretations Committee (IFRIC) and SEC provisions.

Measurement Bases

The unaudited interim consolidated financial statements are presented in Philippine Peso, the Parent Company's functional currency. The Parent Company and its subsidiaries determine their own functional currencies, which best reflect the economic substance of the underlying transactions, events and conditions relevant to each Company. All values are stated in absolute amounts, unless otherwise indicated.

At each reporting date, the assets and liabilities of GGL and PT BES are translated from their functional currencies (US Dollar and Indonesian Rupiah, respectively) to the Parent Company's functional and presentation currency (Philippine Peso) using the closing rate at each reporting date, while its comprehensive income is translated using weighted average exchange rates during the year.

The exchange differences arising on translation of a foreign operation are recognized in other comprehensive income (OCI).

The unaudited interim consolidated financial statements of the Group have been prepared on the historical cost basis, except for the following:

	<u>Measurement Bases</u>
Financial assets at fair value through other comprehensive income (FVOCI)	Fair Value
Investment properties	Fair Value
Derivative financial instruments	Fair Value

Historical cost is generally based on the fair value of the consideration given in exchange for an asset and fair value of the consideration received in exchange for incurring a liability.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability; or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a nonfinancial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses market observable data to the extent possible when measuring the fair value of an asset or a liability. Fair values are categorized into different levels in a fair value hierarchy based on inputs used in the following valuation techniques:

- Level 1 - Quoted (unadjusted) market prices in active market for identical assets or liabilities;
- Level 2 - Valuation techniques for which the lowest level of input that is significant to the fair value measurement is directly or indirectly observable; or
- Level 3 - Valuation techniques for which the lowest level of input that is significant to the fair value measurement is unobservable.

If the inputs used to measure the fair value of an asset or a liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Adoption of Amended PFRS

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following amended PFRS:

Effective January 1, 2022:

- Amendments to PFRS 3, *Reference to Conceptual Framework* – The amendments replace the reference of PFRS 3 from the 1989 Framework to the current 2018 Conceptual Framework. The amendments included an exception that specifies that, for some types of liabilities and contingent liabilities, an entity applying PFRS 3 should refer to PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, or IFRIC 21, *Levies*, instead of the Conceptual Framework. The requirement would ensure that the liabilities recognized in a business combination would remain the same as those recognized applying the current requirements in PFRS 3. The amendment also added an explicit statement that contingent assets acquired in a business combination should not be recognized by an acquirer. The amendments should be applied prospectively.
- Amendments to PAS 16, *Property, Plant and Equipment - Proceeds Before Intended Use* – The amendments prohibit deducting from the cost of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for its intended use. Instead, the proceeds and related costs from such items shall be recognized in profit or loss. The amendments must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when an entity first applies the amendment.
- Amendments to PAS 37, *Onerous Contracts – Cost of Fulfilling a Contract* – The amendments clarify that for the purpose of assessing whether a contract is onerous, the cost of fulfilling a contract comprises both the incremental costs of fulfilling that contract and an allocation of costs directly related to contract activities. The amendments apply to contracts existing at the date when the amendments are first applied. At the date of initial application, the cumulative effect of applying the amendments is recognized as an opening balance adjustment to retained earnings or other component of equity, as applicable. Accordingly, the comparatives are not restated. Earlier application is permitted.
- Annual Improvements to PFRS 2018 to 2020 Cycle:
 - Amendments to PFRS 9, *Financial Instruments - Fees in the '10 per cent' Test for Derecognition of Financial Liabilities* – The amendments clarify which fees an entity includes when it applies the '10 per cent' test in assessing whether to derecognize a financial liability (i.e. whether the terms of a new or modified financial liability is substantially different from the terms of the original financial liability). These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or the lender on the other's behalf. The amendments apply to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendments. Earlier application is permitted.

- Amendments to PFRS 16, *Leases - Lease Incentives* – The amendments remove from the Illustrative Example 13 the illustration of the reimbursement of leasehold improvements by the lessor. The objective of the amendment is to avoid any potential confusion regarding the treatment of lease incentives because of how the requirements for lease incentives are illustrated.

Amended PFRS Issued But Not Yet Effective

Relevant amended PFRS, which are not yet effective as at June 30, 2022 and have not been applied in preparing the unaudited interim consolidated financial statements, are summarized below:

Effective January 1, 2023:

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current* – The amendments clarify the requirements for an entity to have the right to defer settlement of the liability for at least 12 months after the reporting period. The amendments also specify and clarify the following: (i) an entity's right to defer settlement must exist at the end of the reporting period, (ii) the classification is unaffected by management's intentions or expectations about whether the entity will exercise its right to defer settlement, (iii) how lending conditions affect classification, and (iv) requirements for classifying liabilities where an entity will or may settle by issuing its own equity instruments. The amendments must be applied retrospectively. Earlier application is permitted.
- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure Initiative – Accounting Policies* – The amendments require an entity to disclose its material accounting policies, instead of its significant accounting policies and provide guidance on how an entity applies the concept of materiality in making decisions about accounting policy disclosures. In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and its nature. The amendments clarify (1) that accounting policy information may be material because of its nature, even if the related amounts are immaterial, (2) that accounting policy information is material if users of an entity's financial statements would need it to understand other material information in the financial statements, and (3) if an entity discloses immaterial accounting policy information, such information should not obscure material accounting policy information. In addition, PFRS Practice Statement 2, *Making Materiality Judgements*, is amended by adding guidance and examples to explain and demonstrate the application of the 'four-step materiality process' to accounting policy information. The amendments should be applied prospectively. Earlier application is permitted.
- Amendments to PAS 8, *Definition of Accounting Estimates* – The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies, and the correction of errors. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". An entity develops an accounting estimate if an accounting policy require an item in the financial statements to be measured in a way that involves measurement uncertainty. The amendments clarify that a change in accounting estimate that results from new information or new developments is not a correction of an error, and that the effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors. A change in an accounting estimate may affect only the profit or loss in the current period, or the profit or loss of both the current and future periods. Earlier application is permitted.

- Amendments to PAS 12, *Deferred Tax Related Assets and Liabilities from a Single Transaction* – The amendments require companies to recognize deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. Earlier application is permitted.

Deferred effectivity -

- Amendment to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Investments in Associates and Joint Ventures - Sale or Contribution of Assets Between an Investor and its Associate or Joint Venture* – The amendments address a current conflict between the two standards and clarify that a gain or loss should be recognized fully when the transaction involves a business, and partially if it involves assets that do not constitute a business. The effective date of the amendments, initially set for annual periods beginning on or after January 1, 2016, was deferred indefinitely in December 2015 but earlier application is still permitted.

Under prevailing circumstances, the adoption of the foregoing amended PFRS is not expected to have any material effect on the unaudited interim consolidated financial statements of the Group. Additional disclosures will be included in the notes to the unaudited interim consolidated financial statements, as applicable.

Basis of Consolidation

The unaudited interim consolidated financial statements comprise the unaudited interim financial statements of the Parent Company and its subsidiaries.

Subsidiaries are entities controlled by the Parent Company. Control is achieved when the Parent Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Parent Company controls an investee if and only if the Parent Company has:

- power over investee;
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee affect its returns.

Subsidiaries are consolidated from the date of acquisition or incorporation, being the date on which the Parent Company obtains control, and continue to be consolidated until the date such control ceases.

The unaudited interim financial statements of the subsidiaries are prepared using the same reporting period of the Parent Company. Unaudited interim consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. Intercompany balances and transactions, including intercompany profits and unrealized profits and losses, are eliminated in full.

A change in ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction. Upon the loss of control, the Group derecognizes the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising from the loss of control is recognized in profit or loss. If the Group retains interest in the previous subsidiary, then such interest is measured at fair value at the date control is lost. Subsequently, it is accounted for as an equity-accounted investee or as financial assets at FVOCI depending on the level of influence retained.

Non-controlling Interests

Non-controlling interests represent the portion of profit or loss and net assets not held by the Parent Company and are presented separately in the Group's unaudited interim consolidated statements of comprehensive income and within equity in the Group's unaudited interim consolidated statements of financial position, separate from equity attributable to equity holders of the Parent Company, respectively.

NCI represents the following as at June 30, 2022 and December 31, 2021:

	Type of Interest	% of Interest	
		2021	2020
FECI	Direct	40.00	–
SRI	Direct	27.42	27.42
PT BES	Indirect	5.00	5.00
LDFHC	Indirect	64.00	–
FTMRC	Indirect	64.00	–
M2TI	Indirect	64.00	–
PLBRC	Indirect	70.00	–
FLC	Indirect	69.40	–

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interest in the acquiree either at fair value or at the proportionate share of the fair value of the acquiree's identifiable net assets. Transaction costs are expensed as incurred and included in general and administrative expenses.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organized workforce with the necessary skills, knowledge or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

When the Group acquires a business, it assesses the financial assets and financial liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree, if any.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date at fair value and any resulting gain or loss is recognized in the unaudited interim consolidated statements of comprehensive income.

Any contingent consideration to be transferred by the Group will be recognized at fair value at the acquisition date. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PFRS 9, Financial Instruments, is measured at fair value with changes in fair value recognized in the unaudited interim consolidated statements of comprehensive income in accordance with PFRS 9. Other contingent consideration that is not within the scope of PFRS 9 is measured at fair value at each financial reporting date with changes in fair value recognized in the unaudited interim consolidated statements of comprehensive income.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred, the amount recognized for non-controlling interest and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts recognized at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in the unaudited interim consolidated statements of comprehensive income.

If the initial measurement of the fair value of net identifiable assets acquired in a business combination is incomplete by the end of the reporting period in which the business combination occurs, the Group recognizes in its unaudited interim consolidated financial statements provisional amounts for the items for which the measurement is incomplete. During the measurement period, the Group retrospectively adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognized as of that date. During the measurement period, the Group recognizes additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date and, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends as soon as the Group receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable. However, the measurement period shall not exceed one year from the acquisition date.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating unit (CGU) or group of CGUs that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a CGU and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the disposed operation and the portion of the CGU retained.

Where goodwill has been allocated to a CGU and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in this circumstance is measured based on the relative values of the disposed operation and the portion of the CGU retained.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity or a financial liability or equity instrument of another entity.

Date of Recognition. The Group recognizes a financial asset or a financial liability in the unaudited interim consolidated statements of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

“Day 1” Difference. Where the transaction in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a “Day 1” difference) in profit or loss. In cases where there is no observable data at inception date, the Group deems the transaction price as the best estimate of fair value and recognizes “Day 1” difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the “Day 1” difference.

Financial Assets

Initial Recognition and Measurement. Financial assets are recognized initially at fair value, which is the fair value of the consideration given. The initial measurement of financial assets, except for those designated at FVPL, includes transaction cost.

Classification. The Group classifies its financial assets at initial recognition under the following categories: (a) financial assets at amortized cost, (b) financial assets at FVOCI, and (c) financial assets at FVPL. The classification of a financial asset at initial recognition largely depends on the Group’s business model for managing the asset and its contractual cash flow characteristics.

Financial Assets and Liabilities

Date of Recognition. The Group recognizes a financial asset or a financial liability in the unaudited interim statements of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using trade date accounting.

Initial Recognition and Measurement. Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments, except for those designated at fair value through profit or loss (FVPL), includes transaction cost.

“Day 1” Difference. Where the transaction in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a “Day 1” difference) in profit or loss.

In cases where there are no observable data on inception, the Company deems the transaction price as the best estimate of fair value and recognizes “Day 1” difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the “Day 1” difference.

Classification. The Company classifies its financial assets at initial recognition under the following categories: (a) financial assets at fair value through profit or loss, (b) financial assets at amortized cost and (c) financial assets at fair value through other comprehensive income (FVOCI). Financial liabilities, on the other hand, are classified as either financial liabilities at FVPL or financial liabilities at amortized cost. The classification of a financial instrument largely depends on the Company’s business model and its contractual cash flow characteristics.

Financial Assets at FVPL. Financial assets at FVPL are either classified as held for trading or designated at FVPL. A financial instrument is classified as held for trading if it meets either of the following conditions:

- it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- on initial recognition, it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

This category includes equity instruments which the Group had not irrevocably elected to classify at FVOCI at initial recognition. This category includes debt instruments whose cash flows are not “solely for payment of principal and interest” assessed at initial recognition of the assets, or which are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell.

The Group may, at initial recognition, designate a financial asset meeting the criteria to be classified at amortized cost or at FVOCI, as a financial asset at FVPL, if doing so eliminates or significantly reduces accounting mismatch that would arise from measuring these assets.

After initial recognition, financial assets at FVPL are subsequently measured at fair value. Unrealized gains or losses arising from the fair valuation of financial assets at FVPL are recognized in profit or loss.

As at June 30, 2022 and December 31, 2021, the Group classified its derivative financial instrument under this category (see Note 9).

Financial Assets at Amortized Cost. Financial assets shall be measured at amortized cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method, less allowance for impairment, if any. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the financial assets are derecognized and through amortization process. Financial assets at amortized cost are included under current assets if realizability or collectability is within 12 months after the reporting period. Otherwise, these are classified as noncurrent assets.

As at June 30, 2022 and December 31, 2021, the Group’s cash and cash equivalents, trade and other receivables, refundable deposits, and long-term placements (included under “Other noncurrent assets” account) are included in this category (see Notes 5 and 6).

Cash and cash equivalents include cash in banks and short-term placements. Short-term placements are highly liquid investments with original maturities of three (3) months or less that are readily convertible to known amounts of cash, which are subject to an insignificant risk of changes in value.

Financial Assets at FVOCI – Debt Instruments. For debt instruments that meet the contractual cash flow characteristic and are not designated at FVPL under the fair value option, the financial assets are measured at FVOCI if both of the following conditions are met:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, interest income (calculated using the effective interest rate method) and impairment gains or losses of debt instruments measured at FVOCI are recognized directly in profit or loss. When the financial asset is derecognized, the cumulative gains or losses previously recognized in OCI are reclassified from equity to profit or loss as a reclassification adjustment.

As at June 30, 2022 and December 31, 2021, the Group's investments in quoted debt securities are classified under this category (see Note 9).

Financial Assets at FVOCI – Equity Instruments. For equity instruments that are not held for trading, the Group may irrevocably designate, at initial recognition, a financial asset to be measured at FVOCI when it meets the definition of equity instrument under PAS 32, *Financial Instruments: Presentation*. This option is available and made on an instrument by instrument basis.

Dividends from equity instruments held at FVOCI are recognized in profit or loss when the right to receive payment is established, unless the dividend clearly represents a recovery of part of the cost of the investment.

All other gains or losses from equity instruments are recognized in OCI and are presented in the equity section of the consolidated statement of financial position and are not reclassified to profit or loss in subsequent periods, but instead, these are transferred directly to retained earnings.

As at June 30, 2022 and December 31, 2021, the Group has quoted investments in equity securities which were irrevocably designated as financial assets at FVOCI (see Note 9).

Derivative Financial Instruments

The Group uses derivative financial instruments such as foreign exchange forward contracts to manage its exposure to foreign currency risks. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gain or loss arising from changes in fair value of derivatives that do not qualify for hedge accounting is recognized in profit or loss.

Reclassification

The Group reclassifies its financial assets when, and only when, it changes its business model for managing those financial assets. The reclassification is applied prospectively from the first day of the first reporting period following the change in the business model (reclassification date).

For a financial asset reclassified out of the financial assets at FVPL category to financial assets at amortized cost, its fair value at the reclassification date becomes its new gross carrying amount.

For a financial asset reclassified out of the financial assets at FVPL category to financial assets at FVOCI, its fair value at the reclassification date becomes its new gross carrying amount. Meanwhile, for a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVPL, any gain or loss arising from the difference between the previous amortized cost of the financial asset and fair value is recognized in profit or loss.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVOCI, any gain or loss arising from a difference between the previous amortized cost of the financial asset and fair value is recognized in other comprehensive income.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at amortized cost, any gain or loss previously recognized in OCI, and any difference between the new amortized cost and maturity amount, are amortized to profit or loss over the remaining life of the investment using the effective interest method. If the financial asset is subsequently impaired, any gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

In the case of a financial asset that does not have a fixed maturity, the gain or loss shall be recognized in profit or loss when the financial asset is sold or disposed. If the financial asset is subsequently impaired, any previous gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

For equity instruments which were irrevocably designated at initial recognition as financial assets at FVOCI, no reclassification in another category is allowed.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

Impairment of Debt Instruments at FVOCI and Financial Assets at Amortized Cost. The Group recognizes an allowance for expected credit losses (ECL) for all debt instruments not held at FVPL. ECL is based on the difference between the cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation to the asset's original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For financial assets instruments measured at amortized cost and FVOCI, the ECL is based on the 12-month ECL, which pertains to the portion of lifetime ECL that result from default events on a financial instrument that are possible within 12 months after the reporting date. However, when there has been a significant increase in credit risk since initial recognition, the allowance will be based on the lifetime ECL. When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. The Group also considers reasonable and supportable information that is available without undue cost or effort and is indicative of significant increases in credit risk since initial recognition.

The Group considers a financial asset in default when contractual payments are 30 days past due unless it is demonstrated that the non-payment was an administrative oversight rather than resulting from financial difficulty of the counterparty. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows in its entirety or a portion thereof. This is generally the case when the Group determines that the borrower does not have assets or source of income that could generate sufficient cash flows to repay the amount of financial asset for write-off. This assessment is carried out at the individual financial asset level.

Derecognition. A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- The right to receive cash flows from the asset has expired;
- The Group retains the right to receive cash flows from the financial asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- The Group has transferred its right to receive cash flows from the financial asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from a financial asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Group’s continuing involvement in the financial asset. Continuing involvement that takes the form of a guarantee over the transferred financial asset is measured at the lower of the original carrying amount of the financial asset and the maximum amount of consideration that the Group could be required to repay.

Financial Liabilities

Initial Recognition and Measurement. Financial liabilities are recognized initially at fair value, which is the fair value of the consideration received. In case of financial liabilities at amortized cost, the initial measurement is net of any directly attributable transaction costs.

Classification. The Group classifies its financial liabilities at initial recognition as either financial liabilities at FVPL or financial liabilities at amortized cost.

As at June 30, 2022 and December 31, 2021, the Group does not have financial liabilities at FVPL.

Financial Liabilities at Amortized Cost. Financial liabilities are categorized as financial liabilities at amortized cost when the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue, and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the liabilities are derecognized or through the amortization process. Financial liabilities at amortized cost are included under current liabilities if payment is due within 12 months after the reporting period. Otherwise, these are classified as noncurrent liabilities.

As at June 30, 2022 and December 31, 2021, the Group's trade and other payables (excluding statutory payables), loans payable and lease liabilities are classified under this category (see Notes 13 and 14).

Derecognition. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the unaudited interim consolidated statements of comprehensive income.

Offsetting of Financial Assets and Liabilities

Financial assets and financial liabilities are offset and the net amount reported in the unaudited interim consolidated statements of financial position only if there is a currently enforceable legal right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated statement of financial position.

Classification of Financial Instrument between Liability and Equity

A financial instrument is classified as a liability if it provides for a contractual obligation to:

- Deliver cash or another financial asset to another entity;
- Exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- Satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Classification of Assets and Liabilities between Current and Noncurrent

The Group presents current and noncurrent assets, and current and noncurrent liabilities, as separate classifications in the notes to consolidated financial statements.

Current Assets. The Group classifies an asset as current when:

- It expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- It holds the asset primarily for the purpose of trading;
- It expects to realize the asset within 12 months after the reporting period; or
- The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Otherwise, the Group will classify all other assets as noncurrent.

Current Liabilities. The Group classifies a liability as current when:

- It expects to settle the liability in its normal operating cycle;
- It holds the liability primarily for the purpose of trading;
- The liability is due to be settled within 12 months after the reporting period; or
- It does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Otherwise, the Group will classify all other liabilities as noncurrent.

Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost includes all costs of purchase and other costs incurred in bringing the inventories to their present location and condition, and it is calculated using the moving average method.

The NRV of inventories is the estimated selling price in the ordinary course of business, less the estimated cost necessary to make the sale. In determining the NRV, the Group considers any adjustment necessary for obsolescence.

When the NRV of the inventories is lower than their cost, the inventories are written-down to its NRV and the difference between the cost and NRV of the inventories is charged in profit or loss.

Noncurrent Asset Held for Sale

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Noncurrent assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable, and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale expected to be completed within one (1) year from the date of classification.

If the one-year period is not complied, the Group can still classify its noncurrent asset as held for sale when:

- There are non-buyer conditions which extend the period required to complete the sale and the conditions can only be complied after a firm purchase commitment is obtained. The firm purchase commitment should be highly probable within one year
- There are buyer or non-buyer conditions that will extend the period required to complete the sale after the Group obtains a firm purchase agreement, and the Group already responded to the conditions expecting favorable resolution.
- During the one-year period, the noncurrent asset held for sale was not sold due to the occurrence of unlikely circumstances and the Group responded to the change in circumstances within the same period. Also, the noncurrent asset should be actively marketed at a reasonable price given the change in circumstances.

The Group recognizes an impairment loss for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell, to the extent that it has not been recognized in the carrying amount of the noncurrent asset before initial classification as held for sale. The Group recognizes a gain for any subsequent increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been recognized.

Assets and liabilities classified as held for sale are presented separately as current items in the unaudited interim consolidated statements of financial position.

Investment Properties

Investment properties pertain to land, buildings and improvements, and depot tanks held either to earn rental income or for capital appreciation or both, but not for sale in the ordinary course of business or for administrative purposes.

Investment properties are initially measured at cost which pertains to the purchase price and any directly attributable costs related to the acquisition. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are recognized in profit or loss in the period in which they arise. Fair values are determined using market data approach by an accredited external independent real estate appraiser.

An investment property is derecognized either when the asset has been disposed of or when the investment property has been permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal. In determining the amount of consideration from the derecognition of investment property the Group considers the effects of variable consideration, existence of a significant financing component, non-cash consideration, and consideration payable to the buyer, if any.

Transfers are made to or from investment property only when there is a change in use, evidenced by the ending of owner-occupation, commencement of an operating lease to another party or ending of the construction or development. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property and equipment up to the date of change in use.

Deferred Exploration and Evaluation Costs

Deferred exploration and evaluation costs arising from the Group's exploration and evaluation activities are carried at cost less any accumulated impairment losses, if any.

Exploration and evaluation activities involve the search for oil, gas or other natural resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource. These include the following:

- Acquisitions of rights to explore;
- Gathering exploration data through geophysical studies;
- Determining and examining the volume and grade of the resource;
- Surveying transportation and infrastructure requirements; and
- Evaluating the technical feasibility and commercial viability of extracting the resource.

Exploration and evaluation expenditures are recognized as assets when the future economic benefit is more likely than not to be realized. These costs include directly attributable employee remuneration, materials and fuels used, surveying costs, drilling costs and payments made to contractors. The Group capitalizes any further costs incurred for exploration and evaluation activities up to the point when a commercial reserve is established.

Deferred exploration and evaluation costs are assessed for impairment before these are reclassified to "Property and equipment" account in the unaudited interim consolidated statements of financial position when the technical feasibility and commercial viability of extracting the resources are demonstrable. Any impairment loss is recognized in profit or loss. If the exploration area is found to contain no commercial reserves, the deferred exploration and evaluation costs are charged to profit or loss.

Property and Equipment

The following property and equipment are stated at cost less accumulated depreciation, amortization and any accumulated impairment losses:

- Depot Tanks
- Building and improvements
- Furniture, fixtures, and office equipment
- Machinery and equipment
- Transportation equipment

The initial cost of property and equipment consists of its purchase price after deducting trade discounts and rebates, import duties, nonrefundable purchase taxes, and any other costs directly attributable in bringing the asset to its working condition and location for its intended use. The cost of self-constructed assets includes the cost of materials, direct labor, any other costs directly attributable in bringing the assets to the working condition for their intended use, and costs of dismantling and removing the items and restoring the site on which they are located.

Expenditures incurred after the property and equipment have been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized in profit or loss in the year the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment. The cost of replacing a component of an item of property and equipment is recognized if it is probable that the future economic benefits embodied within the component will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced component is derecognized.

When parts of an item of property and equipment have different useful lives, these are accounted for as separate items (major components) of property and equipment.

Depreciation and amortization of property and equipment begin when it is in the location and condition necessary for it to be capable of operating in the manner intended by the management. Depreciation and amortization are calculated on a straight-line basis over the following estimated useful lives of the property and equipment:

	Number of Years
Depot tanks	15
Building and building improvements	15
Machinery and equipment	10
Transportation equipment	5
Furniture, fixtures and office equipment	3

The estimated useful lives, depreciation and amortization method are reviewed at each reporting date to ensure that these are consistent with the expected pattern of economic benefits from items of property and equipment.

Fully depreciated assets are retained in the accounts until they are no longer in use.

When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation, amortization and any impairment in value are removed from the accounts. Any resulting gain or loss is recognized in profit or loss.

Construction in progress represents properties under construction and is stated at cost, including costs of construction and other direct costs. Construction in progress is not depreciated until such time that the relevant assets are completed and ready for operational use.

Other Nonfinancial Assets

Other nonfinancial assets pertain to excess tax credits, prepayments, input value-added tax (VAT), and deferred input VAT.

Excess Tax Credits. Excess tax credits pertain to the Group's excess income tax payments. These include taxes withheld and remitted to the Bureau of Internal Revenue (BIR) by customers which can be applied to the Group's income tax payable in the same year the related income was recognized. Excess tax credits are carried forward and can be utilized in succeeding years.

Prepayments. Prepayments are expenses paid in advance and recorded as assets before these are utilized. Prepayments are apportioned over the period covered by the payment and included in profit or loss when incurred. Prepayments that are expected to be utilized within 12 months after the reporting date are classified as current assets. Otherwise, these are classified as noncurrent assets.

VAT. VAT is a tax on consumption levied on the sale, barter, exchange, or lease of goods or properties and services, and on importation of goods in the Philippines. It is an indirect tax, which may be shifted or passed on to the buyer, transferee or lessee of goods, properties or services.

Revenue, expenses, and assets are recognized net of the amount of VAT, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- Receivables and payables that include the amount of VAT.

Deferred Input VAT. In accordance with Revenue Regulations (RR) No. 16-2005, input VAT on purchases or imports of capital goods (depreciable assets for income tax purposes) with an aggregate acquisition cost (exclusive of VAT) in each of the calendar month exceeding ₱1.0 million is claimed as credit against output VAT over 60 months or the estimated useful lives of capital goods, whichever is shorter.

Deferred input VAT represents the unamortized amount of input VAT on capital goods and input VAT on the unpaid portion of availed services, including the use or lease of properties.

Where the aggregate acquisition cost (exclusive of VAT) of the existing or finished depreciable capital goods purchased or imported during any calendar month does not exceed ₱1.0 million, the total input VAT will be allowable as credit against output VAT in the month of acquisition.

Deferred input VAT that are expected to be claimed against output VAT within 12 months after the reporting date are classified as current assets. Otherwise, these are classified as noncurrent assets.

Impairment of Nonfinancial Assets

The carrying amounts of nonfinancial assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amounts may not be recoverable. If such indication exists and when the carrying amounts exceed the estimated recoverable amounts, the assets or cash-generating units (CGU) are written down to their recoverable amounts. The recoverable amount of the asset is the greater of the fair value less cost of disposal or value in use. The fair value less cost of disposal is the amount obtainable from the sale of an asset in an arm's-length transaction less cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessment of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the CGU to which the asset belongs. Impairment losses are recognized in profit or loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In such instance, the carrying amount of the asset is increased to its recoverable amount. However, that increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment loss had been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such reversal, the depreciation and amortization charges are adjusted prospectively to allocate the asset's revised carrying amount on a systematic basis over its remaining useful life.

Equity

Capital Stock. Common stock is measured at par value for all shares issued and subscribed. Unpaid subscriptions are recognized as reduction to subscribed capital stock.

Additional Paid-in Capital (APIC). APIC represents the proceeds and/or fair value of consideration received in excess of the par value of the shares issued. Incremental costs directly attributable to the issuance of new common stock are recognized as a deduction from APIC, net of any tax effects.

Deficit. Deficit represents the cumulative balance of the Group's profit or loss.

Other Equity Reserves. Other equity reserves consist of cumulative balances of items of income and expense that are not recognized in profit or loss in accordance with PFRS. Other equity reserves of the Group pertain to equity reserve on acquisition of NCI, cumulative gain (loss) on translation of Investments in Associates, cumulative unrealized gain changes in fair value of financial assets at FVOCI, cumulative translation loss on consolidation of a foreign operations, and cumulative remeasurement gain (loss) on net retirement benefit liability.

Treasury Stock. Treasury stock represents the Parent Company's shares held by its subsidiary, which are carried at cost and deducted from equity until the shares are cancelled or sold.

When the shares are subsequently sold, the difference between the cost and consideration received, net of any directly attributable transaction costs, is included in equity attributable to the equity holders of the Parent Company.

Revenue Recognition

Revenue from contract with customers is recognized when the performance obligation in the contract has been satisfied, either at a point in time or over time. Revenue is recognized over time if one of the following criteria is met: (a) the customer simultaneously receives and consumes the benefits as the Group performs its obligations; (b) the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date. Otherwise, revenue is recognized at a point in time.

The Group also assesses its revenue arrangements to determine if it is acting as a principal or as an agent. The Group has assessed that it acts as a principal in its revenue arrangements.

The following specific recognition criteria must also be met before revenue is recognized.

Sale of Fuel. Sales revenue is recognized at the point in time when control of the asset is transferred to the customer upon delivery. The normal credit term is 15 to 120 days.

Service Income. Service income including hauling fees and port service income is recognized over the period that the related service is provided.

Income from Penalty on Delayed Payment of Receivables. Income from penalty on delayed payment of receivables are recognized when payments are received from customers.

Other Income. Income from other sources is recognized as revenue when earned.

The following are the specific recognition criteria for other revenues outside the scope of PFRS 15:

Rental Income. Revenue on rental under non-cancellable and cancellable leases are recognized on a straight-line basis over the lease term.

Interest Income. Interest income is recognized as the interest accrues taking into account the effective yield on the asset, net of final tax.

Dividend Income. Dividend income is recognized when the Group's right to receive payment is established.

Expense Recognition

Expenses are recognized in profit or loss when a decrease in future economic benefit related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.

Cost of Sales. Cost of sales includes the purchase price of the products sold as well as costs that are directly attributable in bringing the inventory to its intended condition and location. Costs of sales is recognized when the related goods are delivered to the customers.

Cost of Services. Cost of services are recognized as expense when the related services are rendered.

General and Administrative Expenses. General and administrative expenses constitute costs of administering the business. These are expensed when incurred.

Interest Expense. Interest expense is recognized in profit or loss using the effective interest method.

Employee Benefits

Short-term Benefits. The Group recognizes short-term employee benefits based on contractual arrangements with employees. The unpaid portion of the short-term employee benefits is measured on an undiscounted basis and is included as part of "Trade and other payables" account in the unaudited interim consolidated statements of financial position.

Retirement Benefit. Retirement benefit costs are actuarially determined using the projected unit credit method. This method reflects services rendered by employees up to the date of valuation and incorporates assumptions concerning employees' projected salaries. The calculation of net retirement benefits (costs) is performed annually by a qualified actuary. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in the future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

The net retirement benefit liability recognized by the Group is the aggregate of the present value of the defined benefit obligation reduced by the fair value of plan assets out of which the obligations are to be settled directly. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using risk-free interest rates of government bonds that have terms to maturity approximating the terms of the related net retirement benefit liability.

Plan assets are assets that are held in trust and managed by a trustee bank. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. The fair value of the plan assets is based on the market price information. When no market price is available, the fair value of plan assets is estimated by discounting the estimated future cash flows using discount rates that reflect both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the retirement benefit liability, the measurement of the resulting net retirement benefit is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group recognizes retirement benefit costs, comprising of current service cost and net interest income or expense in profit or loss. The Group determines the net interest cost by applying the discount rate to the defined benefit liability at the beginning of the reporting period, taking into account any changes in the defined benefit liability during the period as a result of benefit payments.

Remeasurements of the net retirement benefit liability, which consist of actuarial gains and losses and the return on plan assets (excluding interest), and the effect of asset ceiling (if any, excluding interest) are recognized immediately in OCI and are not reclassified to profit or loss in subsequent periods.

Foreign Currency-Denominated Transactions

Transactions denominated in foreign currencies are recorded using the exchange rate at the date of the transaction. Outstanding monetary assets and liabilities denominated in foreign currencies are translated using the closing exchange rate at the reporting date. Differences arising on settlement or translation of monetary assets and liabilities are recognized in profit or loss.

Translation of a Foreign Operation. A foreign operation is a subsidiary, associate, joint arrangement or branch whose activities are based or conducted in a country or currency other than those of the reporting entity.

At each reporting date, the assets and liabilities of the foreign operation are translated from its functional currency to the Parent Company's functional and presentation currency using the closing rate at each reporting date, while its comprehensive income is translated using weighted average exchange rates during the year.

The exchange differences arising on translation of a foreign operation are recognized in OCI. Upon disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to profit or loss.

Income Taxes

Current Tax. Current tax assets and liabilities are measured at the amounts expected to be recovered from or paid to the taxation authorities. The tax rate and tax laws used in the computation are those that have been enacted or substantively enacted at the reporting date.

Deferred Tax. Deferred tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from the excess of minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carryforward benefits of unused tax credits and unused tax losses can be utilized. Deferred tax, however, is not recognized when it arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognized in profit or loss except to the extent that it relates to a business combination, or items directly recognized to equity or in OCI.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to offset current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Related Party Transactions

Related party transactions are transfers of resources, services or obligations between the Group and its related parties.

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control. Related parties may be individual or corporate entities. Transactions between related parties are accounted for at arm's-length prices or on terms similar to those offered to nonrelated parties in an economically comparable market.

Segment Reporting

The Group reports separate information about its operating segment.

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same Group) and whose operating results are regularly reviewed to make decisions about resources to be allocated to the segment and assess its performance; and for which discrete information is available.

Provisions and Contingencies

Provisions. Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain.

The expense relating to any provision is presented in profit or loss net of any reimbursement. If the effect of the time value of money is material, the estimated cash flows are discounted using a current pre-tax rate that reflects the current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Contingencies. Contingent liabilities are not recognized in the unaudited interim consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the unaudited interim consolidated financial statements but are disclosed in the notes to the unaudited interim consolidated financial statements when an inflow of economic benefits is probable.

Basic and Diluted Income (Loss) per Share

Basic Income (Loss) per Share. Basic income (loss) per share is calculated by dividing the net income (loss) for the period attributable to equity holders of the Parent Company by the weighted average number of issued and outstanding shares and subscribed shares, with retroactive adjustment for any stock dividends, stock splits or reverse stock splits during the year.

Diluted Income (Loss) per Share. Diluted income (loss) per share is calculated in the same manner as basic income (loss) per share, adjusted for the effects of any potentially dilutive, convertible securities.

Events After the Reporting Date

Post year-end events that provide additional information about the Group's financial position at reporting date (adjusting events) are reflected in the unaudited interim consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the unaudited interim consolidated financial statements when material.

3. Significant Judgments, Accounting Estimates and Assumptions

The preparation of the unaudited interim consolidated financial statements requires management to exercise judgments and make accounting estimates and assumptions that affect the amounts reported in the unaudited interim consolidated financial statements and related notes. The judgments, accounting estimates and assumptions used in the unaudited interim consolidated financial statements are based upon management's evaluation of relevant facts and circumstances at the reporting date.

While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the estimated amounts. Actual results could differ from such estimates.

The accounting estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions in accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

The following are the significant judgments, accounting estimates and assumptions made by the Group:

Judgments

Determination of Functional and Presentation Currency. The Group's unaudited interim consolidated financial statements are presented in Philippine Peso, the Parent Company's functional currency, which mainly influences labor, material and other costs of providing goods or services. The Parent Company and its subsidiaries determine their own functional currencies, which best reflect the economic substance of the underlying transactions, events and conditions relevant to each entity.

Based on the economic substance of the underlying circumstances, the functional currency of the Group's subsidiaries, except GGL and PT BES, is the Philippine Peso. The functional currency and presentation currency of GGL and PT BES are US Dollar and Indonesian Rupiah, respectively.

Classification and Measurement of Financial Assets. Classification and measurement of financial assets depend on the results of the contractual cash flow and the business model tests. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment reflecting all relevant evidence including how the performance of the assets is evaluated, the risks that affect the performance of the assets, and how these risks are managed.

At initial recognition, the Group designated its investments in equity and debt securities as financial assets at FVOCI (see Note 9).

Cash and cash equivalents, trade and other receivables, refundable deposit and long-term placements (included under "Other noncurrent asset" account) were classified as financial assets at amortized cost since the Group's primary business model in relation to these assets is to hold the financial assets to collect contractual cash flows solely for principal and interest (see Notes 5 and 6).

Fair Value Measurement of Financial Instruments. The fair values of securities that are actively traded in organized financial markets are determined by reference to unadjusted quoted market prices at the close of business on the reporting date.

The fair values of financial instruments that are not quoted in active markets are determined by using generally accepted valuation techniques, such as discounted cash flow models. The models are validated and periodically reviewed by qualified personnel independent of the area that created them and are approved by the BOD before these are used. The models are calibrated to ensure that outputs reflect actual data and comparative market prices. Further, inputs used in these models are from observable data and quoted market prices in respect of similar financial instruments. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility.

While significant components of fair value measurement were determined using verifiable objective evidence, such as foreign exchange rates, the amount of changes in fair value would differ if the Group utilized different valuation methodologies and assumptions. Any changes in fair value of these financial assets and liabilities would affect the financial statements.

In accordance with the amendments to PFRS 7, disclosures about the level in the fair value hierarchy are required in which the fair value measurements are categorized for assets and liabilities measured in the unaudited interim consolidated statements of financial position.

Assumptions and methods of determining the fair values of financial instruments are presented in Note 4 to the unaudited interim consolidated financial statements.

Classification of Investment in an Associate as Noncurrent Asset Held For Sale. The Group classifies a noncurrent asset as held for sale when its carrying amount will be recovered principally through a sale transaction rather than through continuing use. In making its judgment, the Group considers its management's commitment to sell the asset within one (1) year. When the one-year period is not met, the Group determines whether the delay of the sale is caused by events or circumstances beyond its control and there is sufficient evidence that the Group remains committed to its plan to sell the asset.

Based on the Group's management assessment, investment in an associate classified as noncurrent asset held for sale will continue to be classified as such because of continuous discussion with the prospective investor to complete the sale. As at June 31, 2022 and December 31, 2021, the carrying amount of noncurrent asset held for sale amounting to ₱1,157.5 million is lower than its fair value less cost to sell (see Note 8).

Existence of Significant Influence over Associates and Joint Venture. The Group assessed that it has significant influence in its associates despite having interest ownership of below the 20% threshold where significant influence is presumed under PAS 28, *Investments in Associates and a Joint Venture and Joint Ventures*. Significant influence has been established by the Group over the investees because of its participation in the decision making process of the investees' significant activities, through its representation in the investees' BOD.

The Group's Investments in Associates amounted to ₱208.1 million ₱207.5 million as at June 30, 2022 and December 31, 2021, respectively (see Note 10).

Assessment of Control on PLBRC. An entity is considered as a subsidiary when it is controlled by the Group. Control is established when the Group is exposed or has rights to variable returns from its involvement with an entity, and has the ability to affect those returns through its power over the entity.

The Group considers PLBRC as a subsidiary even though it has less than 51% equity ownership because it can exercise control over the management and operations of PLBRC. Moreover, majority of PLBRC's assets are being utilized in the Group's operations. Accordingly, the unaudited interim consolidated financial statements of the Group include those of PLBRC.

Determination of Reportable Operating Segments. The Group has determined that it has reportable segments based on the following thresholds:

- Its reported revenue, including both sales to external customers and intersegment sales or transfers, is 10% or more of the combined revenue, internal and external, of all operating segments.
- The absolute amount of its reported profit or loss is 10% or more, in absolute amount, of (i) the combined reported profit of all operating segments that did not report a loss and (ii) the combined reported loss of all operating segments that reported a loss.
- Its assets are 10% or more of the combined assets of all operating segments.

Operating segments that do not meet any of the quantitative thresholds may be considered reportable, and separately disclosed, if management believes that information about the segment would be useful to users of the unaudited interim consolidated financial statements. The Group assessed that it has a single reportable operating segment which is the downstream oil operations particularly the sale of petroleum products based on the criteria above (see Note 18).

Determination of Interest in a Joint Arrangement. The Group has, after considering the structure and form of the arrangement, the terms agreed by the parties in the contractual arrangement and the Group's rights and obligations arising from the arrangement, classified its interest in joint arrangement with Mariveles Joint Venture Corporation (MJVC) under PFRS 11, *Joint Arrangements*, as a joint venture. Accordingly, the Group accounts for its equity interests in a joint venture using the equity method.

The carrying amount of investment in a joint venture amounted to ₱47.7 million as at June 30, 2022 and December 31, 2021 (see Note 10).

Accounting Estimates and Assumptions

Assessment for ECL on Trade Receivables. The Group, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade receivables. The provision matrix specifies provision rates depending on the number of days that a trade receivable is past due. The Group also uses appropriate groupings if its historical credit loss experience shows significantly different loss patterns for different customer segments. The Group then adjusts the historical credit loss experience with forward-looking information on the basis of current observable data to reflect the effects of current and forecasted economic conditions.

The Group adjusts historical default rates to forward-looking default rates by determining the closely related economic factor affecting each customer segment. The Group regularly reviews the methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience.

The determination of the relationship between historical default rates and forecasted economic conditions is a significant accounting estimate. Accordingly, the provision for ECL on trade receivables is sensitive to changes in assumptions about forecasted economic conditions.

Allowance for impairment losses on trade receivables amounted to ₱2.1 million as of June 30, 2022 and December 31, 2021 (see Note 6).

The carrying amount of trade receivables amounted to ₱9,620.6 million and ₱7,454.9 million as at June 30, 2022 and December 31, 2021, respectively (see Note 6).

Assessment for ECL on Other Financial Assets at Amortized Cost and Quoted Debt Instruments Classified as Financial Assets at FVOCI. The Group determines the allowance for ECL using the general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12 months unless there has been a significant increase in credit risk since initial recognition in which case ECL is provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the counterparty.

The Group also considers financial assets that are more than 30 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the counterparty.

For cash in banks and cash equivalents, refundable deposit and debt instruments classified as financial assets at FVOCI, the Group assessed that the ECL is not material because the transactions with respect to these financial assets were entered only with banks and counterparties with good credit standing and relatively low risk of default. Accordingly, no provision for ECL on these financial assets was recognized in 2022 and 2021.

The carrying amounts of financial assets at amortized cost and quoted debt instruments at FVOCI are as follows:

	Note	June 30, 2022	December 31, 2021
Financial assets at amortized cost:			
Cash and cash equivalents*	5	₱2,276,741,561	₱1,752,440,609
Trade and other receivables**	6	11,211,111,319	8,931,257,027
Noncurrent portion of notes receivables		58,699,355	58,699,355
Refundable deposits		22,692,553	51,607,329
Long-term placements		139,912,903	107,089,806
Financial assets at FVOCI -			
Quoted debt securities	9	—	22,290,148

*Excluding cash on hand amounting to ₱545,920 and ₱498,797 as at June 30, 2022 and December 31, 2021, respectively.

**Excluding nonfinancial assets amounting to ₱36,895 as at June 30, 2022 and December 31, 2021.

Allocation of the Purchase Price in a Business Combination. The Group accounts for its business combinations using the acquisition method which requires extensive use of accounting judgments and estimates to allocate the purchase price to the fair market values of the identifiable assets and liabilities assumed in a business combination at the acquisition date. Any difference in the purchase price and the fair values of the net assets acquired is recorded as either goodwill or gain on bargain purchase in profit or loss. The significant judgments and assumptions made in estimating the fair value to be assigned to the identifiable assets and liabilities assumed in a business combination can materially affect the unaudited interim consolidated financial statements.

The Group engaged an external qualified appraiser to measure the fair values of investment properties and property and equipment arising from the acquisition of FECl in 2021. However, the fair values of net assets acquired are based on provisional amounts while the Group sought an independent valuation of the investment in associates under FECl. As allowed under PFRS 3, *Business Combinations*, the Group has a one-year measurement period from the acquisition date within which to finalize the fair values of net assets acquired. Any changes in the provisional fair values of net assets acquired will affect the amount of gain on bargain purchase recognized in profit or loss.

The Group's acquisition of FECl has resulted in the provisional recognition of gain on bargain purchase amounting to ₱137.2 million in 2021.

Estimation of the Useful Lives of Property and Equipment. The Group estimates the useful lives of property and equipment based on the period over which the assets are expected to be available for use. The estimates are based on a collective assessment of industry practice, internal technical evaluation and experience with similar assets. The estimated useful lives of property and equipment are reviewed at each reporting date and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

Future results of operations could be materially affected by changes in estimates brought about by changes in the factors mentioned above. The amount and timing of recording of depreciation expense for any period would be affected by changes in these factors and circumstances.

There were no changes in the estimated useful lives of property and equipment in 2022 and 2021.

The carrying amounts of property and equipment amounted to ₱3,107.9 million and ₱3,269.2 million in June 30, 2022 and December 31, 2021, respectively (see Note 12).

Determination of the Fair Value of Investment Properties. Investment properties are measured at fair values. The Group works closely with external qualified appraisers who performed the valuation using appropriate valuation techniques. The Group comparable market data adjusted as necessary to reflect the specific assets' size, location and other characteristics. The valuation techniques and inputs used in the fair value measurement of investment properties are disclosed in Note 11 to the unaudited interim consolidated financial statements.

Fair value changes on investment properties amounted to ₱24.0 million in 2021. The Group's investment properties amounted to ₱247.9 million and ₱243.9 million as at June 30, 2022 and December 31, 2021, respectively (see Note 11).

Assessment for the Impairment of Nonfinancial Assets. The Group assesses impairment on nonfinancial assets whenever events or changes in circumstances indicate that the carrying amount of the assets or group of assets may not be recoverable. The relevant factors that the Group considers in deciding whether to perform an asset impairment review include, among others, the following:

- Significant underperformance of a business in relation to expectations;
- Significant negative industry or economic trends; and
- Significant changes or planned changes in the use of the assets.

Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized. Recoverable amounts are estimated for individual assets or, if it is not possible, for the CGU to which the asset belongs.

The recoverable amount of the asset is the greater of the fair value less cost of disposal or value in use. The fair value less cost of disposal is the amount obtainable from the sale of an asset in an arm's-length transaction, less the cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset.

No impairment loss on other nonfinancial assets was recognized in June 30, 2022 and 2021. The carrying amounts of nonfinancial assets are as follows:

	Note	June 30, 2022	December 31, 2021
Investments in associates and a joint venture	10	₱255,868,792	₱255,231,102
Property and equipment	12	4,401,580,326	4,660,651,908
Other current assets		981,826,617	855,748,241

*Excluding financial assets totalling ₱162.6 million and ₱158.6 million in June 30, 2022 and December 31, 2021, respectively.

4. Financial Risk Management and Financial Instruments

The Group's financial instruments consist of cash and cash equivalents, trade and other receivables (excluding nonfinancial assets), refundable deposits, derivative asset, financial assets at FVOCI, long-term placements, notes receivable and trade and other payables (excluding nonfinancial liabilities). The main financial risks arising from the Group's use of financial instruments include credit risk, liquidity risk, and market risks. The BOD regularly reviews and approves the appropriate policies for managing these financial risks, as summarized below.

Credit Risk

The Group's exposure to credit risk arises from the failure of its counterparty in fulfilling its financial commitments to the Group under the prevailing contractual terms. Financial instruments that potentially subject the Group to credit risk consist primarily of financial assets at amortized cost and debt securities at FVOCI.

The carrying amounts of financial assets at amortized cost and financial assets at FVOCI represent the Group's maximum credit exposure.

Trade Receivables

Trade receivables arise mainly from transactions with customers. The Group limits its exposure to credit risk by transacting with pre-approved and credit-worthy customers that have undergone stringent financial credit, and legal evaluation process. In addition, trade receivable balances are strictly monitored on an ongoing basis to ensure timely collections. Generally, trade receivables are written off if determined to be uncollectible.

There are no guarantees against trade receivables but the management closely monitors the receivable balance on a monthly basis and is in regular contact with this customer to mitigate risk.

The Group uses a provision matrix to calculate ECL for trade receivables. The provision rates are based on days past due for groupings of various customer segments analyzed by customer type, credit terms, and number of days outstanding. The provision matrix is based on the Group's historical default rates, which are adjusted for forward-looking information if forecast of economic conditions (i.e., stock market index) are expected to improve over the next year which can lead to a decreased number of defaults in the stock trading industry. At each reporting date, the observed historical default rates are updated and changes in the forward-looking estimates are analyzed.

Allowance for impairment losses on trade receivables amounted to ₱2.1 million as at June 30, 2022 and December 31, 2021, respectively (see Note 6).

Financial Assets at Amortized Cost

The Group limits its exposure to credit risk by depositing its cash and cash equivalents only with banks that have good credit standing and reputation in the local and international banking industry. In addition, the trade and other receivables and refundable deposit are transacted with counterparties with good credit standing and a relatively low risk of default.

It is the Group's policy to measure ECL on the above instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the counterparties.

The Group also considers financial assets that are more than 30 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent significant credit risk such as when non-payment arising from administrative oversight rather than resulting from financial difficulty of the counterparty.

Debt Securities at FVOCI

The Group is subject to credit risk on its quoted debt securities at FVOCI. The Group limits its exposure to credit risk by acquiring quoted debt securities from companies with good credit standing and a relatively low risk of default. The Group recognizes changes in the fair value of the debt securities, whether attributable to changes in market conditions or changes in credit risk, in other comprehensive income.

The table below shows the carrying amounts of financial assets at amortized cost classified under 12-month ECL and lifetime ECL as at June 30, 2022 and December 31, 2021:

	June 30, 2022				
	Financial assets at amortized cost				
	12-month ECL	Lifetime ECL - Not Credit Impaired	Lifetime ECL - Credit Impaired	Financial Assets at FVOCI	Total
Cash and cash equivalents*	₱2,276,741,561	₱-	₱-	₱-	₱2,276,741,561

*Excluding cash on hand amounting to ₱498,797 as at December 31, 2021.

**Excluding nonfinancial assets amounting to ₱36,895 and current portion of notes receivable amounting to ₱1,083,765,900 as at December 31, 2021.

Liquidity Risk

Liquidity risk arises from the possibility that the Group may encounter difficulties in raising adequate funds to meet its financial commitments at a reasonable cost. The Group's objectives in effectively managing its liquidity are: (a) to ensure that adequate funding is available at all times; (b) to meet the commitments as they arise without incurring unnecessary costs; and (c) to be able to access funding when needed at the least possible cost.

To manage this exposure and to ensure sufficient liquidity levels, the Group closely monitors its collections and expenditures by preparing cash position reports that present actual and projected cash flows for the subsequent month.

The table below summarizes the maturity profile of the Company's financial liabilities as at December 31, 2021 and 2020 based on contractual undiscounted payments.

	2022					Total
	On Demand	1 to 3 Months	3 to 12 Months	1 to 5 Years	More than 5 Years

**Including future interest payable

Market Risks

The Group is exposed to market risks, primarily those related to foreign currency risk, equity price risk and interest rate risk.

Foreign Currency Risk. Foreign currency risk arises on financial instruments that are denominated in a foreign currency other than the functional currency.

The Group's transactional currency exposures arise from its transactions denominated in United States Dollar (USD), Thailand Baht (THB) and Indonesian Rupiah (IDR). The Group periodically reviews the trend of the changes in foreign exchange rates to address its exposure to foreign currency risk. The Group's policy is to maintain foreign currency exposure within acceptable limits and within the existing regulatory guidelines. As of June 30, 2022, the Group's exposure to foreign currency risk is minimal.

Equity Price Risk. Equity price risk is the risk that the Group will incur economic losses due to adverse changes in a particular stock or stock index. The Group's equity price risk arises from its financial assets at FVOCI.

The Group's policy is to maintain the risk to an acceptable level. Movement in share price is monitored regularly to determine the impact on its financial position. The Group's exposure to equity price risk is minimal.

Commodity Price Risk. Commodity price risk is the risk that future cash flows from a financial instrument will fluctuate because of changes in market prices of commodities. The Group's commodity price risk results primarily from movements of the commodity prices of fuel purchases and sales from the date of delivery until the date of agreed price setting with the suppliers and customers.

The Group's exposure to commodity price risk is minimal because the intervening period between the date of delivery and date of agreed price setting is short. Accordingly, derivative asset or liability on commodity price risk which is embedded in fuel purchases and sales contracts is minimal as at June 30, 2022 and December 31, 2021.

Interest Rate Risk. The Group's exposure to the risk for changes in market interest rates relates primarily to the Group's interest-bearing financial assets and liabilities.

As at June 30, 2022 and December 31, 2021, the Group's interest-bearing financial assets and liabilities consist primarily of notes receivable, long-term placements and loans payable with fixed interest rates. The Group's exposure to changes in the interest rates is insignificant.

Capital Management

The primary objective of the Group's capital management is to ensure that it maintains strong and healthy financial position to drive its expansion and growth in the future.

The Group considers its capital stock and additional paid-in capital aggregating to ₱3,907,600,484 as at June 30, 2022 and December 31, 2021, as its capital employed. The Group manages the capital structure and will make adjustments when there are changes in the economic conditions, business activities, expense programs and the risk characteristics of underlying assets. No changes were made in the objectives, policies or processes during the years ended June 30, 2022 and December 31, 2021.

The Group is not subject to externally-imposed capital requirements.

5. Cash and Cash Equivalents

This account consists of:

	June 30, 2022	December 31, 2021
Cash on hand	₱545,920	₱498,797
Cash in banks	1,558,280,774	1,004,231,952
Short-term placements	718,460,787	748,206,657
	₱2,277,287,481	₱1,752,937,406

Cash in banks earn interest at the prevailing bank deposit rates and are immediately available for use in the current operations.

Short-term placements are made for varying periods of up to three months depending on the immediate cash requirements of the Group.

6. Trade and Other Receivables

This account consists of:

	June 30, 2022	December 31, 2021
Trade receivable from:		
Third parties	₱5,504,139,851	₱4,211,815,526
Related parties	4,116,509,376	3,245,207,361
Current portion of notes receivable	1,135,543,764	1,083,765,900
Advances to related parties	390,797,888	315,690,000
Interest receivable	11,112,149	11,465,049
Others	55,146,251	65,451,152
	11,213,249,279	8,933,394,988
Less allowance for impairment losses	2,101,065	2,101,066
	₱11,211,148,214	₱8,931,293,922

Trade Receivables

Trade receivables are noninterest-bearing and are generally on a 15 to 120 days credit term.

In 2021, the Group assigned with recourse to a local bank its trade receivables from a related party, amounting to ₱1,977,594,771.

Notes Receivable

This account consists of notes receivables acquired through the acquisition of FECl in 2021. Notes receivable from related parties are unsecured, collectible on demand and bear an annual interest of 3%.

Notes receivable from third parties includes short term receivables amounting to ₱111,493,215 which bears an annual interest of 3% and is collectible on demand. This also includes an unsecured 5-year note receivable with an interest of 7% as follows:

Current	₱20,757,935
Noncurrent	58,699,355
	₱79,457,290

Advances to Related Parties

Advances to related parties amounting to ₱315.7 million as of June 30, 2022 were acquired through the acquisition of FECl in 2021. These advances are non-interest bearing and payable in demand (see Note 15).

7. Inventories

This account consists of fuels inventory measured at cost amounting to ₱7,369,321,811 and ₱1,170,390,829 as at June 30, 2022 and December 31, 2021, respectively. As at June 30, 2022, cost of these inventories are lower than the NRV.

8. Noncurrent Asset Held for Sale

The identifiable assets acquired by the Group in the acquisition of FECl in 2021 includes investment in the shares of stock of an associate amounting to ₱1,157.5 million classified as noncurrent assets held for sale. On February 13, 2019, the BOD of FECl approved the plan to sell its shares of stock of the associate. Due to the COVID-19 pandemic, the negotiations with prospective investors were delayed and were put on hold. The BOD and management of FECl, after acquisition of control of BEC, decided to continue the negotiation with the prospective investor. As of May 26, 2022, the BOD and management of FECl are in discussion with a prospective investor to finalize the arrangement for the sale of the investment. Based on the ongoing negotiation, the carrying amount of the investment is lower than the negotiated price of the transaction.

9. Financial Assets at FVOCI

This account consists of the Group's investments in:

	June 30, 2022	December 31, 2021
Quoted equity securities	₱2,253,131	₱6,933,131
Quoted debt securities	–	22,290,148
	₱2,253,131	₱29,223,279

The Company's quoted debt securities bear annual interest rates ranging from 4.50% to 4.84% in June 30, 2022 and 2021.

The Company's financial assets at FVOCI as at June 30, 2022 and December 31, 2021 are carried at fair values based on quoted market prices or bidding dealer price quotations from active markets at the reporting date. This fair valuation is classified under the Level 1 category (see Note 4).

10. Investments in Associate and a Joint Venture

The details of the investments in associates and a joint venture of the Parent Company are as follows:

	Place of Incorporation	Nature of Business	Percentage of Ownership	
			2022	2021
Associates:				
Vintage EPC Co. Ltd. (VEPC)	Thailand	Engineering, Procurement and Construction	15.00	15.00
VTE International Construction Co. Ltd. (VINTER)	Thailand	Engineering, Procurement and Construction	15.00	15.00
Amlan Negros Development Realty Corp. (ANDRC)	Philippines	Holding of real properties	14.40	14.40
Ecology Insurance Agency Corp. (EIAC)	Philippines	Agency and brokering services	14.25	14.25
Filoil Asia Pacific, Ltd. (FAP)	Singapore	Sale of petroleum products	12.00	12.00
Joint Venture -				
Mariveles Joint Venture Corporation (MJVC)	Philippines	Management services	18.00	18.00

The Group's investments in associates and a joint venture are measured using the equity method. The balances and movements in this account are as follows:

	June 30, 2022	December 31, 2021
Cost		
Balance at beginning of year	₱322,627,446	₱172,285,031
Additions arising from acquisition of a new subsidiary	–	150,342,415
Balance at end of year	322,627,446	322,627,446
Accumulated equity in net losses		
Balance at beginning of year	(54,494,533)	(42,763,516)
Share in net income (loss) for the year	977,142	(11,731,017)
Balance at end of year	(53,517,391)	(54,494,533)
Cumulative translation gain (loss)		
Balance at beginning of year	(12,901,811)	(6,072,180)
Translation losses during the year	(339,452)	(6,829,631)
Balance at end of year	(13,241,263)	(12,901,811)
	₱255,868,792	₱255,231,102

The carrying amounts of investments in associates and a joint venture are as follows:

	June 30, 2022	December 31, 2021
Associates:		
FAP	₱102,000,000	₱102,000,000
VEPC	66,755,586	67,095,038
VINTER	38,374,505	37,397,363
ANDRC	123,079	123,079
EIAC	882,646	882,646
Joint Venture -		
MJVC	47,732,976	47,732,976
	₱255,868,792	₱255,231,102

11. Investment Properties

The balances and movements in this account are as follows:

June 30, 2022				
	Land	Building and Improvements	Construction in Progress	Total
Carrying amount				
Balances at beginning of year	₱239,199,000	₱1,659,703	₱3,077,688	₱243,936,391
Additions	-	-	10,595,526	10,595,526
Depreciation	-	(1,634,863)	-	(1,634,863)
Disposal	(5,033,198)	-	-	(5,033,198)
Balances at end of year	₱234,165,802	₱24,880	₱13,673,214	₱247,863,856

December 31, 2021				
	Land	Building and Improvements	Construction in Progress	Total
Cost				
Balances at beginning of year	₱186,226,000	₱-	₱-	₱186,226,000
Acquisition of a subsidiary	29,000,000	1,659,703	3,077,688	33,737,391
Fair value changes	23,973,000	-	-	23,973,000
Balances at end of year	₱239,199,000	₱1,659,703	₱3,077,688	₱243,936,391

The fair values of land classified as investment properties were estimated by an independent appraiser using the market data approach which involves the comparison of the properties to those that are more or less located within the vicinity of the appraised properties and are subject of recent sales and offerings. Adjustments were made to arrive at the market value by considering the location, size, shape, utility, desirability and time element. The latest appraisal report was dated December 31, 2021.

The fair value of investment properties is categorized under Level 3 (significant unobservable inputs) (see Note 4).

The significant inputs to fair valuation are as follows:

- *Price per sqm* - estimated value prevailing in the real estate market depending on the location, area, shape and time element.
- *Value adjustments* - adjustments are made to bring the comparative values in approximation to the investment property taking into account the location, size, shape and road frontage, among others.

Sensitivity Analysis. Generally, significant increases (decreases) in price per sqm and any value adjustments would result in a significantly higher (lower) fair value measurement.

12. Property and Equipment

The balances and movements in this account are as follows:

	June 30, 2022							
	Land	Depot Tanks	Building and Improvements	Furniture, Fixtures, and Office Equipment	Transportation Equipment	ROU Asset	Construction in Progress	Total
